

Collecting Department Chartstring Information

General Information

Chartstrings are a series of chartfields used in PeopleSoft:

- Each chartfield captures a different element of information (Who?, What?, Why?, How?, Where?) regarding the transaction. It is the combination of chartfields that brings meaning to the transaction.
- The use of multiple chartfields allows for flexible data accumulation and reporting of the financial aspects of projects, activities, programs, events, etc. that occur across UVM organizations or funds.

Ask your financial manager for the chartstrings you are responsible for when working with Journals.

Click [here](#) for a fillable chartstring card to keep a record of chartstrings for your department.

For more information on Chartstrings

See the [Chartstring Mini-Manual](#) for more information about chartstrings
