Application deadline: February 15

APPLY BY DECEMBER 15 for early decision!

COLLEGE OF NURSING & HEALTH SCIENCES
EXPERIENTIAL OPPORTUNITIES

On- and off-campus clinical affiliated sites provide students with opportunities to interact with patients, athletes, parents, coaches and administrators under the direct supervision of athletic trainers and other health care professional clinical preceptors.

UVM’s clinical affiliated sites include the university’s primary athletic training facilities on campus and 20+ sites within the Burlington community, including collegiate and high school settings, outpatient orthopedic rehabilitation clinics and the UVM Larner College of Medicine Department of Orthopaedics and Rehabilitation.

Students benefit from interdisciplinary study, diverse clinical experiences and individual attention. The 49-credit interprofessional curriculum, designed to be completed in two years over the course of six semesters, addresses core competencies and clinical proficiencies required for practice by the Commission on Accreditation of Athletic Training Education (CAATE).

"UVM’s AT program has a focus on experiential and hands-on learning, which allowed me to apply what I learned in lecture and lab to clinical situations and research opportunities. The faculty are incredibly supportive and their focus is on nurturing students to become great clinicians."

– Kendra Lennon ’18

Graduates of the Athletic Training program are eligible to sit for the Board of Certification (BOC) examination.
