HP 305A **HISTORIC PRESERVATION PRACTICE METHODS (10728)**

Building upon skills and methods learned in HP 206, this course aims to provide students with practical training in three vitally important areas of preservation practice: Rehabilitation Investment Tax Credits (RITC), National Register Nominations, and Historic Sites and Structures Surveys. Class presentations and discussion will focus on case studies, philosophical theories and the specific issues students will likely confront in these areas of practice, such as the use of substitute materials. Assignments will require preparation of a sample RITC application and its supporting materials, a sample National Register nomination and building surveys - urban and rural. Related tasks, such as the writing of proficient statements of significance and building descriptions, NR and NPS photograph policies and requirements, interpretation of the Secretary of Interior's Standards for Rehabilitation, and the reading of building plans also will be stressed. By the end of the course, students should understand the level of professional competence required to practice in these areas of historic preservation. Also included shall be discussion surrounding estimating time and labor for projects, and other aspects of professional practice.

Prerequisite: HP Graduate only.
