Vermont EPSCoR is offering 12 summer undergraduate research internship opportunities to join our cutting-edge NSF-funded research on Harnessing the Data Revolution for Vermont: The Science of Online Corpora, Knowledge, and Stories (SOCKS).

SOCKS revolves around stories as an essential part of how people comprehend, explain, predict, and seek to navigate the world.

- Students will do full-time, high-impact, authentic research for 10 weeks in one of 4 areas.
  1. Indigenous voices in global environmental governance
  2. Data ethics, privacy, and narrative bias
  3. Social and health narratives
  4. Analysis of local news stories and programs

- Earn hourly wages for the equivalent of $4,500 over the 10-week period (up to 400 hours).

- Applications due January 31, 2024, at 5 pm EST.
