Survey of Agritourism including On-Farm Direct Sales in the United States

Supports needed by operators

Between November 2019 and February 2020, 1834 farmers, ranchers, and vineyard operators representing all 50 states in the U.S. completed an online survey about agritourism including on-farm sales. For more information and additional summaries, visit https://www.uvm.edu/vtrc/agritourism-survey.

Agritourism operators across the US face many challenges (see Challenges summary), but there is room for service providers, policy makers, and researchers to help build the support systems that operators across the country need to succeed. This summary provides a brief overview of the top 6 supports needed in the US, as told by respondents to the survey.

There are SO many things that affect agritourism businesses that other kinds [of businesses] don’t have.

- Midwest operator

What supports do US operators need?
Operators noted that the three supports most needed for success were social media marketing and management, legal and liability information, and marketing plan development.
