

Mondays @ 4:15 pm in Delehanty 219

Refreshments @ 4:00 pm in Delehanty 316

Spring Semester 2017

01/23/2017 **Nick Gotelli**, Department of Biology, University of Vermont, VT:
"Holocene Shifts In The Assembly Of Plant And Animal Communities"

01/30/2017 **David Pompeani**, Department of Geology and Environmental Science,
University of Pittsburgh:
"Lake sediment geochemistry reveals human-driven environmental change in the United States over the Holocene"

For students only:

02/13/2017 **Jacob Vincent**, Cascade Drilling and Technical Service:
"High Resolution Site Characterization Techniques and what I have learned in the environmental investigative geology field"

03/06/2017 **John Lens**, Department of Civil and Environmental Engineering,
University of Vermont, VT:
"Quantifying seismic risk to buildings and infrastructure where seismicity is low to moderate - such as in Vermont."

04/17/2017 **Rob Root**, Department of Soil, Water and Environmental Sciences,
University of Arizona, AZ:
"Mineral resource recovery has driven the Anthropocene"

Sponsored by the Department of Geology Visiting Lecture Series
