

Spencer Mahne: SGA Senate Candidate

My name is Spencer Mahne, and I am currently a sophomore at UVM! I am double majoring in mathematics in CAS and fisheries biology in RSENR. I am incredibly excited to be running for SGA Senate!

What Matters to Me?

Transparency

As someone who is new to involvement with the SGA, I have recognized there is extraordinarily little awareness of the resolutions the senate pass amongst the general student body. As students, we have a right to know the workings of our SGA, and if elected, I will improve communication and close this gap.

Holding our University Accountable

The framework in place to hold our university officials accountable for their actions is weak. The university has promised a learning environment they have not provided. Our officials have chosen to do cuts to CAS, unintelligently invest money, and offer mediocre support during a pandemic, all without consequence. I aim to fix this by establishing reformed framework within the Senate to be able to better voice our dissatisfaction.

Make Your Voices Heard

As a SGA Senate member, I will voice your opinions. It will be my job to communicate the student bodies' ideas to places where action can be taken, and I promise to not let opinions fall unheard. I will listen to any opinion or idea with open arms. Feel free to contact me directly with anything at any time.
