My name is Will Burroughs and I am running for SGA Senate. I am a Sophomore Community Entrepreneurship major getting more involved around campus. The most recent way I have gotten more involved was by joining Pi Kappa Alpha this past fall, an experience that has so far led me to grow immensely as a person. I am running for SGA Senate because I feel that the voice of our entire student body needs to be heard, and I want to represent the ideals of those numerous voices. I am passionate about the UVM community and believe that a future where we are more united is just around the corner!

Join me in addressing:

1. **The need for the university to divest money from fossil fuels and reinvest that into green energy.**

   We should demand the university reflect on its environmental impacts as an agricultural institution.

   - UVM has directly invested almost 30 million into fossil fuel companies.
   - Green energy is the future and the university needs to take action to support this healthy future not only for its students but for all.

2. **The lack of parking on campus.**

   We should demand the expansion of parking areas around campus as students are...

   - Consistently forced to scramble in order to find off-campus places for their vehicles.
   - Consistently let down by the parking permit “waitlist.”
   - Forced to pay the outrageous price of parking permits.
3. Giving students financial breaks on fines/tickets by allowing them to do community service hours instead of spending their hard-earned money

We should demand an alternative to paying fines as this is crippling to low income students.

- In my experience, UVM as an institution will look to fine students for anything.
- These fines can put students in financially distressing situations
- Fines are often more inflated than they should be in many situations.

4. The need to increase not only education around sexual assault but also to make the important emotional and practical support for those affected more apparent.

- Making every student feel safe should always be the top priority.
- We need more education on consent and why it is essential for the health and safety of any community.
- Services for those affected need to be more prevalent around the dorm buildings.
- The Support Resources UVM page for Sexual Assault and Sexual Misconduct is a list of 17 phone numbers to different community services. We need it to be transparent that there is help out there for any and every type of situation.

Together we can create the happy and healthy UVM that I know we all want!
