

Aidin Repsher – Senatorial Platform

4-7-2021

Hello! My name is Aidin Repsher! I served on the SGA Senate on the Club Affairs Committee for the past two semesters. During my time on SGA, I have learned a great deal, but also accomplished a lot in my first two semesters as a senator on SGA. I have:

- Organized UVM's Mask Day
 - Distributing over 1200 masks to students free of cost while providing mask information to the student body
- Officially recognized multiple student organizations on campus
 - Helping interested students through the process
 - Writing and proposing the recognition bills to Senate
- Worked to develop my connections on campus with the focus on large scale projects.

I am interested in running again for SGA senate for two reasons: I think there is a lot to be done here at UVM to make it a better place for all students, and secondly my experiences from my first semester give me a unique perspective as a (hopefully) returning senator.

I want you to know that I see myself as a representative of the students here at UVM. I can frequently be found having conversations with students trying to better understand the issues that they face day to day on campus, with the goal of helping provide them a better university experience. You can count on me as a student leader to voice your opinion, and to take all information that I am given into consideration.

Personally, I am hoping in my next term to work on a project that would connect UVM's long list of fantastic Student Organizations, to community events and resources. This would allow learning for both UVM students, as well as the Burlington community. I have begun work on this in my first term and am interested in continuing my efforts there.

Thank you for your consideration of me as a candidate for senate this year. I look to represent you and the UVM community at large and I hope to be given that opportunity. Have a wonderful day!
