

Math 295 - Fall 2020
Introduction slide

For this assignment, please create a **one-page pdf** that introduces you to the class. After you turn it in, your introduction slide will be visible to all students in the class, in our Introduction Slides folder.

As part of this assignment, please **choose an image to upload to Teams**. It can be a photo of you, a bitmoji or other cartoon-like representation of you, or a photo of a place, thing or animal that is meaningful to you. Once you have an image you want to upload, go to mail.uvm.edu, click on your initials at the top right of the window, click on the small blue “Change” below your initials, and upload your image. Please note that this will now be your image for all UVM Microsoft services.

To create your slide, you can use Google Slides (free with a free Gmail account), Power Point, or you can even write it out on a piece of paper and scan it. Please feel free to be creative; the purpose is to get to know you!

Things I really would like you to put on your slide (please feel free to skip some if you are uncomfortable):

- the name you prefer we use for you in this class;
- the image you upload to Teams and a few words on why you chose it;
- your pronouns;
- your hometown (where you went to high school) and your current location.

Other things you can include on your slide:

- any pets or other members of your household that you want to tell us about;
- any sport, hobby, or activity you particularly enjoy;
- a piece of art that particularly speaks to you;
- a religious or spiritual symbol that is meaningful to you;
- anything else that is interesting to you!
