The University of Vermont

The University is located at Burlington, Vermont, overlooking an attractive tree-shaded city situated on the shores of Lake Champlain.

Burlington, the largest city in the State, with a population of 35,000, is 95 miles from Montreal, 230 miles from Boston, and 300 miles from New York City. The city has daily plane and bus service to these points.

Chartered in 1791, the University is the twentieth oldest institution of higher learning in the United States authorized to grant degrees and the second institution founded by state legislative action to offer instruction at the university level.

Although its legal title is The University of Vermont and State Agricultural College, the University is known to its students and alumni as UVM. This popular abbreviation is derived from the Latin Universitas Viridis Montis.

Within the nine divisions of the University, instruction is offered in more than fifty programs leading to twenty-five different degrees.

The University is accredited by the following associations:

The New England Association of Colleges and Secondary Schools
The National Council for Accreditation of Teacher Education
National Association of Schools of Music
The American Medical Association
The American Dental Association
National League for Nursing
The Engineers Council for Professional Development
The American Chemical Society
The Philosophy and Objectives of The University of Vermont

Today, more than ever before, higher education is in need of a basic philosophy—one which will clarify its purposes and goals, and which, at the same time, will protect it from any loss of its essential characteristics. It is important to note well that a university, the home of higher education, is not a barometer of public opinion, and that it cannot conceivably bend to meet every demand of society if it is to carry out effectively its major responsibilities to scholarship and learning.

A university must be committed to scholarship, it must be dedicated to education in the very highest branches of learning, and it must aspire to the supreme level of excellence.

If, in the constantly changing environment of modern civilization, a university finds itself in the role of a service agency, ready to meet every demand that society may make upon it, then there is real danger that the vital purposes and goals of higher education may be lost. If the danger is recognized and guarded against, however, the integrity of our educational program will not be jeopardized.

What, then, is the basic purpose of the University of Vermont—what is its philosophy of education?

Basically, the University is an institution dedicated to pure learning in the humanities, the natural sciences, and the social sciences. Our responsibility is that of creating a community of scholars, both old and young; of providing an atmosphere for the discovery, exchange, and transmission of ideas; and of furnishing continuing generations with the intellectual means for leading full and purposeful lives.

Institutional Goals

Quite naturally there is a diversity of goals among American institutions of higher education, and inevitably there are differences in the goals of public and private institutions. As a publicly supported institution, the University has accepted the responsibility of providing an educa-

1 Cited from the President's Report, 1960.
ional opportunity for all qualified men and women residing in the State of Vermont.

The University continues to meet this responsibility at the same time that it is able to enhance the educational opportunity afforded Vermonters by the admission of students coming from many large and small communities outside Vermont’s borders. This tradition, not enjoyed by many state universities, not only provides a heterogeneity of background and experience for all students, but also makes possible a breadth and depth of academic offerings which the University of Vermont otherwise might not be able to provide for Vermonters alone.

Thus our institutional goals are . . .

... to provide a liberal education through individual capacity for the making of intelligent decisions. Such an education becomes meaningful with a knowledge of our historical heritage; it becomes operational through the use of all disciplines, including mathematics and science; and it becomes influential through the art of effective communication

... to extend an opportunity for the development of a cultural life by virtue of the arts and the formulation of philosophical and moral values

... to provide skill training in preparation for specific professions and careers

... to create an atmosphere conducive to research and scholarship through the development of programs which will implement both undergraduate and graduate education

... to develop graduate programs leading to the master’s and doctor’s degree in areas supported by faculty, laboratory, and library facilities as a means of specialization and of complementing desired research and study in selected fields

... to carry on a program of adult education through the Evening Division, off-campus activities, cooperative extension, and modern communication media

... to provide services to state and local government where University personnel, data, or organization are particularly adaptable to a public need which otherwise may not be filled.

Institutional Means

Clearly, our institutional goals cannot be achieved without a faculty of distinction aided by an administration which recognizes that its obligation is both to provide the facilities and to help create the conditions in which the faculty and students can pursue their educational responsibilities.
One of the most important of the University’s means to the desired end is the development of an undergraduate curriculum which provides a liberal education in every professional program. This is not to say that every student should matriculate in the College of Arts and Sciences. It does mean that the professional and vocational must not crowd out a liberal education simply because the subject matter of each professional field is increasing. It is impossible today to teach everything there is to know in the professions, whether in medicine, law, engineering, business, or agriculture. For this reason it is important that we continually review the curriculum to reevaluate, modify, and consolidate the fundamentals of professional education so that the teaching of effective communication—mathematics, history, science, and the arts—retains its central importance.

Facilitating this is the emphasis placed upon individual excellence, wherein the gifted student may advance more rapidly through small seminars, conferences, individual research assignments, the use of original sources, and student advisory services.

Further means include a constant reviewing of admissions requirements to insure an educational opportunity to those applicants who will receive the greatest benefit from a college education; a fostering of research projects which are related to the teaching program and to our established institutional goals, providing opportunity for research in the social sciences and the humanities as well as in the natural sciences; the development of a full graduate program as rapidly as resources permit; and finally, a sustained plan of university self study to provide a continuing evaluation of achievement and a basis for the consideration of new techniques and methods.

Basic to these means, of course, and a resource without which the institution ceases to be a university, is the library. To make our philosophy of education meaningful, to make our goals realizable, and to make our other means workable, a truly fine library is indispensable.

The University’s philosophy of education, then, is to create a community of scholars and provide facilities and an environment for full educational development. Our goals are to insure the undergraduate a well-rounded academic background, regardless of the field of concentration; to offer sound graduate programs at the master’s and doctor’s levels; to pursue a program of continuing adult education; and to provide the State and community with professional and cultural services.

OFFICERS OF INSTRUCTION

*SAMUEL NATHANIEL BOGORAD, Ph.D. (1946)  Professor of English
DON LOREN BOHMONT, M.S. (1961)  Instructor in Mathematics
BETTY MACHTEL BOLLER, Ed.D. (1960)  Associate Professor of Education

*WESSON DUDLEY BOLTON, D.V.M. (1970)  Professor of Animal Pathology
*CHARLES FARRINGTON BOND, Ph.D. (1950-55; 1957)  Professor of Zoology
JOSEPH BORNSTEIN, M.S. (1961)  Assistant Professor of Agricultural Engineering
RICHARD EMILE BOUCHARD, M.D. (1955)  Assistant Professor of Clinical Medicine
*ALEC BRADFIELD, M.S. (1947)  Professor of Animal and Dairy Science
MARY EVELYN BREEN, B.S. (1957)  Instructor in Medical Technology (Pathology)
HORACE WILKINSON BRIGGS, II., M.A.L.D. (1964)  Instructor in Political Science
JOVAN BRKIC, Ph.D. (1963)  Assistant Professor of Philosophy and Religion
THOMAS THADDEUS BRODIN, B.S., Major U. S. Army (1961)  Assistant Professor of Military Science
F. LESLIE BROOKS, JR., Ph.D. (1964)  Assistant Professor of Chemistry
GEORGE WILSON BROOKS, M.D. (1953)  Associate Professor of Clinical Psychiatry
HARRY OLDHAM BROOKS, B.S. (1964)  Instructor in Electrical Engineering
CONSTANCE LORRAINE BROWN, M.S. (1928)  Assistant Professor of Chemistry
DEWEES HAROLD BROWN, M.D. (1963)  Instructor in Epidemiology and Community Medicine

MARIAN HUNTINGTON BROWN, M.S. (1942)  Assistant Professor of Home Economics
JOHN HARLAND BRYANT, M.D. (1960)  Associate Professor of Experimental Medicine
JOHN FRANKLIN BURKE, M.A. (1963)  Instructor in Mathematics
STANLEY LIVINGSTON BURNS, JR., M.D. (1960)  Assistant Professor of Medicine
ROY VEDDER BUTTLES, M.D. (1950)  Assistant Professor of Pathology
FRANCIS ARNOLD CACCADO, M.D. (1960)  Instructor in Clinical Surgery
ROBERT NOLAN CAIN, M.D. (Jan., 1953)  Instructor in Clinical Surgery
CHARLES LYMAN CALAHAN, M.S. (1948)  Extension Horticulturist and Lecturer

MARTHA MARIE CALDWELL, M.S. (1954-59; 1960)  Associate Professor of Home Economics
MARTIN JOHN CANNON, M.D. (1953)  Instructor in Clinical Obstetrics and Gynecology
MAURICE RAYMOND CARON, M.D. (1953)  Instructor in Clinical Psychiatry

HOWARD JULIAN CARPENTER, M.S. (1947)  Associate Professor of Mechanical Engineering
BURRELL MURDOCH CARR, M.A. (1964)  Assistant Professor of Speech
ROBERT RICHARD CARR, M.A. (1964)  Assistant Professor of Speech
ROBERT WAYNE CASWELL, Ph.D. (1960)  Assistant Professor of English
ERLING WILLIAM CHAMBERLAIN, Ph.D. (1962)  Assistant Professor of Mathematics

*ALFRED HAYES CHAMBERS, Ph.D. (1948)  Associate Professor of Physiology and Biophysics

*WILBERT FRANKLIN CHAMBERS, Ph.D. (1955-62; 1963)  Associate Professor of Anatomy

*JAMES PATRICK CHAPLIN, Ph.D. (1947)  Professor of Psychology
VICTOR EDWARD CHASE, M.B.Ch.B. (1964)  Assistant Professor of Psychiatry
ROBERT KENNETH CHIPMAN, Ph.D. (1962)  Assistant Professor of Zoology
RUPERT ADDISON CHITTICK, M.D. (1944)  Professor of Psychiatry
CHARLES CHRISTENSEN, JR., M.Ed. (1959)  Assistant Professor of Physical Education for Men

STANLEY GEORGE CHRISTIE, M.D. (1963)  Assistant Professor of Surgery
BENJAMIN FRANKLIN CLARK, M.D. (1952)  Assistant Professor of Clinical Obstetrics and Gynecology
ELIZABETH ANN CLARK, M.D. (Feb., 1961)  Instructor in Clinical Pediatrics
PAUL DENNISON CLARK, M.D. (1930)  Associate Professor of Clinical Pediatrics
*JACKSON JOSHUA WALTER CLEMMONS, M.D. (1962)  Associate Professor of Pathology
ROBERT EDWARD CLIFFORD, B.S. (1962)  Assistant Professor of Physical Education for Men

BARBARA JEAN COCHRAN, M.Ed. (1962)  Instructor in Physical Education for Women

*ROBERT WILLARD COCHRAN, Ph.D. (1954)  Assistant Professor of English
JULIUS GEORGE COHEN, M.D. (1950)  Assistant Professor of Clinical Psychiatry
FRANCIS PEBODY COLBURN, Ph.B. (1942)  Professor of Art

1 Sabbatical leave second semester 1964-65.
2 Sabbatical leave second semester 1965-66.
OFFICERS OF INSTRUCTION

*CLINTON DANA COOK, Ph.D. (1946-48; 1955)  
Professor of Chemistry

PHILIP WILLIAM COOK, Ph.D. (1963)  
Assistant Professor of Botany

*ROBERT WILLIAM COON, M.D. (1955)  
Professor of Pathology

JOHN HAMILTON COONS, M.S. (1962)  
Instructor in Physical Education for Men

REX DEE COUCH, M.D. (1962)  
Assistant Professor of Pathology

NORMAN BRIGGS COUNCIL, M.A. (1964)  
Instructor in English

ALBERT JAMES CRANDALL, M.D. (1955)  
Professor of Pathology

EDWARD BYINGTON CRANE, M.D. (Jan., 1961)  
Instructor in Epidemiology and Community Medicine (General Practice)

*CECIL M. CRISS, Ph.D. (1961)  
Assistant Professor of Chemistry

GEORGE CHAPMAN CROOKS, Ph.D. (1930)  
Associate Professor of Chemistry

*ALBERT DARY CROWELL, Ph.D. (1955)  
Professor of Physics

JAMES OWEN CULVER, M.D. (1959)  
Assistant Professor of Epidemiology and Community Medicine

JOHN CHARLES CUNNINGHAM, M.D. (1949)  
Shipman Professor of Ophthalmology

*MALCOLM DANIEL DAGGETT, Ph.D. (1945)  
Professor of Romance Languages

JOHN FIDLAR DALY, M.D. (1949)  
Professor of Dermatology

*ROBERT VINCENT DANIELS, Ph.D. (1956-57; 1958)  
Professor of History

CLARK DANIELSON, A.M. (1962)  
Instructor in Romance Languages

PHILIP HOVEY DAVIS, M.D. (1958)  
Instructor in Clinical Orthopedic Surgery

*JEAN MARGARET DAVISON, Ph.D. (1955)  
Associate Professor of Classical Languages and History

ROBERT FRANK DAWSON, Ph.D. (1964)  
Associate Professor of Civil Engineering

WILLIAM NELSON DEANE, Ph.D. (1960)  
Instructor in Social Psychiatry

HERNANDO DE LA CUESTA, Ph.D. (1963)  
Assistant Professor of Electrical Engineering

IMELDA DELGADO, M.M. (1964)  
Instructor in Music

*LUBOMIR ATANASOV DELINESCEFF DELLIN, J.S.D. (1957)  
Associate Professor of Commerce and Economics

ALINE LOUISE DEMERS, M.S. (1960)  
Assistant Professor of Nursing

WILLIAM D. DENNIS, Ph.D. (1964)  
Associate Professor of Romance Languages

ALICE ALDO DENTE, M.D. (1950)  
Assistant Professor of Clinical Anesthesiology

CARROLL WILLIAM DODGE, Ph.D. (1963)  
Visiting Professor of Botany

RAYMOND MADIFORD PEARDON DONAGHY, M.D. (1946)  
Professor of Neurosurgery

JOHN EDWARD DONNELLY, M.A. (1952)  
Associate Professor of Physical Education for Men

*GERALD ALTON DONOVAN, Ph.D. (1960)  
Associate Professor of Poultry Science

HENRY MEADE DOREMUS, II, D.V.M. (1964)  
Assistant Professor of Pharmacology

ROGER WILSON DORWART, M.C.E. (1963)  
Instructor in Civil Engineering

ROBERT KINGSLAND DOTEN, M.D. (1939)  
Associate Professor of Geology

*THOMAS WHITFIELD DOWE, Ph.D. (1962)  
Professor of Animal and Dairy Science

HOWARD DUCACHEK, M.S.A.E. (1949)  
Associate Professor of Mechanical Engineering

WILFRID GERARD DUDEVOIR, M.S.E.E. (Feb., 1958)  
Assistant Professor of Electrical Engineering

*FRED WILLIAM DUNIHUE, Ph.D. (1936)  
Professor of Anatomy

HERBERT ASHLEY DEMERS, JR., M.D. (1957)  
Associate Professor of Clinical Obstetrics and Gynecology

MARVIN LYLE DURHAM, Ph.D. (1964)  
Assistant Professor of Political Science

KATHARINE STONEMAN DURIE, M.S. (Jan. 15, 1964)  
Assistant Professor of Home Economics

WINFIELD BOOTH DURRELL, D.V.M. (1949)  
Associate Professor of Animal Pathology

ALEXANDER HARRY DUTHIE, Ph.D. (Feb., 1964)  
Assistant Professor of Animal and Dairy Science

*JULIUS SOLOMON DWORK, Ph.D. (1954)  
Associate Professor of Mathematics

*GEORGE DUKHUIZEN, Ph.D. (1926)  
Marsh Professor of Intellectual and Moral Philosophy

OLIVER ROLFE EASTMAN, M.D. (1948)  
Associate Professor of Clinical Obstetrics and Gynecology

EILEEN THERESA ECKHARDT, Ph.D. (1962)  
Assistant Professor of Pharmacology

WINSTON MILO EDDY, M.D. (1960)  
Assistant Professor of Clinical Medicine

1 On leave academic year 1964-65.
OFFICERS OF INSTRUCTION

MARGARET EDWARDS, M.A. (1964)  Instructor in Romance Languages
DONALD MERRITT ELDRED, M.A. (1949)  Instructor in Clinical Psychology
JOHN ELLENWOOD, M.A. (1963)  Instructor in Speech
FAITH GRISCOM EMERSON, M.A. (1959)  Assistant Professor of Nursing
ROBERT RICHARD ENGISCH, M.D. (1961)  Instructor in Clinical Neurology
*WARREN ORVEL ESSLER, Ph.D. (1961)  Professor of Electrical Engineering
JOHN WILLIAM STEVENS EURICH, M.A. (1963)  Instructor in German
PAUL DEMUND EVANS, Ph.D. (1930)  Professor of History
WILLIAM THOMAS FAGAN, JR., M.D. (1954)  Assistant Professor of Clinical Urology
DAVID SPERBER FAIGEL, D.D.S. (1954)  Instructor in Dental Hygiene
FRANK JAMES FALECK, Ph.D. (1957)  Assistant Professor of Speech Therapy (Epidemiology and Community Medicine)
VILMA TARASI FALCK (MRS. F. J.), Ph.D. (1960)  Assistant Professor of Audiology
JOHN EDWARD FARNHAM, D.D.S. (1963)  Clinical Instructor in Dental Hygiene
SANDRA MORTON FARRELL, M.S. (1962)  Instructor in Physical Education for Women
HELEN ELIZABETH FARRINGTON, M.P.H. (1962)  Instructor in Nursing
DOUGLAS PATTON FAY, M.S. (1953)  Associate Professor of Civil Engineering
EDWARD JOSEPH FIEDLER, M.F.A. (1958)  Assistant Professor of Speech
*JEREMY POLLAND FELT, Ph.D. (1957)  Assistant Professor of History
WILLIAM FENE, B.S., Captain U. S. Army (1962)  Assistant Professor of Military Science
ARTHUR WILLIAM FINEHOUT, B.S., Captain, United States Army (1964)  Assistant Professor of Military Science
KENNETH DEANE FISHER, Ph.D. (Jan., 1963)  Assistant Professor of Botany
JOHN RICHARD FITZGERALD, M.D. (1961)  Instructor in Clinical Medicine
ROBERT FITZSIMMONS, Ph.D. (1949)  Assistant Professor of Animal and Dairy Science
MARTIN EDWARD FLANAGAN, M.D. (1962)  Instructor in Clinical Neurosurgery
*TED BENJAMIN FLANAGAN, Ph.D. (1961)  Associate Professor of Chemistry
THEODORE ROSS FLANAGAN, Ph.D. (1933)  Assistant Professor of Agronomy
THOMAS ERNEST FLETCHER, M.A. (1964)  Instructor in Romance Languages
CURTIS M. FLOREY, M.D. (1964)  Assistant Professor of Pathology
ARTHUR HOWARD FLOWER, JR., M.D. (1910)  Associate Professor of Clinical Dermatology
EDWARD LEO FOLEY, Ph.D. (1962)  Assistant Professor of Physics
JOSEPH CLAYTON FOLEY, M.D. (1954)  Associate Professor of Clinical Radiology
*MURRAY WILBUR FOOTE, Ph.D. (1947-51; 1953)  Associate Professor of Agricultural Biochemistry
JOHN LOUIS PHILIPPE FOREST, M.D. (1942)  Instructor in Clinical Psychiatry
DONALD GABRIEL FORGAYS, Ph.D. (1964)  Professor of Psychology
ROSE JULIET FORGIONE, M.A. (1964)  Assistant Professor of Nursing
EDWARD EASAU FRIEDMAN, M.D. (1963)  Clinical Instructor in Epidemiology and Community Medicine
*FRED WILLIAM GALLAGHER, Ph.D. (1944)  Professor of Medical Microbiology
ALBERT HENDERSON GARDNER, M.A. (1962)  Instructor in Education
BRUCE ARTHUR GAYLORD, Ed.D. (Feb., 1960)  Associate Professor of Agricultural Education
STOKES GENTRY, M.D. (1962)  Instructor in Clinical Pediatrics
*ALEXANDER GERSHOY, Ph.D. (1923)  Professor of Botany
SAM NATH GHEI, Ph.D. (1962)  Assistant Professor of Psychology
THOMAS CHOMETON GIBSON, M.B., B.Chir. (1962)  Assistant Professor of Epidemiology and Community Medicine

*BRADY BLACKFORD GILLELAND, Ph.D. (1957)  Professor of Classical Languages
*ERLAND CHENEY GJESSING, Ph.D. (1954)  Associate Professor of Biochemistry
*RICHARD WILLIAM GLADE, Ph.D. (1958)  Associate Professor of Zoology
ARTHUR GLADSTONE, M.D. (1933-36; 1941)  Associate Professor of Clinical Surgery
BRUCE McLEAN GOLDEN, D.M.D. (1964)  Clinical Instructor in Dental Hygiene
RICHARD HERRON GOLDSBOROUGH, M.D. (1961)  Instructor in Clinical Otolaryngology
*LYMAN JAY GOULD, Ph.D. (1953)  Associate Professor of Political Science

1 Sabbatical leave academic year 1965-66.

3 Resigned April, 1965.
OFFICERS OF INSTRUCTION

GORDON FIELDING LEWIS, Ph.D. (1961)

Associate Professor of Sociology and Anthropology

WILLIAM J. LEWIS, Ph.D. (1954)

Professor of Speech

*FRANK WAYNE LIDRAL, Ph.D. (1960)

Professor of Music

*HARRY LIGHTHALL, Jr., Ph.D. (1951)

Associate Professor of Mathematics

RICHARD LEWIS LIPSON, M.D. (Dec., 1963)

Assistant Professor of Medicine

GEORGE THOMAS LITTLE, Ph.D. (1950) 1

Professor of Political Science

JACK ERNEST LITTLE, Ph.D. (1945)

Professor of Biochemistry (Agriculture)

*JOHN HUTCHISON LOCHHEAD, Ph.D. (1942)

Professor of Zoology

MARGIT LOCHHEAD (MRS. J. H.), Ph.D. (1954)

Instructor in Nursing

*PHILIPP HANS LOHMANN, Ph.D. (1945) 2

Converse Professor of Commerce and Economics

ROSSIE MAY LOMBARD, M.A. (1959)

Assistant Professor of Nursing

NORMAN THEODORE LONDON, Ed.D. (1960)

Associate Professor of Speech

*FRANK WAYNE LIDRAL, Ph.D. (1960)

Professor of Music

*RICHARD LEWIS LIPSON, M.D. (Dec., 1963)

Assistant Professor of Medicine

CARL LUCARINI, M.A. (1928)

Assistant Professor of Chemistry

JEROLD FRANCIS LUCEY, M.D. (1956)

Associate Professor of Pediatrics

WILLIAM HOSSELD LUGINBUHL, M.D. (1960)

Associate Professor of Pathology

ELEANOR MERRIFIELD LUSE, Ph.D. (1947)

Professor of Speech

JOHN HAMILTON MABRY, Ph.D. (1963)

Assistant Professor of Epidemiology and Community Medicine

MURDO GLENN MACDONALD, M.D. (1960)

Assistant Professor of Clinical Pharmacology

ALBERT GEORGE MACKAY, M.D. (1933)

Professor of Surgery

*WILLIAM HOOPER MACMILLAN, Ph.D. (1954)

Professor of Pharmacology

JOHN VAN SICKLEN MAECK, M.D. (1950)

Professor of Obstetrics and Gynecology

FREDERICK JOSEPH MAHER, JR., B.A. (1958)

Assistant Professor of Sociology and Anthropology

FRANCIS XAVIER MAHONEY, B.S., Captain U. S. Army (1962)

Assistant Professor of Military Science

JAMES EDWARD MARCEAU, D.D.S. (1949-52; 1954)

Instructor in Dental Hygiene

DONALD FRANKLIN MARN, M.A. (1964)

Instructor in Mathematics

GILBERT ADAMS MARSHALL, M.S. (1947)

Associate Professor of Mechanical Engineering

*FREDERICK CARVER MARSTON, JR., Ph.D. (1948)

Professor of English

HERBERT LLOYD MARTIN, M.D. (1954)

Associate Professor of Clinical Neurology

*JAMES WALLACE MARVIN, Ph.D. (1939) 1

Professor of Botany

MARTIN CHARLES MATHE, Ph.D. (1964)

Assistant Professor of Botany

ROBERT ARTHUR MAXWELL, Ph.D. (1962)

Associate Professor of Pharmacology

SALLY BERRY MAYBURY (MRS. T. J.), Ed.D. (1944)

Associate Professor of Commerce and Economics

MARGARET ANNIE MAYS, M.Ed. (1962)

Instructor in Physical Education for Women

JOHN EDMUND MAZUZAN, JR., M.D. (1959)

Assistant Professor of Anesthesiology

CHRISTOPHER PATRICK MAREE, M.B. (1962)

Assistant Professor of Psychiatry

*HERBERT CHRISTIAN MCDONALD, M.D. (1964)

Associate Professor of Psychology

MAXWELL L. MCORMACK, D.F. (1964)

Assistant Professor of Forestry

VERNE LIONEL McINTOSH, JR., M.Ed. (1956)

Instructor in Education

JAMES BISHOP McINTOSH, M.D. (1952)

Assistant Professor of Clinical Surgery

GERALD FRANCIS McGINNIS, M.D. (1962)

Assistant Professor of Psychiatry

JERRY LEON McINTOSH, Ph.D. (1956)

Assistant Professor of Anatomy

ROBERT JAMES KENYON, M.D. (1949)

Professor of Pediatrics

MAX L. MCCANN, M.D. (1958)

Instructor in Clinical Pediatrics

BRUCE ALLAN McNALLIE, M.A. (1964)

Instructor in English

E. DOUGLAS MCSPYFE, M.D. (1964)

Instructor in Surgery

HAROLD EDWARD MEDIETSKY, M.D. (1937)

Assistant Professor of Clinical Medicine

CORNELIUS IRVING MEEKER, M.D. (1962)

Assistant Professor of Obstetrics and Gynecology

HAROLD AUSTIN MEEKS, Ph.D. (1964)

Assistant Professor of Geography

RICHARD WALLACE PAUL MELLISH, M.B. (1963)

Assistant Professor of Surgery

*DONALD BURTON MELVILLE, Ph.D. (1960)

Professor of Biochemistry

JOYCE EVELYN MERRIAM, M.A. (1961)

Professor of Mathematics

BRUCE ELWYN MERVINE, Ph.D. (1964)

Instructor in History

WILLIAM CRAIG METCALF, M.A. (1963)

Professor of Anthropology

1 Sabbatical leave academic year 1964-65.
OFFICERS OF INSTRUCTION

ROGER JEFF MEYER, M.D. (1962)  
Assistant Professor of Epidemiology and Community Medicine, and Instructor in Clinical Pediatrics

WILLIAM LAROS MEYER, Ph.D. (1962)  
Instructor in Biochemistry

*ALVIN REES MIDGLEY, Ph.D. (1951)  
Professor of Agronomy

*REGINALD VENN MILBANK, M.S. (1946-48; 1949)  
Professor of Civil Engineering

EDWARD JERVIS MILES, Ph.D. (1962)  
Associate Professor of Geophysics

ANN JOSEPHINE MILLER, B.S. (1962)  
Instructor in Dental Hygiene

DONALD BARKER MILLER, M.D. (1951)  
Associate Professor of Clinical Surgery (Thoracic)

PAUL ROBERT MILLER, M.S. (1931)  
Professor of Agronomy

JEAN BEATTIE MILLIGAN, M.A. (1953)  
Associate Professor of Nursing

ERNEST LEE MILLS, M.D. (1952-53; 1955)  
Assistant Professor of Clinical Anesthesiology

ISABEL CLARK MILLS (MRS. C. H.), M.A. (1952)  
Associate Professor of Art

JOHN HOLLISTER MILNE, M.D. (1964)  
Instructor in Clinical Medicine

ANTHONY MOLHO, Ph.D. (1964)  
Instructor in History

*PAUL AMOS MOODY, Ph.D. (1927)  
Howard Professor of Natural History and Zoology

DOROTHY JACKSON MORROW (MRS. R. C.), M.D. (1952)  
Instructor in Clinical Pediatrics

RUFUS CLEGG MORROW, M.D. (1951)  
Associate Professor of Otolaryngology

*ELLEN HASTINGS MORSE, Ph.D. (1960)  
Associate Professor of Home Economics

*DONALD EUGENE MOSER, Ph.D. (1960)  
Associate Professor of Mathematics

MARGUERITE L. MOUR, M.A. (1964)  
Instructor in Romance Languages

STANLEY IRVIN MOUR, M.A. (1962)  
Assistant Professor of Education

HANS JOACHIM MURBE, Ph.D. (1960)  
Assistant Professor of English

*MILTON JOSEPH NADWORYN, Ph.D. (1952)  
Professor of Commerce and Economics

RICHARD L. NAHEY, M.D. (1960)  
Associate Professor of Pathology

CHESTER ALBERT NEWHALL, M.D. (1929)  
Thayer Professor of Anatomy

DAVID SOWLE NEWHALL, M.A. (1919)  
Assistant Professor of History

GEORGE HUBERT NICHOLSON, A.M. (1923)  
Associate Professor of Mathematics

MITSUO NUMOTO, M.D. (1962)  
Instructor in Experimental Neurosurgery

*ANDREW EDGERTON NUQUIST, Ph.D. (1938)  
McCallough Professor of Political Science

*WESLEY LEMARS NYBORG, Ph.D. (1960)  
Professor of Physics

*ELBERT AUSTIN NYQUIST, M.S., C.P.A. (1953)  
Professor of Commerce and Economics

ROBERT EMMETT O'BRIEN, M.D. (1955)  
Associate Professor of Clinical Medicine

JAMES DONALD O'HARA, Ph.D. (1959)  
Assistant Professor of English

*PAUL OREN, JR., Ph.D. (1958)  
Professor of Sociology and Anthropology

RALPH HARRY ORTH, Ph.D. (1959)  
Assistant Professor of English

*JOHN OGDEN OUTWATER, Sc.D. (1956)  
Professor of Mechanical Engineering

PAUL PAGANUZZI, M.A. (1961)  
Assistant Professor of Russian

HAROLD GORDON PAGE, M.D. (1954)  
Associate Professor of Clinical Surgery

MARY ELLEN PALMER (MRS. E. M.), M.S. (1953-56; 1958)  
Assistant Professor of Nursing

*IPPOCRATES PAPOUTSAKIS, Mus.M. (1944)  
Professor of Music

MALCOLM SKEELS PARKER, D.M.L. (1953)  
Associate Professor of Romance Languages

WAYNE CURTIS PATTerson, M.S. (Jan., 1965)  
Assistant Professor of Psychology

EDWIN MATTSON PAXSON, M.D. (1957)  
Assistant Professor of Clinical Pediatrics

HANS PENNER, M.A. (1962)  
Instructor in Philosophy and Religion

MERYN WILLIAM PERRINE, Ph.D. (1961)  
Assistant Professor of Psychology

JAMES WILLIAM PETERSEN, Ph.D. (1950-52; 1964)  
Professor of Commerce and Economics

OSCAR SYLVANDER PETERSON, JR., M.D. (1944)  
Associate Professor of Clinical Radiology and Associate in Biophysics

MARY MARGARET PETRUSICH, M.Ed. (1962)  
Assistant Professor of Education

LORRAINE WATERS PHILLIPS, M.N. (1962)  
Assistant Professor of Nursing

RAYMOND VIRGIL PHILLIPS, Ph.D. (1961)  
Professor of Education

SIDNEY BORIS POGER, M.A. (1962)  
Instructor in English

JAMES EUGENE POOLEY, A.M. (1928)  
Associate Professor of Classical Languages and History

1 Sabbatical leave second semester 1965-66.
2 On leave June 30, 1965 to September 1, 1966.
3 On leave first semester 1964-65.
4 On leave academic year 1964-65.
OFFICERS OF INSTRUCTION

ARCHIBALD THOMSON POST, Ed.M. (1929)

WILLIAM BISSELL POPE, Ph.D. (1934-36; 1937)
Frederick Corse Professor of English Language and Literature

BOYD WALLACE POST, D.F. (1963)

MILTON POTASH, Ph.D. (1951)

AGNES TERESA POWELL, M.S. (1963)

PLATT RUGAR POWELL, M.D. (1949)

HENRY LEWIS PRATT, M.D. (1952)

WILLIAM ARTHUR PRATT, M.D. (1954)

RALPH SMITH PROVOST, D.D.S. (1963)

PHYLLIS MELVILLE QUINBY, B.S. (1950)

WILHELM RAAB, M.D. (1939)

DAVID WILLIAM RACUSEN, Ph.D. (1958)

ROBERT MALCOLM RAGAN, Ph.D. (1959-62; 1964)

LOUISE ADELE RAYNOR, Ph.D. (1946)

ELMER McCREADY REED, M.D. (1948)

MORRIS REICHLIN, M.D. (1944)

HEATH KENYON RIGGS, Ph.D. (1950)

BENJAMIN ALBERT RING, M.D. (1959)

SOL ALEXANDER RIPPA, Ed.D. (1960)

FRANK JAY ROBERTSON, B.S., Captain United States Army (1964)

LEONARD GEORGE ROBINSON, M.A., Colonel United States Army (1963)

ALICE KELLY RODGERS, M.S. (1962)

ALAN BENNETT ROONEY, M.S. (1922)

JAMES ALBERT ROOT, M.S. (1946)

EDWARD DAVID ROSSMAN, Jr., M.A. (1964)

HOWARD ROTHSTEIN, Ph.D. (1959)

LYMAN SMITH ROWELL, M.S. (1925)

WILLIAM ADOLPH RUFFER, Ph.D. (1962)

STANLEY RUSH, Ph.D. (1962)

CHARLES BRUSH RUST, M.D. (1948)

THOMAS DUDLEY SACHS, Ph.D. (Feb., 1962)

ALBERT WILLIAM SADLER, Ph.D. (1956)

FRANK SARGEANT, M.A. (1963)

SEYMOUR HERBERT SARGENT, M.A. (1963)

H. REED SAUNDERS, M.S. (Feb., 1964; Jan., 1965)

WADI ISSA SAWABINI, D.D.S. (1956)

ROBERT NEWTON SAXBY, M.D. (1954)

*LEONARD MICHAEL SCARFONE, Ph.D. (1963)

DANIEL JOSEPH SCHEANS, Ph.D. (1959-63; 1964)

*ARNOLD HAROLD SCHEIN, Ph.D. (1947)

*WOLFE WILHELM SCHMOKEL, Ph.D. (1962)

EDWIN CALVIN SCHNEIDER, M.S. (1946)

*NORMAN JAMES SCHOOKMAKER, Ph.D. (1956)

*HAROLD SEESSEL SCHRUTZ, Ph.D. (1946)

HERBERT LOUIS SCHRUTZ, M.A. (1917)

GEORGE ADAM SCHUMACHER, M.D. (1950)

ROBERTA B. SCHWALB, M.A. (1958)

OFFICERS OF INSTRUCTION

BENJAMIN F. SCHWEYER, LL.B. (1963)  Instructor in Commerce and Economics

*MALCOLM FLOYD SEVERANCE, Ph.D. (1951-52; 1953)  Associate Professor of Commerce and Economics

WILLIAM IRELAND SHEA, M.D. (1912)  Assistant Professor of Clinical Surgery

LAURENCE FORREST SHOREY, M.S. (1926)  Associate Professor of Electrical Engineering

*FERDINAND JACOB MORRIS SICHEL, Ph.D. (1937)  Professor of Physiology and Biophysics

FRANK HERMAN SIEKMANN, Ed.D. (1964)  Assistant Professor of Music

KENNETH ROGERS SIMMONS, Ph.D. (Jan., 1963)  Assistant Professor of Animal and Dairy Science

MORRIS LEON SIMON, M.A. (1954)  Assistant Professor of Political Science

JAMES EDWIN SIMPSON, M.D. (1933)  Instructor in Clinical Orthopedic Surgery

ETHAN ALLEN HITCHCOCK SIMS, M.D. (1950)  Associate Professor of Biochemistry and Medicine

*ROBERT ORVILLE SINCLAIR, Ph.D. (1953-55; 1956)  Associate Professor of Agricultural Economics

HOWARD DARRELL SLACK, D.D.S. (1950)  Instructor in Dental Hygiene

NORMAN JOSEPH SLAMECKA, Ph.D. (1957)  Associate Professor of Psychology

ROBERT JAMES SLATER, M.D. (Dec., 1961)  Professor of Clinical Pediatrics

WILLIAM JOSEPH SLAVIN, JR., M.D. (1942)  Associate Professor of Obstetrics and Gynecology

WILLIAM GEORGE SMILLIE, M.D. (Dec., 1962)  Visiting Professor of Epidemiology and Community Medicine

*ALBERT MATTHEW SMITH, Ph.D. (1917)  Associate Professor of Animal and Dairy Science

*DURWOOD JAMES SMITH, M.D. (Jan., 1953)  Professor of Pharmacology

*HOWARD MARSHALL SMITH, JR., M.S. (1947)  Professor of Electrical Engineering

PATRICIA SMITH, M.S. (1963)  Assistant Professor of Home Economics and Home Management House Director

ROBERT PEASE SMITH, M.D. (1951-54; 1956)  Instructor in Medicine, and Epidemiology and Community Medicine

TIBOR SOGOR, M.A. (1963)  Instructor in Romance Languages

ARTHUR BRADLEY SOULE, JR., M.D. (1929)  Professor of Radiology

THOMAS JOHN SPINNER, JR., Ph.D. (1957-59; 1962)  Assistant Professor of History

*THOMAS SPROSTON, JR., Ph.D. (1946)  Professor of Botany

HORACE HARRISON SQUIRE, Ph.D. (1962)  Assistant Professor of Commerce and Economics

MARY ELIZABETH SQUIRE (MRS. H. H.), M.A. (Feb., 1963)  Assistant Professor of Commerce and Economics

JAMES WARD STACKPOLE, M.D. (1962)  Instructor in Clinical Pediatrics

WILLIAM MARTIN STAHL, JR., M.D. (1962)  Associate Professor of Surgery

ROLFE SEATON STANLEY, Ph.D. (1964)  Assistant Professor of Geology

ERNEST STARK, M.D. (1945)  Associate Professor of Pathology

STANISLAW JAN STARON, M.A. (1961)  Instructor in Political Science

Marilyn Ruth Stauff, M.S. (1962)  Assistant Professor of Physical Education for Women

*FRANK LESLIE STEEVES, Ed.D. (1958)  Professor of Education

ROBERT LEO STONE, M.A. (1964)  Instructor in Physical Education for Men

NEIL RALPH STOUT, Ph.D. (1964)  Assistant Professor of History

VICTOR HUGO STRANDBERG, Ph.D. (1962)  Assistant Professor of English

NORMAN KENNETH STRASSBURG, M.Ed. (1946)  Assistant Professor of Physical Education for Men

WILLIAM CRAIGIE STREET, M.D. (April, 1963)  Clinical Instructor in Anesthesiology

JOHN CLINE STRICKLER, JR., B. of C.E., Captain U. S. Army (1962)  Assistant Professor of Military Science

ROBERT ROLF STRUTHERS, M.D.C.M. (Jan., 1964)  Visiting Professor of Clinical Pediatrics

WALTER ALVA STULTZ, Ph.D. (1937)  Professor of Anatomy

JOSEPH ROBERT SURIANO, Ph.D. (1959)  Assistant Professor of Medical Microbiology

1 Sabbatical leave 1964-65.
2 Sabbatical leave first semester 1965-66.
3 On leave October 1, 1964 to October 1, 1965.
OFFICERS OF INSTRUCTION

RALPH DANIEL SUSSMAN, M.D. (1946)  
Associate Professor of Clinical Pediatrics

BURTON SAMUEL TABAKIN, M.D. (1914)  
Associate Professor of Medicine

DAVID LATHAM TABER, M.D. (1953)  
Instructor in Clinical Obstetrics and Gynecology

JOHN PETER TAMAS, M.D. (1962)  
Assistant Professor of Radiology

CHARLES FRANCIS TAYLOR, Ph.D. (Jan., 1964)  
Associate Professor of Electrical Engineering

FRED HERBERT TAYLOR, Ph.D. (1943)  
Professor of Botany

HOWARD CANNING TAYLOR, III, M.D. (1962)  
Assistant Professor of Pathology

CHRISTOPHER MARLOWE TERRIEN, M.D. (1939)  
Associate Professor of Clinical Medicine

LOUIS GEORGE THABAUT, M.D. (1939)  
Instructor in Clinical Surgery

WILFRED LOUIS THABAUT, M.D. (Jan., 1958)  
Instructor in Clinical Obstetrics and Gynecology

MARY ELIZABETH THOMPSON, M.A. (1958)  
Assistant Professor of Nursing

KARL JEFFERSON THOMSON, M.D. (Jan., 1963)  
Professor of Experimental Medicine

SEIKICHI TOKUDA, Ph.D. (1963)  
Assistant Professor of Medical Microbiology

THOMAS BARTHOLOMEW TOMASI, JR., M.D. (1960)  
Associate Professor of Experimental Medicine

HELENE WALLACE TOOLAN (MRS. JAMES M.), Ph.D. (1964)  
Associate Professor of Pathology

JAMES MICHAEL TOOLAN, M.D. (1964)  
Assistant Professor of Romance Languages

REUBEN TORCH, Ph.D. (1953)  
Associate Professor of Zoology

RANDOLPH SHEPARDSON TOWNE, A.M. (1928)  
Assistant Professor of Botany

THOMAS DERMOTT TRAINER, M.D. (1960)  
Assistant Professor of Pathology

*RAYMOND HERMAN TREMBLAY, Ph.D. (1953)  
Associate Professor of Agricultural Economics

*JACK TREVITHICK, Ph.D. (1946)  
Professor of English

KEITH FRANK TRUAX, M.D. (1932)  
Associate Professor of Clinical Surgery

ARTHUR FREDERICK TUTHILL, M.S. (1946)  
Professor of Mechanical Engineering

JOHN CUSHMAN TWITCHELL, M.D. (1961)  
Instructor in Clinical Medicine

MARSHALL COLEMAN TWITCHELL, JR., M.D. (1942)  
Assistant Professor of Ophthalmology

LOUIS MALDONADO UGALDE, M.A. (1962)  
Assistant Professor of Romance Languages

JOHN CHARLES VANBLARCOM, B.S. (1964)  
Instructor in Commerce and Economics

HENRY CARMER VAN BUREN, M.D. (1962)  
Instructor in Clinical Medicine

FREDERICK WILLIAM VAN BUSKIRK, M.D. (1946)  
Assistant Professor of Clinical Radiology

KENNETH EVERSON VARNEY, M.S. (1946)  
Assistant Professor of Agronomy

THOMAS LOUIS VIAU, M.S. (1964)  
Instructor in Mechanical Engineering

RAUL HORACIO VISPO, M.D. (1963)  
Assistant Professor of Psychiatry

*HUBERT WALTER VOEGELMANN, Ph.D. (1955)  
Associate Professor of Botany

LUCILLE MARION WAKEFIELD, M.S. (1917)  
Assistant Professor of Home Economics

*NELSON LEE WALBRIDGE, Ph.D. (1924)  
Professor of Physics

HAROLD JAMES WALLACE, JR., M.D. (1964)  
Instructor in Clinical Medicine and Pharmacology

LESTER JULIAN WALLMAN, M.D. (1948)  
Associate Professor of Neurosurgery

JOSEPH FRANKLIN WARK, D.M.D. (Nov., 1964)  
Instructor in Dental Hygiene

HERBERT FRANKLIN WASS, M.A. (1964)  
Assistant Professor of Commerce and Economics

JOHN FRANKLIN WATSON, M.D. (1961)  
Assistant Professor of Experimental Medicine

LELON ASHLEY WEAVER, JR., Ph.D. (1964)  
Assistant Professor of Home Economics

*BRIAN CLARENCE WEBSTER, Ph.D. (1951-53; 1956)  
Associate Professor of Agricultural Economics

SELINA WILLIAMS WEBSTER (MRS. T. M.), M.S. (Feb., 1960)  
Assistant Professor of Home Economics

TRUMAN MARION WEBSTER, Ph.D. (1947)  
Assistant Professor of German

JOHN GEORGE WEIGER, M.A. (1964)  
Assistant Professor of Romance Languages

FRANCIS ALEXANDER WEINRICH, M.A. (1950)  
Assistant Professor of Music

GEORGE WILLIAM WELSH, 3rd, M.D. (1916)  
Assistant Professor of Mathematics

BRUCE RICHARD WENNER, Ph.D. (1964)  
Assistant Professor of Mathematics

1 Sabbatical leave first semester 1964-65.
2 On leave first semester 1964-65.
3 Sabbatical leave second semester 1964-65.
OFFICERS OF INSTRUCTION

ALBERT LOUIS WENZ, B.S., Major U. S. Army (1962) Assistant Professor of Military Science
WENDELL JENNISON WHITTLER, Ph.D. (1952) Associate Professor of Chemistry
*JAMES FELLOWS WHITE, Ph.D. (1955) Professor of German
KERR LACHLAN WHITE, M.D., C.M. (1962) Professor of Epidemiology and Community Medicine
RUTH A. PRESTON WHITE (MRS. R. K.), M.S. (1962) Assistant Professor of Epidemiology and Community Medicine
*WILLIAM NORTH WHITE, Ph.D. (1963) Professor of Chemistry
ROY ALVIN WHITMORE, JR., M.F. (1918) Associate Professor of Forestry
MARGARET BEACH WHITTLESEY, M.S.W. (1964) Assistant Professor of Home Economics
*SAMUEL CLAUDE WIGGANS, Ph.D. (Feb., 1961) Professor of Horticultural Science
BLAIR WILLIAMS, M.S. (1946-48; 1949) Associate Professor of Home Economics
READE WILLIAMS, Ph.D. (1964) Assistant Professor of Electrical Engineering
RONALD ARTHUR WILLIS, M.F.A. (1964) Assistant Professor of Speech
BETTY JANE WILLS, M.S. (1960) Assistant Professor of Physical Education for Women
JAMES WILSON, Ph.D. (1964) Assistant Professor of Political Science
*GLEN MEREDITH WOOD, Ph.D. (1950) Associate Professor of Agronomy
FLORENCE MAY WOODARD, Ph.D. (1923) Professor of Commerce and Economics
NORMA LOWYN WOODRUFF, M.A. (1952) Associate Professor of Nursing
RICHARD S. WOODRUFF, M.D. (1950) Assistant Professor of Pathology
*STUART COWAN WOODRUFF, Ph.D. (1961) Assistant Professor of English
WILLIAM ALOYSIUS ALFRED WOODRUFF, M.B. (1962) Assistant Professor of Psychiatriy
LLOYD ABRAHAM WOODWARD, M.S. (1920) Associate Professor of Physics
*ROBERT CUMMINGS WOODWORTH, Ph.D. (1961) Assistant Professor of Biochemistry
ALBERT WILHELM WURTHMANN, M.A. (1947) Assistant Professor of German
WILLIAM GREENHILL YOUNG, M.D. (1949) Associate Professor of Clinical Psychiatry
LUTHER EUGEN ZAI, D.Sc.Tech. (Feb., 1961) Assistant Professor of Forestry

Associates in Instruction and Research

HARRY LIVINGSTON COLOMBO, M.D. Clinical Associate in Medicine
JOHN PATRICK CORLEY, M.D. Clinical Associate in Medicine
STEVEN LESLIE FREEDMAN, Ph.D. Research Associate in Anatomy
WILLIAM HENRY HEININGER Clinical Associate in Medicine
HERMAN CONRAD HERRLICH, Ph.D. Research Associate in Experimental Medicine
SHEILA ELIZABETH ISRAEL, Ph.D. Clinical Associate in Biochemistry
THOMAS ROBERT KLEH, M.D. Clinical Associate in Ophthalmology
FREDERICK MITCHELL LAINING, M.S. Research Associate in Botany
PETER C. LINTON, M.D. Clinical Associate in Plastic Surgery
GEORGE E. LUCIA, JR., M.D. Clinical Associate in Surgery
CHARLES E. MOISAN, JR., M.D. Clinical Associate in Medicine
YOSHIO NAWATA, M.D. Research Associate in Experimental Medicine
JOHN LOUIS SAIA, M.D. Clinical Associate in Medicine
TAMOTSU SHINOZAKI, M.D. Research Associate in Surgery
JOHN BUTLER TOMPKINS, M.D. Clinical Associate in Medicine
LOUIS JOSEPH WAINER, M.D. Clinical Associate in Medicine
MAURICE JAMES WALSH, M.D. Research Associate in Experimental Medicine
ZANG ZEE ZAO, M.D.

Other Administrative Officers

EDWIN BARTLETT ABBOTT Auditor
KARL ALBAN ANDREN, B.S. Publications Specialist
EDWARD CLINTON ANDREWS, JR., M.D. Associate Dean, College of Medicine
THOMAS D. SEYMOUR BASSETT, Ph.D. Librarian, Wilbur Library, and University Archivist
JAMES HENRY BATES, M.Ed. Executive Assistant to Dean, College of Medicine
HORACE WILKINSON BRIGGS, M.A.L.D. Director of World Affairs Information Center

1 Sabbatical leave academic year 1965-66.
2 Resigned as of January 31, 1965.
3 On leave September 1, 1965 to December 20, 1965.
4 November 1, 1965.
16

Extension Service Staff

The Cooperative Extension Service is a cooperative undertaking of the State of Vermont, the College of Agriculture and Home Economics, the United States Department of Agriculture, and the several counties of the State. It has a State staff, with headquarters at the University, and a staff of county extension agents in each county. Its purpose is "to aid in diffusing among the people . . . useful and practical information on subjects relating to agriculture and home economics, and to encourage the application of the same". Its programs are available to all the people of the State, including both adults and youth.

Introduction

The University of Vermont was founded in 1791, taking its place among the handful of colleges founded in this country in the eighteenth century for the higher education of young colonials and Americans of the first post-revolutionary generation. The University was the fifth New England college chartered, the second established by a state to grant the bachelor's degree, and the twentieth in the nation to do so.

Though it has enjoyed a long tradition which has seen it receive substantial private support, University development has been closely identified with that of the State since 1791, when Vermont's founding General Assembly granted a charter to the University and set aside about 29,000 acres throughout the State with the intent that rents from this land would support the new educational institution.

That same Vermont General Assembly established that the by-laws of the University should give no preference to any religious sect or denomination or discriminate against any, making the University of Vermont the first in this country and possibly the first in history to go on public record as supporting freedom of religion upon its campus.

Colleges and Curricula

The University consists of the College of Arts and Sciences, the College of Agriculture and Home Economics, the College of Technology, the College of Education and Nursing, the College of Medicine, the Graduate College, and the two-year School of Dental Hygiene.

The College of Arts and Sciences

In common with the practice at most of the early universities, the original curriculum was based on languages, rhetoric, and mathematics, theology, and moral philosophy. Today, the College of Arts and Sciences, often considered the direct descendant of the original University, provides a general four-year curriculum leading to the degree of Bachelor of Arts, with opportunity for concentration in one or more of the following studies: botany, chemistry, economics, English, French, geology,
German, Greek, history, Latin, mathematics, music, philosophy, physics, political science, psychology, sociology, Spanish, speech, and zoology.

Majors in the Department of Commerce and Economics may specialize in options which include accounting; banking and finance; industrial management; and marketing and sales promotion. These programs lead to the degree of Bachelor of Science in Commerce and Economics.

Students interested in continuing their studies beyond the bachelor's degree may, by making a proper selection of courses, meet all requirements for admission to graduate schools, and to such professional schools and colleges as those of medicine, dentistry, law, theology, optometry, and social work. Those who have completed three years of premedical study at the University may qualify for the degree of Bachelor of Science after successfully completing one year of study in an approved college of medicine.

The College of Agriculture and Home Economics

In 1862, the Congress of the United States enacted legislation, fostered by Vermont Senator Justin Smith Morrill, which provided for the establishment of a system of colleges—one for every state—which would make possible college education for all who were qualified. These institutions came to be known as the Land-Grant institutions of America because the Morrill Act provided federal funds for each state which would set aside lands for the new colleges. Their aim was to make possible a new kind of education which combined and blended the agricultural and mechanic arts with education in the liberal and scientific courses. The State of Vermont moved to charter a land-grant institution, the Vermont College of Agriculture, in 1864, and this new college was joined with the University of Vermont in 1865. Under later federal legislation, the services of the land-grant colleges were expanded by the creation of agricultural research and service divisions—the Agricultural Experiment Station and the Agricultural Extension Service respectively.

Today the College of Agriculture and Home Economics offers four-year curricula leading to the degree of Bachelor of Science in Agriculture, Bachelor of Science in Agricultural Engineering and Bachelor of Science in Home Economics. It also offers a two-year program in pre-veterinary science which prepares students for admission to other institutions for professional training.

The curriculum in agriculture provides options in general agriculture, agricultural economics, agricultural education, agronomy, animal and dairy science, dairy industry, botany, foreign agricultural service, forestry, horticultural science, and poultry science.
The curriculum in home economics provides options in clothing, textiles and related art; family living and human development; food and nutrition; home economics education; and house and home management.

The College of Technology

The University of Vermont was probably the first nonmilitary institution in America to offer instruction in engineering and was certainly the first of the present land-grant colleges to give any instruction in this area which was incorporated later into the Morrill Act. Engineering was taught in a separate department until 1911, when a College of Engineering was established. In 1946 the College of Technology was formed and included the curricula in civil, electrical, mechanical, and management engineering; professional chemistry; and medical technology.

The College of Education and Nursing

The University of Vermont has contributed teachers to its state, region and nation virtually since its founding. The evolution of formal professional education preparation resulted first in the department, then the School of Education in 1946, and, in 1951, the College of Education and Nursing, offering four-year curricula leading to the Bachelor of Science degree in the fields of elementary, secondary, business and music education; and a four-calendar-year curriculum leading to the degree of Bachelor of Science in Nursing.

Although techniques have varied, the primary concern of the education curricula has been to produce qualified teachers who have a strong background in academic subject matter and an adequate preparation in professional education.

The University's collegiate program of nursing is designed to educate the student for the practice of professional nursing in beginning positions in the hospital, home and community, and to provide a foundation for advanced study in nursing at the graduate level.

The College of Medicine

The College of Medicine is historically almost as old as the University itself. Medical lectures became part of the offerings in 1804 and degrees were granted in medicine in 1822. There were some interruptions in the operation of the medical courses in 1836, but since 1833 qualified physicians have been graduated annually to serve Vermont and neighboring states. Today, the College of Medicine offers a four-year graduate curriculum leading to the degree Doctor of Medicine and provides facilities for a limited number of candidates for other graduate degrees to take courses in its departments.
INTRODUCTION

The Graduate College

Many academic departments of the University have a long history of providing formal graduate study for well qualified candidates. The Graduate College was formally established in 1952, and since that time has served to provide graduate study opportunities in academic fields in which University resources have made sound graduate programs possible. In recent years several doctoral programs have been inaugurated and more are being planned. The Graduate College administers all studies beyond the Bachelor's degree, with the exception of the program of the College of Medicine leading to the doctor of medicine.

Scholarship aid, fellowships, assistantships and special loan programs are available in increasing numbers for graduate study for the student who achieves a good academic record in his undergraduate program. Nationally, the demand for men and women with advanced training continues to be urgent.

A separate catalogue describing graduate programs at Vermont is available from the Office of the Dean of the Graduate College.

The School of Dental Hygiene

The School of Dental Hygiene was established at the University in 1949. This two-year program leads to a Certificate in Dental Hygiene. Recipients of the certificate are eligible to take all state board examinations for licensing as dental hygienists. Enrollment in the School is limited to women.

Regional Cooperation

The University of Vermont is an active participant with the other state universities of New England in a program of regional cooperation aimed at increasing educational opportunities for the qualified young men and women of the six New England states. Under the program New England residents are given admissions preference and resident tuition privileges in certain specialized curricula. The University of Vermont offers several programs in which qualified residents of other New England states may be granted admissions preference and resident tuition benefits. A special brochure, detailing these specialized curricula, has been prepared by the New England Board of Higher Education and is available through the University of Vermont admissions office and from the other New England state universities.

The University of Vermont offers the following programs in which the Vermont in-state tuition rate is available for students from the states named beginning with the year indicated. Students from the New
England states may enter the programs earlier than the year indicated but in that event the out-of-state rate of tuition would apply.

Business Education, junior year, Maine, Massachusetts.
Classics, freshman year, Massachusetts, New Hampshire, Rhode Island; graduate, Maine, Massachusetts and Rhode Island.
Dairy Manufacturing, junior year, Maine, New Hampshire, Rhode Island.
Foreign Agricultural Service, freshman year, Massachusetts, Rhode Island.
Medical Electronics, graduate, Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island.
Medical Technology, junior year, Massachusetts.
Microbiology, graduate, Maine, Rhode Island.

The Vermont Campus

The campus and present buildings had their origin in 1800, when Burlington was virtually still frontier territory.

The University’s inaugural president and his first four students felled trees from ground which is today’s College Green for timber for the first college building. From their labors and from financial contributions of the citizens of Burlington, the first college building rose. When, in the early 1820’s fire destroyed this first structure, it was rebuilt, again through support of Burlington residents. General Lafayette laid the cornerstone in 1825 for that second building which still stands as today’s Old Mill. A modern classroom addition, Lafayette Hall, was dedicated in 1958 with a direct descendant of General Lafayette present for the ceremonies.

Following its earliest tradition, much of the University’s growth in terms of buildings has been the result of generous private philanthropy.

The Billings Center, now serving as a student center, was one of several structures dedicated in the late 1800’s. A fine example of the work of Henry Hobson Richardson, the well-known American architect, the Library was the gift of Frederick Billings of Woodstock. The Williams Science Hall, the first completely fire-proofed college building in this country, was added in 1896 to house the expanding departments of the several sciences. The gift of Dr. and Mrs. Edward H. Williams of Philadelphia, it was built and furnished at a cost of $160,000. The effect of changing times is illustrated by the fact that a major renovation of the chemistry department facilities in Williams Science Hall has been completed recently at a cost of over $400,000.
Converse Hall, an unusual design of Gothic architecture, was completed in 1895. John H. Converse, class of 1861, purchased the land on which Converse stands, erected the building, and presented the completed gift to his alma mater. He also gave two houses for faculty members on the "south common".

The University dedicated a new $3,000,000 physical education facility in 1962, with alumni and private philanthropy contributing $1,000,000 of the total. The State of Vermont provided a $2,000,000 bond issue, the major share of which will be repaid by student fees. The gymnasium is named to honor Roy L. Patrick, '98; the pool to honor Frank D. Forbush, '86; and the Field House to honor Albert L. Gutterson, a 1912 graduate who won in that same year an Olympic Gold Medal in the broad jump. The baseball facilities in the Field House Cage honor two Vermont alumni who achieved prominence in Major League baseball—Larry Gardner and Ray Collins, both members of the Class of 1909.

A new $1,895,000 engineering building, made possible by a state appropriation, houses electrical, civil, and mechanical engineering departments and the department of mathematics. Opened in the spring semester of 1964, it is named to honor the late Josiah Votey, a graduate of the class of 1884, who served as dean of the then College of Engineering at Vermont from 1901 until his death in 1931.

Morrill Hall, named to honor Vermont's Senator Justin S. Morrill, father of the Land-Grant Act, was the first university building to be provided by an appropriation from the State of Vermont. It was erected in 1907 and houses administrative offices for the College of Agriculture and Home Economics.

The twentieth century has seen the construction of several buildings of Georgian architecture. The Ira Allen Memorial Chapel, with an imposing bell tower was completed in 1927. It was the gift of James B. Wilbur, who also made a generous gift to provide scholarships for Vermont residents. In 1955 a sixty-four-bell electronic carillon was installed in the tower, a gift of winter carnival funds, and dedicated to all men and women of the University who served in the armed forces. Mr. Wilbur's bequest also contributed to the building of the Fleming Museum. Named for Robert Hull Fleming, class of 1862, the Museum was made possible by a gift from Miss Katherine Wolcott of Chicago, Mr. Fleming's niece, and by gifts from other friends of the University. Completed in 1931, it houses the University's art collection, and a fine Arena Theater.

The Waterman Building, dedicated in 1941, was the gift of Charles W. Waterman, class of 1885, and Anna R. Waterman. It contains ad-
ministrative offices, classrooms, laboratories, recreation facilities, a dining hall, and the University Store. A well-equipped language laboratory is maintained in the Waterman Building with tape-recording facilities and listening stations as an aid to pronunciation, aural comprehension, and pattern practice in French, German, Hebrew, Russian and Spanish. An I.B.M. 1620 model electronic computer has been installed to be used for teaching and research in the University and for use by other colleges which may have need for its service. Space in this building vacated by engineering is being renovated to provide for the financial offices and a newly organized data processing center.

In 1949, a group of modern buildings, financed by state appropriation, was erected on the East campus. These are the Hills Agricultural Science Building, named to honor Joseph L. Hills, for many years Dean of the College of Agriculture; the Bertha M. Terrill Home Economics Building, named in honor of the originator and first chairman of the department of home economics; and the Joseph E. Carrigan Hall which houses the department of animal and dairy science. A Life Science Building to house the departments of botany and zoology and to provide teaching and research space is planned for construction. This will also include a lecture auditorium to seat about 400. This building is to be completed for use in 1967.

The Redstone campus for women was originally a large estate. The mansion and the carriage house now serve as Redstone and Robinson Halls. Mable Louise Southwick Memorial Building, another imposing Georgian structure, was completed in 1936 as a center for women's activities. A gift from the family of Miss Southwick, a University graduate in the class of 1905, a bequest from Miss Shirley Farr, federal funds, and a student subscription provided the building and its furnishings.

Slade Hall, built in 1929, is of Colonial-type architecture. Mrs. William G. Slade made a gift toward this building, in memory of her daughter, Harriet Slade Crombie. In 1947, the Grace Goodhue Coolidge Hall, a residence hall for women, was built adjacent to Southwick. Grace Goodhue, class of 1902, was the wife of Calvin Coolidge, President of the United States.

Coolidge Hall and the three men's residence halls, Buckham, Chittenden and Wills Halls, were the first University residence halls to be financed by a bond issue guaranteed by the State of Vermont. Room rents are used to liquidate the bond issue.

Also built on these terms are the three residence halls for women south of Coolidge. Mason, Simpson, and Hamilton Halls were completed in 1957 and named, appropriately, to honor three distinguished women.
Mason Hall and Hamilton Hall honor Vermont's first two women graduates, Lida Mason Hodge and Ellen Hamilton Woodruff, class of 1875, who were also the first women admitted to Phi Beta Kappa at the University. Simpson Hall honors Dean of Women Emeritus Mary Jean Simpson, class of 1913. A new three unit residence and dining facility for men was completed in the fall of 1961 under the federal housing loan program. A new unit for women, named to honor former Dean of Women Marian Patterson was also completed in 1961 and two new units, Wright and Christie, the former containing a dining hall, were opened in September, 1964. These were named to honor Jessie Elvira Wright Whitcomb, a Vermont graduate of 1887, and Jean Alice Christie Chandler Bull, a graduate of 1886. The men's units, which make it possible for the University to provide on-campus housing for many upperclassmen, are named to honor James Marsh, distinguished scholar who served as president of the University from 1826-33, and who introduced the works of Coleridge in this country; the late Professor Frederick Tupper, a noted scholar of Chaucer; and for Warren R. Austin, a Vermont graduate of the class of 1899, who served as the U. S. Representative to the United Nations from 1946-53.

Other buildings of interest include Grassmount, a gracious Georgian mansion which was the home of a former Governor of Vermont; Pomerooy Building, erected in 1829 for the medical department and now used to house the department of speech. The Wasson Infirmary, believed to have been an underground railway stop for escaping Negro slaves at the time of the Civil War, was purchased for the University in 1944 by a group of faculty and alumni, and named for the first dean of women, Pearl Randall Wasson. A modern home management laboratory, named to honor the late Miss Alice E. Blundell, a member of the University's home economics faculty, was completed on the Redstone campus in 1961.

To support the teaching, research and Extension programs of the College of Agriculture and Home Economics, the University maintains animal, dairy and poultry science facilities on Spear Street in South Burlington, approximately a mile from the main campus; and has entered into a contract with the U. S. Forest Service for establishment of a forestry research center nearby; maintains the Blasberg Horticultural Research Center off Shelburne Road in South Burlington; the Forestry Research Farm in Jericho; the Proctor Maple Research Farm in Underhill; and the Weybridge Research Center and Morgan Horse Farm at Weybridge, about 35 miles south of the University's main campus at Burlington. The Weybridge facility attracts many visitors.
INTRODUCTION

each year who come to admire, and many to buy, the University's Morgan Horses.

The College of Medicine

Alumni and private philanthropy has proven the key to a modern building program of the College of Medicine. Vermont medical alumni led the nation in terms of the total amount given in the first year of a three-year fund drive which saw alumni contributions more than match a federal grant which permitted completion of a $1,200,000 first unit of a three-phase program.

So impressive was this record of alumni giving that it attracted the interest and support of private philanthropy which made it possible for the University to match a second federal grant in completing in 1962 the second $1,500,000 phase of the program.

Start of construction in 1965 on the $8,700,000 third phase of its medical building program marks the successful completion of the most ambitious single building fund campaign ever undertaken by the University of Vermont. A $2,000,000 gift from the Given Foundation, the largest single building gift ever received by the University was included in the total raised to match grants made under the Medical Facilities Act of 1964.

Development of the College of Medicine, together with the fine hospitals with which the medical college is affiliated, has meant the development in Burlington of a modern medical center which serves citizens of all three northern New England states, as well as many residing in upper New York.

The Bailey Library

The new library is named to honor the late Guy W. Bailey, thirteenth president of the University. Early completion was made possible by a bond issue guaranteed by the state, to be repaid through an annual student library fee. It is the largest book collection in Vermont and 1,400 periodical titles are regularly received. The University's library collection also includes the medical library housed in the medical building.

Support of the library is derived mainly from University operating funds. Some support is received from income from endowments designating the library as beneficiary, and a group of friends, the Library Fellows, interest themselves in the library and its support.

The library is a depository of U. S. Government publications, Newspapers, pamphlets, maps, state agricultural publications, and microfilms
are included in the collection. Special collections include the George P. Marsh Library, of about twelve thousand volumes in the humanities, the Howard-Hawkins Civil War collection, and the Whittingham-Stevens collection of Chiswick imprints.

The James B. Wilbur Library is rich in manuscript materials, early Vermont imprints, books relating to Vermont, and books by Vermont authors. The Wilbur Library has recently been given the personal collection of Dorothy Canfield Fisher, consisting of books, correspondence, and literary manuscripts.

The Robert Hull Fleming Museum

The Museum, an integral part of the University's teaching program, provides a fourfold educational service to the University and the people of Vermont through its permanent collections covering the history of art, temporary exhibitions, the Fleming Museum Association, and Children's Classes in the Creative Arts.

The permanent collection is arranged to augment in so far as possible the University's teaching in varied fields. Particular galleries are devoted to ancient, medieval, and renaissance art; baroque and modern painting and sculpture; American art; primitive art; and the Orient. Two galleries are often devoted to temporary exhibitions which supplement the permanent collections by representing various aspects of painting, sculpture, graphic arts, architecture, photography and related material. Group shows such as the Vermont Camera Club Exhibition and the Northern Vermont Artists' Show are held annually.

The Fleming Museum Association, open to the public, is composed of friends of the Museum whose support makes possible certain special exhibitions, guest lectures and films. Gallery talks related to exhibitions and the permanent collections are given from time to time and guide service for schools and clubs is available. Children's classes offer instruction in painting and the dance to youngsters of the community.

The Museum has a conference room, a lounge with a high-fidelity sound system, and a kitchenette available for meetings and social functions, a collection of several thousand photographs of painting and sculpture, and study area for courses in art.

The ground floor of the Museum houses an arena theater with about three hundred seats on the four sides. The arrangement provides the intimate atmosphere of a small theater and has contributed much to the dramatic offerings of the college year. It also houses the annual summer Shakespeare Festival.
The George Bishop Lane Artists Series

The George Bishop Lane Artists Series is one of the largest collegiate artists series in the country. It was inaugurated in 1955 by a gift of over $300,000 from the late Mrs. Lane, in honor of her husband, George Bishop Lane of the Class of 1883.

The Lane Series makes it possible for the University to bring to the campus and the community a continuing program of outstanding musical, theatrical, dance and other artistic productions for a moderate admission fee.

The Series is planned and produced by a student-faculty committee, with townspeople serving with student and faculty members on an advisory committee.

The Lane Series has presented many of the world’s finest artists and groups, including the London Philharmonia, the Vienna Philharmonic, the Philadelphia Orchestra, the Chicago Symphony Orchestra, the Royal Ballet of London, the American Ballet Theatre, Rudolf Serkin, Artur Rubinstein, Van Cliburn, Isaac Stern, Nathan Milstein, Andres Segovia, The Vienna Choir Boys, the Weavers, the Robert Shaw Chorale, the Budapest String Quartet, Dave Brubeck, Errol Garner, Benny Goodman, Mantovani, Harry Belafonte, Joan Baez, Sir John Gielgud, Roberta Peters, the New York City Opera Company, and a number of plays including *Tea and Sympathy, Li’l Abner, Camelot, Man for All Seasons, Look Homeward, Angel,* and *J. B.* In addition to two major series presented during each academic year, the Lane Series also sponsors a Chamber Arts Series in the spring semester, and the Lane Summer Series.

Conferences and Institutes

An increasing number of groups seek to meet on the campus of the University of Vermont for the purpose of holding educational conferences, institutes and seminars. Wherever it is possible to do so, the University is pleased to cooperate in making its facilities available for this purpose. Nominal charges are made to cover costs to the University.

Further information may be obtained through the Office of Conferences and Institutes.
Student Life

The general welfare of students is the responsibility of the Offices of the Dean of Women and the Dean of Men.

Housing

All undergraduate women who do not live locally with their families or in a sorority house are required to live and have their meals in University residence halls. All freshman, sophomore and junior men who do not live locally with their families or in a fraternity house are required to live and have their meals in University residence halls.

Contracts for room and board are binding for the college year, unless cancelled for due cause with the sanction of the Dean of Women or the Dean of Men. In August each new student will receive notification of a room assignment, and the date and hour of the opening of his or her residence hall. The rooms for freshman women and men may not be occupied until the date specified. Other students may occupy their rooms no earlier than twenty-four hours before the day of enrollment. Each student is expected to leave the residence hall no later than twenty-four hours after his or her last examination at the close of the school year.

Facilities for doing personal laundry are provided in each residence hall, and space for the storage of trunks, baggage, and skis. Bed linen and towels may be furnished by the student or rented from a commercial linen service which provides weekly delivery of two sheets, a pillow case, and three towels. Students provide their own window draperies, pillows, metal waste baskets, bureau covers, desk lamps and reading lamps.

Women

There are eleven residence halls for women and seven sorority houses. The residents of the halls on Redstone Campus: Christie, Coolidge, Hamilton, Mason, Patterson, Redstone, Robinson, Simpson, Slade and Wright will have their meals in the dining halls in Simpson or Wright on a twenty meal per week annual contract. The residents of Allen House will contract their meals at the Waterman Dining Hall.
Usually, only junior and senior women are permitted to live in sorority houses. All other residences have a prorated number of residents from each of the four undergraduate classes.

A Head Resident on the staff of the Dean of Women's Office is in charge of each living unit. In each larger living unit, there is also a House Fellow, who is a mature and responsible senior woman. The Head Resident and House Fellow work together to assist the women in their residence to profit from the educational opportunities that the University offers and to assist the residents to grow in maturity and self direction.

There is a student house president in each women's residence unit who is appointed by the Women's Student Government Council to carry out the policies of the Association; and a house committee, elected by the residents of each unit, to assist the house president in seeing that the traditions, standards and ideals of the University, and of the Women's Student Government Association are observed.

Men

Austin, Buckham, Chittenden, Converse, Marsh, Tupper, and Wills Halls are residence halls for men. All students who live in these residence halls must have board contracts for the year for twenty meals per week. Sophomore, junior and senior men who are members of fraternities are eligible to live in their fraternity houses. Other sophomore and junior men will live in University residence halls.

Senior men may live either in their fraternity houses, University residence halls or in approved off-campus housing.

Sixteen fraternity houses representing fourteen national fraternities and two local fraternities provide housing and, in most cases, dining facilities for approximately 500 upperclassmen. Only upperclass fraternity men may contract for meals or a room in fraternity housing.

Student Personnel Services

Counseling The offices of the Dean of Women and the Dean of Men offer assistance to students who may have social, vocational and personal problems. Psychiatric counseling is available through the University Health Service.

Placement Service To assist graduating Seniors and Alumni in exploring and selecting among various employment possibilities, the University operates an extensive Placement Program. A large number of representatives from business organizations, govern-
mental agencies, and school systems come to the campus each year to interview for fulltime positions. Related services include individual career counseling and the preparation of confidential credentials. For undergraduates, occupational information is available in the Placement Office and career planning lectures are given during the semester.

Veterans Administration Benefits  Students who are eligible to receive educational benefits under Public Laws 634 (veteran’s child) or 894 (disabled veteran) should present a “Certificate for a Program of Education” to the Office of the Dean of Men at the time of registration. If the student is presently in training at another institution, he should request his school to complete a “Change of Place of Training” form so that a new certificate will be presented to him for use at the University of Vermont. Questions regarding Veterans Administration benefits should be directed to the Office of the Dean of Men.

Financial Aid  The University Financial Aid office counsels students on financial problems, administers the University’s Scholarship and Loan Funds and assists students in obtaining part-time employment.

Reading Center  The University Reading Center provides a free service for students who wish to improve their reading, vocabulary, and study techniques. The first semester classes are open primarily to freshmen who are selected as a result of diagnostic tests given at the beginning of the academic year. Other students may enroll in the reading program as places become available. Students who enroll must attend regularly throughout the semester.

Speech Clinic  Services of the speech clinic, located in Pomeroy Hall, are free to students in the University who have problems of articulation, foreign dialect, stuttering, inadequate vocal control, cerebral palsy, or hearing loss.

Health Services  The University has complete facilities for maintaining the physical well-being of members of the student body. The Health Service, with its headquarters at the Wasson Memorial Infirmary, provides complete physical examinations on all incoming students, the examination of members of athletic squads, care of injuries, and advice on all health
STUDENT LIFE

and medical problems. It is staffed by an administrative director, a medical director, resident psychiatrists, and associate physicians who hold regular office hours in the infirmary and are on call for emergencies. An orthopedic surgeon holds a regular clinic for consultation at the infirmary. Registered nurses are on duty at all hours. A student may employ a private physician using the facilities of the infirmary if desired. Cases of serious illness are sent to one of the two modern, well-equipped hospitals which are adjacent to the campus. Parents of a student are notified of an illness by letter or telephone, depending on the nature of the illness.

Every student who pays full tuition for the normal college year of nine months is entitled to a maximum of five days of free infirmary care and such routine medical care as is needed and as the infirmary and health service can render during the nine months' period. Students who require infirmary care for more than five days in the college year are charged at the rate of $8.00 per day.

Every student at the University is required to participate in the physical education program for two years. Normally this work is taken in the freshman and sophomore years, but may be postponed on the advice and authorization of the medical director, or the student's own physician, who must forward statements to the medical director concerning disability.

Student Activities

The University officially recognizes the activities of a number of organizations supplementing the social and recreational needs of students, developing their cultural and religious interests, providing them with valuable business and executive experience, and broadening their contacts. Because it is within this area that qualities of leadership may be developed, the University encourages participation consistent with its scholastic requirements. The students manage the affairs and finances of these organizations within the framework of the University's regulations.

RELIGIOUS LIFE Although the University cannot itself attempt to guide the religious life of its students, this work is carried out by several independent agencies: the B'nai B'rith Hillel Foundation, the Council for a Cooperative Ministry (representing the Baptist, Congregational Christian, Methodist, and Presbyterian churches), the Episcopal Church at the University of Vermont, and the Newman Club. In addition, the Inter-Varsity Christian Fellowship, the Society of
Friends, the Christian Science College Organization, and the Church of Jesus Christ of Latter-Day Saints are also represented on campus. Students desiring information on any of these groups are referred to the office of the Consultant on Religious Programs.

**The Billings Center**  The following offices of campus organizations and activities are located here: The Director of Student Activities, Student Association, Women's Student Government Association, Panhellenic, Interfraternity Council, Student Court, Kake Walk, Cynic, Ariel and Student Photography Staff.

Billings also provides study and recreational lounges, and snack bar facilities in the Catamount Den. The major function of this multi-purpose building is to provide an atmosphere in keeping with the goals of the University for appropriate development of student activities.

**UVM Student Association**  All students enrolled in the undergraduate colleges and schools are charged a student activity fee and thus become members of the UVM Student Association. A Senate, consisting of elected officers and representatives, holds weekly meetings during the year and conducts the regular business of the association. However, the student body may be convoked by the Senate or by any group of students to hold a referendum or to conduct extraordinary business. There are many opportunities for students to participate in the work of the standing committees.

**Student Court**  The judicial authority of the Student Association is vested in the Student Court, which consists of representatives of each of the undergraduate colleges. The Court has exclusive jurisdiction in all cases concerning interpretation of the Constitution and Bylaws of the Student Association and legislation enacted in pursuance thereof. The Court hears cases referred to it by the Dean of Women, the Dean of Men or the Standing Committee on Jurisdiction.

**Women's Student Government Association**  Every woman who enrolls as an undergraduate student at the University becomes a member of the Women's Student Government Association. W.S.G.A. Council, elected by the women students, works to educate students to become self-directing individuals, to respect the rights of others, and to develop into responsible citizens of the college community.
W.S.G.A.’s primary purpose is to promote the academic success and the social development of all women students, while at the same time respecting the personality and the worth of the individual.

**HONORARY SOCIETIES**

The Boulder Society, a local senior honorary society for men, recognizes responsible student leadership. Election to this society is counted one of the highest honors that a University of Vermont man may achieve. Other honorary class societies for men are Key and Serpent, a junior society, and Gold Key, a sophomore society.

Mortar Board is a national honorary society for senior women. Though membership in Mortar Board comes as a great honor for a University of Vermont woman in recognition of outstanding service, scholarship, and leadership, it is also a challenge for continued sound and honest scholarship, and for unselfish service in the best interests of the college campus. Other honorary class societies for women are Staff and Sandal for juniors and Sophomore Aides.

The Phi Beta Kappa Society established the Vermont Alpha Chapter at the University in 1848, and initiates are chosen primarily on the basis of high scholastic standing. The local chapter was the first in Phi Beta Kappa to initiate women into membership.

The Society of the Sigma Xi, established at the University in 1945, initiates those who have proved their ability to do research in one of the sciences and, if students, who have a high scholastic standing.

Other national honorary societies include Alpha Omega Alpha, medicine; Alpha Zeta, agriculture; Kappa Delta Pi, education; Tau Beta Pi, engineering; Omicron Nu, home economics; Delta Sigma Rho-Tau Kappa Alpha, debating; Sigma Phi Alpha, dental hygiene; National Collegiate Players, dramatics; and Alpha Lambda Delta, freshman women’s scholastic; Ethan Allen Rifles, outstanding students in the Reserve Officers Training Corps; Pershing Rifles, a military fraternity.

**ATHLETICS**

An excellent program of intramural sports provides for voluntary participation by men in all classes. Competitions are arranged among fraternities, residence halls, independent groups, and individuals. A program of intercollegiate competition for men is maintained in baseball, basketball, cross-country, football, golf, hockey, rifle marksmanship, skiing, soccer, tennis, track. The athletic policies of the University are under the direction of the Athletic Council, composed of members of the faculty, the student body, and alumni. Athletic relations are maintained with colleges and universities in New England and the eastern seaboard. The University is a member of the “Yankee
Conference," which is composed of the land-grant colleges and universities in New England, of the National Collegiate Athletic Association, the New England Intercollegiate Athletic Association, and the Eastern College Athletic Conference.

The Women's Recreation Association sponsors intramural and extramural sports events for women in a variety of team sports, individual, dual and recreational activities. Through its program, WRA endeavors to provide opportunity for leadership and to encourage participation in and administration of recreational activities for all women students.

The Outing Club sponsors mountain climbing expeditions, ski trips, and other outdoor activities for both men and women students.

Fraternities and Sororities Chapters of Greek letter fraternities and sororities have long been recognized as part of the social and extracurricular life on the campus. These groups provide valuable experience for their members in the form of interfraternity athletic competition, interfraternity sings, dances, social work projects, house operation, and meal service. Fraternities and sororities are under the jurisdiction of the University Council, and policies regarding the establishment of new chapters and the operation of present groups on the campus are subject to its control. Fraternity activities are coordinated by the Interfraternity Council and sorority activities are coordinated by a Panhellenic Council. The following are active chapters of national and local fraternities: Acacia, Alpha Epsilon Pi, Alpha Gamma Rho, Alpha Tau Omega, Delta Psi, Kappa Sigma, Lambda Iota, Phi Delta Theta, Phi Mu Delta, Phi Sigma Delta, Sigma Alpha Epsilon, Sigma Nu, Sigma Phi, Sigma Phi Epsilon, Tau Epsilon Phi, and Theta Chi. Chapters of the following national sororities are represented: Alpha Chi Omega, Alpha Delta Pi, Alpha Epsilon Phi, Delta Delta Delta, Gamma Phi Beta, Kappa Alpha Theta, and Pi Beta Phi.

Kake Walk The outstanding social event of the year is the Kake Walk weekend in February. This unique celebration is UVM's gala occasion and many alumni attend annually. Festivities include a formal ball at which a king and queen are crowned, snow sculpture, and athletic events. For two nights, fraternity and independent teams compete with one another in original skits and in walking for the much prized "Kakes".

Musical Activities Opportunities for participation and appreciation are provided for students with strong musical interests. The University Choir, the University Orchestra, and the University Band appear in public presentations many times during the year.
Christmas and Easter concerts and a spring opera are regular events. Faculty, senior and monthly departmental recitals are scheduled throughout the year.

The University Band is under the guidance of a director who is a member of the music department. The band appears at military reviews, Kake Walk, football games and parades. The band also performs as a concert band in which valuable experience for students in musical education is obtained.

**FINE ARTS FESTIVAL**  A Fine Arts Festival is held each spring primarily to show student talents and work in the fine arts. Among the highlights of the Festival are exhibitions of painting, sculpture, and arts and crafts. Productions include an opera, a dance program, and student directed plays, as well as choral and orchestral concerts. Exhibitions, lectures and movies are scheduled at the Fleming Museum.

**DRAMA, DEBATING AND RADIO**  The University Players, an organization of students interested in theatre arts, offers opportunities for student participation. These include two or more full length plays, an annual opera or musical comedy, a faculty-student variety show, Readers Theatre productions, and a Drama Workshop for qualified student directors. Outstanding juniors and seniors are eligible for membership in National Collegiate Players, a national theatre honorary.

The Lawrence Debate Club provides opportunities for participation in all types of forensic activities—debate, discussion, oratory, after-dinner, and extemporaneous speaking. Members of the club appear before service clubs, farm organizations, high schools, and other groups throughout the state. The members of the club participate in more than three hundred intercollegiate debates annually with the beginners getting as extensive an experience as the veterans. The club travels to various discussion programs and to outstanding tournaments in the East. Outstanding performers receive recognition by election to Delta Sigma Rho-Tau Kappa Alpha, the national honorary forensic fraternity.

The Radio-Television Workshop operates the campus radio station WRUV and produces many radio and television programs for broadcast on both commercial and educational stations. Open to all students, it provides opportunity for participation in broadcasting activities. The Workshop produces Spotlight UVM, a weekly documentary report of campus activities; provides student interviews for hometown stations;
presents a daily newscast over a local station; and assists in the production of the university television series, *Living and Learning*.

WRUV, a student owned and operated closed-circuit station with professional equipment, broadcasts to the campus daily.

**STUDENT PUBLICATIONS** A college newspaper, literary magazine, and annual yearbook offer interested students the opportunity for journalistic, literary, and editorial expression. The newspaper, the *Vermont Cynic*, is published weekly by students. The *Ariel*, the annual yearbook, is published by members of the senior class. The annual *Freshman Record Book* for all incoming students is published by a committee of the Student Association.

**CLASS ORGANIZATIONS** The members of each freshman class form a class organization which retains its identity throughout the undergraduate years of its members and extends through subsequent years as long as there are living alumni of the class. Members of each undergraduate class elect officers each spring, except that officers elected at the end of the junior year serve through the senior year and to the end of the first reunion. Each senior class conducts the events of Senior Week.

**LIBRARY FELLOWS** This society of students, faculty members, alumni, and members of the public at large aids the libraries in carrying on various phases of their work by special contributions. Membership is open to all who are interested in books, knowledge, and the advancement of learning.
The Admission of Students

To be fully qualified for admission an applicant must have his application on file with the Director of Admissions before March 1 of the year in which admission is sought. Applications filed after this date can be considered only as curriculum and dormitory capacities allow. Forms for admission will be sent upon request. A non-refundable application fee of $10 is required of all applicants.

Admission to the freshman class is determined after careful consideration of the high school record, rank in graduating class, recommendation of the high school principal, scores on the College Entrance Examination Board Scholastic Aptitude Test and a personal interview if requested by the Director of Admissions. The Scholastic Aptitude Test should be taken in December or January of the senior year.

At least three quarters of the grades for high school courses should be at the college certifying level or higher as determined by each high school. The quality of work in the junior and senior years is especially important.

Candidates for admission are expected to present not less than sixteen units from high school. These must include:

- **English**: Four years
- **Mathematics** (as specified below): Two years
- **Foreign Language, ancient or modern**: Two years of one
- **Science**: Two years
- **Social Studies**: Two years

The two years of mathematics should be one year of algebra and one year of geometry. One year of social studies should be European or world history; or European or world geography. Students planning to enter the College of Agriculture and Home Economics should present a second year of algebra for a total of three years of mathematics. Students who plan to specialize in engineering, mathematics or science should present both a second year of algebra and a course in trigonometry for a total of four years of mathematics.
Exceptionally qualified students may in some instances be admitted even though they do not meet the above requirements in full.

Additional courses in mathematics, history, science, the fine arts and music, and a third year in the foreign language are recommended as desirable preparation for college. Students who present such courses will be given preference for admission. A student planning to major in music must arrange for an audition and interview with the chairman of the music department during the year preceding entrance.

**SCHOOL OF DENTAL HYGIENE**

Enrollment is limited to women who are eligible to enter the freshman class of the University. Attributes necessary for success are good health, emotional stability, interest in the work, and the ability to get along well with people.

**SPECIAL STUDENTS**

Special students are those who are not candidates for a degree in one of the regular curricula, or who are carrying fewer than twelve credit hours. Subject to the usual entrance requirements of the University, persons who are qualified for regular admission may, on payment of specified fees, pursue certain studies in regular college classes as special students. This arrangement is intended to accommodate those whose previous study and attainments enable them to pursue with profit special courses of study in particular departments. Students who have been dismissed for low scholarship may not re-enter as special students.

Special students intending to use courses taken for graduate credit as a basis for admission to the Graduate College at some future time must contact the Dean of the Graduate College prior to enrollment.

Special students are enrolled and registered in the same manner as regular students, and are subject to all regulations of the University. Credit for courses completed may be subsequently counted toward a degree. Special students are not eligible to hold University scholarships.

**College Entrance Examinations**

The College Entrance Examination Board will administer a series of tests during 1965 on May 1, July 14 and December 4, and in 1966 on January 8, March 5, May 7, and July 9. Complete information may be obtained from the College Entrance Examination Board, P. O. Box 592, Princeton, New Jersey.
Admission of Students

Admission to Advanced Standing

All applicants for admission who have attended another collegiate institution are required to file with the Director of Admissions and Records an official transcript of high school and college records. A confidential report from the college attended is also required.

A student who transfers to the University from another accredited college or university may be given provisional credit for all courses satisfactorily completed, provided that similar courses are counted toward graduation at The University of Vermont. Transfer credit is not allowed for work completed with grade "D" or its equivalent, unless a more advanced course in the same subject has been passed with a higher grade in the institution from which the student transfers.

The credit is provisional, pending satisfactory completion of a semester’s work at the University. The provisional transfer credits are fully granted if the student is in good standing at the end of the first semester.

Advanced Placement

The University of Vermont welcomes applications from high school students who have taken college level courses offered in their high schools under the Advanced Placement Program of the College Entrance Examination Board. Departments will review Advanced Placement examinations and the scores received in order that qualified students may not be required to repeat work already covered adequately and to permit enrollment in courses above the freshman level.

Orientation Program

Entering students are required to take the College Entrance Examination Board achievement tests in mathematics and modern foreign language in all cases where these subjects are to be continued in the student’s curriculum. The scores on all tests are used in advising students regarding the course of study and the selection of courses. New students are required to come to the campus in June for a two-day orientation and enrollment. Schedules and dates of these meetings are mailed with the Certificate of Admission. The student will plan his course program with the advice of his adviser and academic dean and complete his registration for the September opening of college.
Student Expenses

The student expenses outlined in the following paragraphs are the anticipated charges for the academic year 1965-66. Changing costs, however, may require an adjustment of these charges before the opening of college.

APPLICATION FEES An application fee of $10.00 is charged each applicant for admission to the University. (This fee does not apply to applicants to the Graduate College until July 1, 1965.)

DEPOSIT A deposit of $35.00 is required of every applicant after he has received notification of his acceptance as a student at the University. This deposit is held until he graduates or discontinues his course of study, at which time the deposit minus any indebtedness to the University will be returned to him.

An applicant to an undergraduate college who gives written notice of cancellation of an application prior to July 15 will receive a refund of $15.00.

An applicant to the Graduate College for a program beginning in July or September will receive a $15.00 refund if the Dean is notified by May 1; if the program is to begin in January, the deadline is December 1.

TUITION The tuition charges are in accordance with the following schedule.

1. VERMONT RESIDENTS
   - All Undergraduate Colleges and Divisions . $ 500.00 per year
   - College of Medicine . . . . . . . . . . . . . . . . . 550.00 per year
   - Graduate and Special Students . . . . . . . . . . . 22.00 per credit hour

2. NON-RESIDENTS OF VERMONT
   - All Undergraduate Colleges and Divisions
     Freshmen and transfers
     Sophomores, Juniors and Seniors . . . $1500.00 per year
     College of Medicine . . . . . . . . . . . . . . . . . 1500.00 per year
     Graduate and Special Students . . . . . . . . . . . 62.50 per credit hour

EXCEPTIONAL ENROLLMENTS A student taking fewer than twelve hours is enrolled as a special student.

Undergraduate students who, by reason of conditions over which they have no control, require more than four years to complete the requirements for a degree shall be charged no more than the full tuition for four years.

In the College of Medicine students allowed to repeat a year are charged full tuition for that year.
In the Graduate College a tuition fee of $25.00 per semester is charged each graduate student who has completed all course requirements but who is in residence for the purpose of completing his thesis.

**FEES FOR COURSES IN APPLIED MUSIC**

Private lessons are approximately one-half hour in length, fifteen being given in each semester. Students who enroll as regular full-time students in a music education curriculum, paying full tuition, are charged one-half the regular rates for applied music for such courses as are required in the curriculum. All others pay the scheduled charges.

One lesson a week . . . . . . . . . . . . . . $50.00 per semester
Two lessons a week . . . . . . . . . . . . . . . 75.00 per semester

**ROOM CHARGE**

Rooms in college residence halls are rented for the academic year and the prices are uniform in all residence halls. Single rooms rent for $380.00, all others rent for $335.00 per occupant per year. The residence halls are closed during the University recess periods and the University reserves the right to use student rooms to house University students in any of the residence halls during these recess periods. Nominal charges for the use of certain electrical appliances may be levied upon occupants of the residence halls. A $2.00 fee is charged each male dormitory resident to be used for the Residence Halls' activities program.

A payment of $50.00 is required by April 15 from each student returning to a University residence hall to hold a room reservation for the next year. If written notice of cancellation is received before July 1, the $50.00 charge will be refunded.

The University has established procedures under which it will assist fraternities by collecting room rents from their resident members.

**BOARD**

All students who live in a University residence hall are required to have meal contracts for twenty meals per week at a cost of $440.00 per year. Women living on the Redstone campus take their meals in the Simpson and Wright dining rooms; the men at Marsh, Austin, and Tupper take their meals in the Marsh dining room; and the women in Allen and the men in Buckingham, Chittenden, Converse and Wills take their meals in the Waterman dining hall. Members of a university fraternity which provides meal service may contract for that service with their fraternity.

**LIBRARY FEE**

A Library fee of $30.00 per year is charged to all full-time students except those registered in the College of Medicine. Special and unclassified students enrolled in less than twelve hours but more than three hours will be charged a fee of $15.00 per year. Special and unclassified students enrolled in three hours or less are not subject to the library fee.

**ATHLETIC FEE**

An athletic fee of $30.00 per year is charged to all full-time students. Students have the privilege of using the facilities in the gymnasium at scheduled times and have free admission to intercollegiate home games.
STUDENT ACTIVITY FEE All students who are enrolled in twelve semester hours or more in the College of Arts and Sciences, Technology, Agriculture and Home Economics, Education and Nursing, and the School of Dental Hygiene are charged a fee of $7.50 per semester. This fee is assessed and allocated by Student Association toward the support of student organizations and student activities. First-year medical students who enter the College of Medicine after three years in the College of Arts and Sciences are charged this same fee.

Graduate students, special students, and students in the College of Medicine may, by paying this fee, become entitled to the benefits listed above.

MEDICAL STUDENT ACTIVITY FEE All students in the College of Medicine are charged a fee of $10.00 per year. This covers the cost of the medical year book and other student activities.

PENALTY PAYMENT Failure to complete financial arrangements and registration by specified dates will result in a penalty of $10.00.

CHANGE OF ENROLLMENT FEE A fee of $3.00 is charged, except in the College of Medicine, for any change of enrollment requested by the student concerned. Deans may waive this fee in exceptional cases.

ADVANCED DEGREE FEE A fee of $25.00, payable during the semester prior to graduation, is charged degree candidates in the Graduate College. This fee includes the cost of thesis binding and the academic hood.

Estimated Expenses Per Year

Estimated expenses (excluding transportation, laundry and spending money), based on the regular tuition for undergraduate students include the following:

Payment of Bills

All fees and tuition for the semester (one-half of the above yearly total) are payable upon notification and not later than at the time of registration. Checks should be made payable to The University of Vermont. The University reserves the right to withhold all information regarding the record of any stu-

² Engineering students add about $10 for instruments. Dental hygiene students add about $200 for instruments and uniforms. Nursing students should add about $225 for uniforms and special equipment.
dent who is in arrears in the payment of fees or other charges including student loans.

**TIME PAYMENT** The University of Vermont offers a time payment plan to students or parents wherein, after arranging with the Treasurer's Office, the total charges for a semester may be divided into six equal monthly payments beginning with July 1 for the first semester and January 1 for the second semester. By June 1 the total charges for the year are paid in full. There is a small service charge for this arrangement.

**Refunds**

In the event of withdrawal from college, refunds are made as follows:

1. During the first week of any semester the full tuition is refunded. Thereafter 20 percent of the tuition is deducted for each week that has elapsed.
2. No refund is made of the student fees.
3. Refund of board is made on a pro rata basis.
4. No refund is made of room rent.
5. Contracts for rooms are canceled for the remainder of the year for all students not enrolled for the second semester.

**Banking Facilities**

An arrangement with the Howard National Bank and Trust Company of Burlington enables students to open and maintain regular checking accounts through the University Cashier's Office. Applications for new accounts, deposits to individual accounts, and orders for checkbooks are accepted during office hours in the Cashier's Office. The bank's normal charge of 12½¢ per check is made for this service. The Cashier's Office cashes small personal checks for students in good standing on presentation of a current student identification card.

**Financial Aid**

Many worthy and deserving students are unable to meet college expenses and for them the University provides, so far as its resources permit, aid in the form of scholarships, loans, and employment. The extent of need and the type of financial assistance which can be awarded is determined by the Director of Financial Aid.

New students should request application forms for aid from the Director of Admissions, the Director of Financial Aid, or from their principal if they are attending a Vermont high school. All applicants for financial assistance must submit a Parents' Confidential Statement to the College Scholarship Service in addition to the application for financial aid. These forms may be obtained from the local high school principal.

Applications for students entering the University should be filed before March 1. Only in cases of emergency will applications after that date be considered.

A complete list of scholarships and loan funds will be found on page 233. A brochure presenting in more detail the types of aid available may be obtained from the Financial Aid office.
General Information

Definition of "Vermont Resident"

The following rules of residence, adopted by the Board of Trustees on October 18, 1952, are used in determining a student's eligibility to benefit from the reduced tuition rate for residents of Vermont.

1. A student who is of age when he first enrolls in the University shall be deemed to be a Vermont resident if, and only if, he had his domicile in Vermont for a period of one year next preceding his first enrollment in the University, except as otherwise provided by these rules.

2. A student who is a minor when he first enrolls in the University shall be deemed to be a resident of Vermont, if, and only if, his parents had their domicile in Vermont for one year preceding his first enrollment at the University, except as otherwise provided in these rules.

3. A student, who, at the time of his first enrollment at the University, has his domicile fixed by a special rule of law (as a student under guardianship, a married woman, etc.) shall be deemed to be a resident of the State of Vermont if, and only if, the governing rule of law made Vermont his residence for a period of at least one year preceding his first enrollment.

4. In all cases in which a nonresident student claims that he has become a resident of the State of Vermont by reason of the application of a special rule of law (resulting from the appointment of a guardian, marriage of a woman student, etc.), the circumstances claimed to have made the student a resident must have taken place at least one year prior to the next regular student enrollment. In all such cases, the new resident status of the student shall take effect at the time of the next regular enrollment.

5. Whenever a resident student shall lose his Vermont domicile (as in the case of a minor whose parents move from the State and excepting women who marry nonresidents), the student shall immediately be reclassified as a nonresident.

6. It shall be incumbent upon any student whose status changes from resident to nonresident, to inform the dean of his college, or the Registrar, promptly, of the facts relating to his residence.

7. The burden of proof shall, in all cases, rest upon the student claiming a residence of the State of Vermont.

8. The Board of Trustees may, whenever justice requires, make exceptions to these rules.

The Committee on Residence has been authorized by the Board of Trustees to consider exceptions as stated in rule 8 above. Appeals from the decision of the committee may be made to the Board of Trustees.

Application for change of residence classification should be made to the Director of Admissions and Records, who is chairman of the Committee on Residence.

Academic Discipline

CONDUCT  The general principle governing the conduct of students is set forth in the following "ancient law" of the University:

The conduct of the students toward all men is to be regulated by those plain rules of politeness, honor, and religion which are binding on every free and virtuous community. They are to conform to every requirement of the faculty, which may arise from their relations as instructors,
counselors and guardians, and as upright men and good citizens they shall use all lawful exertions to prevent and expose all violations of the laws of God and of the country, and whatever is at variance with the objects of the University.

Toward this end, the University expects each student to maintain high standards of personal conduct and social responsibility at all times both on and off campus. All students, as responsible citizens, are required to observe and to share in the support of all local, State and Federal regulations. Any student who fails to uphold these standards is subject to disciplinary action by the University.

The disciplinary authority of the University is vested in the President. In such cases as he considers proper, this authority may be delegated to the several deans and to appropriate judicial bodies. The continuance of each student at the University, the receipt by him of academic credits, his graduation and the conferring of any degree or the granting of any certificate are strictly subject to the disciplinary powers of the University. The University is free to cancel his registration at any time on any grounds, if it considers such action to be for the welfare of the institution.

University students are referred to the booklet *Privileges and Regulations for Students* in which University rules concerning discipline and academic procedures are given in detail. Each student is responsible for knowledge of these.

Reserve Officers' Training Corps

The mission of the Army ROTC is to produce qualified leaders with the training and attributes essential to their progressive development in the United States Army as reserve officers or as career officers. The objective is to prepare college students for positions of responsibility commensurate with their education.

The University offers Military Science as an important contribution to national defense. The U. S. Army ROTC is a recognized part of the University’s organization, and all qualified male students are encouraged to satisfy in part, their military obligation under the Universal Military Training and Service Act by participating in the program on a voluntary basis.

The Military Science curriculum is designed to provide a basic education in military subjects and to develop the leadership potential of the student. Instruction is given in subjects common to all branches of the Army with emphasis on national security policy, military technology, U. S. military history, military management, logistics, instruction, and the exercise of command. Qualified graduates are commissioned as lieutenants of armor, army security and intelligence, artillery, engineers, finance, infantry, medical service, signal, ordnance, quartermaster, transportation, or other branch, depending upon aptitudes, the individual’s choice, and the needs of the Army.

Optional Programs Two programs are offered: (1) A four-year program comprising 90 hours of classroom and laboratory work per academic year during the freshman and sophomore years (basic course)
and 120 hours during the junior and senior years (advanced course). (2) A two-year program (advanced course) identical to the junior and senior years of the four-year program, with the following prerequisite: a student who wishes to enroll in the two-year program is required to attend a six-weeks' ROTC basic summer camp at one of the five U. S. Army Basic Training Centers located regionally throughout the United States. Basic camp pay is approximately $117.00, plus travel and major living expenses.

Advanced course students become members of the Army Reserve during the period of enrollment, receive $40.00 a month retainer pay during the junior and senior years, and are required to attend a six-weeks' advanced ROTC summer camp at Fort Devens, Massachusetts, at the end of the junior year. Summer camp pay for advanced course students is approximately $180.00, plus travel and major living expenses. The advanced course camp may be deferred for one year for cogent reasons when approved by the department.

ROTC SCHOLARSHIPS Students motivated toward a career as an Army officer may qualify for one of the 5,500 Army ROTC scholarships authorized by Public Law 88-647 (ROTC Vitalization Act), providing full payment of tuition, books, laboratory fees, and similar educational expenses, plus $50.00 a month retainer pay. Grants are made on a competitive basis for a two-year or a four-year period, but are contingent on enrollment in the four-year ROTC program. Student agrees to serve on active duty for four years.

ADVANCED PLACEMENT With the concurrence of the Military Science Department, advanced placement may be granted for equivalent training as substantiated by a military training certificate issued by an accredited military or secondary school.

UNIFORMS Uniforms are furnished without cost to each student enrolled in the basic course. A student enrolled in the advanced course receives a uniform allowance credit of $100.00 which is ample to defray the cost of his uniform. Upon graduation he receives a uniform allowance of $300.00 which is ample to meet the initial cost of uniforms required of an Army officer on active duty.

FLIGHT TRAINING PROGRAM The Army ROTC Flight Training Program is open to qualified seniors. It is designed to train a reserve pool of Army aviators and affords students the opportunity to qualify for a Federal Aviation Agency private pilot's license. On-campus ground and flight instruction under FAA licensed instructors is provided without cost.

DISTINGUISHED MILITARY STUDENTS Members of the senior class, including ROTC scholarship students, who have demonstrated outstanding motivation toward a military career, and whose academic standing is well above average, may be designated Distinguished Military Students and offered a commission in the Regular Army.
GENERAL INFORMATION

Postgraduate Deferral

Upon graduation, ROTC students are normally commissioned as officers in the U. S. Army Reserve and agree to serve on active duty for two years, subject to call to such duty. However, active duty may be deferred for as many as four years for those who wish to pursue an advanced degree while studying as full-time graduate students.

Physical Education

Two years of physical education, normally completed during the freshman and sophomore years is required of all undergraduate students. Medical examinations are required of all new students. Those with serious defects may be given restricted work or may be excused by the Director of Student Health. Students twenty-five years of age or older are exempt from physical education requirements. The semester hours listed for physical education are in addition to the total number of hours required for graduation in a specific curriculum.

University Responsibility

Many courses involve instruction in and the use of various types of power equipment, laboratory apparatus, and specialized facilities. The University takes every precaution to provide competent instruction and supervision of such courses. It is expected that students will cooperate by following instructions and exercising precaution. In case an accident does occur resulting in personal injury, the University can assume no responsibility except for medical care that is provided by the Student Health Service.

Student Health Insurance

Through an arrangement with the Vermont Accident Insurance Company, students are able to procure a policy providing for payment up to $500.00 for each accident and each illness. The cost for one year's coverage is $23.00 for men and $21.00 for women. Further details may be obtained from the Treasurer's Office.

Enrollment and Registration

Every student is required to enroll and register at the time and in the manner designated by the Registrar. All charges for the ensuing semester must be paid, or otherwise provided for, before registration is complete.

Changes in Enrollment

Any changes in enrollment must be authorized by the dean of the college in which the student is registered. A student may add a course only during the first week of classes, but may drop a course without academic penalty during the first three weeks of classes. Change of enrollment forms are obtained from the office of the dean of the college.

Auditing Courses

With the approval of the Dean and the instructor concerned, a regularly enrolled student carrying a normal program may audit a course. Others who do
not wish to receive credit, or who have not met admissions requirements, may also register as auditors. Auditors have no claim on the time or service of the instructor, the course is not entered on the permanent record, and no grade credit is given for the work. For students paying full tuition, no additional charge is made; for all others, tuition is charged at the applicable rate. Under no circumstances will a change be made after the enrollment period to allow credit for courses audited.

The approval of the Director of the Evening Division and Summer Session is necessary for auditing courses in those divisions.

Undergraduate Degree Requirements

Degrees are conferred on the recommendation of the several colleges, and specific requirements will be found in the sections devoted to the respective colleges.

In addition to the course requirements of the several curricula, students must also fulfill the general requirements in physical education.

To be eligible for graduation, a student must have attained a grade average of 72 or above in the work required for graduation in his curriculum. Grades in courses accepted for transfer credit are excluded in computing this average.

To be eligible for a degree, a student must have completed eight semesters or the equivalent as a full-time student. Every candidate for a degree is required to have taken 30 of the last 42 semester hours of credit in residence at the University, except that those who have completed three years of premedical study in the University are awarded their degrees after successful completion of one year of study in any approved college of medicine. Courses taken in the regular session or in the summer session at the University are counted toward residence.

Exceptions to this rule may be made in special cases by the University Council.

To qualify for a second bachelor's degree the candidate must have fulfilled all the requirements for the degree and must have taken a full year of work in addition to that taken to qualify for the first degree.

Honors

The Bachelor's degree may be conferred with honors, by vote of the Senate, in recognition of general high standing in scholarship. Three grades are distinguished and indicated by inscribing on the diploma the words *cum laude*, *magna cum laude*, or *summa cum laude*. In the College of Medicine, the five students who have attained the highest average of marks during the entire four years' course are graduated *cum laude*. The names of those who receive these honors and of those who win academic awards are printed in the commencement program.
Dean's List

The deans of the undergraduate colleges publish at the beginning of each semester the names of those students who have attained an average of at least 85 in their college credit courses during the preceding semester.

Grades and Reports

Scholarship is graded on a percentage scale. Grades are reported and recorded numerically. The minimum passing grade in the undergraduate college is 60; any grade lower than 60 represents a failure and indicates that the course must be repeated if credit is to be obtained.

All students enrolled in the undergraduate colleges receive reports of scholarship from the Registrar after the close of each semester. These reports are also sent to the parent or guardian of each freshman student and to the principal of the secondary school from which he was graduated. Reports of upperclass students are sent to parents only upon request. Special reports of low standing are sent by the deans' offices about the middle of each semester, both to the students concerned and to the parents or guardians.

Each student, former student or graduate student may procure one photocopy transcript of his record without charge. For additional orders the charge is one dollar when one transcript is ordered. When more than one transcript is ordered at a time, the charge is one dollar for the first copy and fifty cents for each additional copy.

Use of English

Correct English usage is demanded by all departments in the University. Written work of any kind which is unsatisfactory in manuscript form, grammar, punctuation, spelling, or effectiveness of expression may be penalized, regardless of contents. Students whose written work falls below the standard of correct usage may be remanded to the English department for additional instruction, even though the freshman course in English has been passed.

Before they may be admitted to the University, foreign students must offer evidence that they are capable of reading and writing English on the college level.
The College of Agriculture and Home Economics performs four public functions: it teaches resident students; it investigates problems; it disseminates information; it renders related services. These four areas of work are performed respectively by the resident instruction division; the research division, or Vermont Agricultural Experiment Station; the extension division, or Vermont Agricultural Extension Service; and the Related Services Division.

The resident instruction division offers professional curricula in agriculture, agricultural engineering, and home economics and, in addition, two-year programs in forestry and preveterinary science. The curriculum in agriculture leading to the degree of Bachelor of Science in Agriculture provides a variety of options. The curriculum in agricultural engineering offered in cooperation with the College of Technology leads to the degree of Bachelor of Science in Agricultural Engineering. Young women may earn the degree of Bachelor of Science in Home Economics by selecting one of several options. The two-year preveterinary program prepares students for admission to other institutions for professional training. Forestry students complete their last two years at the University of Maine.

Most options in the College of Agriculture and Home Economics leading to the Bachelor of Science degree require 130 semester hours of prescribed and elective courses, plus credit for required courses in physical education. The Agricultural Engineering Curriculum requires 142-145 semester hours of prescribed and elective courses. Normally fifteen to eighteen credit hours of courses exclusive of courses in physical education constitute a semester program.

In each field certain courses are prescribed, with allowance made for the election of additional courses, to provide a well-balanced and integrated educational program and to insure reasonable concentration. Faculty advisers counsel students in the selection of elective courses and other educational problems.

A student may transfer from one curriculum, option or program in the College to another, provided the course requirements established for the curriculum, option or program are satisfied. Arrangements may be made for transfer within the College through counsel with the student's faculty adviser.
The Honors Program

This program of the College of Agriculture is designed to help the superior student. It is intended to provide an environment for such students which will insure that they are constantly challenged by the most advanced work their talents will allow. It is assumed that honors students will have mastered more subject matter upon graduation than other graduates.

Such students are selected on the basis of their academic performance usually as second semester freshmen or during the sophomore year. Their curricula are developed in consultation with an honors committee and are relatively free of the customary restrictions. Special colloquia or consultations may be arranged in lieu of regular class work. Prerequisites may be waived and in general the student is encouraged to work as an individual.

The Curriculum in Agriculture

This curriculum leading to the degree of Bachelor of Science in Agriculture provides the following options:

- Agricultural economics
- Agricultural education
- Agronomy
- Animal and dairy science
- Botany
- Dairy industry
- Foreign agricultural economics
- Horticultural science
- Poultry science
- General agriculture

Every candidate for this degree must fulfill the requirements stated below, and present a total of 130 semester hours of credit plus credit for required courses in physical education.

Courses Required of All Students

A. Four semesters in English.
   Two semesters in Mathematics, or five credit hours.
   One semester in Speech.

B. Four semesters in physical and biological sciences: Chemistry, Physics, Geology, Botany, Zoology.

C. Social Sciences and Humanities
   a) Five semesters taken in at least three of the following:
      Economics and Agricultural Economics;
      Political Science;
      History;
      Geography;
      Sociology and Anthropology;
      Psychology.
   b) Two semesters chosen from the following:
      Philosophy; Religion; Music; Art;
      Literature in addition to any taken under A above;
      Foreign Language above the elementary level.

D. Four semester courses in the College of Agriculture and Home Economics, outside the field of concentration and not included in the option requirements.

E. Option requirements. Each student must choose one of the options listed above. Specific courses to be taken in each option are listed in the description of each option on pages 59-67. These prescribed courses, where applicable, can be used to fulfill, wholly or partially, the requirements under B and C above. Additional departmental courses, support
ing courses, and electives to fulfill the general requirements are chosen in consultation with
the student's adviser or the department chairman.

The Freshman Year

Every candidate for the degree of Bachelor of Science in Agriculture is
required to enroll in a uniform freshman year as follows:

Department Options and Requirements

AGRICULTURAL ECONOMICS is a study of the economic and business phases of
agriculture and the rural economy. Most students completing work in this option select one of four concentrations:

1. Agribusiness and Marketing: Businesses furnishing capital and supplies to farmers or
   providing market facilities for farmers.
2. Farm Management: The management of farm business operations for profit.
3. Education and Services: Aid in solving economic problems relating to agriculture and
   the rural economy is provided by extension workers, company fieldmen, salesmen, regulatory
   officials, and others.
4. Area Development: Changing resource use to meet regional economic developments re-
   quires an increasing number of students who understand principles of area development and
   resource management.

Required courses: Each student majoring in agricultural economics must satisfactorily complete thirty hours of credit in agricultural economics or gen-
eral economics; twenty-one hours of which must be in agricultural economics. All courses must be selected in consultation with and have the approval of the
student's departmental adviser.

AGRICULTURAL EDUCATION This option prepares students to teach vocational
agriculture to high school pupils, young farmers
and adult farmers in the community. The program prepares individuals to serve
as advisers to local FFA chapters and Young Farmer Associations in their role
of developing leadership and citizenship abilities in these organizations.

Students completing this option may pursue many of the professional agri-
cultural careers in commercial concerns, government agencies and foreign
services in agricultural education.

Students are prepared to enter graduate programs in agricultural education
leading to employment by technical agricultural schools, colleges or depart-
ments of education.

Required courses: Each student majoring in agricultural education must sat-
sfactorily complete twenty hours of credit in agricultural education. Additional courses to be selected by the student in consultation with and with ap-
proval of his departmental adviser.

AGRONOMY The field of agronomy encompasses the applied science of grow-
ing crops along with the fundamental aspects of soil science and
plant nutrition. The agronomy curriculum is designed for the student who
THE COLLEGE OF AGRICULTURE

wishes to achieve a general knowledge of crops and soils as well as the student who wishes to become a specialist in one of the agronomic sciences. In either case, he will receive a broad preparation in the physical and biological sciences basic to scientific agriculture. The course of study also allows a wide selection of electives in related fields.

Upon completion of four years' study, agronomy majors are well qualified for graduate work in agronomy or in related fields of biology. With a Bachelor's degree, the agronomy graduate has available a wide array of careers in government work or industry in areas such as fertilizers, weed control, seed marketing, crop production, conservation, and soil survey. Graduates may enter educational fields or engage in commercial farming.

Required courses: These are to be selected in consultation with the adviser and may be chosen to fit either a soils or crops emphasis. Seventeen hours of agronomy are required for an agronomy major. In addition to these, course work for students electing the soils emphasis generally will include organic and quantitative chemistry, geology, plant physiology, physics, microbiology, and biochemistry. For the crops emphasis, advanced botany courses may be substituted for one or more of these courses. Particular importance will be placed on the basic sciences and mathematics of students contemplating graduate study.

ANIMAL AND DAIRY SCIENCE Option 1, Animal and Dairy Production, provides technical and practical instruction in the field of animal science with emphasis on the selection, breeding, nutrition, and management of farm animals. It prepares the graduate for the operation of dairy farms and other livestock enterprises; for field work with federal and state extension services, breed associations, farm organizations and various commercial companies concerned with the animal sciences; for positions in industries related to the processing and sales of dairy products and meats, feed and grain companies, dairy equipment and supply agencies; and for advanced study.

Option 2, Dairy Industry, provides technical and practical instruction to prepare the graduate for positions in either dairy technology or dairy plant management. It prepares the individual for supervisory and management positions in the dairy industry; for quality control work in the dairy industry and allied fields; and for advanced study.

Required courses: Satisfactory completion of eight semester courses in animal and dairy science, including at least five of advanced standing. Additional courses to be selected by the student in consultation with the department in order to place the desired emphasis on the student's special field of interest.

BOTANY Botany is that subdivision of biology which is the foundation of the various branches of plant science, whether theoretical or applied. Students from both the Colleges of Agriculture and Arts and Sciences may select the botany option. The student receives general instruction in the physical and biological sciences while obtaining a liberal education. Such an undergraduate experience can be applied to many fields of future endeavor. A student takes beginning and general botany and physiology as prerequisite to four advanced courses. These courses are selected depending on the student's interest in any one of the fields which constitute botany. In these courses he is intro-
duced to ideas, technics and appropriate modern scientific apparatus. Students have a variety of choices open to them upon receiving the bachelor's degree. Some go directly into agriculture, government services, applied research, or biology teaching in the secondary schools. Others enter professional schools or graduate school to prepare themselves for more advanced positions.

Required courses:

- Botany 1
- Botany 103
- Chemistry 131, 132
- Physics 1-6
- Zoology 1

Three additional semester courses in botany. Six credit hours foreign language above the elementary level.

**FOREIGN AGRICULTURAL ECONOMICS** This option is designed to prepare students for opportunities in the vast field of foreign service with particular emphasis on agriculture. Positions available to graduates include those with commercial concerns engaged in foreign trade in agricultural products, with the agencies of the federal government engaged in world-wide activities, and with the international organizations contributing to the solution of world agricultural problems. Graduates are well qualified to enter graduate school.

Required courses:

- Agricultural Economics 2
- Agricultural Economics 201-202
- Agricultural Economics 207
- Agricultural Economics 208
- Agricultural Economics 281, 282
- Agricultural Education 102
- Economics 11-12
- Economics 187,188
- Economics 205
- Political Science 11, 12
- Political Science 51, 52

World Food and Agriculture
- Farm Management
- Agricultural Marketing and Prices
- Agricultural Policy
- Seminar
- Extension Methods
- Principles of Economics
- Elementary Statistics
- International Trade and Finance
- Introduction to Political Science
- International Relations

Twelve credit hours in sociology, anthropology or psychology. Six credit hours foreign language above the elementary level.

**HORTICULTURAL SCIENCE** Horticulture is a major division of agriculture. It concerns the art and science of growing, handling, processing, and storing of fruits, vegetables, flowers, and ornamentals, as well as the field of landscape design. Horticulture is one of the rapidly developing sciences in the world today.

The horticultural science option is designed to give students a broad general knowledge as well as to prepare them for graduate study in horticulture and related fields in biology. Students majoring in this option will receive instruction in the basic physical and biological sciences as well as being able to select electives in related fields. Excellent opportunities for qualified horticulturists exist in government, teaching, extension, production, marketing, and industry.

Required courses: Each student majoring in horticultural science must satisfactorily complete horticultural science 52, 281, 282 and at least twelve addi-

The College of Agriculture

tional hours of horticultural science at or above the 100 level. Required courses in other areas include general soils, plant physiology, organic chemistry, physics and genetics. Additional courses to suit the student's individual needs will be selected in consultation with his adviser. For students preparing for graduate work, studies in the basic sciences will be emphasized.

Poultry Science

This option provides formal training in the theory and practice of poultry science and technology. The phases that may be emphasized are nutrition, physiology, production, marketing technology, incubation and hatchery management. This prepares the student, depending upon curriculum emphasis, for graduate work or positions in poultry or related fields in the areas of resident teaching, extension, research, or industry.

Required courses: Four semester courses plus two semesters of seminar in poultry science. Other courses from supporting disciplines to be selected in consultation with the student's adviser and approved by the department chairman. Such a program is designed to be flexible and allow the student to meet his needs and desires.

General Agriculture

This option is designed for students wishing to return to farming, to become farm managers, to enter off-farm occupations in agriculture; for those seeking a general rather than a specialized knowledge in the field of agriculture; for those desiring to prepare for county extension work. Through the proper selection of electives, a student may choose a field of concentration in agriculture, and at the same time select courses that contribute to a liberal education.

Required courses: Each student majoring in general agriculture must satisfactorily complete twenty-four hours in the College of Agriculture and Home Economics. All additional courses must be selected in consultation with and have the approval of the departmental adviser.

The Pre-veterinary Program

This program offers preparation for entrance to colleges of veterinary medicine. Adjustments of individual programs may be made to meet the requirements of different colleges. Students completing the prescribed courses with good grades and suitable qualifications may expect consideration for admission to veterinary colleges. Six months of experience after the age of fourteen years on a farm with a variety of livestock is an important qualification for admission to some veterinary colleges. Opportunities are available for graduate veterinarians in general practice, the armed services, public health, teaching and research, and federal, state and municipal disease control work. Two years of work, totaling at least 60 semester hours, plus training in physical education, are required.

The Agricultural Engineering Curriculum

The curriculum in Agricultural Engineering leads to the degree of Bachelor of Science in Agricultural Engineering. It provides fundamental training in engineering similar to that provided by the engineering curricula in the College of Technology. In addition, it provides specialized training in the several subdivisions of agricultural engineering. The curriculum, the teaching staff, and the course content are approved jointly by the College of Technology and the College of Agriculture and Home Economics.

The graduate is prepared for professional engineering work in soil and water control, agricultural machinery and equipment, agricultural structures, the application of electricity and refrigeration to agriculture, and rural water supply and sanitation. The program prepares the student for advanced study in agricultural engineering.

Employment opportunities exist in government agencies and schools; in manufacturing plants, utility companies, insurance companies and processing plants; in contracting, selling, farming, consulting, and many other types of work which demand college training in engineering or agriculture.

The specific courses required for graduation are given below. The elective courses must be chosen so as to fulfill the requirements on page 90, entitled Humanistic-Social Studies for Engineering Students.

Normally, a student who has a good record in high school mathematics, which includes two years of algebra, one year of geometry and a half year of trigonometry, and who qualifies in the placement test in mathematics may enroll in mathematics 11 during the first semester and mathematics 12 during the second semester; these students graduate with 142 semester hours of credit. Students who do not qualify for mathematics 11 will enroll in mathematics 9 during their first semester and 11 in their second semester, but the graduation requirement is then 145 semester hours.

The Forestry Curriculum

The program provides the first two years of study in a four-year forestry curriculum. The last two years of scientific, cultural, and professional education must be taken at an institution that confers the degree of Bachelor of Science in Forestry or Wildlife Management. Special arrangement with the University of Maine permits Vermont resident students in good standing to continue their forestry education at that university after completion of the two-year program. They will receive full credit for all courses passed and they will pay the same tuition as resident students in Maine. Transfers may be made to other institutions under the usual conditions. Nonresident students enrolled in this program complete their last two years as transfer students to the University of Maine or to any other forest school of their choice.

The curriculum at the University of Maine, beginning with the junior year, provides for concentrations in general forestry, forest management, forest utilization, forest science (tree growing or wood technology), wildlife land management, and wildlife science. Immediately following the junior year forestry students take a one-week field trip to experimental forests in New England before the eight weeks instruction at the summer camp. Wildlife students study ecology at the summer camp for one week before the eight weeks of instruction at the summer camp.

Professional forestry prepares men to manage large and small public woodlands for timber production and use; to manage wildlife areas; for technical and managerial work in the wood-using industries; for positions in the United States Forest Service, Wildlife Service, National Park Service, Soil Conservation Service, and other federal and state agencies; for research and teaching; and to function as private forestry consultants.

### Curriculum in Home Economics

The curriculum leading to the degree of Bachelor of Science in Home Economics provides a liberal education in the humanities and sciences and in subject matter related to home and family with concentration in a professional area of home economics. Specialization is provided through one of five options.

Candidates for the degree must present 130 semester hours of credit including the requirements for the option selected and required courses in Physical Education. Elective courses allow a student to pursue a special area of interest for the completion of the degree requirements.

### Options in Home Economics

**Clothing, Textiles and Related Art**  This option provides the opportunity for study in the field of fashion, textiles and design for clothing and the home. By the addition of selected courses to meet individual needs and goals the option can be used effectively as preparation for careers in merchandising, consumer research and counseling, the clothing and textile industries, writing, radio, television, and extension services. The program also provides a strong background for further work leading to careers in fashion illustration and textile designing. Graduate work will be necessary for jobs at certain levels, such as college teaching and textile research.

- English, 12 credit hours
- Basic Speech or Public Speaking, Speech 1 or 11
- European Civilization, Hist. 11, 12
- The Cultures of Man, Soc. and Anthrop. 21
- General Psychology, Psychology 1
- Principles of Economics, Econ. 11, 12
- Laboratory Science, three semester courses to include: Chemistry 3 and 4 or 1, 2 and 131
- Home Economics, 1, 21, 22, 45, 51 or 54, 65, 71, 73, 83, 101, 120, 123, 130, 137, 151, 153, 163, 182, 221, 230

**Education—Teaching and Extension**  This option provides a background which prepares students to teach home economics to elementary, junior and senior high school students and adults in Vermont and may be planned to meet requirements of other states. Students must have a 75 average in their home economics subjects to be eligible for student teaching during their senior year.
Through appropriate selection of courses, this option also prepares for Cooperative Extension work as Home Demonstration Agent, 4-H Agent or Specialist.

**English, 12 credit hours**

- Basic Speech or Public Speaking, Speech 1 or 11
- History or Political Science, 6 credit hours
- The Cultures of Man, Soc. and Anthrop. 21
- General Psychology, Psych. 1
- Principles of Economics, Econ. 11, 12
- Outline of Chemistry, Chem. 3-4
- Home Economics, 1, 21, 22, 43, 51, 54, 63, 73, 83, 101, 130, 135, 137, 139, 144, 151, 153, 163, 204
- Home Nursing, Nursing 7

**Professional Education Courses:**

- Home Economics Education, 17 credit hours
- General Education, 3 credit hours

**FAMILY LIVING—HUMAN DEVELOPMENT** This option prepares men and women in two areas of concentration: Preschool Education—Human Development, and Preprofessional Social Work.

Professional opportunities are found as preschool staff members, family consultants and in work with hospitalized children. The Preschool Laboratory provides opportunity for a multidisciplinary study and experience in human development and family relations.

Preprofessional Social Work is available to students enrolled in any college of the University. It may be elected as a field of study in Home Economics or may be combined with a major in another University department. Opportunities are provided for both field observation and experiences. The concentration in Preprofessional Social Work for students from other colleges is based on a broad Liberal Arts program including courses in sociology, psychology and human development, political science, history and economics.

A student in this area may affiliate at the Merrill-Palmer Institute, Detroit, Michigan, for one semester. The cost of this semester, including transportation, is comparable to the cost of one semester at the University of Vermont.

**English, 12 credit hours**

- Basic Speech or Public Speaking, Speech 1 or 11
- History or Political Science, 6 credit hours
- The Cultures of Man, Soc. and Anthrop. 21 and the Family, Soc. and Anthrop. 51
- General Psychology, Psych. 1, and Personality, Psych. 106
- Principles of Economics, Econ. 11 and 12
- Mammalian Anatomy and Physiology, Zool. 5-6
- Home Economics, 1, 21, 22, 43, 51, 61, 63, 65, 67, 101, 137, 144, 151, 153, 163, 164, 170, 172, 263, 264

**FOOD AND NUTRITION** This option prepares students for positions in the fields of food testing and promotion, food service management and food demonstration. Academic requirements for membership in the American Dietetic Association are met. Those students interested in careers as administrative, therapeutic or clinic dietitians are advised to plan on an internship after completing their undergraduate program. Course work is planned to give a strong background for graduate study which will qualify the student
for positions in college teaching, extension service, research or public health nutrition.

Men find many opportunities in the fields of food and nutrition. They may prepare for them through this program, from which they omit Home Economics 63, 101, 153, 204.

English, 12 credit hours
Basic Speech or Public Speaking, Speech 1 or 11
History or Political Science, 6 credit hours
General Biochemistry, Agric. Biochem. 201
Mammalian Anatomy and Physiology, Zool. 5-6, or Introduction to Zoology, Zool. 1, and Physiology, Zool. 52
Introductory Microbiology, Bot. 55
The Cultures of Man, Soc. and Anthrop. 21
General Psychology, Psych. 1
Home Economics, 1, 21, 43, 54, 63, 83, 101, 135, 137, 151, 153, 163, 186, 187, 204, 243

Additional courses to meet academic requirements for American Dietetic Association Internship:

Area of Concentration:

*Therapeutic and Administrative Dietetics*
- Commerce and Economics, 251
- Education, 7 or 202
- Home Economics, 244 and 288

*Food Service Administration*
- Commerce and Economics, 13, 14, 141, 251
- Home Economics, 288

*Sciences—Foods and Nutrition*
- Education, 7 or 202
- Home Economics, 236, 238 or 244, 246 or 248

**HOUSING AND HOME MANAGEMENT** Professional careers in this option include work with public utility home service departments, magazines, newspapers, radio and TV. Students may prepare to become interior designers, consultants in homemaking rehabilitation, directors of homemaker services, housing managers or researchers in housing design, materials, furnishings or equipment.

Graduate study in this field prepares for college teaching and work as an Extension Specialist in Housing, Home Furnishings, Equipment, Home Management, Family Economics, Consumer Education.

English, 12 credit hours
Basic Speech or Public Speaking, Speech 1 or 11
History or Political Science, 6 credit hours
The Cultures of Man, Soc. and Anthrop. 21
General Psychology, Psych. 1
Principles of Economics, Econ. 11, 12 and Principles of Marketing, Econ. 121
Laboratory Science, 8 credit hours
Home Economics, 1, 21, 22, 43, 51, 54, 63, 83, 101, 130, 137, 151, 153, 163, 204, 105 or 106 or 230
The College of Arts and Sciences.

The College of Arts and Sciences aims to provide for young men and women the means and opportunity of fitting themselves intellectually, emotionally, and spiritually to play a responsible part in the world of thought and action.

It devotes itself to the inculcation of ideals and the cultivation of ideas. It seeks to encourage habits of clear, independent thinking and effective expression; to stimulate an appreciative understanding of the thought and achievement of man; to develop sound critical judgment and a spirit of tolerance; to arouse the intellectual curiosity which is the basis of continuing self-education.

Its fundamental purpose is to install the courage and conviction to exemplify the enduring values of American democracy.

The Liberal Arts Curriculum

The curriculum in liberal arts, leading to the degree of Bachelor of Arts, is designed to assure adequate training in language, particularly in English, as the mother tongue and the chief tool of thought and expression, and in certain other subjects essential to an understanding of the various fields of human knowledge; and to provide for further study and mastery of a chosen field of concentration.

Every candidate for this degree must fulfill the requirements stated in sections A, B and C below, and present a total of 120 semester hours of credit, plus credit in required courses in physical education.

A. Required of all students

ENGLISH Freshman English the first year, and the second year either English-American Literature or World Literature.

FOREIGN LANGUAGE One-year course of at least intermediate grade in a foreign language, to be completed as early as possible in the college career.

SCIENCE One laboratory course, normally the first year, to be chosen from botany, chemistry, geology, physics and zoology. A semester of botany may be combined with a semester of zoology to meet this requirement.

PHYSICAL EDUCATION Two years of physical education for men and women.

MILITARY SCIENCE Two years of military science for men.

1 Changed to an elective as of September, 1965.
FIELD OF CONCENTRATION Each student, in consultation with his adviser must choose a field of concentration during his sophomore year. The specific courses making up the field, as well as the student's whole program for the last two years, are chosen in consultation with the chairman of the department in which the major part of the work is to be taken and must have his approval. The following restrictions must be met.

1. The field must be a well integrated whole, adapted to the student's special interests.
2. It must include a minimum of twelve semester courses totalling not less than thirty-six semester hours, at least eighteen in one subject and at least twelve in a related subject.¹
3. It must contain at least four semester courses (twelve hours) of advanced level in one subject and two related semester courses (six hours) of advanced level in another subject.²
4. Each student must take at least one course, normally an advanced course, in his field of concentration in each semester of his junior and senior years.

B. Requirements for Concentration in Divisional Fields

LANGUAGE AND LITERATURE, OR MUSIC History (American, Ancient, Medieval, or European Civilization)² normally the first year; a second foreign language reaching the intermediate level³; a second year course in the social science division. It is strongly recommended by the language departments that students who wish to choose modern foreign language as their field of concentration complete Intermediate Latin in college unless they presented four years of Latin for entrance. The English Department considers courses in Latin to be a distinct aid to students concentrating in English.

SOCIAL SCIENCE History (American, Ancient, Medieval, or European Civilization) normally the first year; during the first two years a total of two year courses in different subjects, chosen from the following: economics, geography, philosophy, political science, psychology, religion, sociology and anthropology.

SCIENCE AND MATHEMATICS Introductory Chemistry (except for students concentrating in mathematics), mathematics and physics as stated in departmental requirements, and a total of at least four semester courses (twelve semester hours) in departments other than the sciences and mathematics.

C. Specific Departmental Requirements for Concentration

AREA STUDIES Satisfactory completion of the following courses or their equivalent: Economics 11-12; Geography 1-2; History 12 or 13; Political Science 11, 12 or equivalent; Sociology 21; eighteen semester hours of ad-

¹ These requirements may be modified slightly for students concentrating in an Area Studies program.
² All students in Liberal Arts who are required to take History and who do not present for admission at least one course in European or World History, must take European History (11, 12 or the equivalent).
³ Students concentrating in English substitute an advanced literature course in foreign language for the second foreign language.
vanced courses dealing with a selected foreign area, including six hours of advanced language and literature, six hours of history, and six hours of other social science. Concentrations must be approved by the Committee on Area Studies. Areas in which students may concentrate are Canada, Latin America, or Russia and Eastern Europe.

**Botany**  Mathematics 9, 2 or 7, 8 or 11, 12; Physics 5-6; Chemistry 131, 132; Zoology 1; Botany 1, 2, 103, and four additional semester courses. The advanced related course (six semester hours or more) is normally in one of the other sciences.

**Chemistry**  Mathematics 21; Physics 14-15, 16; Chemistry 11-12, 131, 132, 141-142, 143, 144, 181-182, 183-184, and 224. No advanced related course is required. Those who wish to qualify for accreditation by the American Chemical Society must also complete 212, six additional hours in advanced courses, or senior research, and also German 11-12. Only those who so qualify will be recommended by the department as chemists.

**Economics**  Courses in economics totalling at least twenty-four semester hours, including twelve or more of advanced grade. The related courses are chosen in consultation with the departmental adviser on the basis of the student's individual needs and plans. See page 73 for economics courses for which credit is granted toward the Bachelor of Arts degree.

**English**  Satisfactory completion of English-American Literature and seven semester courses of advanced grade. The advanced related courses may be in language, music, or any course approved by the department; it is expected that this advanced related course will be taken in the senior year. An advanced literature course in a foreign language is required, but an intermediate course in a second foreign language is not required.

**Geology**  Mathematics 11, 12; Physics 5-6; Introductory Chemistry; Geology 1-2, 15-16, 105-106, 115 (or accredited summer field camp), 116, 205-206; one advanced related course, six semester hours or more, in one of the other sciences or mathematics. An advanced course in some other subject may be approved to meet particular needs. Geology 1-2 may be waived, with the approval of the Chairman, if the student is well prepared in allied sciences and mathematics, or has taken an accredited basic course in geology. All concentrators are encouraged to spend the summers after their sophomore and junior years in some such activity as faculty-advised research, geological survey or industrial employment, or an accredited geology field camp.

**German**  Satisfactory completion of six semester courses of advanced grade in German including 101-102, and at least one advanced related course, six semester hours or more, normally in another foreign language or English.

**Greek**  Satisfactory completion of twenty-seven semester hours, fourteen of which must be in courses numbered above 100, including 111-112, and one advanced related course of at least six semester hours. The required Greek courses may include either 151 or 153, but not both.
**History**  Satisfactory completion of twenty-four hours in history and twelve semester hours in a related subject in another department. At least twelve of the hours in history and six in a related subject must be in courses numbered above 100. The history courses must include: History 11, 12; at least six hours in American history; at least six hours in courses numbered above 200.

**Latin**  Satisfactory completion of twenty-two semester hours in Latin courses numbered above 100, including 111-112, and one advanced related course of at least six semester hours. The required Latin courses may include either 152 or 154, but not both. Courses in Greek are strongly recommended, particularly to those who contemplate graduate work in classics.

**Mathematics**  Physics 5-6 or 14-15; Mathematics 21, 22 and six semester courses numbered above 100. The advanced related course, six semester hours or more, is normally in one of the sciences and is chosen in consultation with the department.

**Music**  Music 1, 2, 5, 6, 105-106, 221, 222, and six hours of applied music including piano. It is recommended that the related course be an advanced course in a foreign language. Those who wish to qualify for recommendations for teaching positions or graduate study will also complete one of the following combinations:

(a) 203, 205, 223, 224, 225, and 226  
(b) 203, 205, 208, 215, and two advanced courses in music literature  
(c) 208, one advanced course in music literature, and twelve additional hours of applied music.

Candidates for honors may complete 281, 282 in lieu of two courses subject to approval by the department.

**Philosophy**  Satisfactory completion of Philosophy 1, 2, 4, 107, 108, 214, and either 201 or 206, and an advanced related course or courses, chosen in consultation with the departmental adviser to fit the needs of the individual students.

**Physics**  Mathematics 211, 212; six semesters of physics courses numbered above 100, including Physics 115, 116, and 271. A student who plans a concentration should take Mathematics 11, 12 and Physics 14 in the freshman year, postponing his language. Russian or German is recommended.

**Political Science**  Satisfactory completion of at least four semesters of advanced courses in political science and an advanced course of six or more semester hours ordinarily in one of the other social sciences.

**Psychology**  Satisfactory completion of at least eight semester courses in psychology, totaling at least twenty-four semester hours and including 1, 50, 109-110, 123, 281-282; and four semester courses to be chosen in consultation with the department from mathematics, philosophy, physics, sociology and anthropology, or zoology.

**Religion**  Satisfactory completion of Religion 1, 2, 101, 112, 122, 201, and two additional semester courses at the 200 level; an advanced related course or courses, chosen in consultation with the departmental adviser to fit the need of the individual student.
ROMANCE LANGUAGE Satisfactory completion of six semester courses of advanced grade, of which at least four must be in literature, and at least one advanced course, six semester hours or more, ordinarily in another foreign language or English.

SOCIOLOGY AND ANTHROPOLOGY Satisfactory completion of 21, 101 and 251, and at least five additional semester courses in sociology, including two numbered above 100. A minimum of four semester courses in a related field must include two numbered above 100.

SPEECH Satisfactory completion of nine semester courses in speech: 1, 11; a semester course in three of the following five areas—public speaking (other than 11), oral interpretation, drama, radio, and speech correction; and four semesters of advanced courses in no more than three areas. An advanced related course or courses (six semester hours or more) chosen in consultation with the departmental adviser. Those whose advanced related course is in the Social Sciences meet the distribution requirements (B, page 69) of that area; those whose advanced related course is in Language, Literature or Music meet the requirements (B, page 69) of that area, but may, in place of a second foreign language, substitute (a) an advanced literature course in foreign language or (b) twelve hours of course work in Fine Arts.

ZOOLOGY Mathematics: 7, 8 or 9, 10 or 5 or 11 (Mathematics 7, 8 should be chosen only by students certain that they will not wish to study branches of zoology in which mathematics is an important tool); Physics 5-6; Botany 1; thirty hours in zoology, which must include 1, 41, 150, and at least fourteen additional hours in courses numbered above 100. In addition, the seminar (281, 282) is required of all students doing research. The advanced related course (six semester hours or more) may be in one of the other sciences or psychology. A student concentrating in zoology must attain an over-all average of 72 or above in the courses in mathematics and science required for concentration in the department.

Special Provisions Concerning Credit

Courses Offered in Other Colleges Acceptable for Full Credit Toward the B.A. Degree

Agricultural Biochemistry 172: General Biochemistry.
Agricultural Biochemistry 253: Microbial Biochemistry
Botany: all courses
Chemistry: all courses
Education 145-146: Learning and Human Development
Education 202: Philosophy of Education
Family Living, H. E. 163: Dynamics of Family Development
Forestry 208: Biological Statistics
Mathematics: all courses
Music Education 151: Student Teaching in Music
Physical Education 50: Dance Technique and Analysis
Related Art, H. E. 21: Design

1 Other courses may be approved in individual cases by the Committee on Studies.
Related Art, H. E. 120: History of Costume  
Secondary Education 102: Principles of Education  
Secondary Education 252: Teaching Latin  
Secondary Education 255: The School as a Social Institution

Courses in Economics Acceptable Toward the B.A. Degree  

Other Courses Acceptable Toward the B.A. Degree  
A given student may elect not more than twelve semester hours (four three-hour courses) from other University courses outside the College of Arts and Sciences.

The Commerce and Economics Curriculum

The Department of Commerce and Economics offers a specialized curriculum leading to the degree of Bachelor of Science in Commerce and Economics. This program is recommended for those who are preparing for a business career. Students who desire a less specialized business orientation may take the liberal arts curriculum and receive the Bachelor of Arts degree.

The commerce curriculum is intended to provide a sound basic training in the various phases of business activity. The several areas of concentration enable students to emphasize such specialized studies as accounting, banking, industrial management, and marketing management. The Department of Commerce and Economics cooperates with the Department of Mechanical Engineering in offering courses in the Management Engineering Curriculum. This curriculum is administered by the Department of Mechanical Engineering and is described in the section on engineering curricula.

The accounting option is registered with the University of the State of New York, The State Education Department, in Albany, N. Y. Students completing the requirements of the accounting option will thus be eligible for admission to the New York State licensing examination in Certified Public Accountancy.

A minimum of 126 approved semester hours is required for the Bachelor of Science degree in Commerce and Economics plus required courses in physical education. The normal program for the first two years is as follows:

<td>Business Law I, Econ. 109, 110</td>
<td>3</td>
<td>3</td>
</tr>
<tr>
<td>Foreign Language1</td>
<td>3-4</td>
<td>3-4</td>
<td>Foreign Language, Mathematics, or Social Science</td>
<td>3</td>
<td>3</td>
</tr>
</tbody>
</table>

1 In place of the foreign language, students may choose Mathematics 11-12 (plane analytic geometry, differential and integral calculus).
After the first two years a student may elect various concentrations of courses to emphasize selected aspects of business administration. The following courses, however, are required of all candidates for the Bachelor of Science degree:

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Money and Banking, Econ. 201</td>
<td>3</td>
</tr>
<tr>
<td>Elementary Statistics, Econ. 187, 188</td>
<td>6</td>
</tr>
<tr>
<td>Principles of Marketing, Econ. 121</td>
<td>3</td>

<tr>
<td>Industrial Management, Econ. 143</td>
<td>3</td>
</tr>
<tr>
<td>Corporate Finance, Econ. 207</td>
<td>3</td>
</tr>
<tr>
<td>Social Science</td>
<td>9</td>
</tr>
</tbody>
</table>

In addition to the courses listed above, a minimum of 21 more hours in Commerce and Economics is required. These courses should be selected in consultation with an adviser from the department. In general, however, a student should plan on taking at least nine of these hours in his chosen area of concentration. Suggested courses by area of concentration are listed below:

### Banking and Finance

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Hours</th>

</table>
Special Honors

The honors program at both the junior and senior levels is designed for the superior student with unusual initiative and intellectual curiosity, and provides an opportunity to pursue a special project without the restrictions of classroom routine. Such a student enters a program of reading, research, or creation under the direction of the department of his choice. A student may take honors in either or both years.

A student in the College of Arts and Sciences who, at the end of his junior year, has an average of 85 or above for the work of the sophomore and junior years may become an applicant for special honors in a particular subject. His program for the senior year must be approved not later than the end of the junior year by the department in which honors are sought and by the Committee on Honors, and he must present a satisfactory written report and pass an oral examination on the field of special study.

A program called junior honors, which may be considered introductory to but distinct from special honors, is available to juniors who have a sophomore average of 85 or above and who have the permission of their department chairmen. The program for each junior honors candidate will be determined by the department concerned.

Preprofessional Preparation

Students who plan to enter professional colleges requiring previous collegiate preparation will find the variety of courses offered in the College of Arts and Sciences and the freedom of election in that college is such that all the requirements for any professional school may be met. Many students will desire so to direct their four-year undergraduate course as to provide, in addition to a sound general education, appropriate preprofessional training for later work in the medical sciences, law, or theology.

LAW American law schools, as a rule, require graduation from a four-year college with a Bachelor's degree prior to admission. There is no prescribed curriculum which is requisite for admission, but the student is advised to include in his undergraduate course substantial elections in the fields of languages, literature, history, economics, political science, and philosophy.

THEOLOGY Graduation from a four-year college is prerequisite for admission to most theological seminaries. Although no prescribed curriculum is demanded as preparation for such professional schools, the student is advised to elect substantially from the departments of languages (particularly classics), history, philosophy and religion, psychology, and social studies.

OPTOMETRY The requirements for admission to schools and colleges of Optometry vary, but typically they include courses in English, mathematics, physics, chemistry and zoology with a minimum of two years of college work.

PHARMACY Under the Regional Plan (pages 27-28) Vermont residents may prepare for pharmacy school at Connecticut or Rhode Island. This is a five-year program with two years of preprofessional work which includes
English, mathematics, botany, chemistry, zoology, physics, social science, a course in fine arts, and orientation to pharmacy taken in the sophomore year.

**Premedical and Predental**  The prevailing requirements for admission to an accredited medical college usually include not less than three years of undergraduate work, during which courses in biology, chemistry, English and physics must be completed. Any student who wishes to enter medical college should by the beginning of his sophomore year consult the catalogue of the college of his choice and arrange to include in his program courses required by that particular school.

Each student, in consultation with his adviser, plans a four-year program of courses which will fulfill the requirements for a Bachelor's degree. Those who wish to meet the minimum requirements for admission to medical college may follow the first three years of the program below. By successfully completing these three years and one year in an accredited medical college, they will qualify, on application, as candidates for a Bachelor of Science degree.

In the following outline, courses listed are normally taken in the year indicated. The program may be modified both for the needs of the individual student and to allow for concentration in a particular field. A student must have completed a total of 90 semester hours by the end of the third year to be considered for admission to a medical college.

</table>

The requirements for admission to colleges of dentistry vary but in all cases include at least two years of college work with at least one course each in biology, inorganic chemistry, physics, and English. Hence, the course of study advised as preparation for medicine may be used as a basis for selection by those interested in dentistry.

¹ Unless already completed.
The School of Dental Hygiene

The School of Dental Hygiene, established in the fall of 1949 on authorization and a grant of money by the State Legislature and accredited by the Council on Dental Education of the American Dental Association, offers a two-year curriculum leading to a Certificate in Dental Hygiene. The purpose is to meet the ever-increasing need for dental health service.

The curriculum conforms to the requirements for accrediting of schools of dental hygiene as adopted by The Council on Dental Education of the American Dental Association on June 20, 1951. On successful completion of this curriculum, the student is eligible to take various examinations given by the State Board of Dental Examiners for licensing by that body.

Graduates of this school will be qualified to give oral prophylactic treatment; to chart the mouth, and to carry dental health education into the private dental practice, public institutions, hospitals and industrial clinics. The hygienist may be called upon to perform the following subsidiary functions as the supervising dentist may direct or approve: to X-ray teeth and develop X-ray films; to assist with laboratory work; to make appointments and keep office records; to give demonstrations of the proper method of using a toothbrush and massaging the gums; to lecture on oral hygiene, and to teach oral hygiene and the relation of diet to oral health. The role of the dental hygienist in the achievement of oral health is an extremely important one, and opportunities for well-rewarded service are practically unlimited.

The course of study is designed to give the student a background of knowledge sufficient to enable her to perform intelligently the tasks of her profession. Students applying for this program should be interested in and have aptitude for scientific studies. A general scientific background is acquired by courses in chemistry, bacteriology, anatomy, and physiology. Courses specifically relating to dental problems give the student an insight into the field of dentistry and dental health. English composition and public speaking teach the individual to express herself clearly on paper and by word of mouth. The proper approach to the patient is taught by courses in psychology and sociology. Skill and self-confidence are acquired by extensive work during the second year in the dental clinic.

The School of Dental Hygiene operates a ten-chair clinic and offers its services for examination and charting of teeth, prophylaxis treatments and the teaching of dental health to students, employees and faculty members of the University, in addition to the school children in surrounding areas.

Enrollment is limited to women who are high school graduates and otherwise eligible to enter the freshman class of the University. Prospective appli-
cants are invited to write the Director of Admissions for detailed information concerning such matters as requirements for admission and expenses. High school subjects which are helpful prerequisites include algebra, chemistry, physics or biology. Attributes necessary for success in this curriculum are good health, emotional stability, interest in the work, and the ability to get along well with people. Since the laboratory equipment in the School of Dental Hygiene is limited, prospective students are advised to submit their application by March 1 of their senior year in high school. Applicants in this curriculum are required to take the Dental Aptitude test. Application for the test should be made to the American Dental Hygienists' Association, 304 East 45th St., New York 17, N. Y.

The College of Education and Nursing

The College of Education and Nursing offers four-year curricula leading to the following degrees: in elementary and secondary education, the degree of Bachelor of Science in Education; in business education, the degree of Bachelor of Science in Business Education; and in music education, the degree of Bachelor of Science in Music Education.

This College also offers a four-year curriculum leading to the degree of Bachelor of Science in Nursing.

The objectives of the several curricula include growth in appreciation and understanding of the cultural heritage, development of social and civic competence, improvement of personality, stimulation of intellectual curiosity, strengthening of personal integrity, and development of competence and enthusiasm for the professions of teaching and nursing. To attain these objectives each curriculum provides for a balance of general education courses, professional courses, and laboratory experiences.

General education courses may be elected in the College of Arts and Sciences, Technology, and Agriculture and Home Economics. Professional courses are taken in the College of Education and Nursing. Professional laboratory experiences are provided in the College of Education and Nursing and in schools and hospitals under the supervision of the College of Education and Nursing.

Education curricula in the College of Education and Nursing meet requirements for teaching certification in most of the states. Adjustments in individual programs may be made to fit special requirements for certification in specific states. If in doubt about certification requirements, students should consult with their advisers or with the dean of the college.

The Department of Education has the responsibility for maintenance of standards approved by the National Council for the Accreditation of Teacher Education. Official admission to teacher education is made during the sophomore year, and all students enrolled in the College of Education and Nursing or in other colleges are to make application for admission to specific curricula before the beginning of the junior year.
Official forms for application may be obtained from the office of the Dean of the College of Education and Nursing. Accepted students must meet personal, academic, and professional criteria established for teacher education candidates.

**Fifth-Year Certificate in Education**

A special fifth-year program culminating in a certificate of advanced study is offered for students who wish to work beyond the bachelor's degree but who need or desire more flexibility than is possible in any of the standard programs for master's degrees.

The certificate program is especially designed to meet the needs of teachers who are developing new teaching fields, for advanced students who are meeting requirements for state certification, and for experienced teachers who desire flexibility in choice of courses at both graduate and undergraduate levels.

Each certificate program is individualized to fit the qualifications and the professional objectives of the candidate. Undergraduate courses may be approved for the program when such courses appropriately support the candidate's professional objectives.

The program for the *Fifth-Year Certificate* is governed by the following regulations:

1. Candidates must hold a bachelor's degree.
2. Candidates must make written application on forms obtained from the Office of the Dean of the College of Education and Nursing.
3. Candidates are admitted to the program by action of a faculty committee.
4. A maximum of twelve credits may be applied to the program at the time of admission.
5. A maximum of nine credits may be transferred from other institutions.
6. Credits for the program may be earned in the regular academic year, the Summer Session, and the Evening Division.
7. The program for each candidate must include a minimum of thirty credits approved by a faculty adviser.
8. A minimum mark of 72 (C) must be made in any course which is to be included in the program.
9. No comprehensive examination or formal thesis is required for completion of the program, but the candidate will submit a culminating paper under the direction of his faculty adviser.
10. The program must be completed within seven years after the time of admission.

In addition to the planned program leading to the *Fifth-Year Certificate*, the Department of Education will arrange for college graduates special programs leading to qualification for teaching certificates in either elementary or secondary education. To be accepted for these special programs, candidates must have included appropriate academic courses in their degree curricula, and they must satisfy the Department of Education that they have desirable personal qualifications for teaching.
Requests for further information about fifth-year programs should be directed to the Dean of the College of Education and Nursing.

Elementary Education

The elementary education program is intended to prepare teachers for any of the elementary grades. The Bachelor of Science in Education is awarded upon satisfactory completion of an approved program.

The elementary education curriculum includes a base of required academic courses, a planned sequence of professional courses, laboratory experiences, and elective academic courses. The student must use electives during the four years to build an academic major.

The foundation in general education includes required courses in the social sciences, in mathematics, in laboratory science, in English and literature, in psychology and in speech. Courses in fine arts and in languages may be elected.

The professional program begins with the introduction of the student to education as a field of study during his freshman year. Each student is made aware of the social foundations and relationships of education, introduced to the extensive resources available to him for learning about the field in depth, and impressed with the developmental need for his delving into the literature and research as a basis for making critical judgments concerning education. The characteristics of teaching as a profession are also stressed.

In the sophomore year, the students are offered field experiences with children's groups in the community. These experiences serve the dual purpose of giving first-hand information about children and of providing opportunity for determining the satisfaction which association with children of different age levels brings to the student.

The junior year emphasizes professional course work and special content courses for elementary teaching. Professional courses include classroom observation and participation in local elementary schools.

The senior year continues the professional methods courses and includes seven full weeks of student teaching in the elementary schools of Burlington, South Burlington, Winooski, and Essex Junction.

In each year of the program, the curriculum provides for elective courses from other colleges. Total electives approximate forty semester hours and open to the student in elementary education attractive majors in music, art, speech, language, literature, history, and other fields of study offered by the University.

</table>

A minimum of 125 approved semester hours is required for the degree, plus credit in required courses in physical education.

Secondary Education

The secondary education program is intended to prepare teachers for junior and senior high schools in Vermont and other states. The degree of Bachelor of Science in Education is awarded upon satisfactory completion of an approved program.

During the first two years the curriculum consists generally of basic courses in English, fine arts, foreign languages, mathematics, science, and social science. Sophomores begin concentration on majors and minors in chosen teaching fields and are given opportunity to participate in teaching experiences in local secondary schools. The junior and senior years combine courses in the elected teaching fields, professional courses in education, and laboratory experience in teaching.

Professional Requirements  
Candidates for the degree in secondary education are required to complete with a high standard of scholarship twenty semester hours of course work in professional education.

Teaching Majors and Minors  
Candidates for the degree in secondary education are required to complete approved courses in teaching fields common to secondary schools, or in one of two broad fields combining either natural sciences or social sciences. Broad field majors include approximately fifty semester hours in related courses, single subject majors include thirty semester hours, and minors include at least eighteen semester hours. The major-minor program must include credits in advanced courses.

Students should choose majors and minors which bear logical relationships and which commonly occur as teaching combinations in secondary schools. Suggested major and minor fields are English, foreign languages, history, mathematics, physical education, political science, speech, and the sciences. Advisers can assist students in making choices which are in accord with student aptitudes and interests and which are likely teaching combinations. Outlines of suggested course sequences for majors and minors may be obtained from advisers or from the office of the dean of the college.

Students are expected to maintain a high standard of scholarship in their major and minor fields. A grade of less than 72 may not be credited toward a major or minor unless other grades in the field are sufficiently high to justify an exception.

1 A political science course, preferably in local and state government, must be included during the four-year curriculum. Some of the electives must be concentrated in an academic major.
EXPERIENCES IN PUBLIC SCHOOLS  Students in secondary education have direct experiences in public schools at two points in the four-year curriculum. During the sophomore year students observe and participate as teacher assistants in local junior and senior high schools. During the senior year students devote seven continuous weeks to full-time teaching in public secondary schools. In most cases students must arrange to live off campus during the student teaching assignment.

Applications for all field experiences must be made well in advance of assignments, and the student must assume responsibility for meeting deadlines. Information about application and assignment procedures may be obtained from the dean's office.

</tbody>
</table>

A minimum of 122 approved semester hours is required for the degree, plus credit in required courses in physical education.

PHYSICAL EDUCATION  Students in teacher education may qualify as physical education instructors in Vermont and other states by combining a minor program in physical education with other teaching majors. A major in physical education is being developed and is expected to be available at an early date. Information about physical education as a teaching option may be obtained from the Office of the Dean, College of Education and Nursing.

Business Education  

The curriculum in Business Education is intended to prepare teachers of business subjects for secondary schools in Vermont and other states. Freshman and sophomore years are concerned primarily with the development of a foundation in general education. Junior and senior years emphasize courses in business and in education. Students do seven weeks of practice teaching in the final semester of the senior year. During the four years the student must concentrate a minimum of 24 semester hours in a second teaching field.

Beginning courses in typing and in shorthand make it possible for students to succeed in the program without previously developed skills in these subjects.

1 If History is chosen, European Civilization is recommended.
2 If recommended by adviser.
3 An approved elective if intermediate language has been completed.
4 All students are to elect a course in speech.

A minimum of 125 approved semester hours, plus credit in required physical education, is required for the degree.

Music Education

The curriculum in music education, leading to the degree of Bachelor of Science in Music Education, is recommended to students who have sufficient training and natural musical ability to justify a career in music. Graduates are qualified for positions as instructors and supervisors of music in the public schools.

1 European Civilization is recommended.
2 All students must complete a year of laboratory science.
3 All students must complete a course in speech (Public Speaking is recommended).
4 Until functional piano facility achieved (see Applied Music, page 186).
5 English 25, 26 (World Literature) recommended.
6 History 11, 12 (European Civilization) recommended.
7 A second applied field may be substituted for one ensemble.
A minimum of 130 approved semester hours is required for the degree plus credit in required courses in physical education.

The Nursing Curriculum

The faculty of the Department of Nursing believes that nursing is a profession which has increasing responsibilities and contributions to make in meeting the health needs of a changing society. In accordance with this belief, the educational program is designed to stimulate the optimum growth of each student as an individual, a professional person, and a contributing member of society. It is believed that this can best be realized in an environment which recognizes the individuality of each student and which provides guidance towards achievement of independent thought, critical judgment, and effective behavior.

The purposes of the program are to provide the opportunity for qualified individuals to prepare for professional practice in beginning positions, to acquire a foundation for continued formal study in nursing, and to enhance growth toward maturity as individuals, professional persons, and citizens. The graduates of this program receive the degree of Bachelor of Science in Nursing, are qualified for state licensure examination, and may advance without further formal education to positions which require beginning administrative skills.

The program objectives are designed to encourage the student in nursing to achieve progressively higher levels in the development of knowledge, skills, and understandings necessary to meet the physical, emotional, spiritual, and social needs of people; the development of skill in establishing effective relationships by the understanding of behavior and its effect on interpersonal relations; the development of an understanding of the responsibilities inherent in the professional practice of nursing and the profession's role in meeting the health needs of a changing society; and, the development of an appreciation of the thought and achievement of man as a basis for enrichment of personal life.

The curriculum, conducted in four academic years, provides an approximate balance in general and professional education. Courses in the humanities and sciences—biological, physical and social—serve as a foundation for the professional nursing courses which are begun in the second year with concentration in the third and fourth years. Faculty guided experience in the care of patients and families is secured through the facilities of the Mary Fletcher Hospital, adjoining the campus, the Burlington Visiting Nurse Association, Inc., and other selected community resources.

The program is approved by the Vermont Board of Nursing and is fully accredited by the National League for Nursing, Inc. Applicants must satisfy the general admission requirements for the University. High School courses in biology, chemistry, and physics are highly desirable.

**A minimum of 124 approved semester hours is required for the degree plus credit in required courses in physical education.**

In addition to the general education courses found in the curriculum outlined above, specific courses in general education are required and additional courses are elected in accordance with individual need and interest and in consultation with the faculty adviser. These are:

- Philosophy 1, or 214
- Fine Arts
- History, Political Science
- Economics or Geography
- Electives

Students are encouraged to pursue the study of a foreign language if able to enter the intermediate level of instruction. Students desiring to learn a new foreign language will need to plan on summer sessions.

The department reserves the right to request the withdrawal from the nursing curriculum of any student who does not progress satisfactorily in the practice of nursing.

**EXPENSES**

The cost of the program in nursing is approximately the same as for other students in the University (see also pages 49-50) with the following exceptions:

1. Effective by October 1 of the second year all students in nursing are required to carry Blue-Cross and Blue-Shield insurance, or its equivalent, at not less than the maximum daily rate issued by Blue-Cross.
2. At the beginning of the second year all students in nursing are required to purchase uniforms and other items of special equipment and to assume the cost of laundering uniforms.

Insofar as resources permit, the University provides financial aid in the form of scholarships, loans, prizes and employment. In addition, Vermont students in the nursing curriculum are eligible for Senatorial Scholarships. Students may apply for appointments in the Army Student Nurse Program or the Navy Nurse Corps Candidate Program at the beginning of their junior year. The appoint-
ments carry generous financial allowances. A student who participates twelve months or less serves on active duty in the respective service for twenty-four months. If two years of financial support have been received, thirty-six months of service are required.

Additional federal loan funds for students in the nursing curriculum are expected to be available through the Nurse Training Act of 1964.

PROFESSIONAL PERSONNEL IN COOPERATIVE AGENCIES
Robert B. Aiken, M.D., Commissioner of Health, Vermont State Department of Health
Grace Buttolph, R.N., Director, School of Nursing, Mary Fletcher Hospital
Sally Sample, R.N., Director, Nursing Service, Mary Fletcher Hospital
Georgia Murchison, R.N., Director, Burlington Visiting Nurse Association
The College of Technology

The College of Technology includes the Departments of Chemistry, Civil Engineering, Electrical Engineering, Mechanical Engineering, and Mathematics. It offers a number of specialized professional curricula in these fields and in medical technology, leading to the degree of Bachelor of Science in the field of specialization. Details are given in the sections immediately following. In addition to the courses listed in the several curricula, all students must fulfill the general requirements in physical education, and hygiene. Students whose curricula require them to take two years of mathematics are referred to the footnote under the offerings of the Department of Mathematics for information concerning the possible sequences of courses in freshman mathematics.

The Chemistry Curriculum

The Department of Chemistry offers a specialized curriculum leading to the professional degree of Bachelor of Science in Chemistry. This curriculum is designed to give a sound basic training in chemistry, to prepare the student for service in some branch of the chemical profession, and to qualify him adequately for advanced study in graduate school. The department is accredited by the Committee on Professional Training of the American Chemical Society, which has established minimum requirements for the training of chemists at the bachelor's level. In accepting accreditation, the department has planned a curriculum which permits the student to reach these minimum objectives and will qualify the graduate for certification.

Those who wish a less intensive training in chemistry may take the liberal arts curriculum with a concentration in chemistry and receive the Bachelor of Arts degree. These students may also qualify for accreditation by satisfactorily completing certain courses beyond the minimum required for concentration, and only those who so qualify will be recommended as chemists by the department. A student can elect to concentrate in chemistry at the end of the freshman year or even as late as the end of the sophomore year and still qualify for accreditation. However, the department strongly recommends that the student choose before the start of his sophomore year. In the first year, and to some degree in the second year, prescribed courses are such that a student can transfer into the curriculum from liberal arts, or vice versa.

A minimum of 134 approved semester hours is required for the degree in this curriculum, plus required courses in physical education.

The Engineering Curricula

The engineering curricula are designed to help students learn to approach and deal in a professional manner with problems and situations they will meet as engineers, citizens and individuals. From this basic preparation they should continue to learn from experience and to grow in stature throughout their professional life.

The Departments of Engineering offer instruction in four curricula, Civil, Electrical, Management, and Mechanical Engineering, each leading to the degree of Bachelor of Science in the field of specialization. Each curriculum includes the general subjects: mathematics, chemistry, physics, graphics, elements of electrical engineering, mechanics, thermodynamics, economics, and English.

The required courses in each curriculum are shown arranged for a four year program. These courses may be arranged in a five-year sequence if desired. Also, the courses can be arranged to accommodate transfer from other curricula. Two years of physical education are normally required of all students.

1. See footnote under course offerings in Department of Mathematics.
2. To be certified as a chemist, a student must complete twelve hours of courses in the humanities and social studies in addition to the English and foreign language requirements.
3. Those students who must enroll in Mathematics 9 will be required to take Mathematics 11 and 12. They will not be required to take Mathematics 21.
4. German through the intermediate level (11-12) is required. Russian or French is advised as a second language for students proficient in German.
5. Electives in mathematics or a field of science other than chemistry are acceptable for this item. Advanced mathematics, physics, or life science are recommended.
6. Advanced inorganic chemistry is required for certification as a chemist. Courses in biochemistry are acceptable as advanced chemistry electives.
All junior engineering students visit New England industrial centers during spring vacation. This plant inspection trip is required for graduation. The expense for the trip of several days is borne by the student.

Students enrolled in the civil, electrical, and mechanical engineering curricula may become affiliated with their respective national professional engineering societies, the American Society of Civil Engineers, the American Institute of Electrical and Electronics Engineers, and the American Society of Mechanical Engineers, as each organization has authorized a student chapter at The University of Vermont. Engineering students demonstrating high scholarship attainment combined with exemplary character are recognized by membership in the Vermont Alpha Chapter of Tau Beta Pi, the national engineering honor society. These student organizations' meetings present opportunities for students to conduct activities similar to those of the national societies. These include: technical papers presented by students and engineers actively engaged in their profession; attendance at conventions; and inspection trips. These provide helpful contacts with engineering practice and assist in the development of leadership qualities essential to success in the engineering profession.

The curricula in civil, electrical, and mechanical engineering are accredited by the Engineers' Council for Professional Development.

**Humanistic-Social Studies for Engineering Students**

The objective of the program in humanities and social studies is to broaden the engineering student's understanding of man and the relationships in human society. Each student should plan, in consultation with his adviser in the second semester of his freshman year, an integrated sequence of courses to meet this objective.

A minimum of twenty-four credit hours is required in humanistic-social studies. To meet this requirement each student must satisfy the following distribution.

<table>
<thead>
<tr>
<th>Required of all students</th>
<th>Minimum credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. English, 1-2 (must be taken the Freshman year)</td>
<td>6</td>

<td><strong>24</strong></td>
</tr>
</tbody>
</table>

**Elective Areas**

- Geography
- History
- Philosophy
- Religion
- Political Science
- Psychology
- Sociology
- World Problems
- Intermediate Classical Languages
- Intermediate Romance Languages
- Intermediate German
- Intermediate Russian
- Advanced Literature courses
- Art (history courses only)
- Music (history and survey courses only)
- Economics (history and theory courses only)
- Speech (history and literature courses only)

1 Management engineering students will take English 25 or 26 and omit Item No. 4.

2 These six hours may be taken from two of the Elective Areas listed if the student has completed six credit hours in Item No. 2.

### Agricultural Engineering

For the Agricultural Curriculum see page 58.

---

1. See distribution of Humanistic-Social Studies on page 90.
The Mathematics Curriculum

This curriculum is designed to provide sound basic training in mathematics, to prepare the student for a position in an area in which mathematicians are sought, and to qualify him for advanced study in graduate school. Students in the College of Arts and Sciences may also concentrate in mathematics and will receive the Bachelor of Arts degree. An adviser from the department will assist students in the determination of a program best suited to their individual needs and plans.

A minimum of 129 approved semester hours is required for the degree in this curriculum, plus required courses in physical education.

The Medical Technology Curriculum

The curriculum is divided into two parts, a three-year preclinical period and a final clinical year of twelve months which is under the supervision of members of the faculty of the College of Medicine.

The program of the preclinical period is designed to provide the student with a background in fundamentals essential for the professional work of the clinical year. During the first three years the Council on Medical Education and Hospitals of the American Medical Association requires a minimum of sixteen semester hours of chemistry, sixteen semester hours in biological sciences and one semester of college mathematics. The clinical year includes didactic courses in the College of Medicine and practical laboratory experience, primarily in the laboratories of the Mary Fletcher Hospital but also in other local health facilities.

---

1 See footnote under course offerings of the Department of Mathematics.
2 Students desiring to take a foreign language during the freshman year may defer the laboratory science until after the language requirement has been met.
3 If an intermediate language is taken initially, an elective may be substituted.
4 Beyond mathematics 22.
5 Physical science or engineering courses beyond the sophomore level, to constitute a minor specialization.
After graduation an additional two and one-half months of practical supervised experience in the affiliated laboratories is required. At the end of this additional period, those satisfactorily completing the program will be recommended to the Registry of Medical Technologists as eligible to take the examination for certification as Medical Technologists ASCP.

---

1 If zoology 5-6 are elected then zoology 115 or botany 55 is required.  
2 Recommended approved electives include chemistry 132.
The Physics Curriculum

The Department of Physics offers a pre-professional curriculum leading to the degree of Bachelor of Science in Physics. This program is designed to give a strong background for future professional education in industry or graduate school. Students in the College of Arts and Sciences may also concentrate in physics and receive a Bachelor of Arts degree.

1 See footnote under course offerings of Department of Mathematics.
2 Chemistry 1-2 is acceptable for a student of limited background. A student wishing to continue a foreign language in the freshman year at the intermediate level may postpone chemistry until the sophomore year.
3 This elective is usually in the area of the arts, humanities or social sciences. However, a student with a particular interest such as biology may take Zoology 1 or Botany 1 here to facilitate a concentration in biological physics.
4 See footnote 2. In the junior year an elective may be taken if a language through the intermediate level has been passed in the freshman or sophomore years.
5 This elective may be either in a natural science, mathematics or in the arts, humanities or social sciences. The Department recommends at least a year in the latter category. A student emphasizing biology might include Physics 122 or 222.
6 In general an undergraduate major should plan to take mathematics every semester. Various courses are possible depending on the interests of the student and the offerings of the Department of Mathematics. In some cases other courses might be substituted with the permission of the Department of Physics and of the Dean of the College of Technology.
The Graduate College

The purpose of the Graduate College is to serve the needs of college graduates who desire a broader and more thorough knowledge of scholarship and research in their chosen fields. At present the College offers fifty-six different programs leading to the master's degree and eight programs leading to the degree of Doctor of Philosophy. Each student is expected to be familiar with the general regulations and procedures of the Graduate College, and with the specific degree requirements in his chosen field of study.

Attention is also drawn to the special fifth-year program offered by the College of Education and Nursing leading to a certificate of advanced study in Education.

Master of Education

Programs are designed to prepare qualified candidates for school positions in guidance, supervision, and administration, or to give classroom teachers a more complete understanding of professional education as applied to teaching and to membership in the profession. Programs are planned on an individual basis and may include courses in areas outside professional education.

Master of Arts in Teaching

This degree is appropriate for teachers who are interested primarily in increasing their knowledge of their subject matter field and thereby the effectiveness of their classroom instruction. Programs are offered in the following fields:

<table>
<thead>
<tr>
<th>Agriculture</th>
<th>Geology</th>
<th>Latin</th>
</tr>
</thead>
<tbody>

<td>Zoology</td>
</tr>
</tbody>
</table>

Master of Extension Education

This degree is designed to meet the needs of county agricultural agents, home demonstration agents, 4-H Club agents, extension specialists, professional co-operative and agricultural business leaders, teachers of agriculture and home economics.
Master of Science

Programs are offered in the following fields:

Agricultural Biochemistry  Chemistry  Medical Electronics
Agricultural Economics  Civil Engineering  Medical Microbiology
Agronomy  Commerce  Microbiology
Anatomy  Electrical Biophysics  Pathology
Animal and Dairy Science  Electrical Engineering  Pharmacology
Animal Pathology  Forestry  Physics
Biochemistry  Geology  Physiology and Biophysics
Botany  Home Economics  Poultry Science

Master of Arts

Programs are offered in the following fields:

Economics  Greek  Music
English  History  Political Science
French  Latin  Psychology
German  Mathematics

Doctor of Philosophy

Doctoral programs are offered for qualified students in the fields of biochemistry, botany, chemistry, microbiology, pharmacology, physics, physiology and biophysics and zoology.

Admission

Students who, prior to the date of their first enrollment, will hold a baccalaureate degree or will have completed work equivalent to that required for a baccalaureate, and whose undergraduate records indicate that they are capable of successful study at the graduate level may apply for admission to the Graduate College. Graduates of unaccredited institutions must support their applications with satisfactory scores on the Graduate Record Examinations.

Admission is limited to students who intend to become candidates for advanced degrees, other than Doctor of Medicine, and students whose enrollment will consist of courses to be taken for graduate credit. Students who hold bachelors' degrees but whose entire enrollment will be in undergraduate courses should seek admission as special students in the appropriate undergraduate college.

Only applicants who desire to work along lines in which the University offers graduate programs will be admitted to the Graduate College. Students in the Graduate College therefore fall into three categories: (1) duly admitted students accepted to candidacy, (2) degree candidates at other institutions who study at The University of Vermont for transfer of credit, (3) duly admitted students not yet accepted to candidacy.

Students seeking admission to the Graduate College must make application on an official form which can be obtained from the Office of the Graduate College. All applications must be supported by official transcripts from each college or university attended and by three letters of recommendation from persons qualified to assess the applicant's capacity for graduate work. For submission of necessary test scores, see Aptitude and Achievement Tests.

The deadline for applications for admission in the fall semester is May 15. It is not always possible to admit additional students at midyear in all departments. Such applications should be initiated well in advance of the date study
is to begin. Students who wish to be considered for fellowships as well as admission should complete the appropriate section on the application form. Such applications, with supporting materials, must be filed by March 15 of the academic year preceding that for which the application is made.

Admission to the Graduate College does not mean that a student is automatically accepted as a candidate for an advanced degree.

FOREIGN STUDENTS Applications from foreign students, other than those of the United Kingdom and those studying in the United States at the time of application, will be accepted only through the Institute of International Education. Foreign students should make application a year in advance through the Institute. For information write to Institute of International Education, 809 United Nations Plaza, New York, N.Y. 10017.

APTITUDE AND ACHIEVEMENT TESTS Applicants for admission to graduate programs in some departments must submit scores on the Graduate Record Examination and the Miller Analogies Tests (see under department). Information on the Miller Analogies Test may be obtained from the Testing Office, University of Vermont or from any college testing office. Information on the Graduate Record Examination may be obtained from the Educational Testing Service, Box 592, Princeton, N.J.

DEPOSIT A deposit of $35 is required of each applicant upon notification of admission into the Graduate College. The deposit will cover the graduation fee of $25 (see p. 49). Any residue from this deposit will be returned to the student upon graduation or upon withdrawal from the college.

CREDENTIALS submitted by the student, such as transcripts and letters of recommendation become the property of the Graduate College and may not be returned.

Dismissal

A graduate student whose work or deportment is unsatisfactory may be requested at any time by the Dean or the department concerned to withdraw from the Graduate College.

General Requirements

ACCEPTANCE TO CANDIDACY A student will be accepted to candidacy upon approval of both the Dean and the department or departments concerned. Acceptance to candidacy can be granted only in cases where a student has fully met all undergraduate prerequisites for the courses that are required in his degree program. A year of graduate study in residence at The University of Vermont is a prerequisite for acceptance to candidacy for the doctoral degree.

MINIMUM RESIDENCE REQUIREMENTS Each candidate for the master's degree must satisfactorily complete at least twenty hours of graduate credit while in residence on The University of Vermont campus, either in the regular academic year, in summer sessions, or at the off-campus centers established at Lyndon and Castleton. Each candidate for
the doctoral degree must satisfactorily complete at least thirty hours of graduate credit in residence on The University of Vermont campus; ordinarily a minimum total of fifty hours in residence will be required.

Teaching Requirement Each degree candidate must acquire appropriate teaching experience in his chosen field prior to the award of his degree. The nature and the amount of this teaching, for which no academic credit is allowed by the Graduate College, will be determined by the department concerned.

Graduate Credit Courses numbered 400 and above are open to doctoral students only. Courses numbered 300 to 399 are open to graduate students only. Courses numbered between 200 and 299 are also offered for graduate credit, and, if taken by graduate students, must be taken for graduate credit.

Courses numbered between 100 and 199 are normally courses for undergraduates. No degree program can include more than ten hours graduate credit for courses numbered between 100 and 199 and most programs include none. Graduate credit can be allowed for some courses so numbered only (1) if the student has already been accepted to candidacy, and (2) has obtained in advance the approval of his department and the Dean for inclusion of this particular course in his degree program.

Under no circumstances will graduate credit be allowed for a course numbered below 100.

Minimum Grade Requirements A candidate for a higher degree must complete his program with an overall average of not less than 85 (B). Credit for a course completed with a final grade lower than 75 (C) will not be accepted in partial fulfillment of degree requirements. No credit will be allowed in transfer for courses whose final grade is lower than 80 (B—).

After completing 12 course credits, any graduate student whose scholastic record does not meet the minimum requirements of the Graduate College may be asked to withdraw.

Maximum Time Limits A program leading to the master's degree must be completed within a span of three years if it is pursued on a full-time basis during the regular academic year; if it is pursued on a part-time basis or in summer sessions, it may be completed within a span of seven years. A doctoral program must be completed within a span of nine years. Only in special cases will credits earned outside these time limits be re-evaluated and re-instated; requests for such re-evaluation must be addressed to the Dean and must be accompanied by a full statement of the extenuating circumstances. This time limit applies both to study at The University of Vermont and to courses presented for transfer of credit. Individual departments may set deadlines within these time limits.

Transfer of Credit A maximum of eight hours credit in the case of master's candidates and twenty-five hours in the case of doctoral candidates may be accepted in transfer for appropriate courses completed in residence in other institutions. Such courses must have been taken in a fully
accredited college or university which offers graduate study and must be ac­ceptable at that institution in partial fulfillment of its requirements for an advanced degree. Credit cannot be transferred for (1) courses which would not, if taken at The University of Vermont, receive graduate credit, (2) courses in which a grade lower than 80 (B—) was received, (3) extension courses, (4) correspondence courses, (5) courses which are inappropriate for inclusion in any degree program offered by the Graduate College, (6) courses which were taken more than seven years prior to the completion of a degree program, (7) thesis credits received at another university. No transfer of credit is pos­sible prior to a student’s acceptance to candidacy.

EXTENSION COURSES  Not more than eight semester hours of credit toward the master’s degree may be earned by taking extension courses offered by The University of Vermont. A maximum of three hours of graduate credit per semester is permissible for master’s candidates who are full-time teachers in public schools. No credit for extension courses is allowable in a doctoral program.

Requirements for Master’s Degree

All master’s programs call for a minimum of thirty semester hours of gradu­ate credit. At least fifteen credit hours must be earned in formal courses and seminars. In programs that require a thesis, the number of credit hours to be earned in thesis research varies between six (minimum) and fifteen (maxi­mum); these credits are included in the minimum of thirty required for the degree.

Master of Education

Before acceptance to candidacy for the degree of Master of Education, the student must present a satisfactory score in the Miller Analogies Test, and must demonstrate satisfactory proficiency in written composition. Before the degree is awarded, the candidate must have completed one year of successful teaching experience or other educational service.

The graduate program of each student admitted to candidacy for the de­gree of Master of Education is planned and supervised by an individual com­mittee, which includes ex-officio the Deans of the Graduate College and the College of Education. A graduate program is planned in view of a student's undergraduate curriculum and in the light of his aims and purposes in pur­suing the master's degree, and in such a way that its subject matter will be concentrated as far as possible within a general area of study. Each program must include either thirty semester hours of approved course work or twenty­four hours earned in courses and six hours in thesis research. If a student's preparation is inadequate for him to begin study at the graduate level in cer­tain aspects of his program, additional undergraduate courses will be required.

In order to insure effective planning of a graduate program for the degree of Master of Education, not more than twelve hours credit (fourteen if the maximum eight hours of transfer credit is offered) will be accepted in partial fulfillment of degree requirements for courses taken prior to acceptance to candidacy. A prospective candidate should therefore make application for ac­ceptance to candidacy before his first semester of residence, or, if he has been
a student in Summer Session, prior to his second summer in residence. Candidates must expect to earn on The University of Vermont campus a part of the credit to be applied to a graduate degree. In most cases candidates who are in residence during the regular academic year must also attend one or two summer sessions in order to have a suitable selection of available courses.

Master of Arts in Teaching

The program leading to the degree of Master of Arts in Teaching is designed primarily for teachers with the purpose of enhancing their teaching ability and strengthening their background in their subject matter field.

A minimum of thirty semester hours is required in courses numbered above 200, of which not less than six semester hours shall be in Education. No thesis is allowable in this degree program; a student must complete at least twenty hours, and usually twenty-four, in a single department offering courses for graduate credit or in any acceptable combination of such departments. In order to be accepted to candidacy for this degree, a student must have completed an undergraduate major within the area of his specialization, have submitted a satisfactory score on the Miller Analogies Test, and must be acceptable to the department or departments concerned.

In his undergraduate program, a candidate is expected to have completed at least twelve semester hours in education including courses which, when combined with graduate courses, will generally satisfy minimum requirements for certification to teach in the public schools. If candidates have not earned at least twelve undergraduate credits in education, they cannot expect to complete the degree in one academic year. To qualify for the degree of Master of Arts in Teaching, the candidate must present at least eighteen semester hours in education in his combined undergraduate and graduate program.

Master of Extension Education

A minimum of thirty hours is required in courses numbered above 200. Nine semester hours are required as follows: Political Science 241, Philosophy 214, Economics 204 (courses equivalent to Political Science 241 and Economics 204 may be substituted); a minimum of twelve semester hours of course credit in Agriculture and Home Economics or related basic courses; and a minimum of six semester hours of course credit in Agricultural Education, Extension Education, and Home Economics Education.

The candidate must have completed one year of successful professional experience before the degree is granted.

The candidate is at liberty to select the manner in which he or she will complete the requirements for the degree from the alternatives of: (1) a combination of three-week and six-week summer sessions, (2) a combination of summer session and extension course offerings in the State, (3) full-time residence on the campus, and (4) a combination of one term of residence and summer sessions.

Master of Arts and Master of Science

FIELD OF SPECIALIZATION

At least twenty hours of graduate credit, including credit for the thesis and research leading to the thesis, must be earned in the field of specialization. All course credits included in these twenty hours must have been earned in courses which are numbered above 200.
Thesis Each candidate will undertake a problem of original research under the direction of a member of the department in which he is specializing. At the conclusion of the investigation the student must present a thesis which embodies the results of his work and which demonstrates his capability for independent research. The original copy of this thesis must be presented to the Dean for deposit in the University Libraries; some departments require that additional copies be presented to the department.

Related Study A graduate program may include advanced courses outside the field of specialization. In order to be included as part of the master's program, these courses must be approved in advance by the department in which the student is specializing.

Final Examinations

The examinations culminating the program of graduate study for the master's degree are as follows:

I. For the Degree of Master of Education:
   a. A written comprehensive examination (three-hour minimum) in the field of Education.
   b. A comprehensive oral examination (one-hour minimum) in the field of Education.

II. For the Degree of Master of Arts in Teaching:
   a. A written comprehensive examination (two-hour minimum) in the field of Education.
   b. A written comprehensive examination (two-hour minimum) or a comprehensive oral examination (one-hour minimum) in the field of specialization. The choice between written and oral examination is to be determined by the department after consultation with the candidate. All examinations are taken on the University campus in Burlington.

III. For the Degree of Master of Extension Education:
   a. A written comprehensive examination (two-hour minimum) in the technical and social science areas.
   b. A comprehensive oral examination (one-hour minimum) in the field of specialization.

IV. For the Degrees of Master of Arts and Master of Science:
   a. A written comprehensive examination (two-hour minimum) in the field of specialization.
   b. An oral examination (one-hour minimum) in defense of the thesis.

Success in the written examinations is prerequisite to taking the oral examination. One re-examination only is permitted for any final comprehensive examination.

Requirements for the Degree of Doctor of Philosophy

The degree of Doctor of Philosophy requires of candidates a minimum of seventy-five credit hours to be earned in courses and in thesis research.
STUDIES COMMITTEE  Upon admission to the Graduate College, the prospective candidate for the Ph.D. degree will be assigned an interdepartmental Studies Committee by the Dean. This committee will meet at least once a semester with the candidate to advise him and to help plan his program of study. All courses taken in the program must be approved by this committee, the department chairman concerned, and the Dean of the Graduate College. The committee will also be responsible for administering and evaluating language examinations.

COURSES  At least forty hours must be earned in courses and seminars. The first year of each doctoral program consists almost entirely of required courses; in the following years appropriate courses are selected by the Studies Committee in consultation with the candidate. Details of each program can be obtained from the appropriate department chairman or from the Dean.

LANGUAGE REQUIREMENTS  In order to satisfy the language requirements, each candidate must be able to comprehend the literature of his field in at least two foreign languages appropriate to his field in addition to English, or demonstrate fluent command (ability to read, write and converse) of one foreign language appropriate to his field in addition to English. The choice of the language is to be determined by the candidate's department, and the testing of the candidate is to be the joint responsibility of the candidate's department and the language departments involved. The examinations will only be given during the months of October and April.

The language requirements must be completed before the comprehensive examination is taken.

RESEARCH AND THESIS  Each candidate, while in residence at The University of Vermont, must complete an acceptable original research project which contributes new knowledge or techniques in his academic field. A minimum of twenty credits will be allowed for thesis research.

THESIS EXAMINING COMMITTEE  Upon submission of the completed thesis, the Dean of the Graduate College will appoint a Thesis Committee for the oral examination of the candidate. The Committee shall consist of the Dean, the members of the Studies Committee, and at least two other faculty members nominated by the chairman of the department concerned. The acceptability of the thesis will be determined by the Thesis Committee.

EXAMINATIONS

(a) A comprehensive written examination in the field of study must be passed by the candidate at least six months before the thesis is submitted. This examination will be prepared by the department concerned, in consultation with the candidate's Studies Committee. One re-examination only will be permitted.
(b) An oral examination, in which the candidate will be expected to defend his thesis, will be scheduled no sooner than one month after the thesis has been submitted to the Department. One re-examination only will be permitted.

Copies of the thesis, as required, must be forwarded to the Dean of the Graduate College after the successful defense of thesis.

Financial Aids

Students who wish to be considered for fellowships as well as admission must submit applications, with supporting material, by March 15 of the academic year preceding that for which application is made. Application for fellowships should be made by completion of the appropriate section on the application form, except as otherwise indicated.

Graduate Fellowships The Graduate College offered four Graduate Fellowships in 1964-65, each of $1,000 plus a full tuition scholarship. These fellowships are open to applicants in any field in which the University offers a graduate degree program. Holders of Graduate Fellowships are expected to carry a full-time graduate program towards an advanced degree.

Graduate Teaching Fellowships and Graduate Research Fellowships are awarded in departments offering graduate work. Graduate Teaching Fellows are usually appointed for nine months with an initial stipend of $2,200; Graduate Research Fellows for eleven months with an initial stipend of $2,640. Teaching and Research Fellows may enroll for a maximum of twelve hours per semester; they are eligible for reappointment. Fellowship award includes tuition scholarship.

A maximum of half-time assistance in the department is expected of Graduate Teaching Fellows and Graduate Research Fellows, and they must expect that more than one academic year will be necessary to complete the requirements for the master's degree. If a Teaching Fellow or Research Fellow is a candidate for the Ph.D. degree, he must expect to spend at least four calendar years before his academic program can be completed. While it is customary, it is not obligatory that Fellows select their fields of concentration in the departments in which they are appointed; for example, foreign-born students appointed Graduate Teaching Fellows in the Department of Romance Languages may be accepted as degree candidates by the Department of English.

Appointments will be announced before April 15.

Residence Hall Counselorships Male graduate students are eligible for appointment as residence hall counselors. Residence hall counselorships afford graduate students opportunity to obtain practical experience in hall activities, human relationships, government and administration while pursuing an advanced degree in their chosen field of study. Residence hall counselorships are open to either married or single men who qualify for graduate work at The University of Vermont. Leadership experiences are
desirable. Selection is based on character, academic record, recommendations and a personal interview. Residence hall counselors receive for the first year a stipend of $2,200 plus a tuition scholarship for a ten-month period. Room and board will be deducted from this stipend. Requests for applications and additional information should be addressed to the Dean of Men. Applications should be filed not later than March 15 of the academic year preceding that for which application is made.

**George H. Walker Dairy Fellowship** The George H. Walker Dairy Fellowship is awarded every third year. It provides a stipend of not less than $900 plus a full tuition scholarship. It is available to graduate students who, during their undergraduate courses, have studied "agriculture, chemistry, and bacteriology" and who desire to study the problems relating to the production of a sanitary milk supply on comparatively small plants and farms. Applications should be addressed to the Chairman of the Department of Animal and Dairy Science.

**National Defense Education Act Fellowships** The U. S. Department of Education supported eight fellowships at The University of Vermont during the academic year 1964-65 under provisions of Title IV of the National Defense Education Act. These awards were made to students enrolled in doctoral study in the following departments: botany, chemistry, physiology and zoology. Additional fellowships may be made available in one or more of the above, or in additional departments during the academic year 1965-66. These awards carry stipends plus a dependency allowance, and include payment of tuition and fees. Inquiries concerning NDEA Fellowships should be directed to the chairman of the department concerned.

**National Aeronautics and Space Administration Traineeships** The National Aeronautics and Space Administration has supported seven graduate traineeships in the departments of chemistry and physics and zoology during the academic year 1964-65. Additional NASA traineeships may be available in these and other departments during the academic year 1965-66. These awards carry stipends plus a dependency allowance and cover payment of tuition and fees. Inquiries concerning NASA Traineeships should be directed to the chairman of the department concerned.

**National Science Foundation Cooperative Fellowships** The University of Vermont participates in the Cooperative Graduate Fellowship program of the National Science Foundation. These fellowships which are open to U. S. citizens for graduate work in the natural sciences, engineering and the quantitative social sciences, carry a stipend plus dependency allowance and tuition and nonrefundable fees. The Graduate Record Examination is required of all applicants. Special application forms are available from the office of the Dean of the Graduate College.
GRADUATE TRAINEESHIPS  Graduate traineeships have been made available to certain departments through grants from various divisions of the U. S. Public Health Service. Traineeships were awarded to graduate students enrolled in the following departments during the academic year 1964-65: biochemistry, pharmacology, and physiology and biophysics, and speech. Traineeships, which carry stipends of $1,800 upwards plus payment of tuition, will be awarded in these areas again during the academic year 1965-66. The chairman of the department concerned should be contacted for information on the availability of these awards.

OTHER SOURCES  Students undertaking graduate work at The University of Vermont may apply for other awards such as the National Science Foundation Graduate Fellowships and National Institutes of Health Predoctoral Fellowships. Further information concerning these programs may be obtained from the respective granting agencies.

LOANS  Graduate students may apply for National Defense Students Loans. Applications should be made through the Director of Financial Aid, Waterman Building, prior to April 1 for September enrollment.

Graduate students, after they have successfully completed one semester, are also eligible for university loans on the same basis as undergraduates. Details may be obtained from the Financial Aid Office.
The College of Medicine

Requirements for Admission

The College of Medicine requires that an applicant hold a Bachelor's degree, and that his four years of college work be taken in an institution listed among the "Accredited Institutions of Higher Education," compiled and published by the National Committee of Regional Accrediting Agencies of the United States. The College of Medicine requires one year each of: biology; English; physics, including laboratory; general chemistry; organic chemistry; a satisfactory one-semester course in quantitative chemistry or physical chemistry including laboratory work; and fundamental mathematical principles at the college level.

The College strongly recommends that the applicant, while in college, study in depth one or more fields of interest to him.

Students must complete satisfactorily all requirements for admission to the College of Medicine in any given year by July 1 preceding the September admission. Ordinarily courses taken in other than a liberal arts college will not meet our admission requirements.

Eligibility of an applicant for admission to the College of Medicine is determined by the Admissions Committee of the College of Medicine on the basis of the following:

1. The scholastic record of the applicant in his premedical work.
2. Personality and general fitness of the applicant for the study and practice of medicine as determined by recommendations of the applicant's college teachers and others, and by personal interview with the Admissions Committee.
3. The applicant's scores on the Medical College Admission Test. Such scores are taken into consideration but are not used as a final determinant in accepting students. If a majority (all but one or two) of the required courses have been or will be completed by the end of the third year in college, applicants are urged to take the Medical College Admission Test in May of that year.
4. All applicants are required to submit a health report completed by their college or university health service and not by their personal physician.
A maximum of fifty students is admitted to the entering class. Preference for admission is according to the following priorities:

1. Qualified residents of Vermont.

2. Qualified residents of other New England states having contractual arrangements with the College of Medicine through the New England Board of Higher Education. Contracts are presently in force with the states of Maine, New Hampshire, Massachusetts and Rhode Island.

3. Qualified residents of other areas.

Sons and daughters of the alumni of the College of Medicine of the University of Vermont are given special consideration within the framework of the above policy.

Applications for admission to the class entering in September of any year will close January 1 preceding the September admission. Application blanks should be in by December 1 for early consideration.

An application fee of ten dollars, payable to The University of Vermont and State Agricultural College, must accompany all applications and is not refundable.

The Curriculum

**FIRST YEAR**  Anatomy, physiology and biochemistry are integrated in such a fashion that topics are considered simultaneously by all departments in so far as possible. Thus when the abdomen is being dissected, the physiology of the gastro-intestinal system and the biochemistry of digestion are being considered at the same time. The students are introduced to psychobiology and epidemiology and community medicine during the first year.

**SECOND YEAR**  The curriculum is divided into three parts and correlated in time.

Course A: Morphology, Physiology, and Chemistry of the Abnormal; runs throughout the entire year and includes pharmacology, pathology, clinical pathology, medical microbiology, psychopathology, and epidemiology and community medicine.

Course B: Elicitation of Data; includes history taking and examination which are taught cooperatively by the various specialists under the general supervision of an internist. This is given in the second semester only.

Course C: Introduction to Clinical Medicine; consists of didactic lectures and case presentations covering elementary medicine, pediatrics, surgery, obstetrics, gynecology and oral medicine, and is given in the second semester.

The schedule varies from week to week because the subject material presented by the different departments is correlated.
THIRD AND FOURTH YEARS  The third and fourth years provide a continuing clinical clerkship under the direction of the major clinical departments. A one and a half-month vacation is afforded during the summer at the end of the third year. The schedule provides for clerkship experience in general and specialty hospitals, and includes ambulatory patient services in the Family Care Unit, the outpatient departments of the general hospitals, and in the home. Up to three months of elective time is provided for the student to pursue in depth an area of his interest.

Teaching Facilities

The College of Medicine Building, the College of Medicine Annex, Mansfield House, Phase I and Phase II of the new College of Medicine building contain offices, lecture rooms, medical library, student and research laboratories. Clinical facilities for teaching in the third and fourth years include the two Burlington hospitals with a total of 616 beds (not including bassinets) and 149,974 patient days.

In Burlington there are three outpatient departments with 32,166 patient visits annually, which includes the Home Care Service with 1,500 home visits annually. Elective preceptorships with general practitioners are available.

STATE SCHOLARSHIPS

There are a limited number of state scholarships of $200.00 a year each available to Vermont residents enrolled in the College of Medicine.

The scholarships available to students in the College of Medicine are listed on pages 237 and 238, and information on loan programs may be obtained from the Director of Financial Aid.
The University through its extension services aims to broaden the horizon of those who have not attended college, to afford an opportunity for those who have attended college and subsequently wish to keep in touch with academic thought in their favorite fields or to gain information about subjects which were not studied in college, and to provide undergraduates opportunities in addition to the regular classroom experience.

The Summer Session

Summer Session offers courses on both the graduate and undergraduate level in many subjects, including art, botany, chemistry, commercial subjects, conservation, dramatic art, economics, education, English, French, geography, German, history, home economics, mathematics, music (instrumental and vocal), philosophy, physical education, physics, political science, psychology, sociology, Spanish, speech and zoology.

The offerings are diversified to meet the needs of the following various groups of students: those with adequate preparation who desire courses leading to a bachelor's degree; those with adequate preparation who wish to do graduate work for the master's degree; principals and superintendents of schools who desire fundamental or specialized courses in the fields of educational administration and supervision; teachers in elementary or secondary schools who seek credit toward state teachers' certificates or who desire to broaden their knowledge of special subjects; persons who desire college level courses for self-improvement. Students must have sufficient maturity and background to profit from the courses in which they enroll.

It is recommended that any regularly matriculated student at The University of Vermont obtain prior approval from his academic dean for any courses to be taken in the Summer Session. The purpose of this recommendation is to insure such courses are appropriate for the degree for which the student is working.

Through work in the Summer Session it is possible to earn the degrees of Master of Arts, Master of Science, Master of Arts in Teaching, and Master of Education. A special bulletin giving a full description of courses will be sent upon application to the Director of the Summer Session.

Evening Division

Continuing education for adults in the State of Vermont is provided under the Evening Division Program offered by the University. Members of the faculty
at the University and others, working under temporary appointment, offer evening or extension courses in arts and sciences and education. A variety of courses is presented in evening sessions on campus throughout the college year. Some of these may be taken for credit while others are non-credit and are designed for the adult who is interested in continuing his education for the pleasure of self-improvement.

Courses are given in towns and cities throughout the state wherever a group of ten or more individuals register for a course.

Arrangements for Evening Division courses are made through the Evening Division, 147 Waterman Building. Length of courses varies from ten to fifteen weeks.

It is recommended that any regularly matriculated student at the University of Vermont obtain prior approval from his academic dean for any courses to be taken in the Evening Division. The purpose of this recommendation is to insure such courses are appropriate for the degree for which the student is working.

All persons desiring graduate credit must secure the approval of the Dean of the Graduate College.

The Government Research Center

The Government Research Center, established in 1950 as the Government Clearing House, provides research and informational services for students, state and local officials, members of civic groups, and the public. Activities include the following: developing opportunities for students to become acquainted with, and to gain practical experience in, the operation of government; maintaining liaison with state and local officials relative to the use of University resources in the study of problems in state and local government; operating a public affairs research center, conducting research projects, and publishing studies in state and local government; and preparing background materials for conferences on public questions.

Many of the activities of the Government Research Center are sponsored in cooperation with state officials, local officials, or civic groups. The annual Listers' Schools are sponsored jointly with the Governor and the Vermont State Tax Department. Many state and local officers participate in the series of one-day Town Officers Educational Conferences, which originated in the late 1930s and which are held annually in several locations throughout Vermont. A two-day conference on citizenship, in which high school juniors, high school faculty members and administrators, and University personnel participate, has become an annual event, with the cooperation of the State Department of Education and various educational associations.

A Public Affairs Library collection is maintained as a memorial to the late James P. Taylor, whose effort to expand citizen interest in effective government is well known throughout the State. The Government Research Center also sponsors the annual Taylor Town Report Contest in Vermont and cooperates with the New England Council relative to the region-wide contest.

The World Affairs Center

The World Affairs Center, located in the Old Mill on the University campus, is the focus for programs and services to further greater understanding of
world affairs and responsible citizens’ participation in U. S. foreign policy. The Center is staffed jointly by the University and the Vermont Council on World Affairs. A library on world affairs, national foreign policy, and international organizations is maintained at the Center for the use of Vermont citizens and University members. Advice and services for foreign students and staff as well as international visitors are part of the Center’s responsibility on the University campus.

The Center cooperates with the United States Department of State, the United Nations, and many other national and local organizations in arranging speakers, programs, material for distribution, hospitality for visitors from abroad, and consultations with Vermont groups on various aspects of world affairs. The Center serves as a coordinating agent and occasionally sponsors activities such as specialized conferences, courses and contests throughout the State of Vermont.

The Center for Area Studies

The Center for Area Studies is an inter-departmental activity of the University conducted by the Committee on Area Studies appointed by the President. The purposes of the Center are to encourage and coordinate interdisciplinary study of selected foreign areas and to promote research and interest in foreign areas among all the colleges of the University. The staff and course offerings in the Center’s program are included under the various academic departments.

The Center represents a permanent continuation of the interest in non-Western areas that was developed by the Program of Non-Western Studies under a five-year grant, 1959-1964.

The Center for Area Studies administers the program of concentration in Area Studies for the A.B. degree in the College of Arts and Sciences. Undergraduates concentrating in Area Studies choose one of the areas in which the Center currently approves an interdisciplinary program of social science and foreign language: Canada, Latin America, or Russia and East Europe. For the requirements for concentration in Area Studies see under the College of Arts and Sciences.

Undergraduates interested in taking area studies should, as early as possible in their college careers, consult the Chairman of the Committee on Area Studies or the Dean of the College of Arts and Sciences.

Junior Year Study Abroad

A University of Vermont student who wishes to attend a foreign university in his junior year and receive transfer credit should consult with the dean of his college and receive approval, in advance, of his plan and program. In general to gain approval a student will be expected:

a) to have completed two full years (sixty semester hours) of work;
b) to have an average of not less than 80;
c) to have a valid objective, appropriate to his academic program and not available at the University of Vermont;
d) to have a good working knowledge of the language of the country to which he proposes to go.

Definite preference will be given to programs sponsored by approved Universities and Colleges in this country.

Conferences and Institutes

Conference activity is a rapidly increasing part of University life, both throughout the regular college year and during the summer, many conference groups make use not only of university classroom and auditorium facilities but also of university dormitories and dining service. Groups interested in arranging for meetings or conferences at the University should contact the Conferences and Institutes Office, Waterman Building. This office also arranges the University Lecture series which brings outstanding speakers to the campus, and coordinates the Speakers Bureau through which University personnel are made available to organizations outside the campus.

Audio-Visual Services

Audio-Visual Services includes an Audio-Visual Aids Library, an Audio-Visual Equipment Service and a Photographic Service.

The Library contains educational films; slides, filmstrips and tape and disc recordings. The Vermont State Department of Education contributes aids for elementary and secondary schools which are distributed as an extension service of the University.

Equipment Service has available for campus and outside users projection equipment for 16mm sound motion pictures, slides and filmstrips; opaque and large transparent materials; tape recorders and record players, as well as projection and maintenance service.

Photographic Service, on assignment from administrative departments and faculty, produces motion and still pictures, lantern slides and transparencies, and maintains a file of photographs and negatives.
Courses of Instruction

The University reserves the right to change these course offerings at any time.

The departments and areas of instruction are arranged alphabetically, and the college in which each is located is indicated.

Courses numbered from 1 to 99 are elementary and intermediate courses. Those numbered from 100 to 199 are advanced undergraduate courses. Those numbered from 200 to 299 are advanced courses for undergraduates which also may be taken for graduate credit by qualified graduate students. Courses numbered from 300 to 399 are limited to graduate students. Courses numbered above 400 are limited to candidates for the degree of Doctor of Philosophy.

A separate number is used for each semester course and for each semester of a year course.

Two numbers with a comma between (17,18) indicate that the separate semester courses may be taken independently for credit.

Two hyphenated numbers (17-18) indicate that the semester courses may not be taken independently for credit and, unless otherwise stated, they must be taken in the sequence indicated.

Odd-numbered courses are offered the first semester; even-numbered courses the second semester, unless otherwise indicated by the Roman numeral I for the first semester or II for the second semester.

The letter “S” preceding the course number indicates the course is offered normally in the Summer Session.

The letter “A” preceding the course number indicates the course is offered normally in the Evening Division program.

The number of credit hours per semester is stated in each course description.

The form (2-3) immediately following the course title indicates the number of class hours respectively of lecture and of laboratory.
Agricultural Biochemistry

COLLEGE OF AGRICULTURE AND HOME ECONOMICS

Professor Johnstone (Chairman); Associate Professors Foote and Racusen

197, 198 Senior Research Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. Three hours. Staff.

201 General Biochemistry (3-4) Broad coverage of fundamentals of biochemistry for science students, including the chemistry of carbohydrates, proteins, lipids, vitamins, enzymes, and hormones and their relation to processes of biological significance. Basic principles of analytical procedures involved in biochemical methods. Prerequisite: chemistry 131. Five hours. Dr. Foote.

250 Advanced Biochemistry (4-2) An advanced study of biochemical systems with emphasis on research methods and plant biochemistry. Laboratory sessions include the use of radioisotopes and chromatographic techniques. This course augments agricultural biochemistry 201 (general biochemistry), the combined sequence providing a base for graduate research in biochemistry and related fields. Prerequisite: 201 or medical biochemistry 301. Five hours. Dr. Racusen.

253 Microbial Biochemistry (2-3) The chemical composition, energy utilization and metabolism of microbial cells. Prerequisite: 201 or medical biochemistry 301, botany 116; and departmental permission. Three hours. Dr. Johnstone. Alternate years, 1965-66.

381, 382 Graduate Seminar Topical seminar with discussion of assigned and collateral reading. Required of departmental graduate students. One hour. Staff.

391 through 399 Master’s Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

491 through 499 Doctor’s Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

1 Sabbatical leave first semester 1964-65.
Agricultural Economics

COLLEGE OF AGRICULTURE AND ECONOMICS

Professors Samenfink and Sargent (Chairman); Associate Professors Sinclair¹, Tremblay² and Webster

2 World Food and Agriculture
Historical development and pattern of agriculture to the present. Emphasis on the adjustment of agriculture to natural and economic phenomena. Present pattern of crop and livestock production, trade, and consumption in Vermont, the United States, and the world. Three hours. Dr. Tremblay.

51 Agricultural Finance
Capital requirements of American agriculture; analysis of the financial problems of farmers; types and sources of credit and the lending problems and practices of farm credit institutions. Prerequisite: sophomore standing. Three hours. Dr. Sinclair.

66 Agricultural Business
Management problems of rural business firms including agricultural cooperatives, especially those handling farm produce and supplies. Theoretical and practical considerations in the organization and operation of agricultural businesses with emphasis on financial and legal organization, accounting and budgeting procedures, and tax policies. Prerequisite: sophomore standing. Three hours. Dr. Webster.

103 Rural Sociology
The origin, characteristics, forms of organization, levels of living, mobility, and geographic distribution of rural people, and their relationship to urban society. Prerequisite: junior standing or departmental permission. Three hours. Dr. Samenfink.

159 Land Economics
The field of land economics, benefit-cost analysis, economic appraisal of public resource development investments, water problems, the legal framework of resource development, economics of recreational land use, economic aspects of rural development, land classification, rural zoning, land use planning. Prerequisite: economics 11-12. Three hours. Dr. Sargent.

197, 198 Senior Research
Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. Three hours. Staff.

201 Farm Management (3-2)
Organization and operation of a successful farm business. Prerequisite: economics 11-12 or concurrent enrollment; junior standing. Four hours. Dr. Tremblay.

207 Agricultural Marketing and Prices (2-2)
Market structure, prices, and economic forces involved in the movement of farm products from producers to consumers. Emphasis on the New England situation. Prerequisite: economics 11-12 or departmental permission. Three hours. Dr. Webster.

¹ Sabbatical leave first semester 1965-66.
² Sabbatical leave first semester 1964-65.
208 Agricultural Policy The role of government, farm organizations, and other institutions in the development of agricultural policy. An economic analysis of the price and income problems of American agriculture and alternatives to their solution. Prerequisite: economics 11-12 or departmental permission. Three hours. Dr. Sinclair.

251 Research Methods The scientific method, statistical methods, sampling methods, use of electronic computers, linear programming, reporting research results. Prerequisite: three hours of statistics. Three hours. I or II. Staff.

253 Theory of Agricultural Production Economics Application of the theory of the firm to agricultural production units. Emphasis on resource allocation and production efficiency. Principles of marginal analysis applied to production problems in a static and dynamic economy. Prerequisite: twelve hours in agricultural economics and economics, senior standing, and departmental permission. Three hours. I or II. Dr. Sinclair.

256 Special Topics in Agricultural Economics Readings and discussion of specific topics in agricultural economics at advanced level. Prerequisite: departmental permission. Three hours. I or II. Staff.

270 Agricultural Development Problems of economic development of underdeveloped countries. Levels of economic development, prerequisites to development, land reform, theories of development, investment priorities, terms of trade, and national development programs. Prerequisite: twelve hours in economics and agricultural economics. Two hours. Dr. Sargent.

281, 282, 283, 284 Agricultural Economics Seminar Discussion of problems and research in agricultural economics and other social sciences. Prerequisite: senior or graduate standing, or departmental permission. One hour. Staff.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.
Agricultural Education

COLLEGE OF AGRICULTURE AND HOME ECONOMICS

Associate Professor Gaylord (Chairman); Mr. Davison

102 EXTENSION METHODS (1-2) Methods and techniques of extension teaching. Prerequisite: junior standing. Two hours. Mr. Davison. Alternate years, 1964-65.

104 LEADERSHIP TRAINING AND ORGANIZATION METHODS (2-2) Methods and techniques by which officers, group members and administrators may increase the effectiveness of organizations. Practice in applying the methods treated. Prerequisite: junior standing, or departmental permission. Three hours. Dr. Gaylord.

152 INTRODUCTION TO TEACHING VOCATIONAL AGRICULTURE (1-2) Introduction to the vocational education acts and major program objectives; the determination of instructional needs, and development of farming programs for high school students. Development of the philosophy of problem solving in agricultural education, and a general orientation to the work of the teacher of vocational agriculture. Prerequisite: junior standing, or departmental permission. Two hours. Dr. Gaylord.

155 DIRECTED PRACTICE TEACHING IN VOCATIONAL AGRICULTURE Ten weeks of practice teaching in high school departments of vocational agriculture under guidance of experienced teachers and the teacher trainer. One week of home visits to supervised farming programs during the summer, and the first week of high school. Prerequisite: 251 and 253 or departmental permission. Eight hours. Dr. Gaylord.

197, 198 SENIOR RESEARCH Work on a research problem under the direction of a staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. Three hours. Staff.

251 METHODS OF TEACHING VOCATIONAL AGRICULTURE (2-2) Making farm surveys, analyzing farm businesses, developing a course of study and farming programs. Developing teaching plans; techniques and visual aids; advising the FFA chapter; evaluating student progress; providing counseling; guidance and maintaining discipline. Prerequisite: senior standing. 104 and 152 or departmental permission. Three hours. Dr. Gaylord.

253 METHODS OF TEACHING YOUNG AND ADULT FARMER CLASSES IN VOCATIONAL AGRICULTURE (2-2) Determining needs, problems and objectives for education of young and adult farmers; selecting positions, planning courses, and developing teaching plans; use of on-farm instructions; demonstrations and other suitable methods, techniques and instructional materials; use of advisory groups; progress evaluation; role of young farmer associations. Prerequisite: 104 and 152 or departmental permission. Three hours. Dr. Gaylord.
282 Seminar Evaluation of student teaching experiences; in-school and out-of-school public relations; placement and follow-up of students; department management; planning and maintaining facilities; overall program; summer program and professional responsibilities. Required of agricultural education majors. Prerequisite: senior standing; 155 or departmental permission. One hour. Dr. Gaylord.

301 through 304 Research in Agricultural Education Investigation of a research topic under the direction of an assigned staff member. Credit as arranged.

Agronomy

College of Agriculture and Home Economics

Professor Midgley (Chairman); Associate Professors Bartlett and Wood; Assistant Professors Flanagan and McIntosh

10 Introductory Crop Science (3-2) Principles of establishment, management and improvement of agronomic crops. Prerequisite: botany 1 or departmental permission. Four hours. Dr. Wood and staff.

23 Forage and Pasture Crops (2-2) Producing, improving and managing forage and pasture crops including study of silage and hay making. Prerequisite: botany 1 or departmental permission. Three hours. Dr. Wood.

52 General Soils The chemistry, physics, and biology of soil in its role as a substrate for plants. Three hours. Dr. McIntosh.

153 Conservation of Natural Resources A study of natural resources including soils, water, atmosphere, wild life, and minerals. Interrelationships, management, and the social and economic aspects of depletion and conservation are emphasized. Prerequisite: junior standing. Three hours. Dr. Flanagan.

197, 198 Senior Research (0-3) Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. Three hours. Staff.

226 Special Topics in Soils and Crops  Correlation of advanced information in soils with that of crops. Soil chemistry, physics, microbiology and soil management are related to crop production, other topics suited to the needs of the students. Prerequisite: 103 or 105; chemistry 123 or 131, and departmental permission. Three hours. Staff. Alternate years, 1966-67.

227 Mineral Nutrition of Plants  Classical work in solution culture; modern theories of ion accumulation. Colloidal chemistry of roots and the rhizosphere. Measurement of ion availability in relation to uptake and growth. Prerequisite: senior standing in a plant science; botany 103 and introductory soils or the equivalent. Three hours. Dr. Bartlett and botany, forestry and horticultural science staff. Alternate years, 1965-66.

281 through 284 Agronomy Seminar  Presentation and discussion of papers on selected topics of agronomic interest by students and staff. One hour. Staff.

391 through 399 Master's Thesis Research  Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

Animal and Dairy Science

College of Agriculture and Home Economics

Professor Bradfield; Associate Professors Atherton, Balch and Smith (Chairman); Assistant Professors Duthie, Fitzsimmons and Simmons

1 Introductory Dairy Science (2-3)  Management, feeding, selection, and breeding of dairy cattle. Three hours. Dr. Fitzsimmons.

2 Milk and Milk Products (2-2)  History, development, role of products made from milk in the dairy industry, markets, and principles of processing. Three hours. Dr. Duthie.

4 Introductory Animal Science (1-3)  Size, scope and functions of our modern livestock industry. The types and breeds of livestock of major economic importance; horses, beef cattle, sheep, and swine. Practical application of selection and management principles. Two hours. Dr. Balch.

21 Dairy Products Judging and Selection (2-1)  Critical study of various dairy products; relation of judging and selection to consumer acceptance; market standards and grading. Prerequisite: sophomore standing. Two hours. Dr. Duthie.

44 Dairy Cattle Judging (0-6)  Judging, fitting, and showing of dairy cattle. Prerequisite: 1. Two Hours. Dr. Fitzsimmons.

95 Light Horse Production and Management (2-3)  The problems of light horse production. Practical application of the principles of selection,

105 Feeds and Feeding (3-2) Fundamentals of livestock feeding and evaluation of livestock rations with emphasis on ingredients and nutritive value. Four hours. Dr. Smith.

109 Dairy Bacteriology (1-4) Relation of microorganisms to milk and milk products, methods of examination and control. Three hours. Dr. Atherton.

114 Manufactured Dairy Products (2-3) Methods and technical problems in manufacturing milk products such as cheese, butter, evaporated and dry milks. Prerequisite: 2, junior standing. Three hours. Mr. Bradfield. Alternate years, 1965-66.

153 Milk Processing (2-2) Technical aspects of processing fluid milk and fluid milk products. Prerequisite: departmental permission. Three hours. Mr. Bradfield.

197, 198 Senior Research Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. Three hours. Staff.

206 Animal Nutrition Nutrients, their function and utilization, and requirements for growth, reproduction and lactation. Prerequisite: 105; chemistry 131 or departmental permission. Three hours. Dr. Smith.

211 Ice Cream and Frozen Dairy Products (2-3) Fundamentals of ice cream manufacturing, the physico-chemical and biological factors involved; calculation of formulas; sherbets and specialties; merchandising, soda fountain management and sanitary control. Prerequisite: 104; credit or concurrent enrollment in 109; junior standing. Three hours. Mr. Bradfield. Alternate years, 1966-67.

251 Dairy Cattle and Milk Production (2-2) Advanced principles of dairy cattle feeding and management. Prerequisite: 105. Three hours. Dr. Fitzsimmons.

256 Dairy Plant Management Organization and operation of milk processing and manufactured milk products plants. Prerequisite: 153; economics 12; junior standing. Two hours. Mr. Bradfield. Alternate years. 1966-67.

260 Dairy Cattle Breeding (2-3) Theory and application of genetic principles to breeding of dairy cattle. Prerequisite: 1, zoology 115 or departmental permission. Three hours. Dr. Fitzsimmons.
ANIMAL PATHOLOGY

271 ENDOCRINOLOGY (2-2) Anatomy, physiology, glandular interrelationships, and assay methods of the endocrine glands and their hormones. Prerequisite: zoology 1 and departmental permission. Three hours. Dr. Simmons.

276 PHYSIOLOGY OF REPRODUCTION AND LACTATION (2-2) Fundamental principles of the physiology of reproduction and lactation with the primary emphasis on farm animals. Prerequisite: 271 or departmental permission. Three hours. Dr. Simmons.

281, 282 ANIMAL AND DAIRY SCIENCE SEMINAR Reports and discussions of problems and special investigations in selected fields. One-two hours. Maximum credit 1 hour senior, 3 hours graduate. Staff.

291, 292 SPECIAL PROBLEMS IN ANIMAL AND DAIRY SCIENCE Reading, discussion, and special laboratory investigation in the field of animal and dairy science. Three hours. Staff.

391 through 399 MASTER'S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

Animal Pathology

COLLEGE OF AGRICULTURE AND HOME ECONOMICS

Professor Bolton (Chairman); Associate Professor Durrell

105 ANATOMY AND PHYSIOLOGY Structure and function of the various parts of the animal body with emphasis on cattle. Prerequisite: junior standing. Three hours. Dr. Durrell.

106 ANIMAL DISEASES Fundamentals of disease control and prevention. Special disease problems in cattle, sheep, horses, and swine with emphasis on control measures. Prerequisite: 105 strongly recommended; junior standing. Three hours. Dr. Durrell.

197, 198 SENIOR RESEARCH Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. Three hours. Staff.

391 through 399 MASTER'S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.
1 Greek Art  History of art in Greek lands in ancient times, with principal emphasis on sculpture, architecture, and vase painting. Prerequisite: sophomore standing. Three hours. Dr. Davison.

2 Renaissance Art  Architecture, sculpture and painting in Italy and Northern Europe 1400-1600. Studies of original material in the Museum collection. Prerequisite: sophomore standing. Three hours. I. Dr. Janson. Alternate years, 1966-67.

3 Medieval Art  Architecture, sculpture, and painting in Western Europe from the year 1000 to the early 15th century. Prerequisite: sophomore standing or departmental permission. Three hours. II. Dr. Janson. Alternate years, 1966-67.

4 Modern Art  Painting and sculpture from the period of French Impressionism to the present time; emphasis on European influences. Prerequisite: junior standing. Three hours. Mrs. Mills.

6 Modern Architecture  Monuments, Masters and Movements in architecture since 1850. Visits with architects and to modern buildings in the area. Prerequisite: sophomore standing. Three hours. Dr. Janson. Alternate years, 1965-66.

7 Painting in America  Development of painting in America from colonial times to 1900. Social and economic forces which at times channelled American artistic expression. Prerequisite: sophomore standing. Two hours. Mr. Colburn.

8 American Architecture  American building and design from colonial times to Frank Lloyd Wright, particularly as represented on the Vermont scene. Prerequisite: sophomore standing. Three hours. I. Dr. Janson. Alternate years, 1965-66.

11, 12 Arts and Crafts  Basic creative experiences in ceramics and silver jewelry are used to develop individual ability in design, appreciation and technical skill. Aspects of related historical and contemporary crafts are included. Prerequisite: sophomore standing. Three hours. Mrs. Mills.
21, 22 Drawing and Painting Composition and painting techniques. Emphasis on a clearer understanding of modern schools of painting and on individual development. By permission, the course may be taken a second time for credit. Prerequisite: sophomore standing. Three hours. Mr. Colburn.

41, 42 Sculpture An introductory course in sculpture, dealing with both formal and technical problems. Prerequisite: sophomore standing. Three hours. Mr. Aschenbach.

For courses in Art Education, see Elementary Education 170.

Botany

College of Agriculture and Home Economics

Professors Dodge, Gershoy, Marvin, Sproston and Taylor; Associate Professors Raynor and Vogelmann (Chairman); Assistant Professors Cook, Fisher and Mathes

1 Introductory Botany (3-3) Fundamental principles of biology illustrated by the morphology, physiology, and reproduction of vascular plants. Study of forms and functions, leading to an understanding of the plant as a dynamic unit. Four hours. I, II. Dr. Cook. (An equivalent course is offered in Summer Session.)

2 The Plant Kingdom (2-4) Plant groups: their relationships to one another, based on structure and patterns of reproduction. Plant distribution in time and space. Prerequisite: 1. Four hours. Dr. Raynor.

S10 Field Botany (2-4) Regular field trips conducted to areas around Lake Champlain and in the Green Mountains to study Vermont's rich native flora. Identification and classification of flowering plants. Techniques of collecting and mounting specimens. Prerequisite: a semester course in botany. Four hours. Dr. Vogelmann. Summer Session only.

51 Plants and Man The place of plants in man's affairs. The influence of plants on exploration, migration and the development of civilizations. The role of plants in the world today, with special emphasis on food, drug, fiber, and other useful plants and on the botanical features which contribute to their usefulness. Prerequisite: 1. Three hours. Dr. Taylor.

55 Introductory Microbiology (2-4) Study of microorganisms, especially bacteria, their structure, development and activities. Emphasis is placed on the basic principles and laboratory techniques. The role of microorganisms in nature and their various interrelationships with man are discussed. Prerequisite: eight hours of chemistry. Four hours. Dr. Fisher.

1 Visiting professor.
2 Sabbatical leave 1964-65.
3 Sabbatical leave first semester 1965-66.
60 **Plant Ecology**  Basic principles of plant ecology; climatology; analysis of the environment and its effect on organisms; interrelationships between plants; ecologic adaptations and evolution. *Prerequisite:* 1. Three hours. Dr. Vogelmann. Alternate years, 1966-67.

103 **Plant Physiology** (3-4)  Mechanisms of absorption, translocation, synthesis, and utilization of materials. The role of internal and external factors in growth. *Prerequisite:* 1; credit or concurrent enrollment in Chemistry 131. Five hours. Dr. Mathes.

110 **Taxonomy** (1-4)  Principles of classification; phylogeny of vascular plants, the evolution of the angiosperms; the species concept; variation; development and migration of floras; modern techniques and biosystematics. *Prerequisite:* 1; junior standing. Three hours. Dr. Vogelmann. Alternate years, 1965-66.

113 **Plant Communities** (2-2)  Structure and organization of plant communities; plant succession; formations and associations; sampling methods; field work. *Prerequisite:* 110 or departmental permission. Three hours. Dr. Vogelmann. Alternate years, 1966-67.

117 **Plant Pathology** (2-4)  Diagnosis, life history, and control of plant diseases caused by fungi, viruses, bacteria, nematodes. *Prerequisite:* 1. Four hours. Dr. Sproston.

156 **Advanced Microbiology** (3-2)  Selected topics in microbiology, including further study of bacteriology, soil and food microbiology. Emphasis is placed on activities and role of microorganisms in the specialized habitats. *Prerequisite:* botany 55. Four hours. Dr. Fisher. Alternate years, 1966-67.

197, 198 **Senior Research**  Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by department. *Prerequisite:* senior standing. Three hours. Staff.

227 **Mineral Nutrition of Plants**  (See agronomy 227.) Three hours. Dr. Bartlett and botany, forestry, and horticultural science staff. Alternate years, 1965-66.

252 **Plant Anatomy and Histology** (2-4)  Development of the organism and accompanying integration of cellular tissues. Ontogeny of vegetative tissues; modifications of the cell wall. *Prerequisite:* 2; senior standing or departmental permission. Four hours. Dr. Taylor. Alternate years, 1966-67.

253 **Fungi** (2-4)  The reproductive processes of the common molds, yeasts, and actinomycetes and their classification. Physiological studies; antibiosis. *Prerequisite:* 103 or departmental permission. Four hours. Dr. Sproston. Alternate years, 1965-66.

255 **Genetics and Cytogenetics** (3-2)  Fundamental principles of genetics. Analysis of concepts of variation, mendelian inheritance, cytoplasmic inheritance, gene action, population genetics, and biometry; meiotic chromosome behavior in diploids, polyploids and species hybrids. *Prerequisite:* 1; zoology 1; botany 2 and a second course in zoology, 21 or 41, are strongly recommended; senior standing. Four hours.
256 CYTOLOGY (2-4) Dynamics of the protoplast; nuclear division, gamete formation, syngamy and substitute methods of reproduction. Interrelation of chromosomal and genetic phenomena. Prerequisite: 255 or zoology 115; chemistry 131, 132 or departmental permission. Four hours. Dr. Cook and Dr. Mathes. Alternate years, 1966-67.

258 PLANT GROWTH (2-4) The nutrition of plant cells, growth hormones, cyclic variation of environmental factors, morphogenesis. Prerequisite: 103; chemistry 131, 132 or departmental permission. Four hours. Dr. Marvin. Alternate years, 1965-66.

259 MORPHOLOGY AND EMBRYOLOGY (2-4) Comparative study of body form, ontogeny of reproductive structures and phylogenetic relationships in the embryophytes; emphasis on seed plants. Prerequisite: 2; senior standing or departmental permission. Four hours. Dr. Raynor. Alternate years, 1966-67.

260 PHYCOLOGY (2-4) The morphology, classification, and general biology of the algae, with special consideration of the freshwater forms. Emphasis on the use of algae as experimental material for the investigation of general biological problems. Prerequisite: 2, or two courses in zoology or botany above 100. Four hours. Dr. Cook. Alternate years, 1965-66.

381, 382 BOTANY SEMINAR A topical seminar with discussion of assigned and collateral reading. Required of botany graduate students. One hour. Staff.

391 through 399 MASTER'S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

491 through 499 DOCTORAL THESIS RESEARCH Original research under the direction of an assigned staff member, culminating in an acceptable doctoral dissertation. Credit as arranged.

Chemistry

COLLEGE OF TECHNOLOGY

Professors Gregg and White (Chairman); Associate Professors Crooks, Flanagan and Whitcher; Assistant Professors Brooks, Brown, Criss, Krapcho, Kuehne and Lucarini

Note: Credit cannot be granted for: 1-2 and also 11-12; 3-4 and also 1-2; 35 and also 131, 132; 140 and also 141-142.

1-2 INTRODUCTORY CHEMISTRY (3-3) General inorganic chemistry. Lectures, recitations and laboratory, including elementary qualitative analysis. Acceptable prerequisite to advanced courses. Prerequisite: at least one year of high school mathematics. Four hours. Drs. Gregg, Crooks, Whitcher and Miss Brown.

1 On leave September 1, 1965 to December 20, 1965.
3-4 Outline of Chemistry (3-2) Backgrounds of inorganic, organic, and biochemistry, primarily for students in nursing or for dental hygienists. Elective for others with the approval of the dean of their college and the chemistry department. Prerequisite: at least one year of high school mathematics. One year of high school chemistry or physics recommended. Four hours. Dr. Crooks and staff.

11-12 General Chemistry (3-6) Lectures, recitations and laboratory, including general experiments in elementary qualitative and quantitative analysis. Recommended for those concentrating in physical science. Prerequisite: at least one year of high school mathematics. Five hours. Dr. Krapcho and staff.

13, 14 The Chemical Bond Nature of interatomic and intermolecular forces. Stereochemistry, bond energies, and crystal structures are considered. Prerequisite: 1-2 or 11-12. One hour. Dr. Gregg.

123 Quantitative Analysis (3-3) Theory and practice of gravimetric and volumetric methods of analysis. Theoretical discussion of indicators, buffers, pH, etc. Prerequisite: 1-2. Not open to students with credit for 11-12. Four hours. Dr. Whitcher.

131, 132 Organic Chemistry (3-6) Organic chemistry for chemistry majors, premedical students and those concentrating in the biological and physical sciences. Prerequisite: 1-2 or 11-12; 21-22 recommended; 131 for 132. Five hours.1,2 Dr. White and staff.

140 Physical Chemistry for Biological Science Students Aspects of physical chemistry most pertinent to work in the biological sciences: acid-base equilibrium, theory of solutions, thermodynamics and kinetics. Prerequisite: 1-2, physics 5-6 or the equivalent. Three hours. Dr. Flanagan.

141-142 Physical Chemistry Elementary quantum chemistry, introduction to statistical mechanics, thermodynamics, properties of solutions and chemical kinetics. Prerequisite: 1-2 or 11-12; physics 16; mathematics 21. Three hours. Staff.

143 Molecular Structure Molecular spectroscopy, scattering and resonance phenomena. Prerequisite: 142. Three hours. Staff.

144 Physical Chemistry Laboratory Basic physical chemistry experiments. Prerequisite: 11-12 or 123; 141; concurrent enrollment in 142. Two hours. Staff.

145 Advanced Physical Chemistry Laboratory Experiments dealing with molecular structure; spectroscopy, x-ray diffraction, dipole moment determination, magnetic susceptibility. For chemistry majors. Prerequisite: 142; 144; concurrent enrollment in 143. Two hours. Staff.

Advanced Inorganic Chemistry

108 Inorganic Preparations Laboratory preparations of inorganic compounds. Prerequisite: 1-2. Two hours. Dr. Crooks.

1 May be taken by certain students for four hours credit, with only one three-hour laboratory period.
2 May be taken without laboratory work for three hours credit by departmental permission.
212 Advanced Inorganic Chemistry  Chemistry of the elements; relation of structure to properties and to coordination compounds, complex ions, radioactivity, and stereoisomerism. **Prerequisite:** credit or concurrent enrollment in 141-142. Three hours. Dr. Gregg.

### Advanced Analytical Chemistry

221 Advanced Theoretical Chemistry  Selected topics in theoretical chemistry with reference to analytical applications. **Prerequisite:** credit or concurrent enrollment in 141-142. Three hours. Dr. Whitcher. Not offered every year.

224 Instrumental Analysis (2-6)  Theory and practice of optical, electrometric, chromatographic, and radiochemical methods of analysis. **Prerequisite:** 11-12 or 123; 141 and credit for or concurrent enrollment in 142. Four hours. Dr. Whitcher.

### Advanced Organic Chemistry

231, 232 Special Topics in Organic Chemistry  An elaboration of structural and configurational isomerism, modern acid-base theory, molecular rearrangements and organic-free radicals. **Prerequisite:** 131, 132; credit or concurrent enrollment in 141-142. Three hours. Alternate years, 1964-65.

233, 234 Physical Organic  Physical organic chemistry, emphasis on structural aspects and reaction mechanisms. **Prerequisite:** 131, 132; credit or concurrent enrollment in 141-142; 233 for 234. Three hours. Dr. Krapcho. Alternate years, 1965-66.

237 Identification of Organic Compounds and Advanced Techniques in Organic Chemistry (3-8)  Methods, both chemical and physical, of identifying organic compounds, their separation, and the determination of their functional groups. Experiments with infrared and ultraviolet spectroscopy, vapor phase chromatography, thin layer, paper and column chromatography, selective oxidations and reductions, synthetic reactions, isolation and purification of a natural product. **Prerequisite:** 131, 132; credit or concurrent enrollment in 141-142. Five hours. Dr. Kuehne.

238 Organic Reactions  Discussion, from the preparative viewpoint, of applications, limitations, and experimental conditions of the more important reactions of organic chemistry. **Prerequisite:** 132; credit or concurrent enrollment in 141-142. Three hours. Dr. Krapcho or Dr. Kuehne. Not offered every year.

251, 252 Advanced Organic Chemistry  A more detailed description of reactions encountered in basic organic chemistry. Topics include mechanisms of important classes of organic reactions, condensation reactions, synthetic methods, stereochemistry, electronic theory, tautomerism, free radicals; kinetic, radioisotope and stereochemical approaches to mechanism studies, and the application of acid-base theory to organic mechanisms. **Prerequisite:** 132; credit or concurrent enrollment in 141-142, 251 for 252. Three hours. Dr. Kuehne.
CHEMISTRY

332 Natural Products—The Alkaloids The major classes of alkaloids will be surveyed from a biogenetic point of view. Classical and modern degradation methods, total syntheses and biosynthetic incorporation of labeled compounds will be discussed. Prerequisite: 252 or concurrent enrollment, or the equivalent with departmental permission. Three hours. Alternate years, 1966-67. Dr. Kuehne.

334 Natural Products—The Terpenes Chemistry of mono-sequi-di and triterpenes, including degradations, structure proofs, total syntheses, rearrangements reactions and biogenesis. Prerequisite: as for chemistry 332. Three hours. Dr. Kuehne. Alternate years, 1965-66.

Advanced Physical Chemistry

247, 248 Advanced Physical Chemistry Higher level consideration of the topics discussed in 141-142. Emphasis on spectra, statistical mechanics and quantum theory. Prerequisite: 141-142; 247 for 248; concurrent enrollment in mathematics 21. Three hours. Dr. Flanagan.

246, 249 Special Topics in Physical Chemistry Advanced level discussion of specific topics in physical chemistry; molecular and atomic spectra, theory of solutions, quantum theory or statistical mechanics. Prerequisite: 248 or its equivalent. Three hours. Staff.

341 Chemical Thermodynamics Systematic study of the application of thermodynamics in the solution of chemical problems. Prerequisite: 248. Three hours. Dr. Criss or Dr. Flanagan.

342 Chemical Kinetics Velocity of chemical reactions in homogeneous and heterogeneous systems. Prerequisite: 248. Three hours. Staff.

Seminars and Research

Seminars are required of graduate students and juniors and seniors concentrating in chemistry.

181-182 Junior Seminar (2-0) One hour. Mr. Lucarini.

183-184 Senior Seminar (2-0) One hour. Staff.

197-198 Senior Research (0-6, 0-12) The student elects a field for special study in inorganic, analytical, physical or organic chemistry and works under the direction of a staff member. Findings submitted in written form and suitably bound. Required of seniors in the chemistry curriculum. Two hours. I. Four hours. II. Staff.

381 through 384 Graduate Seminar (2-0) One hour. Staff.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

491 through 499 Doctoral Thesis Research Original research under the direction of an assigned staff member, culminating in an acceptable doctoral dissertation. Credit as arranged.
Professors Gilleland and Kent (Chairman); Associate Professors Davison and Pooley; Assistant Professor Ambrose.

Greek

1-2  ELEMENTARY GREEK  Essentials of Attic Greek. Prose compositions and selected readings from Greek authors. Four hours. Mr. Pooley.

11-12  INTERMEDIATE GREEK  Plato's *Euthyphro* and *Apology*; selections from the *Iliad* and the *Odyssey*. Prerequisite: 1-2 or its equivalent. Three hours. Drs. Gilleland and Davison.

111-112  PROSE COMPOSITION  Required of students who concentrate in Greek. Prerequisite: 11-12. One hour. Dr. Kent.

151  GREEK DRAMA IN TRANSLATION  Plays of Aeschylus, Sophocles, Euripides, Aristophanes, and Menander. The historical development of dramatic techniques. Prerequisite: English 25, 26 or 27, 28; six additional hours in literature and philosophy. Three hours. Dr. Gilleland. Alternate years, 1965-66.

153  GREEK HISTORIANS IN TRANSLATION  Works of Herodotus, Thucydides, Xenophon, Polybius, Arrian, and others. Introduction to Greek historiography. Prerequisite: English 25, 26 or 27, 28; six additional hours in literature and philosophy. Three hours. Dr. Kent. Alternate years, 1966-67.

201  GREEK ORATORS  Selected speeches of Lysias and Demosthenes. Prerequisite: 11-12. Three hours. Dr. Gilleland. Alternate years, 1965-66.

202  GREEK COMEDY  Two plays of Aristophanes. Prerequisite: 11-12. Three hours. Dr. Davison. Alternate years, 1965-66.

203  GREEK HISTORIANS  Thucydides, Books I and II; selections from Herodotus and Xenophon's *Hellenica*. Prerequisite: 11-12. Three hours. Dr. Kent. Alternate years, 1966-67.

204  GREEK TRAGEDY  Sophocles' *Antigone* and Euripides' *Medea*, or two equivalent plays. Prerequisite: 11-12. Three hours. Dr. Ambrose. Alternate years, 1966-67.

205  GREEK PHILOSOPHERS  Plato, Republic, Books I and II; selections from the pre-Socratics and from Aristotle. Prerequisite: 11-12. Three hours. Dr. Ambrose. Alternate years, 1966-67.

252  GREEK EPIGRAPHY  Introduction to Greek inscriptions, with emphasis on those of historical interest. Prerequisite: 201 or 203. Three hours. Dr. Kent. Alternate years, 1966-67.

381, 382  SEMINAR  Graduate level study of Greek authors not read in the candidate's undergraduate program. Credit as arranged. Staff.
391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

For Greek Literature in Translation, see General Literature 51; for Greek Philosophy, see Philosophy 107; for Greek Art, see Art 1.

Latin

1-2 Elementary Latin Essentials of Ciceronian Latin. For students who present less than two years of high school Latin.\(^1\) Credit is allowed only if Latin 11-12 is also completed. Four hours. Staff.

32 Etymology Derivation of English words from Greek and Latin bases. Training in analysis of unfamiliar words; special attention to scientific vocabulary. No previous knowledge of Greek or Latin required. Three hours. Staff.

101, 102 Survey of Latin Literature Selections from the principal Roman authors, with particular attention to Livy and Horace. The development and decline of various prose styles and poetic forms. Prerequisite: 11-12 or three years of high school Latin. Three hours. Drs. Kent and Gilleland.

111-112 Latin Prose Composition May be taken concurrently with Latin 101, 102. Required of students who major in Latin and of those who wish to be recommended to teach Latin. Prerequisite: 11-12 or three years of high school Latin. One hour. Mr. Pooley.

152 Roman Epic in Translation Latin epic poetry, from Ennius to Ausonius; its development, fruition, and decline. Prerequisite: English 25, 26 or 27, 28; six additional hours in literature and philosophy. Three hours. Dr. Gilleland. Alternate years, 1966-67.

154 Roman Satire in Translation Roman satire, in both prose and poetry, from Lucilius to Lucian, and its influence on medieval and modern literary forms. Prerequisite: English 25, 26 or 27, 28; six additional hours in literature and philosophy. Three hours. Dr. Kent. Alternate years, 1965-66.

203 Republican Prose Reading in Caesar and Sallust, and in the speeches of Cicero. Prerequisite: 101, 102. Three hours. Dr. Gilleland.

204 Epic Poets Reading in Lucretius, Vergil, Ovid, and others. Prerequisite: 101, 102. Three hours. Dr. Ambrose.

223 Advanced Prose Composition Prerequisite: 111-112. Three hours. Mr. Pooley.

\(^1\) Students who have completed two years of high school Latin more than two years prior to their entrance into the University must obtain departmental permission to enroll in Latin 1-2 for credit.

252 *Comedy* Two plays of Plautus and Terence. Development of this literary form. *Prerequisite:* 203, 204 or concurrent enrollment. Three hours. Mr. Pooley. Alternate years, 1965-66.

253 *Roman Oratory* Selections from Cicero’s *De Oratore, Orator,* and *Brutus,* and from his speeches. Historical development of forensic and other rhetorical canons. *Prerequisite:* Latin 203, 204 or concurrent enrollment. Three hours. Dr. Gilleland. Alternate years, 1966-67.

256 *Satire* Selections from Horace, Persius, and Juvenal. *Prerequisite:* 203, 204 or concurrent enrollment. Three hours. Dr. Kent. Alternate years, 1966-67.

381 through 384 *Seminar* Graduate level study of Latin authors not read in the candidate’s undergraduate program. Credit as arranged. Staff.

391 through 399 *Master’s Thesis Research* Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

For Latin Literature in Translation, see General Literature 52; for The Teaching of Latin, see Secondary Education 252.

---

**Commerce and Economics**

---

**College of Arts and Sciences**

*Professors Greif¹, Lobman², Nadworny, Nyquist, Petersen (Chairman) and Woodard; Associate Professors Dellin and LeSourd; Assistant Professors Squire and Wass; Instructors Alnasrawi, Bloomberg, Jacobs, Kelly, Saunders, Schweyer and Van Blarcom*

1-2 *World Economic Geography* Geography as a basis for economic development; importance of resources to production, exchange, consumption, population, and national economies. Three hours. Dr. Woodard and Dr. Dellin.

11-12 *Principles of Economics* Fundamental economic principles as an aid to the understanding of modern economic society. *Prerequisite:* sophomore standing. Three hours. Staff.

¹ Sabbatical leave second semester 1964-65.

15, 16 Economic History of the United States Analysis of capitalism as first developed in Western Europe and later in the United States as a basis for understanding our modern economic systems. Three hours. Drs. Woodward and H. Squire.

Banking, Finance and Insurance

109, 110 Business Law I First Semester: fundamental legal concepts of the American system of law as related to business, as the law of contracts, sales, bailments, and negotiable instruments. Second semester: the legal aspects of business with reference to the law of agency, partnerships, and corporations. Prerequisite: 12. Three hours. Messrs. Bloomberg and Schweyer.

111 Economics of Life Insurance Types of life insurance contracts and their application; premium and reserve computation, social security, and other forms of life insurance. Prerequisite: 12. Three hours. Staff.

112 Property and Casualty Insurance Principles underlying property and casualty insurance. Prerequisite: 12. Three hours. Staff.

201 Money and Banking Commercial and central banking with special attention given to the Federal Reserve System. Monetary theory and policy. Prerequisite: 12. Three hours. Mr. Alnasrawi.

203 Economics of Taxation Revenues and expenditures of federal, state, and local governments and their effects upon individuals, business institutions, and the national economy. Prerequisite: 12. Three hours. Dr. LeSourd.

204 State and Local Finance Revenues, expenditures, and debt management problems of state and local governments; analysis of state and local fiscal relationships. Problems, policies and practices in Vermont and neighboring states. Prerequisite: 12. Three hours. Dr. LeSourd.

205 International Trade and Finance Theory of international values, mechanism of adjustment of international balances, foreign exchange theory, international aspects of monetary and banking theory, and tariff theory. Prerequisite: 12, and a year of history. Three hours. Staff.

206 Principles of Investments An analysis of the investment process, including an examination of types of financial assets, the markets in which such assets are traded, and factors affecting their values. Prerequisite: 12 and 14. Three hours. Staff.

207 Corporate Finance A study of the sources of financing and the efficient utilization of funds by corporations. Topics include capital budgeting, capital structure, dividend policy, and problems of financing new business ventures, large and small. Prerequisite: 12 and 14. Three hours. Staff.
Marking and Merchandising

121 PRINCIPLES OF MARKETING The place of marketing in our economy. Analysis of the marketing structure by functions, institutions, and commodities. **Prerequisite:** 12. Three hours. Mr. Greif.

122 PROBLEMS IN MARKETING Application of the case method to discover solutions to problems which challenge producers and middlemen in marketing goods and services. **Prerequisite:** 121. Three hours. Mr. Greif.

126 RETAILING MANAGEMENT Retail merchandising and small store operation: finance, location, merchandising, promotion and control. The management techniques required for planning, organization, control and profitable operation. Individual project development. **Prerequisite:** 122. Three hours. Mr. Greif.

130 SALES MANAGEMENT AND PROMOTION Methods of selection, testing, training, compensation, and control. Principles and practices of creative selling. Sales organization analysis and the coordination of related department functions. **Prerequisite:** 122. Three hours. Mr. Greif.

132 FUNDAMENTALS OF ADVERTISING Advertising as an economic and social influence. Principles and techniques of copy preparation, selection of media and agency activities. Practice in preparation of advertising copy and layout. **Prerequisite:** 121. Three hours. Mr. Greif.

228 CURRENT MARKETING DEVELOPMENTS Modern marketing theory and practice. Topics include: the nature of consumer changes; urban and suburban trading centers; the distribution cycle; marketing legislation; functional and institutional changes. **Prerequisite:** 122. Three hours. Mr. Greif.

229 MARKETING MANAGEMENT Formulation of overall policies and planning strategies for marketing programs. Product planning and development; channel selection; market and sales forecasts; advertising and sales campaigns. **Prerequisite:** 228. Three hours. Mr. Greif.

Industrial and Personnel Management

For Motion and Time Study, and Plant Organization, required of students in this option, see Engineering, Mechanical (M.E. 175, 176).

143 INDUSTRIAL MANAGEMENT Principles and practices employed in the direction and operation of industrial organizations. Techniques of organization and control of operations. Personnel function in an industrial structure. **Prerequisite:** 12. Three hours. Dr. Nadworny.

243 Developments in Labor-Management Relations Analysis of issues in collective bargaining; impact of long-term agreements; shifting wage and related benefits demands; impacts of shifting industrial and occupational structures on collective bargaining; interpretation of federal labor laws in relation to collective bargaining procedures; implications, and limits, of mediation and arbitration in disputes settlement. Prerequisite: 242. Three hours.

251 Personnel Administration The field and organization of the personnel function; selecting and training employees; job analysis and evaluation; evaluating employees; wages and wage administration; problems of morale; human relations in the supervision of personnel. Prerequisite: 141. Three hours. Dr. Nadworny.

252 Executive Decision-Making Synthesis of the management and operation of a firm in terms of production, marketing, personnel, and finance. The process of decision-making, planning and execution of policies. Prerequisite: 121, 143, and a course in finance, or departmental permission. Three hours. Dr. Nadworny.

254 Scientific Management and Labor Development of scientific management; reactions and relationship of organized labor to it. Long-range effects of scientific management on the structure and policies of industry and organized labor. Prerequisite: 143. Three hours. Dr. Nadworny.

256 American Business History Evolution of firms and industries from relatively small and undifferentiated establishments to large, highly complex institutions of the present day. Selected studies in textiles, machinery, transportation, steel, coal, electric machinery, insurance, communication, retail, and others. The roles of Federal and state governments and of legislation. Developments in American management. Prerequisite: 143 or departmental permission. Three hours. Dr. Nadworny.

Accounting

160 Introduction to Integrated Data Processing and Computers A study of the nature of business data processing and a general introduction to the components and characteristics of electronic digital computers available for such processing. Included is a study of programming systems, systems analysis, system design, elementary flow charting, and processing procedures. Demonstration problems are prepared for processing at the University Computer Center. Prerequisite: 14 or departmental permission. Three hours. Mr. Nyquist.

164 Basic Federal Taxes The federal income tax law; regulations covering taxable income, exclusions and inclusions, allowable deductions, exemptions, gains and losses, accounting methods, and computation of tax for all
classes of taxpayers; Federal payroll taxes. Assigned research problems and preparation of tax returns. **Prerequisite:** 14. Three hours. Mr. Kelly.

266 **ADVANCED ACCOUNTING** Accounting for partnerships, ventures, consignments, installment sales, insurance, statement of affairs, receivers, realization and liquidation, estates, trusts, home offices and branches, and parent and subsidiary accounting. **Prerequisite:** 162. Three hours. Mr. Nyquist.

271 **AUDITING** Theory and practice of auditing applicable to the work of the internal and external auditor; auditor's responsibility, types of audits, and audit programs. Illustrative audit working papers, financial statements, and audit reports prepared and discussed. **Prerequisite:** 266. Three hours. Mr. Nyquist.

272, 273 **COST ACCOUNTING** The nature of manufacturing costs and conventional methods of accumulating, summarizing, and interpreting them. Special problems in job order, process and standard costs. Second semester, joint and by-product costs; problems of waste and spoilage; inventory planning, capital budgeting; accounting systems including EDP; statistical methods and operations research. **Prerequisite:** 14, 272 for 273. Three hours. Mr. Nyquist.

276 **C.P.A. PROBLEMS** Review of questions and problems from past C.P.A. examinations. Including: partnerships, corporations, financial statements, auditing, cost accounting, insolencies, receiverships, liquidations, consolidations, estates, trusts, governmental and institutional accounting methods. **Prerequisite:** 266. Three hours. Mr. Nyquist.

353 **BUDGET PROCEDURE AND CONTROL** Principles and procedures of preparing budgets and analyzing performance under a budgetary program. Development of sales, production, materials, purchases, labor, capital additions, and cash budgets is demonstrated by coordinated problems assignment. **Prerequisite:** 161 or equivalent and 272. Three hours. Mr. Nyquist.

**Economics**

181 **TRANSPORTATION** Social and economic aspects of transportation problems as revealed by analysis of the nature, history, and problems of transportation agencies of the United States. **Prerequisite:** 12; political science 1, 2. Three hours. Staff.

183 **ECONOMIC LIFE AND GOVERNMENT CONTROL** Economic causes and consequences of government regulation and control of business activities. **Prerequisite:** 12; political science 1, 2. Three hours. Dr. H. Squire.

187, 188 **ELEMENTARY STATISTICS (2-2)** Theory and interpretation of statistics. First semester: data collection, graphical presentation, frequency distribution, measures of central tendency and dispersion, tests of significance, and analyses of variance. Second semester: index number theory and construction, time series, the fitting of linear and non-linear trend lines, and two-variable, multiple and partial correlation. **Prerequisite:** 12; mathematics 7, 8 or 11. Three hours. Mr. Saunders.

258 **PROBLEMS OF COMMUNISM** (cross-reference Political Science 258) A comparative study of economic and political problems of applied communism with particular emphasis on current developments in selected Communist coun-
tries. **Prerequisite:** 12 and six hours of political science or six hours of European history. Three hours. Dr. Dellin.

286 **Economic Analysis** Analysis of consumer demand, supply, market price under competitive conditions and monopolistic influences, and the theory of income distribution. **Prerequisite:** 12 and one other semester course. Three hours. Staff.

288 **Quality Control (2-2)** Application of statistical tools to industrial problems. Control charts, sampling plans, index numbers, and measurement of trends. **Prerequisite:** 187. Three hours. Staff.

290 **The Soviet Economy** Analysis of the economic development of the USSR, its structure, performance and direction. Seminar. **Prerequisite:** six hours of advanced courses in economics, and six hours of political science or European history; senior standing. Three hours. Dr. Dellin.

291 **Economic Patterns and Policies of Eastern Europe** An area approach to the resources, organization, and domestic and foreign economic policies of the Communist countries of Eastern Europe, with special emphasis on recent changes. **Prerequisite:** six hours of advanced courses in economics and six hours of political science or European history; senior standing. Three hours. Dr. Dellin.

292 **International Economic Problems and Policies** Important aspects of international cooperation and conflict in the economic sphere; quest for foreign markets, raw materials, investment opportunities, and population outlets. **Prerequisite:** 12. Three hours. Mr. Wass.

293-294 **Money, Income and Prices** Analysis and description of cyclical fluctuations. Second semester: problems of cyclical control, employment, price levels, overall planning. **Prerequisite:** 201 or concurrent enrollment. Three hours. Dr. LeSourd.

295 **History of Economic Thought** Development of economic ideas from classical antiquity to modern times. The Classical, Historical, Socialist, Optimist, Marginalist, and Neoclassical Schools. **Prerequisite:** 286 or 201-202 and departmental permission. Three hours. Dr. Dellin.

297, 298 **Seminar** For students concentrating in the department. Review of recent books and periodic literature; discussions of topics of contemporary interest; student reports based upon personal investigation. **Prerequisite:** senior standing; departmental permission. Three hours. Staff.

300, 301 **Independent Reading and Research** Designed to meet the special research problems of graduate students. Departmental consent required. Hours to be arranged. Staff.

341 **Managerial Economics** Techniques used in management decision-making and forward planning. Demand and cost analysis, forecasting methods,
capital management and budgetary planning. Prerequisite: 187, 188 or its equivalent and 286. Three hours. Dr. Squire.

342 Operations Research for Managerial Economics Application of advanced quantitative methods to operating problems in business. Operations research techniques including programming, both linear and curvilinear, and queuing theory are presented. Prerequisite: 341 and mathematics 7, 8 or 11, 12. Three hours. Staff.

367 Advanced Economic Statistics Theories and techniques of statistical analysis; probability, sampling, design of experiments, tests of statistical hypotheses, statistical estimation, regression, correlation, statistical demand and cost functions, econometric methods and models as tools of structural analysis, economic projections and decision-making. Prerequisite: 187, 188 or its equivalent and mathematics 7, 8 or 11, 12. Three hours. Dr. Petersen and Mr. Saunders.

377 Advanced Economic Theory Macro- and micro-economic models presented and analyzed. Advanced market structure theories; theory of games, general equilibrium, and dynamic models. Prerequisite: 286. Three hours. Dr. Petersen.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

Dental Hygiene

School of Dental Hygiene

Assistant Professors Quinby and Sawabini (Chairman); Instructors Bannister, Faigel, Farnham, Golden, M. C. Heininger, P. L. Heininger, Howe, Lampert, Miller and Slack.

1 Orientation to Dental Hygiene (1-) The dental hygiene movement; history, growth, status of dental hygienist, scope of operations, standards and ethics, personal qualifications and personality traits. Two hours. Miss Quinby.

2 Instrumentation (0-6) Principles and technics of instrumentation for scaling and polishing teeth with use of manikins. Examination and charting of mouth and general clinical procedures. Three hours. Misses Quinby and Miller.

11 Dental Anatomy (2-4) Anatomy of head and neck; form and structure of teeth, nomenclature and relationship; calcification and eruption of teeth; drawing, carving, and identification of individual teeth. Four hours. Dr. Heininger.

22 General and Dental Histology and Embryology (2-2) Microscopic structure and development of the basic tissues of the body with emphasis on dental and oral material. Use of microscope, colored slide projections and drawings. Three hours. Staff.
31 Medical Emergencies (1-0) Basic principles of emergency aid taught to prevent and cope with emergencies that arise in the dental office. One hour. Mrs. Heininger.

51-52 Pharmacology and Anesthesiology (1-0) (1-0) The reactions and uses of drugs. Anesthesia, general and local, as used in dental practice. One hour. Dr. Farnham.

53-54 Oral Pathology (2-2) General pathology of the more common diseases affecting the human body. Pathology of the teeth and their supporting structures. Two hours. Dr. Sawabini.

55 Periodontics (1-0) Classification of periodontal disease, clinical picture, etiological factors, and types of treatment. Particular emphasis is placed on the role of the hygienist in patient education for the prevention of periodontal disease. One hour. Dr. Faigel.

61-62 Radiology (1-1) Study, demonstration, and practice of the fundamentals of intra-oral radiographic technic including electrophysics; angulation of machine; placing of films and complete processing of films. One hour. Mr. Bannister and Dr. Slack.

72 Dental Health Education (2-0) Demonstrations and practical applications of modern methods of dental health education. Teaching methods; visual aids; surveys and statistics; materials; campaigns; school dental programs. Two hours. Miss Miller.

74 Public Health (2-0) Public health as it applies to community sanitation; communicable disease control; organization, powers and function of health departments and voluntary health agencies; relation of dentistry to public health. Two hours. Dr. Howe.

81-82 Dental Hygiene Clinic Practice (0-15) Clinical practice on patients from simple to more difficult cases with children and adults. Field practice at local dental clinics, hospitals and in Children’s Homes. Five hours. Misses Quinby and Miller.

91-92 Dental Assisting, Dental Materials, Ethics and Office Management (1-0) Principles of professional ethics and economics; office management and essentials of practice building; dental assistant and materials used in dental practice. One hour. Dr. Lampert.
Education

COLLEGE OF EDUCATION AND NURSING

Professors Baker (Chairman), Kent, King, Lidral, Pappoutsakis and Steeves; Associate Professors Boller, Keppel, Mills and Rippa; Assistant Professors Adams, Christensen, Keene, Leggett, Mour, Petrusich, Ruffer, Schultz, Stauff, Weinrich and Wills; Instructors Gardner, Grant, Greig and McDonald

2 FOUNDATIONS OF EDUCATION Social foundations of education; development of American education; education as a profession. Two hours. I or II. Staff.

7 EDUCATIONAL PSYCHOLOGY Principles of educational psychology as drawn from research, theory, and educational practice. A study of the learning process, its determining conditions, and its results. Prerequisite: junior standing (not open to students who take education 145-146). Three hours. Mr. Gardner.

41, 42, 43, 44 TECHNIQUES OF COACHING—FOOTBALL; TRACK AND CROSS COUNTRY; BASKETBALL; BASEBALL. Lecture and laboratory. Prerequisite: sophomore standing. Credit only for students in the physical education minor. One hour. Staff.

116 HEALTH EDUCATION Role of the classroom teacher in the program of school and community health. Physical development and well-being of the human body. Two hours or three hours. Mr. Christensen and Dr. Ruffer.

145-146 LEARNING AND HUMAN DEVELOPMENT The developing individual; psychology of learning with particular application to human development; measurement and evaluation of learning and development. Prerequisite: junior standing. Three hours. Mr.-Gardner and Dr. Rippa.

152 METHODS OF TEACHING SPORTS Fundamental skills, techniques, and teaching methods in team, dual, and individual sports. One hour. Staff.

153 METHODS OF TEACHING DANCE Methods, procedures, and devices in teaching creative rhythm activities and all forms of dance; folk, square, ballroom and modern, for men and women. One hour. Staff.

154 RECREATIONAL LEADERSHIP Recreation and recreation education; theory and practice of recreational activities for youth and adults. Two hours. Mr. Greig.

155 PHYSICAL EDUCATION IN SECONDARY SCHOOLS Practice in activity and activity-teaching skills in team, individual, dual, recreational sports and other media of physical education suitable for secondary grades. Two hours. Dr. Leggett.

156 HISTORY AND PRINCIPLES OF PHYSICAL EDUCATION The development of physical education; functions of physical education in society; underlying principles and concepts. Three hours. Staff.

1 On leave second semester 1964-65.
157 Prevention and Care of Athletic Injuries
Prevention, recognition and care of injuries related to school physical education and athletic programs. Two hours. Mr. Grant.

158 Organization and Administration of Health and Physical Education
Organization and administration of instructional programs, intramurals, interscholastic athletics, school recreational programs, schedules, personnel, budgets, equipment, records, tests, and public relations. Three hours. Staff.

202 Philosophy of Education
Educational theory and philosophy past and present; contributions of leading educational philosophers; the interrelationships of education, society, and philosophy. Prerequisite: senior standing; twelve semester hours in education and psychology or departmental permission. Three hours. Drs. Boller and Keppel.

205 History of American Education
History of principles and practices in American education as they relate to social, economic, political, and cultural developments. Prerequisite: twelve hours in education and psychology, or a major in history. Three hours. Dr. Keppel.

211 Educational Measurements
Essential principles of measurement in education; test construction, application, and analysis. Prerequisite: senior standing and twelve semester hours in education and psychology. Three hours. Dr. Steeves.

217 Secondary School Curriculum
Principles and problems in curriculum development for secondary schools. Prerequisite: senior standing and twelve hours of education and psychology. Three hours. Dr. Rippa.

222 Reading Problems—Upper Grades and Junior High School
Principles of remedial teaching, causes of reading difficulties, and materials for remedial work in reading. Prerequisite: twelve hours in education and psychology, including an introductory course in the teaching of reading. Three hours. Mr. Mour.

235 The School as a Social Institution
Analysis of major social forces affecting elementary and secondary education; exploration of values underlying educational policy; examination of contemporary social, cultural, economic and political issues and their impact upon the school. Prerequisite: twelve semester hours in education and psychology or nine semester hours in sociology. Three hours. Staff.

297, 298 Problems in Education
Individual research problem to be selected by the student in consultation with a staff member. Enrollment by permission of the Dean and the staff member who will direct the study. Open to seniors and graduate students who have at least twelve hours in education and psychology. Credit to be arranged. Staff.

391 through 399 Master's Thesis Research
Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.
Elementary Education

3, 4 CHILD AND COMMUNITY Supervised experiences with children’s groups in the community. One hour. Dr. Boller.

100 PHYSICAL EDUCATION IN THE ELEMENTARY SCHOOL Development of a program of physical education for the elementary school. Principles, methods and materials appropriate for the several age and grade groups. Two hours. Miss Stauff.

113 SCHOOL MUSIC Basic principles in elementary school music teaching. Prerequisite: music 9-10 or 1, 2 and 5-6. Three hours. Staff.

121 TEACHING READING Principles underlying teaching reading; materials of instruction; reading readiness; vocabulary development; development of correct study skills; observation in elementary school. Three hours. Miss Adams.

134 CHILDREN’S LITERATURE Traditional and modern children’s literature in prose and poetry; appreciation and evaluation of literature for children of all age levels; techniques of story telling. Three hours. Mrs. Adams.

144 METHODS AND MATERIALS I Curriculum, teaching methods, materials in language arts, social studies, science, and arithmetic in the elementary school. Observations and participation in elementary schools. Three hours. Dr. Boller and Miss Petrusich.

160 METHODS AND MATERIALS II Classroom management, instructional planning, and methods of teaching in all core subjects in the elementary school. Three hours. Dr. Boller and Miss Petrusich.

161 STUDENT TEACHING Seven full weeks of teaching in the elementary schools of Burlington and vicinity under the guidance of cooperating teachers and college supervisors. Prerequisite: senior standing; approval of the supervisors of student teaching. Seven hours. Dr. Boller and Miss Petrusich.

170 ART FOR THE ELEMENTARY SCHOOL Purposes and methods of contemporary art education in the development of the child. Lectures, discussions, and direct experience in creative art for classroom teachers. Three hours. Mrs. Mills.

Secondary Education

15 PARTICIPATION Thirty clock hours of observation and participation in classroom work in junior and senior high schools. Discussion meetings on campus. Prerequisite: departmental permission. Two hours. Dr. Steeves and staff.

178 SECONDARY METHODS AND PROCEDURES General methods of secondary school instruction; classroom problems common to all teachers. Prerequisite: satisfactory completion of six hours in education; senior standing; departmental permission. Two or three hours. Taken coordinately with student teaching. Dr. Steeves.

179 CONTENT, CURRICULUM, METHODS AND MATERIALS IN SPECIAL SUBJECT AREAS (Romance languages, mathematics, Latin) Prerequisite: education 178 and acceptance in teacher education. Two hours. Staff.
181 Student Teaching in Secondary Schools Seven weeks of teaching in the public schools of Vermont under the guidance of cooperating teachers, principals, and college supervisors. Prerequisite: 15, 178 and 145-146; high achievement in professional courses and in appropriate teaching fields; departmental approval. Candidates must make written application at least one full semester in advance of the teaching assignment. Six hours. Drs. Keppel, Rippa and Steeves.

250 Guidance in Education Introduction to guidance as an organized function of education; bases of modern guidance practices; the school testing program; relationship of guidance to the curriculum; current approaches to guidance problems of the intellectually gifted; counseling techniques for classroom teachers. Prerequisite: senior standing and twelve semester hours in education and psychology. Three hours. Dr. Rippa.

Business Education

104 Principles of Business Education Basic principles, practices, problems and trends in business education. Prerequisite: psychology 1. Two hours. Mr. McDonald.

105 Teaching Business Subjects Principles and techniques in the organization and the teaching of business subjects in the high school. Prerequisite: 104. Two hours. Mr. McDonald.

Music Education

For applied music class study see 71, 72 under Music Department.

131 Music Methods Methods and materials in the teaching of vocal and instrumental music in elementary and secondary schools. Prerequisite: 145-146 and senior standing in music education. Five hours. Mr. Schultz.

151 Student Teaching in Music Seven weeks of teaching in the public schools of Vermont under the guidance of cooperating teachers, principals, and college supervisors. Prerequisite: concurrent enrollment in 131 and departmental permission. Seven hours. Mr. Schultz.

290 Basic Concepts in Music Education Disciplinary backgrounds; historical and philosophical foundations; fundamental considerations of the functions of music in the schools; development of a personal philosophy. Prerequisite: senior standing as a music education major. Three hours. Dr. Lidral.

291 Psychology of Music Psychological dimensions of tone and rhythm; the learning process in music; emotional and aesthetic response; musical ability; musical behavior and its measurement; American and European viewpoints and contributions. Prerequisite: 145-146 or psychology 1 and 205. Three hours. Dr. Lidral.

390 Organization and Administration of Music Education A study of the organization and administration of vocal and instrumental music in the public schools. Prerequisite: graduate standing in music education and teaching experience or departmental permission. Three hours. Mr. Keene.
Other Courses in Education

In addition to the courses offered during the academic year, the following courses may be offered in summer sessions and in the evening division program.

Engineering, Agricultural

V COLLEGE OF AGRICULTURE AND HOME ECONOMICS

Professor Schneider (Chairman); Associate Professor Arnold; Assistant Professor Bornstein

1 Farm Power, Machinery and Electricity (2-2) Operation and maintenance of internal combustion engines and farm tractors; operation and the maintenance of farm machinery; electricity and the utilization of electricity and electrical equipment on the farm. Not for credit for B.S.A.E. degree candidates. Three hours. Dr. Arnold.

2 Farm Structures and Utilities and Soil and Water Engineering (2-2) Construction on the farm; planning and selection of materials. Operation, selection and maintenance of farm water systems and sewage disposal systems. Operation of refrigeration units used on the farm. Soil conservation prac-
tices and surveying. Not for credit for B.S.A.E. degree candidates. Three hours. Dr. Arnold.

101 Farm Shop (0-6) Wood and metal working by hand and machine methods, sheet metal work, welding, rope work and tool fitting, demonstrations and methods of teaching. Problems in safety, shop care, layout, and selection of equipment. Prerequisite: sophomore standing. Three hours. Mr. Schneider.

115 Dairy Production Engineering (2-2) Theory, principles, and practices in the operation and selection of milk production and handling equipment. Prerequisite: physics 5 or 14, or departmental permission. Three hours. Given jointly with the Animal and Dairy Science Department. Dr. Arnold and Department of Animal and Dairy Science staff. Alternate years, 1965-66.

116 Dairy Plant Engineering (2-2) Theory and practical problems in the operation and selection of dairy processing equipment. Prerequisite: 115. Three hours. Given jointly with Animal and Dairy Science Department. Dr. Arnold and Mr. Bradfield. Alternate years, 1965-66.

151 Farm Structures (2-2) Design of farm structures, materials, structural requirements, functional requirements, insulating, heating, and ventilating. Prerequisite: civil engineering 131 or concurrent enrollment. Three hours. Dr. Arnold. Alternate years, 1966-67.

152 Farm Utilities (2-2) Water systems; plumbing; sewage disposal; refrigeration. Prerequisite: mechanical engineering 142 or civil engineering 162 or concurrent enrollment; physics 16. Three hours. Dr. Arnold. Alternate years, 1966-67.

154 Agricultural Machinery and Equipment (2-2) Theory, design, operation and maintenance of agricultural machinery and equipment. Prerequisite: civil engineering 130 and 131. Three hours. Dr. Arnold. Alternate years, 1965-66.

155 Soil and Water Engineering (2-2) Study of hydrologic, hydraulic, and agronomic principles as related to design and installation of drainage and irrigation systems, erosion control facilities, farm and small watershed flood control reservoirs, and stream channel improvements. Philosophy of soil and water conservation. Prerequisite: agronomy 52, civil engineering 53 or departmental permission. Three hours. Mr. Bornstein. Alternate years, 1965-66.

156 Electricity in Agriculture (2-2) Theory and engineering practices in the application of electricity to agriculture. Prerequisite: electrical engineering 101. Three hours. Dr. Arnold. Alternate years, 1966-67.

158 Farm Power Machinery (2-2) Theory, design, operation, and maintenance of tractors and their engines. Prerequisite: mechanical engineering 113, civil engineering 131 or concurrent enrollment. Three hours. Dr. Arnold. Alternate years, 1965-66.

182 Junior Seminar (1-0) Review and discussion of current agricultural engineering research, student reports and studies of agricultural engineering problems. Prerequisite: junior standing and departmental permission. One hour. Staff.
183, 184 Senior Seminar (1-0) Review and discussion of current agricultural engineering research, student reports and studies of agricultural engineering problems. **Prerequisite:** 182 or departmental permission. One hour. Staff.

### Engineering, Civil

#### College of Technology

Professor Milbank\(^1\) (Chairman); Associate Professors Knight, Root and Fay, Assistant Professors Ragan and Dawson; Instructor Dorwart

24 Statics (3-0) Fundamentals of statics; composition and resolution of forces; the analysis of force systems in two and three dimensions, centroids and moments of inertia. **Prerequisite:** mathematics 12. Three hours. I, II. Staff.

51, 52 Surveying (3-4) First semester: Propagation of errors; error application to measurements in surveying; selected items in plane surveying. Second semester: Selected items in analytical photogrammetry; elements of photo-interpretation; control surveys; theory of curves and earthworks. **Prerequisite:** mathematics 11 for 51, mathematics 12 and 51 or 53 for 52. Four hours. Mr. Root.

53 Plane Surveying (3-4) Fundamental surveying methods; elements of topographic surveying; special problems as presented in fields affected. For those not enrolled in civil engineering. **Prerequisite:** mathematics 11. Four hours. Mr. Root.

113 Concrete and Bituminous Laboratory (0-3) Testing materials used in concrete and bituminous mixtures; design of mixes to obtain specified compressive and flexural strengths; investigations of durability, yield, economy, and the effect of admixtures. **Prerequisite:** 131 and 173 or concurrent enrollment. One hour. Mr. Knight.

114 Mechanics of Materials Laboratory (0-3) Experimental stress analysis methods; fundamental properties of metals, plastics, and wood; the effects of size, shape, method and speed of loading, and strain history on these properties. **Prerequisite:** 131. One hour. Staff.

130 Dynamics (3-0) Fundamentals of kinematics covering rectilinear and curvilinear motion, relative motion, Coriolis acceleration, translation, rotation, and plane motion. Fundamentals of kinetics covering translation, rotation, and plane motion of particles and rigid bodies; work, energy, power; impulse and momentum; simple harmonic motion. **Prerequisite:** 24, also mathematics 12. Three hours. I, II. Staff.

131 Mechanics of Materials I (3-0) The elastic and plastic behavior of materials; normal and shearing stresses from axial, torsional, and flexural loading combinations; deflections due to torsion and bending; applications to

---

\(^1\) Sabbatical leave second semester 1965-66.
140 **STATICALLY DETERMINATE STRUCTURES (3-3)** Analysis and design of statically determinate structures; prefaced by consideration of function, expected loads, reactions, material choice, and layout of members. Influence lines; criteria for positioning moving loads; design of steel and timber members under combined bending and axial load; base plates; eccentric connections. Laboratory practice in the graphic statics and design computations, including use of electronic computation methods. *Prerequisite:* 131. Four hours. Mr. Knight.

151 **ENGINEERING CONTRACTS (2-0)** Contract law and engineering specifications, ethics and professional conduct. *Prerequisite:* junior standing. Two hours. II. Mr. Milbank.

158 **SUBSTRUCTURE ANALYSIS AND DESIGN (3-3)** Evaluation of subsoil conditions and earth pressures; design of retaining walls, substructures for buildings and bridges, and cofferdams. *Prerequisite:* 155 and 173. Four hours. Mr. Milbank.

162 **HYDRAULICS (3-0)** Mechanics of fluids with emphasis on incompressible fluids; flow meters; flow in closed conduits; flow in open channels; elements of hydraulic machinery. *Prerequisite:* 130 and mechanical engineering 113. Three hours. Mr. Root.

165 **SANITARY ENGINEERING I (3-0)** Quantities of water and waste water; the role of the earth sciences in the development and control of surface and ground water supplies, transmission of water and waste water. *Prerequisite:* 162. Three hours. Dr. Ragan.

166 **SANITARY ENGINEERING II (2-3)** Characteristics of water and waste water; study of basic mechanisms involved in treatment, role of microbiology in waste stabilization, natural purification of streams. Laboratory pilot plant studies, chemical and biological analyses. *Prerequisite:* 162, 165, chemistry 1-2. Three hours. Dr. Ragan.

168 **HYDRAULICS LABORATORY (0-3)** Laboratory studies for illustration of the theory of mechanics of fluids; flow in closed conduits; and hydraulic machinery. *Prerequisite:* 162 or mechanical engineering 142 or concurrent enrollment in civil engineering 162. One hour. Mr. Root.

173 **SOIL MECHANICS I (2-3)** Identification, description, and physical properties of soils; subsurface exploration; engineering characteristics of natural deposits of soil. Stress distribution, consolidation of soil masses, shear strength evaluation, and stability of slopes. Laboratory practice in sampling, classification, and testing for index properties. Introduction to experimental methods in permeability, consolidation, and shear testing. *Prerequisite:* 140. Three hours. Mr. Knight.
174 Transportation Engineering (3-0) Analysis of the highway transportation system. Consideration of planning studies, traffic flow phenomena and geometric design of the highway. Economic analysis of engineering designs. Prerequisite: 52 and senior standing. Three hours. Dr. Dawson.

175 Indeterminate Structures I (3-0) Analysis of statically indeterminate structures by consistent deformation, least work, slope deflection, and moment distribution; prefaced by determinations of deflections by virtual work, moment area, conjugate beam, and Williot-Mohr diagram. Continuous structures and an introduction to structural dynamics. Prerequisite: 140. Three hours. Mr. Knight.

176 Advanced Structural Design (3-3) Advanced theory and design of structures with emphasis on continuous frames and trusses. Consideration of wind stress analysis, space frames, moment connections, and camber diagrams. Comparative studies of specifications for design in steel; aluminum design. Laboratory problems in design of steel building frames and continuous highway girder and truss bridges. Prerequisite: 175. Four hours. Mr. Knight.

180 Engineering Investigation Independent investigation of a special topic under the guidance of a staff member. The course work may consist of library investigations, unique design problems, laboratory and field studies. Preparation of a formal report on the problem is required. Prerequisite: senior standing and departmental permission. Three hours. Staff.

231 Mechanics of Materials II (3-0) Study of stresses and strains at a point under plane and three-dimensional loading using Mohr's circle; failure theories; energy methods; plastic design; buckling of plates and shells. Prerequisite: 176 or concurrent enrollment. Three hours. Mr. Fay.

232 Advanced Dynamics (3-0) Study of Coriolis acceleration; gyroscopic forces; dynamic measurements; vibrations, earthquakes, and blast shocks on structures. Prerequisite: 130, 131, mathematics 211. Three hours. Mr. Fay.

234 Advanced Mechanics of Materials (3-0) The theory of elasticity with applications to curved beams, combined stresses, torsion of non-circular sections; relaxation procedures. Prerequisite: 131, mathematics 212. Three hours. Mr. Fay.

235 Photoelasticity (2-3) Development of the theories of photoelastic stresses analyses; model similitude; correlation with other stress analysis techniques. Laboratory work on two-dimensional applications such as stress concentrations around holes, notches, and fillets. Prerequisite: 131, mathematics 211. Three hours. Staff.

261 Hydrology (3-0) Basic theory of precipitation, run-off infiltration and ground water; precipitation and run-off data; application of the data for use in development of natural water resources. Prerequisite: 162 or mechanical engineering 142. Three hours. Dr. Ragan.

262 Water Power Engineering (3-0) Hydrologic, hydraulic, and geologic studies of water power sites; selection of turbines and equipment; economic considerations. Prerequisite: 162 or mechanical engineering 142. Three hours. Mr. Root.
273 Soil Mechanics II (3-0) Index and engineering properties of soils with emphasis on current research problems. Critical evaluation of the theories of ground water movement, frost action, consolidation, shearing strength, and stress distribution. Case histories and comparison of failure conditions with predictions based on laboratory tests. Prerequisite: 173. Three hours. Mr. Knight.

274 Soil Engineering (3-0) Applications of soil mechanics to special problems of earth structures and foundations. Topics considered include bearing capacity evaluation, earth pressures, stabilization, effects of vibratory loading, earth dam and roadway construction. Prerequisite: 273. Three hours. Mr. Knight.

275 Indeterminate Structures II (3-0) Analysis of trusses with redundant members, elastic weights and column analogy methods for indeterminate frames, plastic methods for gable frames. Prerequisite: 175. Three hours. Staff.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged. Staff.

Engineering, Electrical

College of Technology

Professors Essler, Roth (Chairman) and Smith; Associate Professors Hoilman, Rush, Shorey and Taylor; Assistant Professors de la Cuesta, Dudevoir and Williams; Instructor Brooks

101, 102 Electrical Engineering Principles (3-3) Principles of electric and magnetic circuits; application of these principles to the theory and performance of selected power, control and communication equipment. Prerequisite: mathematics 21 and physics 15, 101 for 102. Four hours.

109, 110 Electronics I (3-0), (3-3) Physical principles of vacuum tubes, gas tubes and solid-state devices. Analysis and design of circuits used in communication equipment. Prerequisite: 26 or 102 or physics 242 and permission of instructor for 109; and 125 or physics 115 and departmental permission for 110. Three hours for 109, four hours for 110.

116, 117 Electric Machines (3-3) A study of the principal types of rotating machinery from the physical and mathematical standpoint. Prerequisite: electrical engineering 125. Four hours.

125 Electric Circuits II (3-3) Polyphase electric circuits, non-sinusoidal waves, coupled circuits and transformers, and applications. Prerequisite: 26 or physics 242 and departmental permission; concurrent enrollment in mathematics 211. Four hours.

126 Electromechanical Analogies (3-0) Transient behavior of electromechanical systems. Analysis of electrical, mechanical, acoustic and hydraulic circuits by unified methods. Prerequisite: 125 or physics 242 and departmental permission; mathematics 211. Three hours.

203 Electronics II (3-3) Analysis and design of wave shaping, timing and logic circuitry using solid state and vacuum tube devices. Prerequisite: 110. Four hours.

206 U.H.F. Circuits (3-3) Circuits and techniques for use at ultra-high frequencies. Prerequisites: 203 and 225. Four hours.

207, 208 Special Topics (2-3) Formulation and solution of theoretical and practical problems dealing with electrical circuits, apparatus, machines or systems. Prerequisite: 125. Three hours.

210 Control Systems (3-0) Theoretical background for analysis and synthesis of feedback control systems. Concepts of stability, transfer functions, performance criteria and compensation are viewed with root-locus and frequency response methods. Analog simulation as a design tool is stressed. Prerequisite: 101 and 116, 126 or physics 242, mathematics 211 and departmental permission. Three hours.

211 Electric Utilities (3-0) Organization of the electrical utility; elementary corporate finance; economics of location, conductor size, station and line costs; rate structures; regulatory bodies. Prerequisite: senior standing in electrical engineering and departmental permission. Three hours.

212 Power Systems (3-0) Machine and line transients; steady state and transient stability of power systems; relay systems; circuit breakers; lightning; fault studies; coordination of power and telephone systems. Prerequisite: senior standing in electrical engineering and departmental permission. Three hours.

214 Industrial Power Application (3-0) Design and application of d-c and a-c motor drives for industrial plants; magnetic and electronic controls; duty cycles; acceleration, retardation and braking; power supplies and distribution systems. Prerequisite: 102 or 117, and departmental permission. Three hours.

225, 226 Circuits and Fields II (3-0), (3-0) Study of basic laws and elementary applications of electromagnetic fields; electrostatics, magnetostatics, Faraday's Law, plane waves, transmission lines and wave guides. Prerequisite: 25 and 26, 225 for 226. Three hours.

230 Creative Engineering (3-0) Creative techniques and problems approach to applications of these methods to current industrial problems. Prerequisite: mathematics 211, at least four hours in electricity and magnetism or electrical engineering in courses numbered above 100, and departmental permission. Three hours.
231 Transistors (2-0) Fundamental principles of semi-conductor operation. P and N type conductivity; the PN junction; construction of the junction transistor. Circuit analysis of transistor operation in terms of hybrid parameters. Biasing methods for stabilization in multistage amplifiers. Equivalent circuits for high frequency operation; oscillators and pulse switching circuits. Prerequisite: 110. Two hours.

235 Network Synthesis (3-0) Basic principles of passive electrical network synthesis; energy relations, physical realizability, two-terminal network synthesis; approximation methods; properties and synthesis of four-terminal networks. Prerequisite: 126. Three hours.

239 Transient Phenomena (3-0) Study of complex variable basis of Laplace and Fourier Transforms; applications to transient behavior of lumped and distributed parameter systems, root locus, Nyquist criterion and two dimensional field problems. Three hours. Prerequisite: 126.

241 Hybrid Computers Systems design concepts and use of interconnected analog and digital computers as an engineering tool are stressed. Selected problems from mathematics, biological and physical sciences are solved on a hybrid computer. The use of logic and decision as well as analog/digital and digital/analog conversion are stressed. Prerequisite: 110 or departmental permission. Three hours.

245 Information-Transmission Systems (3-0) Introduction to information transmission; modulation and demodulation; noise and noise figures; comparison of information transmission systems and statistical methods used in information systems. Prerequisite: 126. Three hours.

246 Information Theory (3-0) Introduction to probability concepts of information theory; entropy of probability models; theoretical derivations of channel capacity; coding methods and theorems, sampling theorems. Prerequisite: mathematics 21. Three hours.

261 Radiation Electronics (1-3) Electronic techniques for the detection and measurement of radioactivity; ionization chambers, geiger counters, proportional counters, scintillation counters, neutron counters, coincidence circuits, ratemeters, and scalers. Prerequisite: physics 16 or departmental permission. Two hours.

275 Solid State Physical Electronics Electrical conduction phenomena in semi-conductors, junction transistors and thermionic emitters. The ideas developed are applied to various solid state devices. Prerequisite: 102 or 109 or departmental permission. Three hours.

281 through 284 Seminar Presentation and discussion of advanced electrical engineering problems and current developments. Prerequisite: senior or graduate engineering enrollment. One hour.

301 Nonlinear System Analysis Principal methods of solving nonlinear problems. Topological, analytical, graphical, and numerical methods; the general theory of nonlinear oscillation and stability; application of theory to numerous oscillatory problems. Prerequisite: mathematics 211 and degree in physical sciences or engineering. Three hours.
311 **ADVANCED CONTROL SYSTEMS (3-0)** Multiple input-output control system analysis. State-space techniques, sampled-data and nonlinear control systems. Design utilizing optimal control theory. **Prerequisite:** 210, mathematics 211, and degree in physical sciences or engineering. Three hours.

391 through 399 **MASTER'S THESIS RESEARCH** Investigation of a research topic under the direction of an assigned staff member culminating in an acceptable thesis. Credit as arranged.

Engineering, Mechanical

**COLLEGE OF TECHNOLOGY**

*Professors Outwater and Tutbill; Associate Professors Carpenter, Duchacek and Marshall; Instructor Viau*

1 **ENGINEERING GRAPHICS I (0-6)** Basic geometrical constructions, freehand sketching and lettering, charts and graphs, orthographic projection and applications of orthographic principles to typical engineering problems. Introduction to descriptive geometry. Two hours.

2 **ENGINEERING GRAPHICS II (0-6)** A continuation of the application of orthographic principles to technical problems covering intersections and development. Axonometric projection. **Prerequisite:** 1. Two hours.

3 **ENGINEERING PROBLEMS** Nature of engineering and the kinds of work done in the fields of engineering. Development of skill and systematic methods in the solution of problems related to engineering. Enrollment restricted to freshman engineering students. One hour.

51, 52 **MANUFACTURING PROCESSES (1-3)** Metal machining, casting, welding forming and inspection methods including economic factors and choice of methods. Laboratory involves further study of variables, applications and limitations of some of the more common processes. **Prerequisite:** 2; 51 for 52. Two hours.

84 **MECHANICAL INSTRUMENTATION (1-0)** Engineering measurements; experimental error; test sequence; data analysis. **Prerequisite:** concurrent enrollment in 92. One hour.

92 **THERMODYNAMICS I (2-0)** Engineering thermodynamics with particular emphasis on energy forms, the development of thermodynamics laws, equilibrium, fixed and variable mass systems, reversibility, and entropy. **Prerequisite:** mathematics 21, physics 15, Two hours.

111 **THERMODYNAMICS II (3-3)** Properties and processes of fluids; the perfect gas, and approximate relationships for real gases; application of thermodynamics principles to areas such as combustion, mixtures, power cycles, gas compression, and refrigeration. Laboratory on problems and analysis. **Prerequisite:** 92. Four hours.
113 **Thermodynamics and Heat Transfer** (3-0) Fundamental principles of engineering thermodynamics; application of these principles to thermodynamic cycles, prime movers, compressors, heat transfer. *Prerequisite:* physics 15; mathematics 21. Three hours.

117 **Mechanical Engineering Laboratory** (0-3) Experiments using the project method to investigate thermodynamic principles, instrument capability, and the theory of experimentation. *Prerequisite:* 84 and concurrent enrollment in 111. One hour.

132 **Mechanisms** (3-3) Analysis and synthesis of displacements, velocities, and acceleration in machines; application of analyses to cams, gears, and other mechanisms. Study of rolling contact, cam and gear design, flexible connectors, computing mechanisms, and miscellaneous mechanisms. *Prerequisite:* 2; civil engineering 130. Four hours.

135 **Machine Design I** (3-0) Statically indeterminant members, deflection of beams, columns, connections, energy methods, theories of failure, continuous beams, thick-walled cylinders. *Prerequisite:* 132, civil engineering 131. Three hours.

142 **Fluid Mechanics** (3-0) Dynamics of an ideal fluid; energy and momentum relations; similitude; flow in conduits; boundary layer mechanics; compressibility phenomena; wing theory; hydrodynamic lubrication; fluid machines and controls. *Prerequisite:* 111 or 113; civil engineering 130. Three hours.

164 **Air Conditioning** (3-0) Application of the fundamental principles of thermodynamics, heat transfer and fluid mechanics to the design and performance of air conditioning systems and equipment. *Prerequisite:* 111 or 113; 142. Three hours.

174 **Industrial Engineering** (3-0) Principles of industrial organization, plant facilities and layout, production and quality control, motion and time study, wage incentives and job evaluation. *Prerequisite:* inspection trip. Three hours.

175 **Motion and Time Study** (2-3) Work simplification: analysis, application, introduction to human engineering. Work measurement: time study, work sampling, predetermined data. *Prerequisite:* junior or senior standing. Three hours.

176 **Plant Organization** (2-6) Analysis of industrial plant requirements as to location, layout and materials handling; plant services and maintenance. *Prerequisite:* junior or senior standing. Four hours.

191, 192 **Thesis** (0-9) Investigation of a research or design project under the supervision of an assigned staff member culminating in an acceptable thesis. *Prerequisite:* senior standing and departmental permission. Three hours.

202 **Advanced Mechanics** (3-0) Development of the foundations of mechanics leading to Hamilton's principle and LaGrange's equations; vibration and stability of systems with many degrees of freedom; gyroscopic effects in mechanical systems; systems with variable co-efficients and non-linear systems. *Prerequisite:* 252. Three hours.
211 Advanced Mechanical Structures I (3-0)  The torsion problem and membrane analogy; thick cylinders and rotating discs; beams on elastic foundation and the bending of plates and shells. Prerequisite: 252; mathematics 211. Three hours.

222 Advanced Mechanical Structures II (3-0)  Stress and strain at a point in three dimensions; the theory of elasticity with two-dimensional examples; development of strain energy method with applications to beams, curved bars and plates; elastic bodies in contact. Photoelasticity. Prerequisite: 211. Three hours.

243 Advanced Fluid Mechanics (3-3)  Foundations of fluid dynamics; thermodynamics and concepts of compressible flow; isentropic flow; normal shock waves; flow in ducts with friction and with heating or cooling; generalized solution of combined effects. Prerequisite: 142 and mathematics 211. Four hours.

244 Compressible Flow (3-0)  Introduction to flow in two and three dimensions; steady irrotational flow; small perturbations; the hodograph method; the Karman-Tsien, Prandtl-Glauert, and Gohert's methods; supersonic airfoils; the method of characteristics; oblique shocks; shock waves and boundary layer interaction. Prerequisite: 243. Three hours.

246 Aerodynamics (3-0)  Application of the principles of fluid mechanics to the design and performance of aircraft; fluid dynamics; experimental facilities; airfoil characteristics; aspect ratio and plan-form influences; viscosity phenomena as applied to boundary layer; transition and separation on various shapes; compressibility phenomena; the optimum airfoil; performance. Prerequisite: 142. Three hours.

252 Machine Design II (3-3)  A continuation of 135 with emphasis on the dynamics and vibration of machines. Design problems correlating various engineering fundamentals and considering practical limitations. Prerequisite: 52, 135. Four hours.

262 Advanced Heat Power Engineering (3-3)  Application of theoretical thermodynamic cycles to actual plant and machine; analysis of the elements of internal combustion engines, gas turbines, and steam power plants; investigation of nuclear and other energy sources; development of station energy balances; economic factors. Prerequisite: 111 or 113, 266. Four hours.

266 Heat Transfer (3-0) Fundamental principles of heat transfer; conduction, convection, radiation; steady and unsteady state; the electric analogy; applications to heat transfer equipment. Prerequisite: 111 or 113 and mathematics 211. Three hours.

267 Advanced Thermodynamics (3-0) A rigorous, detailed study of the laws of thermodynamics and of ideal and actual thermodynamic processes. Prerequisite: 111 or 113 and mathematics 211. Three hours.

271 Industrial Materials I (3-0) Fundamentals of ferrous and non-ferrous physical metallurgy, and non-metallic materials. The correlation of the microscopic structure and physical properties of metals, alloys and plastics
with their heat treatments and uses. Prerequisite: chemistry 2; physics 16. Some laboratory work required. Three hours.

272 Mechanical Behavior of Materials (3-0) Elastic and plastic behavior of single crystals and polycrystals; dislocations; approximate plastic analysis; anisotropic materials; hardness; residual stress; brittle, transitional and ductile fractures; fatigue; damping; creep and surface phenomena. Prerequisite: 271. Three hours.

274 Industrial Materials 11 (3-0) Geometrical crystallography; packings in crystals; formation and transformations in crystals; structure of metals, semiconductors, and insulators. Prerequisite: 271. Three hours.

284 Advanced Heat Engines (3-0) Application of engineering science to specific types of heat engines according to the interest of the students. Prerequisite: 111, 142, 266. Three hours.

294 Engineering Analysis (0-3) Application of scientific principles to the analysis of comprehensive engineering problems. Presentation of current developments. Prerequisite: senior standing. One hour.

295, 296 Special Topics (3-0) Advanced study and discussion in areas dependent on the interest of the students. Prerequisite: senior or graduate standing, with further individual eligibility to be determined by the instructor. Three hours.

301 Advanced Machine Design (3-0) Advanced mechanics of materials and applications to mechanical design according to the interests of the student. Prerequisite: 252. Three hours. I or II.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

English

College of Arts and Sciences

Professors Bandel, Bogorad (Chairman), Hughes, Marston, Pope and Trevithick; Associate Professors Cochran, Jones, Long and McArthur; Assistant Professors Caswell, Grenthot, Murbe, O'Hara, Orth, Strandberg and Woodruff; Instructors Council, Howe, Kinnach, King, M. E. Leonard, M. H. Leonard, McNallie, Poger and Sargent

1-2 Freshman English Study and discussion of selected literary works and writing compositions related to them, to encourage reading with understanding and enjoyment and to develop clear and effective expression. Required of all freshmen. Three hours. Staff.

1 Sabbatical leave first semester 1964-65.
16 Expository Writing  Writing and analysis of expository essays. Prerequisite: 1-2. Three hours. I, II. Dr. Long.

18 Creative Writing  Writing short stories, novels, poetry, plays, and imaginative essays. Instruction is guided by the particular needs and talents of the students. Prerequisite: 1-2. Three hours. I, II. Dr. Bandel.

25, 26 World Literature  A detailed study, in English translation of selected masterpieces of world literature. Lectures, discussions, and reports. Prerequisite: 1-2. Three hours. Staff.

27, 28 English-American Literature  Selected English and American authors from early to modern times. Required of students concentrating in English. Lectures, discussions, and reports. Prerequisite: 1-2. Three hours. Staff.

102 Medieval Literature  The forms (in translation) of medieval literature and middle English texts, excluding Chaucer. Lectures, discussion, and reports. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Hughes.

133, 134 The Development of American Literature  The emergence and growth of a national literature, including both major and minor figures. First semester: Colonial times to the Civil War; second semester: from the Civil War to the present. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Orth.

192 Major Concepts in English Literary History  Twelve to fifteen broad studies of literary genres, trends, influences, periods, movements, and ideas. Lectures by various members of the Department on the broad aspects of their special fields. Discussions, seminars, and student papers under the direction of a coordinator. Limited to seniors concentrating in English. Prerequisite: 25, 26 or 27, 28. Three hours. Coordinator and staff.

201 Chaucer  The principal works of Chaucer, with emphasis on Chaucer's literary scope, talents, and position in medieval literature. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Hughes and Dr. Grenthot.

206 Elizabethan Drama  Drama in England from its beginning to 1642, exclusive of Shakespeare. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Long. Alternate years, 1966-67.

207-208 Shakespeare  Literary study and textual interpretation of most of Shakespeare's works. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Bandel.

209, 210 Elizabethan Prose and Poetry  The major writers of the Tudor and Stuart periods: English prose from the early humanists to the Restoration; English poetry from Wyatt and Surrey to Donne and his followers, including the development of Elizabethan lyric poetry. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Long. Alternate years, 1965-66.

212 Milton  The works of Milton including Paradise Lost, Paradise Regained, Samson Agonistes, some of the minor poems, and selections from the prose works. Lectures, discussions, and reports. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Bogorad. Alternate years, 1965-66.

217 Restoration and Eighteenth-Century Drama  Development of English drama from Dryden to Sheridan. The lectures, discussions, and reports
ENGLISH

consider the literary and theatrical qualities of representative plays. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Bogorad. Alternate years, 1966-1967.

218 Restoration and Eighteenth-Century Prose and Poetry The works, including selected novels, of significant writers from Dryden to Johnson. Particular emphasis on the development of the essay, the satires of Pope and Swift, and the works of the Johnson-Boswell circle. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Bogorad. Alternate years, 1966-67.

221, 222 The Romantic Period First semester: development of the Romantic Movement through Wordsworth and Coleridge; second semester: Byron, Shelley, Keats, and other Romantic poets and prose-writers. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Jones.

227, 228 English Novel English fiction from its origin through the nineteenth century. Masterpieces are stressed and read critically. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Woodruff. Alternate years, 1965-66.

231, 232 Victorian Literature A study of the lives and the works, except the novels, of the significant writers from 1832 to 1900. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Long. Alternate years, 1966-67.

237 Modern Novel Representative British and American novelists since 1915. Limited to seniors, except with permission of the instructor. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Cochran and Dr. Marston.

238 Modern Drama European and American plays which represent the principal trends in the dramatic renaissance of the late nineteenth and the twentieth centuries. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Bandel.

239 Modern Poetry A study of selected English and American poets since 1885, including Yeats, Eliot, and Stevens. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. O'Hara.

240 Modern Short Fiction Short stories and novellas of outstanding modern writers; recent techniques and trends in this type of literature: Limited to seniors, except with departmental permission. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Cochran.

244 Modern Irish Literature A study of Irish literature from 1890 to the present with emphasis on Yeats and Joyce. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Caswell. Alternate years, 1965-66.

251, 252 American Novel Masterpieces of nineteenth-century American fiction selected on the basis of literary merit. Lectures, class discussions, oral and written reports. First semester: Hawthorne, Melville, and others; second semester: Mark Twain, Howells, James and others. Prerequisite: 25, 26 or 27, 28. Three hours. Dr. Trevithick. Alternate years, 1966-67.

254 EMERSON, THOREAU AND THEIR CIRCLE  The essays, journals, and poetry of Emerson, and Thoreau’s *Walden*. Minor writers in the group will receive briefer treatment. Lectures, discussions, oral and written reports. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. Trevithick. Alternate years, 1965-66.

256 LITERATURE OF THE AMERICAN FRONTIER  Frontier, local-color and regional writing in America from the eighteenth century to the First World War, including Parkman, Harte, Mark Twain, Garland and others. Lectures, discussion and reports. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. Marston. Alternate years, 1965-66.

258 AMERICAN POETRY  Major American poets from the eighteenth century to the First World War, including Poe, Whitman, Emily Dickinson, Robinson, Frost, and others. Lectures, discussions and reports. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. Marston. Alternate years, 1966-67.

261 OLD ENGLISH  The sounds, words and structure of Old English; simple prose texts and selected passages from *Beowulf*. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. McArthur. Not offered 1965-66.

271 BIBLIOGRAPHY  Methods of literary study, research, and scholarship. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. Pope.

273 TECHNIQUE AND CRITICISM OF POETRY  Poetic theory with close analysis of selected poems, past and present, designed to show their organic structure, the relation between poetic effect and sense, mood, tone, imagery, stanzaic form, and meter. Lectures, discussions, reports. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. Bogorad.

275, 276 CONTEMPORARY CRITICISM  A seminar in selected topics of contemporary critical interest (for example, myth and tragedy); discussion and criticism of selected major works both contemporary and traditional. *Prerequisite:* 25, 26 or 27, 28. Three hours. Dr. McArthur.

277-278 ADVANCED CREATIVE WRITING  Development of extended projects in creative writing such as a novel, a group of short stories or plays, or a sequence of poems. *Prerequisite:* 25, 26 or 27, 28, and one of the following: 16 or 18. Three hours. Dr. McArthur.

281 SEMINAR FOR PROSPECTIVE TEACHERS OF ENGLISH  Grammar and language; literary interpretation and criticism; allied problems useful to teachers of English. *Prerequisite:* 25, 26 or 27, 28; and 260. Three hours. Dr. Hughes.
302 Graduate Seminar Discussion topics vary from year to year. Recommended for all first-year graduate students in English. Three hours.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

Forestry

College of Agriculture and Home Economics

Professor W. R. Adams (Chairman); Associate Professors Whitmore and Zai; Assistant Professors McCormack and Post

1, 2 Introduction to Forestry (0-6) (2-0) First semester: field identification and characteristics of the more important forest trees, forestry and conservation sciences. Second semester: introduction to specialization in forestry and conservation. Prerequisite: 1 for 2. Two hours. Dr. Adams, Dr. McCormack and Dr. Zai.

4 Dendrology (3-3) Classification and silvical characteristics of the more important native and exotic forest trees. Twig identification. Prerequisite: 1. Four hours. Dr. Zai.

21 Forest Fire Control Forest fire behavior as influenced by fuels, weather, topography; causes and effects of fire; fire danger measurement; methods of preventing and controlling fires; use of fire in forest management. Prerequisite: sophomore standing. Two hours. Mr. Whitmore.

26 Forest Products (2-3) Forest products other than lumber. Wood products manufacture including veneer and plywood, pulp and paper. Wood preservation; naval stores; maple products. Forest products marketing practices. Prerequisite: 2 or 103. Three hours. Mr. Whitmore.

29, 30 Forest Mensuration (2-3) (1-3) First semester: tree measurement techniques, volume determination of standing timber and wood products; growth and yield determinations. Second semester: methods of mathematical and graphical analysis of forest tree stand and product measurements, continuous forest inventory. Prerequisite: 4 or 103; 29 for 30. Three hours; two hours. Dr. Zai and Dr. McCormack.

103-104 Woodland Management (2-3) (2-0) The theory and practice of silviculture in the management of farm woodlands and small forest areas. Prerequisite: junior standing. Three hours; two hours. Dr. Adams.

106 Wood Identification (0-3) Identification of the commercial woods of the United States; basic properties and variations in relation to their use. One hour. Mr. Whitmore.
197, 198 **Senior Research** Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. *Prerequisite:* senior standing. Three hours. Staff.

208 **Biological Statistics** Application of statistics to the analysis of biological data; interpretation of statistical analysis. *Prerequisite:* mathematics 9; senior standing. Three hours. Dr. Post.

227 **Mineral Nutrition of Plants** (See Agronomy 227.) Three hours. Dr. Bartlett and botany, forestry, and horticultural science staff. Alternate years, 1965-66.

381, 382 **Special Topics** Advanced readings and discussion of forestry research literature. Three hours. Staff.

391 through 394 **Master's Thesis Research** Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

---

**General Literature**

**College of Arts and Sciences**

51 **Greek Literature in Translation** Lectures on the development of various branches of Greek literature and on its chief authors, with emphasis on Homer and the drama. Readings in standard translations from the major authors. No knowledge of Greek required. *Prerequisite:* junior standing and one year course in any literature. Three hours. Dr. Ambrose.

52 **Latin Literature in Translation** Lectures on the development of Latin literature and on the principal Latin authors. The relation of Latin literature to Greek and English literature. Readings in standard translations from the major authors. No knowledge of Latin required. *Prerequisite:* junior standing and one year course in any literature. Three hours. Dr. Ambrose.

62 **German Literature in Translation** Lectures on the development of German literature; reading and discussion of representative works in English translations. No knowledge of German required. *Prerequisite:* junior standing and one year course in any literature. Three hours. Mr. Kahn.

72 **Romance Literature in Translation** Comparative study of various literary movements in France, Spain, and Italy. *Prerequisite:* junior standing and one year course in any literature. Three hours. Dr. Parker.
GEOGRAPHY

COLLEGE OF ARTS AND SCIENCES

Associate Professor Miles; Assistant Professor Meeks.

1, 2 Human Geography  Man's occupation of the major regions of the world against the background of the characteristics of the natural environment. Emphasis on the problems of population distribution and pattern of land utilization through time. Prerequisite: sophomore standing or departmental permission. Not open to students who have taken Geography 3. Three hours. Staff.

3 World Geography  A survey of the major regions and nations of the world, their peoples, problems, and potentialities. The physical and cultural factors which have been influential in shaping present-day economic, social and political patterns. Not open to students who have taken geography 1 or 2. Three hours. Staff.

101 Geography of Africa  The significance of geographic factors in the rapid political and economic development of tropical Africa. Attention is focused on the character of the human patterns and cultural development in the various regions against the background of the physical and resource base of the continent. Prerequisite: twelve hours in the social sciences. Three hours. Dr. Miles.

102 Geography of Canada  The character, origin, and development of cultural, industrial and commercial patterns of present-day Canada against the background of the physical and resource base of the country. The analysis of Canadian regions. Prerequisite: twelve hours in the social sciences. Three hours. Dr. Miles.

103 Geography of the Soviet Union  The geographic basis of Soviet strength. The geographical development of the Soviet Union with special reference to the physical patterns and their relationship to settlement, agriculture, industrial resources, economic structure and urbanization. Prerequisite: twelve hours in the social sciences. Three hours. Dr. Meeks.

104 Geography of Asia  Lands and peoples of east, southeast, southwest and south Asia, with special attention to India, China, and Japan. Geographic foundations of economic activities and population problems. Prerequisite: twelve hours in the social sciences. Three hours. Dr. Meeks.

201 Geographic Backgrounds of American History  The physical setting within which the drama of American history has unfolded, with emphasis on the sequence of peoples and cultures which have occupied the land and on their varied appreciation of its resource base. Prerequisite: six hours in geography (of which three hours should be in United States history). Three hours. Dr. Miles.
257 Political Geography The characteristics of the political unit as a geographic area. The consideration of location, resources, and the distributional relationships of the variety of cultural and human factors as they have a bearing on the structure and functioning of the modern political unit. The relationship between geopolitics and political geography. Prerequisite: twelve hours in geography and political science, or departmental permission. Three hours. Dr. Miles.

Geology

College of Arts and Sciences

Associate Professor Doten; Assistant Professors Hunt and Stanley (Chairman)

1-2 Introductory Geology (3-2) An introduction to the earth's composition and present state. The role of the sun, atmosphere, oceans, and internal forces in modifying our planet. The origin and evolution of the earth, continents, oceans, atmosphere, and life, with emphasis on methods of interpretation. Such geological disciplines will be introduced as geophysics, geochemistry, geobiology, oceanography, and space geology. Two lectures, a recitation, and laboratory each week. Field trips. Four hours. Staff.

11-12 Mineralogy (3-3, 2-3) Crystallographic, chemical and physical properties of minerals with emphasis on their geologic environment. Laboratory sessions will stress identification of minerals in hand specimen and by means of the polarizing microscope. Prerequisite: 1-2, or departmental permission. Introductory chemistry is advisable and may be taken concurrently. Four, three hours.

21 Geology for Engineers (2-3) The recognition of common minerals and rocks; rock structures and their effects on engineering problems. Required of students in civil engineering, elective by permission to students in agricultural engineering, open to others by departmental permission. Three hours. Dr. Doten.

105-106 Petrology (3-3) A year course devoted to the study of igneous, sedimentary, and metamorphic rocks with emphasis on geologic processes instrumental in their formation. Laboratories are problem oriented and introduce the student to various methods utilized in rock analysis. Prerequisite: 12. Four hours. Staff.

115 Field Geology (1-6) Geologic mapping of a nearby area or field study of selected structural features within a 100-mile radius of the University. Field methods are illustrated during the mapping program and in class. Further study of a field area may be continued as a senior research problem. Prerequisite: 12. Three hours. Dr. Stanley.

116 Structural Geology (2-3) The behavior of rocks in different tectonic environments of the earth's crust. Emphasis is placed on laboratory studies of rock deformation, description and geometry of structural types, and the kinematic and dynamic interpretation of structural features of all sizes. Prerequisite: 12 or departmental permission. Three hours. Dr. Stanley.
121 PALEONTOLOGY (2-3) Principles of classification, methods of interpretation, and a survey of ancient life. Consideration is given to the species concept, the fossil sample, principles of evolution, uses of fossils, and other basic topics. Laboratory includes methods of collecting, preparing, and identifying fossils. **Prerequisite:** 2 or zoology 1, or the equivalent. Three hours. Dr. Hunt.

151-152 ECONOMIC GEOLOGY (2-2) Characteristics, occurrence, distribution, production, and uses of the more important mineral resources. First semester: non-metallics; second semester: metallics. Trips to localities of economic interest. **Prerequisite:** 116. Three hours. Dr. Doten.

197-198 SENIOR RESEARCH (0-12) Individual research supervised by a member of the staff. Problems should normally be selected by the end of the junior year so that research can begin during the summer. Discussions and readings are designed to deepen a student's knowledge in a selected field of geology. Students from the allied sciences, mathematics, and engineering who have taken several of the required courses of the geology major may elect a research problem that combines their major field of study and geology. Written and oral research reports required. **Prerequisite:** consultation with the staff. Three or six hours.

207 IGNEOUS GEOLOGY (2-2) Paragenesis of igneous rocks; laboratory work on selected suites of specimens. **Prerequisite:** 106. Three hours. Alternate years, 1965-66. Dr. Doten.

208 METAMORPHIC GEOLOGY (2-2) Metamorphic processes and types of metamorphic rocks, with appropriate laboratory study of metamorphic suites. **Prerequisite:** 106. Three hours. Alternate years, 1965-66. Dr. Doten and Dr. Stanley.

215 GEOMORPHOLOGY (2-2) The land forms of the surface of the earth and their origins; external and internal forces modifying the earth. The physiographic provinces of North America. **Prerequisite:** 106. Three hours. Alternate years, 1966-67. Dr. Stanley.

216 GLACIAL GEOLOGY (2-3) The origin, mechanics and effects of past and present glaciations. **Prerequisite:** 215. Three hours. Alternate years, 1966-67. Dr. Stanley.

223 SEDIMENTATION (2-2) Processes active in the erosion, transportation and deposition of sediments, their consolidation into sedimentary rocks, and methods of sedimentary petrology. **Prerequisite:** 106. Three hours. Alternate years, 1965-66. Dr. Hunt.

224 STRATIGRAPHY (2-2) Sequential development and distribution of the sedimentary rocks. **Prerequisite:** 223. Three hours. Alternate years, 1965-66. Dr. Hunt.

281-282 SEMINAR IN GEOLOGY (1-0) A synthesis of geologic processes and evolution of North America and selected portions of the world. Topics cover a wide range of subjects, with emphasis on current problems. **Prerequisite:** 106, 115, 116. One hour. Staff.
391 through 399 Master’s Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

¹ Sabbatical leave 1965-66.
² Sabbatical leave second semester 1964-65.
208 NINETEENTH CENTURY DRAMA Works by Kleist, Büchner, Grillparzer, Hebbel, O. Ludwig, Wagner, and the early Hauptmann will be read. **Prerequisite:** 101-102 or the equivalent. Three hours. Dr. White. Alternate years, 1966-67.

209, 210 THE TWENTIETH CENTURY Selected works in poetry, prose and drama by Brecht, George, Hauptmann, Hofmannsthal, Kafka, Thomas Mann, Rilke, and others will be read. **Prerequisite:** 101-102 or the equivalent. Three hours. Dr. White. Alternate years, 1967-68.

221-222 ADVANCED COMPOSITION AND CONVERSATION Guided conversation, discussion and advanced oral and written drill in German. Study of modes of expression and stylistic devices of modern German based on analysis of selected texts. Problems in translating literary and technical English prose into German. **Prerequisite:** 121-122 or equivalent. Three hours. Staff.

232 HISTORY OF THE GERMAN LANGUAGE Introduction to Germanic linguistics, the comparative method, and linguistic reconstruction. The linguistic development of German from Indo-European to the present. No knowledge of the older stages of the language is presupposed or required. **Prerequisite:** 121-122 or the equivalent. Three hours. Dr. White.

235 THE STRUCTURE OF GERMAN Linguistic analysis of the phonological, morphological, and syntactic structure of modern German with special attention to problems useful for teachers. **Prerequisite:** 121-122 or the equivalent. Three hours. Dr. White.

281-282 SENIOR SEMINAR Readings and research. Required of all senior concentrators. One hour.

381, 382 GRADUATE SEMINAR Readings, conferences, and reports in connection with the work of candidates for the M.A. degree. Three hours.

391 through 399 MASTER'S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

---

Hebrew

COLLEGE OF ARTS AND SCIENCES

Assistant Professor Kahn

1-2 ELEMENTARY HEBREW The spoken language of everyday use with oral, aural and written practice in speaking, reading, and comprehension based on memorization of texts in the form of dialogues. Three hours. Mr. Kahn. Alternate years, 1965-66.

11-12 INTERMEDIATE HEBREW Reading, translation, and discussion in Hebrew of texts selected to show the development of Hebrew culture from Biblical times to the present. Three hours. Mr. Kahn.
History

COLLEGE OF ARTS AND SCIENCES

Professors Daniels (Chairman), Evans and Schultz; Associate Professors Davison, Keppel and Pooley; Assistant Professors Felt, Hand, Newhall, Schmoke1, Spinner and Stout; Instructors Briggs, Hoffman, Metcalfe and Molbo

All advanced courses (numbered 100 or above) have the prerequisite of a specific survey course (CEEB and Advanced Placement tests may in some cases be accepted instead, with the permission of the instructor concerned). Courses numbered 200 or above have the further prerequisite of six additional hours of history or other social science. The first semester of any two-semester course is prerequisite for the second semester, except by departmental permission.

Note: All students required to take a year of history for distribution in the Liberal Arts Curriculum must complete either 12 or 13, unless they offered for admission a year of European or World History.

1 INTRODUCTION TO EUROPEAN HISTORY Survey of the principal developments, from ancient times to the present. Open only to freshmen who lack the preparation necessary for 11. This course cannot be counted toward concentration or distribution requirements in the Liberal Arts Curriculum. Three hours. Dr. Hand and Dr. Stout.

11, 12 EUROPEAN CIVILIZATION History of Europe, 1500 to the present. For students who satisfy the department that they have adequate preparation. 12 or 13 is required of all who concentrate in history. Three hours. Staff.

13 EUROPEAN THOUGHT AND INSTITUTIONS Survey of European history, 1500 to the present, with emphasis on social and intellectual history. An accelerated course open only to freshmen with departmental permission. Freshmen who complete history 13 in the fall semester are advised to take 28 in the spring semester, if qualified to do so. The sequence of 13 and 28 satisfies the distribution requirement in history in the Liberal Arts Curriculum. Three hours. Dr. Newhall.

28 AMERICAN THOUGHT AND INSTITUTIONS Survey of American history, 1783 to the present, with emphasis on social and intellectual history. An accelerated course open only to freshmen and sophomores with departmental permission. Three hours. Dr. Hand.

31, 32 ANCIENT HISTORY The ancient Near East, Greece, and Rome. Prerequisite: sophomore standing or concurrent enrollment in Latin or Greek. Three hours. Dr. Davison.

1 On leave 1964-65.
33, 34 MEDIEVAL EUROPE Europe from the late Roman Empire to the Renaissance, with emphasis on political and cultural developments. *Prerequisite:* sophomore standing or concurrent enrollment in Latin. Three hours. Mr. Pooley.

40 BIOGRAPHY The biographical approach to history. *Prerequisite:* senior standing. Three hours. Dr. Schultz.

51, 52 CONTEMPORARY HISTORY Survey of the world since 1918, stressing the background of current events. *Prerequisite:* sophomore standing. Three hours. Drs. Daniels and Schmokel; Mr. Hoffman.

116 INTRODUCTION TO AFRICAN HISTORY Survey of the history of Africa south of the Sahara, from earliest times to independence. *Prerequisite:* 12 or 13; geography 101 recommended. Three hours. Dr. Schmokel.

123 AMERICAN HISTORY SINCE 1945 Survey of recent developments in the United States not covered in detail in 24 or 28. *Prerequisite:* 12, 13, 24, 28; or 52. Three hours. Drs. Felt, Hand.

130 CHINESE HISTORY Survey of Chinese civilization from earliest times to the twentieth century. *Prerequisite:* 12 or 13, or political science 75. Three hours. Mr. Briggs.

191, 192 SENIOR HONORS RESEARCH For seniors concentrating in history only; required of candidates for Special Honors in history. *Prerequisite:* six hours of advanced history courses and departmental permission. Three hours. Staff.

195 READINGS FOR DEPARTMENTAL HONORS For seniors concentrating in history only. (Candidates should consult the chairman of the Department at the time of spring enrollment. Students accepted will do their readings between November and March; official enrollment will be in the spring semester.) *Prerequisite:* an 80 average through the junior year and an 85 average in at least eighteen hours of history; completion of at least six hours of history numbered above 200.

203, 204 LATIN-AMERICAN HISTORY Political, social, and economic development. First semester, colonial period; second semester, national period. *Prerequisite:* 12 or 13. Three hours. Dr. Felt.

211 THE RENAISSANCE Political, economic, and cultural developments in Europe, c. 1250 to c. 1517, with emphasis on Italian humanism. *Prerequisite:* 12, 13 or 34. Three hours. Mr. Molho.

212 THE REFORMATION Political, economic, and cultural developments in Europe in the sixteenth century, with particular attention to the religious movements, and to the evolution of Northern European humanism. *Prerequisite:* 12 or 13. Three hours. Mr. Molho.

213, 214 CANADIAN HISTORY Canadian development from the French exploration and settlement to the present; evolution of self-government and relations with the United States. *Prerequisite:* 12 or 13. Three hours. Mr. Metcalfe.

221, 222 THE AMERICAN COLONIES American history to 1789. *Prerequisite:* 12, 13, 24 or 28. Three hours. Dr. Stout.
231, 232 French History History of France in modern times: first semester, seventeenth century to 1848; second semester, 1848 to the present. Prerequisite: 12 or 13. Three hours.

233, 234 German History History of Germany in modern times: first semester, seventeenth century to 1850; second semester, 1850 to the present. Prerequisite: 12 or 13. Three hours.

241, 242 Era of the French Revolution and Napoleon French history from 1789 to 1815 with special attention to the impact of French ideas and power upon Europe. Prerequisite: 12 or 13, and reading knowledge of French. Three hours. Dr. Evans.

243 Soviet Russia The USSR from the Revolution of 1917 to the present. A general introduction to the study of Russia and Communism, including historical and ideological background, Soviet political and economic institutions, Soviet foreign policy, and international Communism. Prerequisite: 12, 13 or 52. Three hours. Dr. Daniels.

244 Tsarist Russia History of Russia from the Middle Ages to the Revolution of 1917, with emphasis on the period since Peter the Great. Prerequisite: 12 or 13. Three hours. Dr. Daniels.

253, 254 English History Political and social history of England and its role in world history. First semester, Middle Ages to 1715; second semester, 1715 to the present. Prerequisite: 12 or 13. Three hours. Dr. Spinner.

257, 258 American Statesmen Thought and practical politics of American statesmen. Prerequisite: 24 or 28. Three hours. Dr. Schultz.

261 Vermont History Prerequisite: 24 or 28. Three hours. Dr. Bassett.

265, 266 American Social and Intellectual History Selected topics in the social and intellectual history of the United States since 1783. Prerequisite: 24 or 28. Three hours. Dr. Felt.

277 Government of the USSR (Same as Political Science 277.) Theoretical background, structure and development of the Soviet state and the Communist Party; economic, social, and cultural policies; comparative survey of other Communist governments; current changes. Prerequisite: 243, or six hours of political science including 72, and one other year course in social science. Three hours. Dr. Daniels.

278 Foreign Policy of the USSR (Same as Political Science 278.) Theoretical background; history of Soviet foreign relations; development of the international Communist movement and the Communist bloc; factors and instruments of policy; current problems of relations between Russia and the West among the Communist countries. Prerequisite: 243 or six hours of political science including 51, and one other year course in social science. Three hours. Dr. Daniels.

281, 282 Seminar in American History Research in selected topics. By permission. Three hours. Staff.
283, 284 Seminarrison European History Research in selected topics. By permission. Three hours. Staff.

391 through 399 Master’s Thesis Research Investigation of an individual research topic. Required of all candidates for the M.A. Normally arranged for two semesters at three hours each. Staff.

Home Economics

College of Agriculture and Home Economics

Professor Samenkirk; Associate Professors Brown, Caldwell, Knowles, Morse and Williams (Chairman); Assistant Professors Duroe, Hand, Powell, Smith, Wakefield, Webster and Wittlesey; Instructors Lopeschkin, Mmes. Cummings and Hart

Housing and Home Management

51 Housing Survey of family shelter, needs and supply. Discussion of problems of site location, financing, utilization of space and materials. Three hours. Miss Knowles.

54 Household Equipment (2-2) Application of scientific principles to the selection, operation and care of household equipment. Three hours. Miss Knowles.

101 Principles of Home Management Family and individual management techniques. Application to use of time, energy and money. Introduction to consumer economics. Three hours. Miss Knowles.

105 Experimental Equipment (1-4) Performance measurement and rating of household equipment. Prerequisite: 54. Three hours. Miss Knowles.

106 House Planning An advanced study of housing design to meet family requirements, application of home management principles. Prerequisite: 51, 101. Three hours. Miss Knowles.

153 Home Management Residence Practical application of home management and group living in the Home Mangement Residence. A charge of $95.00 is made to cover partial cost of board and operating expenses. Students not living on campus are charged for room rent proportional to that paid by student in University residence halls. Prerequisite: 101, 137. Three hours. I, II. Miss Smith.

203 Home Management Problems Application of economic and sociological principles to some problems of the home and family. Prerequisite: 101, psychology 1. Three hours. Staff.

1 Sabbatical leave second semester 1965-66.
204 Family Economics  The consumer and the market. Use of credit, savings and investments, insurance and estate planning for the family. Prerequisite: 101, economics 12. Three hours. Miss Knowles.

206 Advanced Housing  Investigation of housing data and current problems including studies of environmental factors, technological developments and governmental programs. Prerequisite: 51, economics 12 and sociology 21. Three hours. Miss Knowles.

301 Readings in Family Economics  Critical survey of the literature and recent research in family economics. Three or four hours. Staff.

Home Economics Education.

115 Introduction to Home Economics Education  Homemaking education in relation to philosophy, professional contracts, and growth toward teacher competencies. Observation of secondary school problems, place of homemaking in general education. Prerequisite: junior standing. Two hours. Miss Smith.

165 Methods of Teaching  Methods of teaching home economics in junior and senior high schools, and of general administration of home economics departments in secondary schools. Prerequisite: 115, psychology 1. Three hours. Miss Brown.

166, 167 Special Problems in Home Economics Education  Individual investigation of a problem selected to meet special needs of students. Prerequisite: 165. Two or three hours. Misses Brown and Smith.

168 Student Teaching  Supervised observation and teaching in approved secondary schools in Vermont. Prerequisite: 165. Seven hours. Miss Brown.

169 Communication Methods (2-4)  Presentation of information through the media of press, radio and television, and lecture-demonstration. Prerequisite: junior standing. Three hours. I. Mrs. Hart and Mr. Spaven.

216 Teaching Adults (1-2)  Problems of organization and of teaching classes in home economics to meet the needs of adults; supervised experience in techniques of teaching adults. Prerequisite: 165; and education 145-146 or agricultural education 104, or equivalent. Two hours. Miss Brown.

Family Living-Human Development

61 The Family, the Individual and Marriage  A functional course designed to aid young men and women to prepare for marriage and family living. Three hours. I, II. Dr. Samenfink.

63 Human Development and Personality (I)  The biological, psychological, and social growth and development of the child and his relationships with his family, peers and institutions. Observation in the preschool laboratory. Prerequisite: sophomore standing or departmental permission. Three hours. I, II. Dr. Samenfink and Mrs. Lepeschkin.

65 Experience with Preschool Families (2-2)  An opportunity to work in the laboratory preschool program to understand better the role of the
teacher consultant in relationship to young children and their families. Prerequisite: 63. Three hours. I, II. Staff.

67 Creative Curriculum Activities (2-2) The theory and practice of developing a creative curriculum for preschool and kindergarten children: experimenting with art, science, and language materials and experience with preschoolers. Prerequisite: 63. Three hours. Mrs. Lepeschkin.

163 Dynamics of Family Development Development growth of parents and children in the various stages of the family life cycle. Prerequisite: sociology 21. Three hours. I, II. Dr. Samenfink.

164 Introduction to Parent Education and Family Consulting Principles of parent education and family consulting; formulation and presentation of programs for preschool parents. Two hours. Dr. Samenfink. Alternate years, 1966-67.

170 Introduction to Social Work History, philosophy, fields, and objectives of social work; process of social case work through discussion of cases. Prerequisite: sociology 21, psychology 1. Three hours. Miss Whittlesey.

172 Preschool Planning and Practicum (2-14) Preschool theory and philosophy past and present; planning and conducting programs of the preschool laboratory. Prerequisite: 63, 65 and 67. Nine hours. Mrs. Lepeschkin and staff.

263 Seminar in Family Relations and Human Development Theory and research on the family. Prerequisite: 63, 163 and sociology 51. Three hours. Dr. Samenfink. Alternate years, 1966-67.

264 The American Woman Focuses on recent literature regarding the role of women and the unique tasks they face in maintaining stability in a dynamic twentieth century world. Prerequisite: 163 and sociology 51. Three hours. Dr. Samenfink. Alternate years, 1966-67.

Clothing and Textiles

22 Clothing Selection and Construction (1-4) Selection of clothing to meet individual needs in relation to design and appropriateness of dress. Development of clothing construction techniques. Three hours. Mrs. Webster and Mrs. Duroe.

73 Pattern Design and Advanced Construction (0-6) Techniques of designing and altering flat patterns. Advanced construction techniques and original design. Prerequisite: 22 or departmental permission. Three hours. I. Mrs. Webster.

83 Survey of Textiles (2-2) Fibers, their properties and manufacturing processes. Identification, care and use of clothing and household fabrics. Three hours. Miss Duroe.

123 Tailoring (0-6) Construction techniques with emphasis on tailoring problems. Prerequisite: 73 or departmental permission. Three hours. Mrs. Hart and Miss Smith.
182 Advanced Textiles (1-4) Historical and sociological background to textiles and textile design; testing techniques and recent developments in the field. Prerequisite: Three hours. Staff.

221 Costume Design and Draping (1-4) Draping techniques used in creative fashion design. Handling of fabrics in relation to line in dress. Original projects developed according to individual interests. Prerequisite: 21, 73, or departmental permission. Three hours. Mrs. Webster.

273 Clothing, Textiles and Related Art Seminar Theory and research in the field of Clothing, Textiles and Related Art, analysis of current problems; review and discussion of recent research, book and publication; individual studies. Prerequisite: departmental permission. Three hours. Staff.

Related Art

21 Design (1-4) Color and design in theory and practice. Work with various media as a means of creative expression and understanding of art principles. Three hours. Miss Caldwell.

71 Costume Design (1-4) Application of design fundamentals and principles to fashion planning. Techniques of fashion illustration. Prerequisite: 21. Three hours. Miss Caldwell.

120 History of Costume (2-2) History of costume stressing the background philosophy and events of each period as reflected in dress. Adaptation of historic design to modern fashion. Prerequisite: history 12. Three hours. Miss Caldwell.

130 Home Furnishing I (1-4) Application of design fundamentals to the problems involved in furnishing the home. Prerequisite: 21. Three hours. Miss Caldwell.

230 Home Furnishing II (1-4) Interior design; period furnishing, its present use and influence upon modern furnishing. Prerequisite: 130. Three hours. Miss Caldwell.

Food and Nutrition

43 Basic Concepts of Food and Nutrition (3-4) Food selection and preparation in relation to human growth and health. Basic principles of food selection presented through demonstration lectures. Four hours. I, II. Miss Williams.

87 Fundamentals of Nutrition Basic principles of nutrition. Nutrient content of foods. Practice in recording and evaluating dietary intake of individuals. Prerequisite: chemistry 4, zoology 6, or departmental permission. Three hours. Miss Powell.

89-90 Diet Modification in Disease Diet modification in the treatment of disease. The role of diet in the nursing care. Laboratory work is integrated with hospital experience. For students in nursing. Integrated with Nursing Education 19-20 Medical and Surgical Nursing. One hour. Miss Powell.
135 **Advanced Food Preparation** (2-4) Scientific principles and fundamental processes underlying food preparation and preservation with practical applications. **Prerequisite:** 43, chemistry 4, 131. Four hours. Miss Wakefield.

137 **Meal Management** (1-5) Principles and practice in planning, preparing and serving family meals at different cost levels. **Prerequisite:** Three hours. I, II. Mrs. Hand.

144 **Applied Normal Nutrition** (2-2) Emphasizing nutritional needs of individuals in all stages of the life cycle. Attention is given to the social, economic and cultural factors which affect nutrient intake. Selected field experience. **Prerequisite:** 43, sociology 21, junior standing. Three hours. Miss Powell.

236 **Introduction to Food Research** (1-4) Methods and techniques in experimental work in foods. Independent laboratory study of problems in food preparation. **Prerequisite:** 135. Three hours. Miss Williams.

238 **World Dietary Problems** The complex interrelationships which are responsible for the nutritional status of persons living in representative countries. A background for the understanding of the causes of malnutrition in various areas in the world and the study of the agencies and techniques working to alleviate the problems. **Prerequisite:** 144, 135, sociology 21, or departmental permission. Three hours. Miss Williams.

243 **Nutrition and Diet** (3-2) Human nutrition; the nutritive value of foods with application in calculating food requirements; diets for children, adults and family groups. **Prerequisite:** 135; agricultural biochemistry 201; zoology 6, or 52. Four hours. Dr. Morse.

244 **Diet Therapy** (2-2) Adaptations of the normal diet in conditions affected by or affecting the utilization of food. **Prerequisite:** 243. Three hours. Miss Wakefield.

246 **Readings in Foods** Critical survey of the literature on the recent developments in food research. **Prerequisite:** senior standing; 135. Two or three hours. Staff.

248 **Readings in Nutrition** Critical survey of the literature on recent developments in nutrition. **Prerequisite:** 243. Two or three hours. Staff.

**Institutional Management**

139 **Food Service Management** (1-2) Managerial responsibility, menu planning, cost calculation and organization necessary for preparing and serving food for groups. Basic techniques of organization, management, time and motion studies and floor plans in relationship to school lunch and community feeding problems. **Prerequisite:** 137. Two hours. Miss Wakefield. (Not open to dietetic majors.)

186 **Quantity Food Production** (1-4) Practical applications of principles, methods, and techniques used in quantity food production. **Prerequisite:** 135. Three hours. Miss Wakefield.

187 **Institutional Administration** Survey of the field; organization, management and personnel problems; time and motion studies; sanitation; food
cost control. Prerequisite: 186, may be taken concurrently. Three hours. Miss Wakefield.

288 INSTITUTIONAL MARKETING AND ACCOUNTING (3-2) Advanced institutional management, marketing, accounting, equipment, floor plans, layouts and related material on design and furnishing in the different types of food services. Prerequisite: 186, 187. Four hours. Miss Wakefield.

Home Economics Seminars and Research

1 ORIENTATION Home economics in the Land-Grant college—teaching, research, and extension. The historical development of the field, its common core of family and individual, and the professional opportunities which are available. One hour. Staff.

151 SENIOR SEMINAR Ethics and responsibilities of the professional home economist. Readings and discussion of research and progress in the field. One hour. Staff.

197, 198 SENIOR PROBLEMS Supervised study in a field of home economics. Findings submitted in a form prescribed by the department. One to three hours. Staff.

386, 387 GRADUATE SEMINAR Advanced study in a special field; opportunities for independent work are provided. Three hours. Staff.

391 through 399 MASTER'S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged. Staff.

Other Courses in Home Economics

In addition to the courses offered during the academic year the following courses may be offered in Summer Session and the Evening Division program:

S265 FAMILY LIFE EDUCATION IN SCHOOL AND COMMUNITY.

296 NUTRITION SEMINAR.

S370 ADVANCED HOME ECONOMICS EDUCATION.
Horticultural Science

COLLEGE OF AGRICULTURE AND HOME ECONOMICS

Professors Wiggans (Chairman) and Hopp; Mr. Calahan

11 HOME AND GARDEN HORTICULTURE Enrichment of every day home living through horticulture. Planning of the home grounds for maximum use and enjoyment. Selection and maintenance of plants for the home grounds, including shrub, tree and flower plantings, the home lawn, home fruit and vegetable gardens, and house plants. Designed for students with a non-commercial interest in horticulture. Three hours. Staff.

52 FUNDAMENTALS OF HORTICULTURE Principles underlying the culture, propagation, harvesting, storage and utilization of important horticultural crops. Prerequisite: botany 1. Three hours. Staff.

152 TREE FRUIT CULTURE (2-2) Cultural practices and principles involved in modern tree fruit production. Prerequisite: 52. Three hours. Mr. Calahan. Alternate years, 1966-67.

153 VEGETABLE CULTURE (2-2) Cultural practices and principles involved in modern vegetable production, including a review of recent experimental work. Prerequisite: 52. Three hours. Mr. Hopp. Alternate years, 1965-66.

155 SMALL FRUIT CULTURE (2-2) Principles underlying plant growth and fruit production of small fruits. Prerequisite: 52. Three hours. Staff.

157 ORNAMENTAL HORTICULTURE (2-2) The identification, climatic requirements, cultural management, and use of ornamental plant materials in landscape plantings. Prerequisite: 52. Three hours. Staff. Alternate years, 1966-67.

197, 198 SENIOR RESEARCH Work on a research problem under the direction of a senior staff member. Findings submitted in written form as prescribed by the department. Prerequisite: senior standing. One to three hours. Staff.

205 PLANT PROPAGATION (2-2) Physiological and anatomical principles involved in the propagation of plants and their application to specific propagation problems. Prerequisite: Credit or concurrent enrollment in botany 103. Three hours. Staff. Alternate years, 1965-66.

210 PLANT RESEARCH TECHNIQUES (2-2) Methods of conducting research with plants. Organizing and planning of experiments. The use of field and laboratory equipment. Three hours. Prerequisite: botany 103, agronomy 52, junior or senior standing in a plant science. Dr. Wiggans. Alternate years, 1965-66.

227 MINERAL NUTRITION OF PLANTS (See agronomy 227.) Three hours. Dr. Bartlett and botany, forestry, and horticultural science staff. Alternate years, 1965-66.

1 Sabbatical leave first semester 1964-65.
281 through 284 Horticulture Seminar (1-0) Presentation and discussion of papers on selected topics of horticultural interest by students and staff. Required of all seniors and graduate students. One hour. Staff.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

Mathematics

College of Technology

Professors Meserve, Riggs¹ and Schoonmaker (Chairman); Associate Professors Dwork, J. Izzo, R. Izzo, Lighthall, Moser and Nicholson; Assistant Professors Bentzen, Chamberlain and Wenner; Instructors Bobmont, Burke, Marn and Merriam; Visiting Lecturer Morrissey.

1 Elementary College Algebra Review of fundamental operations and a more extensive study of fractions, exponents, radicals, linear and quadratic equations. Additional topics to be discussed include ratio, proportion, variation, progressions and the binomial theorem. This course covers the topics normally included in intermediate algebra in high school. Students who have satisfactorily completed two years of high school algebra, or the equivalent, will receive no credit for this course. Offered only in Summer Session. Three hours. Staff.

2 Plane Trigonometry A study of trigonometric functions, their graphs and other properties, logarithms, solution of triangles, trigonometric equations and identities, and inverse trigonometric functions. Prerequisite: 1 or 9. Three hours. Staff.

4 Mathematics of Finance Mathematical theory of finance applied to interest and investments, annuities, and life insurance. Prerequisite: 1 or 9. Three hours. Staff.

5² Plane Analytic Geometry and Calculus An introduction to plane analytic geometry and calculus. This course prepares students for mathematics 12. Prerequisite: 2, or sufficiently high scores on the algebra and trigonometry placement tests. Three hours. Staff. Not offered in 1965-66.

7, 8 Fundamentals of Mathematics To provide an understanding of basic logical and mathematical ideas (both ancient and modern) and some of their applications to other fields of knowledge. Emphasis is on fundamental concepts and logical methods of reasoning rather than on the development of

¹ Sabbatical leave 1965-66.
² The enrollment of students who desire eventually to take mathematics 12 will depend on their previous record and their score on a mathematics achievement test. Students not qualified to enroll in mathematics 11 will be enrolled in mathematics 9. A student who takes mathematics 9 in the fall of his freshman year and who, because of his chosen curriculum, needs to have completed mathematics 12 prior to the beginning of his sophomore year, will need to take mathematics 12 during the summer between his freshman and sophomore years. Those who are deficient in high school mathematics are urged to attend summer school prior to their first semester in college.
techniques. Many topics of algebra, trigonometry and analytic geometry are considered in their relation to certain basic concepts pervading all mathematics. A course for students in the arts, social sciences and others whose programs do not require further study of mathematics. Credit will not be given for both mathematics 7 and 9. Prerequisite: one year each of secondary school algebra and geometry, 7 for 8. Three hours.

9 College Algebra A study of sets, relations, and functions with particular attention to properties of algebraic, exponential, and logarithmic functions, their graphs and applications. Students who have earned credit for any higher numbered course in mathematics may not enroll in this course for credit. Credit will not be given for both mathematics 7 and 9. Prerequisite: two years of secondary school algebra and one year of secondary school geometry. Three hours. Staff.

11 Plane Analytic Geometry and Calculus A few topics from College Algebra and an introduction to plane analytic geometry and calculus. This course prepares students for mathematics 12. Prerequisite: 9 and 2 or sufficiently strong background in secondary school algebra and trigonometry. Five hours. I, 11. Staff.

12 Analytic Geometry and Calculus A continuation of the study of plane analytic geometry, differential and integral calculus and their applications, vectors, and solid analytic geometry. Prerequisite: 5 or 11. Five hours. Staff.

21 Sophomore Mathematics Partial differentiation, multiple integrals, infinite series, and elementary differential equations. Prerequisite: 12. Three hours. Staff.

102 Fundamental Concepts of Mathematical Analysis Sets, relations, functions, the Schroeder-Bernstein theorem, cardinal numbers, ordinal numbers, well-ordering, the Axiom of Choice, Zorn's lemma, rational numbers, fundamental sequences, real numbers, complex numbers, elementary topology of the reals and complexes. Prerequisite: credit or concurrent enrollment in mathematics 21. Three hours. Staff.

125, 126 Numbers Discussion of natural numbers, integers, fractions, decimals, and real numbers together with the fundamental operations and fundamental principles involving them. Number bases, sets, measurement and approximation, ratio, proportion, percentage, and selected topics from algebra which are a natural extension of arithmetic. Open only to students in elementary education. Prerequisite: junior standing; 125 for 162. Three hours. Staff.

181, 182 Senior Problem Investigation of some area or problem, under the direction of an assigned staff member, culminating in a report. This course is available only to candidates for the Bachelor of Science degree in Mathematics. Prerequisite: departmental permission. Three hours. Staff.

1 See footnote 2 page 178.
207, 208 Advanced Calculus The calculus beginning with limits, continuity, differentiation, and Riemann integrals; treatment of those topics not included in the earlier course as a foundation for more advanced courses in analysis and applied mathematics. Prerequisite: 21; 207 for 208. Three hours. Staff.

209 Projective Geometry Principle of duality, perspectivity, projectivity, harmonic sets, cross ratio, the theorems, the Pascal and Brianchon, and poles and polars. Prerequisite: 12. Three hours. Staff. Alternate years, 1966-67.

210 Foundations of Geometry Geometry as an axiomatic science, various non-Euclidean geometries, and relationships existing between Euclidean plane geometry and other geometries. The development of geometry as a science based upon invariant properties. Prerequisite: 12. Three hours. Staff.

212 Applied Mathematics Boundary-value problems, orthogonal functions and vector analysis. Prerequisite: 24 and 211. Three hours. Dr. Dwork.

220 Vector Analysis Introduction to vector methods including the elements of vector algebra and vector calculus with applications to physics and mechanics. Prerequisite: 21. Three hours. Staff. Not offered in 1965-66.

221 Mathematical Statistics Frequency distributions including: the calculation of moments, standard deviations and related quantities, the theory of least squares and its application to scientific problems, the Chi-square test and Student’s t-test with a discussion of the validity of statistical results. Prerequisite: 12. Three hours. Dr. Izzo.

224 Theory of Probability Permutations and combinations, stochastic variables, moments, probability distribution functions, joint distribution functions, normal, binomial and Poisson distributions, Stirling’s Theorem, The Central Limit Theorem and the laws of large numbers. Prerequisite: 21 and 221. Three hours. Dr. Izzo.

225, 226 Topology The elements of point set topology; closed sets and open sets in metric spaces, continuous mappings, connection, Peano curves, separation theorems and homotopy. Prerequisite: 102 or 208; 225 for 226. Three hours. Alternate years, 1966-67. Dr. Wenner.

227 Differential Geometry Analytic metric differential geometry of curves and surfaces in ordinary three dimensional space; curvature, torsion, Frenet formulas, involutes, evolutes, developable and ruled surfaces, and geodesic curves. Prerequisite: 21. Three hours. Alternate years, 1965-66. Staff.
228 **Number Theory** Divisibility, prime numbers, Diophantine equations, congruence of numbers, and methods of solving congruences. **Prerequisite:** 21. Three hours. Staff.

231, 232 **Function of a Complex Variable** Differentiation and integration of a function of a complex variable, mapping of elementary functions, infinite series, properties of analytic functions, analytical continuation, calculus of residues, contour integration, integral functions, meromorphic functions, Riemann surfaces, and conformal representation. **Prerequisite:** 208; 231 for 232. Three hours. Alternate years, 1966-67. Staff.

233, 234 **Theory of Functions of Real Variables** Functions of real variables, including: point sets and measure, transfinite numbers, Riemann and Lebesgue integrals, and sequences of functions. Considerable outside reading is assigned. **Prerequisite:** 208; 233 for 234. Three hours. Alternate years, 1963-66. Staff.

235, 236, 237 **Special Topics in Analysis** For advanced students in the field of analysis. Lectures, reports and directed readings on advanced topics in analysis. **Prerequisite:** 232 or 234 and departmental permission. Credit as arranged. Offered as occasion warrants. Staff.

241 **Modern Higher Algebra** Fundamental concepts of modern higher algebra, logic, groups, rings, fields, integral domains, lattices, Boolean algebra and order systems. **Prerequisite:** 24 and departmental permission. Three hours. Staff.

242 **Theory of Determinants and Matrices** Basic concepts, theorems, and applications of determinants and matrices including the theory of vector spaces and quadratic forms. **Prerequisite:** 241. Three hours. Staff.

243 **Theory of Groups** The study of the various kinds and structures of groups. **Prerequisite:** 241. Three hours. Alternate years, 1965-66. Staff.

244 **Galois Theory** The study of Galois theory leading to the insolvability of general quintic equations by radicals and theorems on constructions with ruler and compasses. **Prerequisite:** 243. Three hours. Alternate years, 1965-66. Staff.

245, 246, 247 **Special Topics in Algebra** For advanced students in the field of algebra. Lectures, reports and directed readings on advanced topics in algebra. **Prerequisite:** 241 and departmental permission. Credit as arranged. Offered as occasion warrants. Staff.

251 **The Theory of Digital Computing Machines and Numerical Analysis** Mathematical theory underlying digital computing machines including assigned problems on the IBM 1620, and 7090 at M.I.T., including programming in machine language, symbolic and fortran languages. The last third of the course is devoted to elementary numerical analysis. **Prerequisite:** 21, 24 highly desirable. Three hours. Dr. Riggs.

252 **Advanced Numerical Analysis** Finite difference methods, numerical solution of differential equations, numerical solutions of systems of linear equations, linear programming and approximations of various types. Problems
solved on the 1620 computer. Prerequisite: 251 and credit or concurrent enrollment in 24. Three hours. Alternate years, 1966-67. Dr. Riggs.

255, 256, 257 Special Topics in Geometry For advanced students in the field of geometry. Lectures, reports and directed readings on advanced topics in geometry. Prerequisite: 209 or 227 and departmental permission. Credit as arranged. Offered as occasion warrants. Staff.

265, 266, 267 Special Topics in Topology For advanced students in the field of topology. Lectures, reports and directed readings on advanced topics in topology. Prerequisite: 226 and departmental permission. Credit as arranged. Offered as occasion warrants. Staff.

270, 271 Ordinary Differential Equations Linear and non-linear systems, approximate solutions, existence, uniqueness, stability, asymptotic behavior of solutions. Prerequisite: 208 or 211 or departmental permission. Three hours. Dr. Chamberlain.

281, 282, 283, 284, 285, 286 Seminar Members of the staff and approved students meet weekly to study contemporary advances in mathematics and for reports on current research. One hour. Staff.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged. Staff.

Medical Technology

Note: All courses limited to students of Medical Technology except by permission of the Departmental Chairman.

1 Introduction to Medical Technology Orientation and explanatory lectures in each of the disciplines in Medical Technology. Fall semester. One hour. Dr. Couch and staff.

101 Medical Technology (3-6) Principles, procedures, and special technics in medical technology. Includes hematology, immunohematology, serology, and urinalysis. Fall semester. Six hours. Dr. Couch and staff.

102 Medical Technology (1-4) Continuation of 101; includes histologic technic, introduction to cytopathology, parasitology. Spring semester. Three hours. Dr. Coon and staff.

103 Seminar in Medical Technology Group discussions of technics and principles in medical technology. Spring semester. Two hours. Dr. Coon and staff.

111-112 Biochemistry for Medical Technologists Human physiological chemistry; structure, metabolism and regulatory mechanisms. Laboratory:
biological reactions, preparation of reagents, instrumentation. Application of sound quantitative principles to analysis of body constituents. Lectures, conferences and laboratory. Limited to students of medical technology except by permission of departmental chairman. Four hours. Dr. Melville and staff.

Hospital Assignments Rotating assignments in various departments of hospital, medical college, and public health diagnostic laboratories to give experience in medical laboratory procedures. Spring semester. Six hours. Dr. Coon and staff.

Military Science

Colonel Robinson (Chairman); Majors Brodin, Hussey, Mahoney and Wenz; Captains Fene, Finebout, Haas, Robertson and Strickler

1-2 U. S. Army and National Security (2-1) Organization for national defense; national security program; economics of national security; role of U. S. Army in total, limited, and cold war; military technology and weapons systems; research and development; principles of marksmanship; basic tactics; leadership laboratory.

11-12 U. S. Military History; Military Topography (2-1) Great Captains; the Revolutionary War; Civil War; origins of World War I; World War I; origins of World War II; World War II: Defense, North Africa, Desert Victory, Sicily, Italy, Normandy, Germany, Japan; the Korean War; military topographic and aerial photographic maps; grid reference systems; cartographic symbology, terrestrial orientation and navigation; leadership laboratory.

101-102 Army Teaching Methods; Fundamentals of Leadership (3-1) Methods of instruction; U. S. Army organization, military leadership; military communications, command, and control; small unit tactics; leadership laboratory.

111-112 Military Command and Management (3-1) Military administration; staff functions and organization; training management; military law; military intelligence; military transportation; logistics; role of the U. S. in world affairs; leadership laboratory.

Fundamentals of Small Unit Leadership will be substituted for U. S. Military History during fall semester, 1965, for students enrolled in Military Science 1-2 during academic year 1964-65.
Music

COLLEGE OF ARTS AND SCIENCES

Professors Lidral (Chairman), Bennett and Pappoutsakis; Associate Professor Kinsey; Assistant Professors Keene, Schultz, Siekmann and Weinrich; Instructor Delgado; Part-time Instructors Auchter, Dahl and Kinsey

Students in all music courses are required to attend a designated portion of major ensemble concerts, faculty recitals, and formal student recitals as part of the course requirements.

Theory and Composition

5-6 Theory I (2-3) Melodic and rhythmic dictation, sight singing, and elementary harmony. Three hours. Mr. Pappoutsakis.

9, 10 Introductory Music Required of students in elementary education, elective to others. First semester: ear training, music reading and writing, elementary theory; second semester: history and appreciation. Three hours. Mr. Pappoutsakis.

105-106 Theory II (2-3) Contrapuntal and harmonic dictation, advanced harmony, and elementary counterpoint. Prerequisite: 5-6. Three hours. Dr. Lidral.

203, 204 Orchestration First semester: characteristics of instruments, arranging for orchestra; second semester: advanced exercises in orchestral scoring. Prerequisite: 105-106; 203 for 204. Three hours. Mr. Pappoutsakis. 204 in alternate years, 1965-66.

205, 206 Counterpoint First semester: tonal counterpoint; second semester: canon and fugue. Prerequisite: 105-106; 205 for 206. Three hours. Dr. Kinsey. 206 in alternate years, 1965-66.

207 Pedagogy of Theory Objectives, viewpoints, content and specific approach to the organization and teaching of theory courses. Prerequisite: eighteen hours in theory. Three hours. Dr. Lidral. Alternate years, 1965-66.

208 Form and Analysis Creative approach to aural and sight analysis of musical construction. Prerequisite: 105-106 or the equivalent; 203 recommended. Three hours. Dr. Kinsey.

209, 210 Arranging, Vocal and Instrumental First semester: arranging for vocal ensembles of various sizes and functions including mixed groups,

1 On leave 1964-65.
2 Enrollment in music 5 will cancel credit for music 9 and music 1 or 2 will cancel music 10.
men's and women's glee clubs, and chamber groups. Second semester: arranging for instrumental ensembles of various sizes including marching, concert, and school bands, and chamber groups. Prerequisite: 203. Three hours. Dr. Lidral and Mr. Schultz. Alternate years, 1966-67.

215, 216 COMPOSITION Creative work in free composition with instruction according to the needs and capabilities of the individual student. Prerequisite: 205 and 208 or departmental permission. Three hours. Dr. Lidral.

History and Literature

1, 2 SURVEY OF MUSICAL LITERATURE First semester: the Romantic era in songs and piano pieces, program music, the symphony and the concerto, and the opera. Second semester: the Classical era, Gregorian chant to Handel and Bach, modern music, and American music. Three hours. Dr. Kinsey and Miss Delgado.

129 CHORAL LITERATURE A study of selected masterpieces of choral literature through analysis and performance. Prerequisite: twelve hours or the equivalent in voice. Two hours. Mr. Weinrich.

130 VOCAL LITERATURE A study of selected masterpieces of the vocal literature through analysis and performance. Prerequisite: twelve hours or the equivalent in voice. Two hours. Mr. Weinrich.

221, 222 HISTORY OF MUSIC Changes in musical structure and style in relation to contemporaneous artistic, literary, religious, and social movements. First semester: Gregorian chant to the Baroque era. Second semester: Baroque to Modern. Prerequisite: 1, 2 and 5-6 or 7-8. Three hours. Mr. Bennett.

223 through 228 MUSIC LITERATURE Advanced studies in the literature of music. Prerequisite: 105-106 and 221, 222. Three hours. Mr. Bennett.

245-246 CHAMBER MUSIC LITERATURE A study through analysis and performance of masterworks for small groups leading to public performance. Prerequisite: twelve hours or the equivalent in applied field and departmental permission. One hour. Staff.

281, 282, 283, 284 INDEPENDENT STUDY Studies in theory, composition, history, or literature under the direction of an assigned staff member for advanced students and candidates for honors. Credit as arranged.

381, 382, 383, 384 SEMINAR Study of special topics appropriate to student needs. One hour. Dr. Kinsey.

391 through 399 MASTER'S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

For Music Education, see page 84.

For School Music, see Elementary Education 113.
Applied Music

For the fees for instruction, see page 48.

A senior recital in the applied major field is required of all music majors. Regular appearances in informal recitals are required of all applied music students. Appearance in one formal departmental recital a semester is required of all music majors. At the end of each semester jury examinations are given in applied music.

All music majors on any curriculum are required to pass a FUNCTIONAL PIANO FACILITY examination before certification for graduation. This will include:

a. Ability to sight-read songs of the type found in a community song book.

b. Ability to harmonize at sight; to improvise a simple piano accompaniment for songs requiring the use of I, IV, and V chords and some simple modulations; to transpose the songs and harmonizations to other keys.

c. Ability to sight-read fairly fluently simple accompaniments, vocal or instrumental, and simple piano compositions of the type used for school rhythmic activities.

41, 42 Major Ensembles (0-3) University Band, Choir, and Orchestra. Prerequisite: departmental permission. One hour. Dr. Siekmann and Messrs. Keene and Weinrich.

45, 46 Chamber Music (0-2) Study and performance of masterworks for small groups. Outside practice required. Prerequisite: departmental permission. One hour. Messrs. Keene, Weinrich and staff.

51, 52 Individual Study Private study in piano, organ, harpsichord, voice, strings, woodwinds, brass, percussion, and harp. One or two hours. Staff.

71, 72 Class Study (0-2) Required of music education students, elective to others. Class study in applied music fields of voice, strings, woodwinds, brass, and percussion. One hour. Staff.

74 Instrument Repair Class (0-2) A laboratory for music education students in minor repair and adjustment of string, woodwind, brass, and percussion instruments. Prerequisite: string, woodwind, brass, and percussion classes or concurrent enrollment and departmental permission. One hour. Dr. Siekmann.

211, 212 Conducting (2-2) First semester: technique of the baton, score reading, laboratory practice. Second semester: preparation and performance of selected scores, including score reading at the piano and rehearsal procedures. Selected students will conduct University major ensembles. Prerequisite: 5-6; 211 for 212. Three hours. Mr. Pappoutsakis. 212 in alternate years, 1966-67.

1 Indicated courses in applied music may be taken for several years, but no B.A. candidate may receive credit toward graduation totalling more than six semester hours in major ensembles and six semester hours for individual study. One hour of credit per semester will be given for one private lesson (one-half hour) per week under a member of the department, and six hours practice per week, on condition that the instruction be accompanied or preceded by music 1, 2 or 5-6 or 9, 10 and participation in major ensemble (keyboard students excepted); two hours credit will be given for two private lessons per week (one hour) and twelve hours practice per week, on the same condition.
251, 252 Advanced Individual Study  Private study in piano, organ, harpsichord, voice, strings, woodwinds, brass, percussion, and harp leading to public recital performance. Prerequisite: advanced standing in applied field. One or two hours. Staff.

271, 272 Applied Music Pedagogy  Methods of teaching voice, strings, woodwinds, brass or keyboard instruments and advanced class instruction in them. Research paper required. Prerequisite: performing ability, teaching experience, and consent of instructor. Two hours. Staff.

Nursing

College of Education and Nursing

Associate Professors Milligan and Woodruff (Chairman); Assistant Professors Demers, Emerson, Forgione, Lombard, Palmer, Phillips, Rodgers, Schwalb and Thompson; Instructors Farrington and Hager

1, 2 Orientation to Nursing  First semester: introduction to nursing as a profession including its historical development. Second semester: the influence of environmental factors on an individual and his health practices. 1, one hour; Miss Woodruff; 2, two hours. Miss Milligan.

7 Home Nursing (0-2)  Care of the family. Prerequisite: junior standing in home economics curriculum. One hour. Mrs. Rodgers.

21-22 Introductory Nursing (2-8) (3-12)  First semester: development of understandings, attitudes and skills necessary in giving basic nursing care. Laboratory study in classroom and hospital. Second semester: development of understandings, attitudes, and skills necessary in giving nursing care to people who face illnesses which have a favorable prognosis. 21, four hours; 22, six hours. Misses Lombard and Milligan.

26 Interpersonal Relations in Nursing  Understanding of human relationships in the care of patients; some of the dynamic factors influencing interpersonal relations; development of approaches useful in the solution of common problems in nurse-patient relationships. Three hours. Miss Phillips.

121-122 Intermediate Nursing (4-20)  Development of understandings, concepts and skills necessary to provide nursing care to the family and its members. One semester: laboratory experience with mothers and children through a family centered approach. One semester: laboratory experience with adults who face illnesses which necessitate short and long term adjustments in patterns of living. Nine hours. Misses Demers, Forgione, Hager and Schwalb; Mrs. Palmer.

156 Psychiatric Nursing (4-8)  Principles of nursing care of patients with psychiatric problems in hospitals and other settings. The emphasis will be on the development of therapeutic relationships with selected patients and

1 See footnote page 186.
upon the nurse's role with patients in various treatment situations. Six hours. Miss Phillips.

166 ADVANCED NURSING (3-12) The development of understandings, concepts, and skills necessary to provide nursing care based on the assessed needs of the critically ill patient, and support for the family; the concept of the nursing team and participation as a team member and a team leader; an appreciation of the leadership role of the head nurse. Six hours. Miss Thompson and Mrs. Rodgers.

176 NURSING IN THE COMMUNITY (4-8) Study and discussion of the development functions and trends in official and voluntary health organizations with emphasis on the role of the nurse at the local, state, national and international level. Laboratory study provided in the community. Six hours. Misses Emerson and Farrington.

186 SURVEY OF CONTEMPORARY NURSING Influence of contemporary social, educational, political and economic developments on nursing; problems and issues in the profession today; and professional organizations in nursing and responsibilities of the professional nurse. Three hours. Miss Woodruff.

\[ \text{Philosophy and Religion} \]

\[ \text{COLLEGE OF ARTS AND SCIENCES} \]

\[ \text{Professor Dykhuizen; Associate Professors Hall (Chairman) and Sadler; Assistant Professors Beckett, Brkić and Kahn; Instructor Penner} \]

\[ \text{Philosophy} \]

1 INTRODUCTION TO PHILOSOPHY The chief problems of philosophy. Three hours. Staff.

2 LOGIC Principles and conditions of correct thinking with emphasis on the detection of fallacies of thought. Three hours. Dr. Beckett and Dr. Brkić.

4 ETHICS Examination of the ideas underlying man's moral behavior to develop an acceptable and coherent theory of conduct. Three hours. Staff.

81 SYMBOLIC LOGIC Newer techniques of logical analysis; discussion of logistic systems; general inquiry into the nature of deductive logic. Prerequisite: one course in philosophy or departmental permission. Three hours. Dr. Beckett.

82 PHILOSOPHY OF SCIENCE Some philosophical problems closely associated with the scientific enterprise: scientific explanation, interpretations of the concept of probability, the justification of induction, causality, space and time, and the relation of science to ethics. Emphasis on current attempts at their solution. Prerequisite: a course in philosophy or a science; sophomore standing. Three hours. Dr. Beckett.
102 Philosophy of Religion A critical analysis of the basic concepts and values which have emerged from man's religious experience. Prerequisite: 1, or religion 1, 2. Three hours. Dr. Hall.

107, 108 History of Philosophy First semester: ancient and medieval philosophy; second semester: modern philosophy. Prerequisite: 1; junior standing. Three hours. Dr. Dykhuizen.

109 Recent American Philosophy The thought of leading contemporary American philosophers. Prerequisite: 1; junior standing. Three hours. Dr. Dykhuizen.

111 19th Century Philosophy Some significant philosophers, such as Schelling, Hegel, Nietzsche, and Kierkegaard. Prerequisite: 1. Three hours. Dr. Hall.

113 Aesthetics An analysis of some principal theories of art and the beautiful as exemplified in music, literature and painting. Prerequisite: 1; junior standing or departmental permission. Three hours. Dr. Hall.

201 Contemporary Philosphic Thought The philosophic ideas of such men as Russell, Dewey and Whitehead, and of such movements as pragmatism, logical empiricism and existentialism. Prerequisite: 1; junior standing. Three hours. Dr. Beckett.

206 Social Philosophy The meanings and values inherent in social life. Prerequisite: 1 or 4; junior standing. Three hours. Dr. Brkić.

214 Intellectual Background of Modern Life Intellectual movements which have influenced the thought and life of today. Prerequisite: senior standing or departmental permission. Three hours. Dr. Dykhuizen.

215 Plato A systematic analysis of the Dialogues of Plato on the following topics: theory of knowledge, ethics and political philosophy, and fine art. Prerequisite: six hours in philosophy or departmental permission. Students concentrating in the classics may be admitted. Three hours. Dr. Brkić.

281, 282 Readings in Philosophy Selected classics in philosophical literature. The choice of classics will be determined according to the interest of students and instructor. Prerequisite: six hours of advanced courses in philosophy or departmental permission. Three hours each semester. Staff.

For economic philosophy, see economics 295 and 296; and for political philosophy, see political science 211, 212.

Religion

1, 2 Religions of the World First semester: Confucianism, Taoism, Hinduism, Buddhism. Second semester: Judaism, Christianity, Islam. Three hours. Dr. Sadler and Mr. Penner.

11 Bible The religious thought of selected writers of the Bible. Prerequisite: sophomore standing. Three hours. Mr. Kahn. Alternate years, 1964-65.

101 Religion and Society A comparative study of the basic types of religious community and religious institution, within various cultural settings. Prerequisite: 1, 2 or sociology 101; sophomore standing. Three hours. Dr. Sadler.
112 RELIGIOUS EXPERIENCE A comparative study of the ways in which the inward dimension of the religious life finds expression. Prerequisite: 1, 2 or sociology 21; sophomore standing. Three hours. Dr. Sadler.

122 MYTH AND RITUAL A critical analysis of the understanding of myth and ritual as religious structures of expression through symbol and act. Emphasis upon modern interpretations of myth and ritual, the relationship between myth and ritual, and their historical patterns. Prerequisite: 1, 2 or sociology 21; sophomore standing. Three hours. Mr. Penner.

201 METHODS OF UNDERSTANDING RELIGION Investigation of some major methodological contributions to the understanding and interpretation of religion since the appearance of the writings of Tylor and Frazer, concluding with an analysis of the contemporary phenomenological movement and its contribution to the methodology of religion. Prerequisite: 1, 2; junior standing. Three hours. Mr. Penner.

205, 206 AREA STUDIES IN RELIGION A study in depth of religion in a particular area of the modern world, for example, the Indian sub-continent, Japan, the Middle East, Latin America. Prerequisite: six hours in religion, or departmental permission. Three hours. Staff.

211 CONTEMPORARY TRENDS Significant modern developments in the world religions. Prerequisite: 1, 2; junior standing. Three hours. Dr. Sadler.

281, 282 PROBLEMS IN THE HISTORY AND PHENOMENOLOGY OF RELIGION Topics of current concern to historians of religions. Prerequisite: 201 and senior standing; or departmental permission. Three hours. Staff.

Physical Education

Associate Professors Evans and Post; Assistant Professors Christensen (Chairman for Men), Clifford, Lapointe, Leggett, Ruffer and Stauff, Strassburg and Wills (Chairman for Women); Instructors Cochran, Coons, Farrell, Grant, Greig, Lambert, Lee, Lemmer, Mays and Stone

For requirements in physical education see page 54.

22 FIRST AID (1-1) Standard and Advanced First Aid Courses of the American Red Cross. Red Cross certificate for successful completion. Open to men and women. One hour credit except in the College of Arts and Sciences. Mr. Grant.

26 WATER SAFETY (2-2) American National Red Cross Water Safety Instructors' Training Course. Red Cross certificate for successful completion. Prerequisite: at least eighteen years of age; hold an active Red Cross Senior Life Saving Certificate. Open to men and women. Two hours credit except in the College of Arts and Sciences.
DANCE TECHNIQUE AND ANALYSIS (1-4)  The history, technique, theory and composition elements of movement as found in dance and the related arts. Training through technique, improvisation, compositional problems and performance. **Prerequisite:** sophomore standing or departmental permission. Open to men and women. Three hours.

For Physical Education Minor courses, see under Department of Education.

MEN

**1-2 FRESHMAN PHYSICAL EDUCATION**  **Prerequisite:** 1 for 2. Two hours weekly. One credit.

**11-12 SOPHOMORE PHYSICAL EDUCATION**  **Prerequisite:** Physical Education for Men 1. Two hours weekly. One credit.

Physical Education I is required of all freshman men and is a course devoted to: the acquisition of knowledge concerning the individual student's specific physical potentials and limitations; the development of an individual physical self-profile through an extensive program of evaluation; and a program of fitness activities. Utilizing the information gained in physical education 1, students are free to elect activities from a diversified, seasonal sports offering based upon their individual needs and interests.

The uniform required in this program consists of T-shirt, shorts, supporter, socks, sweat clothes and white tennis shoes. The T-shirts, shorts and sweat clothes must be obtained at the University Store. The other items of equipment may be purchased there also.

WOMEN

**1-2 FRESHMAN PHYSICAL EDUCATION**  Two hours weekly. One hour.

**11-12 SOPHOMORE PHYSICAL EDUCATION**  Two hours weekly. One hour.

A seasonal sports program with instruction in a variety of individual and dual sports, field sports, court games, swimming activities and dance forms. Emphasis is placed on the role of physical education in everyday living. The program is designed to provide a variety of activities to meet the needs and interests of women. The purposes of the program are: to develop an awareness of the physical self, to provide an opportunity to apply basic movement patterns in new sports and dance activities, and to increase proficiency in activities already learned.

The uniform required consists of regulation shorts and shirt, white rubber-soled tennis shoes, white ankle socks, black leotard and dance tights. All uniforms must be the regulation style and color.
Physics

COLLEGE OF ARTS AND SCIENCES

Professors Crowell (Chairman), Nyborg and Walbridge1 Associate Professor Juenker; Assistant Professors Foley, Krizan, Sachs and Scarfone

5-6 ELEMENTARY PHYSICS (3-2) An introduction to the principles of physics for students not concentrating in physical science or engineering. Mechanics, heat, waves, optics, electricity, magnetism, atomic and nuclear physics. Demonstration lectures coordinated with laboratory work. Prerequisite: secondary school algebra and trigonometry. Four hours. Staff.

14-15 GENERAL PHYSICS (3,3-2) For students concentrating in engineering or a physical science. Mechanics, waves, electricity and magnetism, thermodynamics, and geometric optics. Prerequisite: for physics 14, concurrent enrollment or credit in mathematics 11; for physics 15, 14 and concurrent enrollment or credit in mathematics 12. Three hours. Staff.

16 INTRODUCTORY MODERN PHYSICS (4-2) Physical optics and modern physics. Includes an introduction to the theory of relativity, electron and atomic physics, and the physics of the nucleus and elementary particles. Prerequisite: 15.5 Five hours. Staff.

115 ELECTRICAL CIRCUITS AND MEASUREMENTS (3-2) Principles of AC and DC circuit theory including study of the natures of resistance, capacitance, inductance, vacuum tubes and transistors. Applications are given to electronics and emphasis is on fundamental principles and measurements. Prerequisite: 152; mathematics 21. Four hours. Dr. Sachs.

116 MECHANICS (3-0) Mechanics of a particle, including central forces, forced and coupled vibrations; introductory rigid body motion. Prerequisite: 152; mathematics 21. Three hours. Dr. Walbridge.

173 THERMAL PHYSICS (3-0) Basic concepts of thermodynamics including the characteristic functions, and their application to determination of equi-

1 On leave 1964-65.
2 May be replaced by physics 5-6 with departmental permission.

191, 192 *Senior Research* (0-4, 0-8) The student works on a theoretical or experimental project under direction. Written and oral reports are submitted. 191, two hours; 192, four hours. Staff.

212 *Mechanics and Wave Motion* (3-0) Continuation and developments of the principles and methods of mechanics; integration of fundamental physical principles with mathematics and with the extension of these principles to wave motion. *Prerequisite:* 116; mathematics 212 concurrently. Three hours. Dr. Sachs.

222 *Advanced Biological Physics* (3-2) Sound and electromagnetic waves, the latter including light, micro-waves and x-rays; ionizing particles and radiation. Interaction of these physical agents with biological systems. Physical properties of macromolecules and their aggregates. *Prerequisite:* chemistry 2; mathematics 21; and experience in applying differential equations. Departmental permission required. Four hours. Dr. Nyborg.

225, 226, 227 *Special Topics in Biological Physics* For research students in the field of biological physics. Lectures, reports and directed readings related to the research of the department. *Prerequisite:* 122 or 222, mathematics 21 and departmental permission. Credit as arranged. Dr. Nyborg. Offered as occasion warrants.

231, 232, 233 *Special Topics in Acoustics* For research students in the field of acoustics. Lectures, reports and directed readings on problems of particular interest to the current research of the department. *Prerequisite:* 212 and departmental permission. Credit as arranged. Drs. Nyborg and Sachs. Offered as occasion warrants.

242 *Electromagnetism* (3-2) Fundamental principles of electric and magnetic fields. Electrostatic theory and magnetic fields of steady currents. Electromagnetic energy relationships and introduction to electromagnetic theory. *Prerequisite:* 115; mathematics 211. Four hours. Dr. Crowell.

251, 252, 253 *Special Topics in the Physics of Surfaces* For research students in the field of surface chemistry and physics. Background of particular interest to the current research of the department is presented and discussed. *Prerequisite:* 173, or chemistry 142, mathematics 212 and departmental permission. Credit as arranged. Dr. Crowell. Offered as occasion warrants.

271, 272 *Advanced Modern Physics* (3-2) Background and concepts of relativity, quantum theory, and nuclear physics. Topics selected from relativity, electron physics, atomic structure and spectra, wave mechanics, molecular and solid state physics, x-rays, nuclear physics. *Prerequisite:* 115 and 116 or electrical engineering 110 or chemistry 142 and mathematics 211, 271 for 272. Four hours. Drs. Foley and Juenker.

276 *Solid State Physics* (3-0) Crystal structure and classification of solids. Mechanical, thermal and electromagnetic properties of solids. Free electron

---

1 May be replaced by physics 5-6 with departmental permission.

2 May be taken without laboratory for three hours credit.
model of conductors and band theory. **Prerequisite:** 212, 242, 271; mathematics 212 or 220. Three hours. Dr. Foley. Alternate years, 1965-66.

**301, 302 Mathematical Physics** Required of all graduate students in physics. Introduction to basic mathematical methods of theoretical physics; vector and tensor analysis, partial differential equations, orthogonal functions, complex variables and variational techniques presented with appropriate physical illustrations. **Prerequisite:** 212 and 242, or mathematics 213, 301 for 302. Three hours. Dr. Krizan.

**311 Advanced Dynamics (3-0)** Classical mechanics presented as the basis of the concepts and methods of modern physics. Variational methods. Lagrangian and Hamiltonian formulations, canonical transformations. **Prerequisite:** 212; mathematics 211 and either 220 or 212. Three hours. Dr. Nyborg. Alternate years, 1966-67.

**313 Electromagnetic Theory** Development of Maxwell’s theory of electromagnetism with emphasis on the unity of electric and magnetic phenomena, both in their physical basis and in the mode of mathematical description. Boundary value problems in electrostatics, multipoles, electrostatics of macroscopic media, dielectrics, magnetostatics, time varying fields, Maxwell’s equations, conservation laws, gauge transformations, wave equations, Green’s functions are employed throughout. **Prerequisite:** 242, mathematics 211 and 212 or 220. Three hours. Dr. Scarfone. Alternate years, 1965-66.

**314 Classical Electrodynamics** A continuation of electromagnetic theory. Plane electromagnetic waves, wave guides and resonant cavities, simple radiating systems and diffraction, magnetohydronamics and plasma physics, special theory of relativity, relativistic particle kinematics and dynamics, multipole fields. **Prerequisite:** 313. Three hours. Dr. Scarfone. Alternate years, 1965-66.

**281 through 286 Seminar** Members of the staff and graduate students meet weekly to study contemporary advances in physics and for reports on research being done in the department. One hour. Staff.

**361, 362 Quantum Mechanics** Mathematical and physical foundations of non-relativistic quantum mechanics are presented from the unifying point of view of Dirac which includes the matrix and wave formulations. Applications include the theory of angular momentum, perturbation theory, the theory of radiative transitions and scattering theory. The role of symmetry operations and the essential algebraic structure of quantum mechanics are emphasized. **Prerequisite:** 212, 242, 272, 301 and 302 concurrently, 361 for 362. Three hours. Dr. Scarfone. Alternate years, 1966-67.

**376 Statistical Mechanics** Applications of fundamentals of statistical mechanics to quantum and classical ideal and imperfect gases. Investigations of special topics such as the Ising model, relativistic statistical mechanics, physical
adsorption and phase transitions. Prerequisite: 375 and 361. Three hours. Dr. Krizan.

391 through 394 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

491 through 499 Doctoral Thesis Research Original research under the direction of an assigned staff member, culminating in an acceptable doctoral dissertation. Credit as arranged.

Political Science

College of Arts and Sciences

Professors Babcock, Haugen, G. T. Little and Nuquist (Chairman); Associate Professors Gould, Hilberg and Miles; Assistant Professors Best, Durham, Keene, Meeks, Simon and Wilson; Instructors Berke, Briggs, Eastman and Staron

1, 2 American Government First semester: state and local governments. Second semester: national government. Three hours. Staff.

11, 12 Introduction to Political Science First semester: elements of political science. Second semester: comparative governmental institutions. Students should not elect both 1, 2 and 11, 12. Three hours. Staff.

51, 52 International Relations First semester: imperialism and the emergence of Afro-Asia; World War I and the rise of totalitarianism; World War II and the nuclear threat. Second semester: comparative foreign policy; the state system; international cooperation and conflict. Prerequisite: sophomore standing. Three hours. Mr. Briggs, Dr. Hilberg and Mr. Staron.

61, 62 Local Government First semester: government of counties, towns, and other rural units. Second semester: municipal government. Prerequisite: sophomore standing. Three hours. Dr. Nuquist.

71, 72 European Governments Political and legal ideas, institutions, and processes in the context of national life. First semester: emphasis on the United Kingdom and France. Second semester: emphasis on the U.S.S.R. and Germany. Prerequisite: sophomore standing. Three hours. Mr. Staron.

74 Canada and the Commonwealth Governmental systems in the British Commonwealth and overseas territories, with particular emphasis on Canada and Commonwealth cooperation. Prerequisite: sophomore standing. Three hours. Dr. Haugen. Alternate years, 1965-66.

75 Governments of the Far East Political development and organization of China, Japan, and some other states of Asia. Prerequisite: sophomore standing. Three hours. Mr. Briggs. Alternate years, 1965-66.

2 Sabbatical leave second semester 1964-65.
3 Sabbatical leave 1964-65.
76 Governments of Latin America Analysis of the formal and informal political structure of the Latin American states with emphasis upon contemporary developments. Prerequisite: sophomore standing. Three hours. Dr. Gould. Alternate years, 1966-67.

191, 192 Honors or Special Readings For undergraduates only. Three hours. Staff.

211, 212 Political Theory First semester: development of political theory. Second semester: recent political theory. Prerequisite: 1, 2 or 11, 12; one other course or one sophomore course in social science; senior standing. Three hours. Dr. Babcock and Mr. Staron.

216 American Political Thought American political thought from the colonial period to recent times. Prerequisite: 1, 2 or 11, 12 and one other course or economics 11-12 or history 23, 24; junior standing. Three hours. Mr. Simon.

221, 222 Constitutional Law First semester: historical and analytic study of judicial review, federalism, the taxing power, the commerce power, the suffrage. Second semester: historical and analytic study of the war power, the executive power, due process of law, citizenship, Bill of Rights, equal protection of the laws. Prerequisite: 1, 2 or 11, 12; one other course, or economics 11-12 or history 23, 24; junior standing. Three hours. Dr. Gould.

226 Administrative Law A study of judicial decisions affecting the actions of public officials as they relate to the functions and policies of government. Prerequisite: 221 or 241 or 263. Three hours. Dr. Nuquist.

227 International Law Principles and applications of public international law. Prerequisite: 51; one other year course in social science; junior standing. Three hours. Dr. Durham. Alternate years, 1966-67.

231 The Legislative Process Congressional and parliamentary organization and procedure. Prerequisite: 11, 12 or 1, 2; one other course or one sophomore course in social science; junior standing. Three hours. Dr. Haugen. Alternate years, 1965-66.

232 Lawmaking and Public Policy Influence of the executive and problems of congressional and parliamentary control. Prerequisite: 1, 2 or 11, 12; one other course or one sophomore course in social science; junior standing. Three hours. Dr. Haugen. Alternate years, 1965-66.

241 Public Administration Introduction to the role of administration in government, theories of administrative organization and their application, the basic functions of administrative management, and problems of democratic control. Prerequisite: 1, 2 or 11, 12; one other course or one sophomore course in social science; junior standing. Three hours. Dr. Nuquist and Dr. Wilson.

242 Administrative Procedures Prerequisite: 241 or 263. Three hours. Dr. Wilson.

251, 252 American Foreign Policy First semester: constitutional principles, institutional factors, and historic traditions in the formation of foreign
policy. Second semester: contemporary policies toward specified countries. Prerequisite: 11 and 12, or 2 and 51; junior standing. Three hours. Dr. Hilberg.

253-254 WORLD POLITICS Analysis of the foreign policies of countries other than the United States; selected problems in Europe, Latin America, and the Pacific Area. Prerequisite: 51, 52; junior standing. Three hours. Dr. Keene. Alternate years, 1965-66.

256 INTERNATIONAL ADMINISTRATION Theory and practice in international agencies. Prerequisite: 51, 52; junior standing. Three hours. Dr. Durham. Alternate years, 1966-67.

257 POLITICAL GEOGRAPHY The characteristics of the political unit as a geographic area; location, resources, and the distributional relationships of the variety of cultural or human factors as they have a bearing on the structure and functioning of the modern political unit; the relationship between geopolitics and political geography. Prerequisite: twelve hours in geography, history, and political science, or departmental permission. Three hours. Dr. Miles.

258 PROBLEMS OF COMMUNISM. Three hours. Dr. Dellin. See economics 258.

263 STATE GOVERNMENT Processes of basic policy formulation and popular control, the nation-wide effort to improve governmental systems, the theoretical basis of reform movements, and trends in the treatment of governmental problems. Prerequisite: 1, 2 or 11, 12; one other course or one sophomore course in social science; junior standing. Three hours. Dr. Haugen.

264 STATE ADMINISTRATION The effect of expansion in state activity, problems in policy determination, the responsibility and accountability of officers and agencies, the organization and maintenance of central services and controls, and the impact of study and investigation by legislative committees, interim commissions, councils, and citizens groups. Prerequisite: 263 or 241. Three hours. Dr. Wilson.

265, 266 INTERGOVERNMENTAL RELATIONS First semester: problems of the federal system. Second semester: national-state-local cooperative administration of selected public functions. Prerequisite: 1, 2 or 11, 12; one other course or one sophomore course in social science; junior standing. Three hours. Dr. Haugen. Alternate years, 1966-67.

271, 272 POLITICAL PARTIES AND PRESSURE GROUPS First semester: political parties. Second semester: citizen participation and interest groups. Prerequisite: 1, 2 or 11, 12; one other course or one sophomore course in social science; junior standing. Three hours. Mr. Best.

278 FOREIGN POLICY OF THE U.S.S.R. Three hours. Dr. Daniels. See history 278.

279 COMPARATIVE PUBLIC ADMINISTRATION Universal applicability of basic administrative concepts evident in the administrative systems and environments in selected countries in Europe, the Commonwealth, and elsewhere; prob-
lems and developments in established and in emergent countries. **Prerequisite:** 241. Dr. Wilson.

281, 282 **SEMINAR** Popular government and other selected topics; for senior and graduate students. **Prerequisite:** departmental permission. Three hours. Staff.

291 through 294 **READING AND RESEARCH** For advanced undergraduates and graduate students. Three hours. Staff.

391 through 394 **MASTER'S THESIS RESEARCH** Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

---

Poultry Science

**COLLEGE OF AGRICULTURE AND HOME ECONOMICS**

*Associate Professors Donovan (Chairman) and Henderson*

1 **GENERAL POULTRY SCIENCE** (2-2) Principles of poultry science and their application to the poultry industry. Three hours. Mr. Henderson.

58 **INTRODUCTORY AVIAN BIOLOGY** (2-2) The evolution and biology of birds. Includes development from physiological and morphological viewpoints, the endocrinology and physiology of reproduction, social behavior and mechanics of flight. Designed for students with a general interest in biology. Three hours. Dr. Donovan and Mr. Henderson.

102 **INCUBATION AND BROODING** (2-4) General biology of embryonic development and hatchability; fundamental principles underlying incubation practices; theory and practice of brooding chicks and other poultry. **Prerequisite:** 1; junior standing and departmental permission. Four hours. Mr. Henderson.

103 **PROCESSING AND PACKAGING POULTRY PRODUCTS** (2-2) Principles of marketing of eggs and poultry meat; candling, grading, and packing eggs; preparation of poultry for market. A one-week inspection trip to the Boston market for which there is a charge of $30.00. **Prerequisite:** junior standing. Three hours. Mr. Henderson. Alternate years, 1966-67.

190 **POULTRY TECHNOLOGY** Principles of poultry feeding, breeding, and management. Three hours. Staff. Alternate years, 1965-66.

197, 198 **SENIOR RESEARCH** Work on a research problem under the direction of a qualified staff member. Findings submitted in written form as prescribed by the department. **Prerequisite:** senior standing. Three hours. Staff.

281 through 284 **SEMINAR** Current developments and literature. Required of all poultry seniors. **Prerequisite:** 1. One hour. Staff.

391 through 399 **MASTER'S THESIS RESEARCH** Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.
Psychology

COLLEGE OF ARTS AND SCIENCES

Professors Ansbacher, Chaplin and Forgays (Chairman); Associate Professor Slamecka; Assistant Professors Ghei, Patterson and Perrine; Instructor Huber

1 GENERAL PSYCHOLOGY Introduction to the entire field, emphasizing the normal adult human being. Three hours. Staff.

2 LABORATORY IN GENERAL PSYCHOLOGY Experiments and laboratory exercises in individual differences, sensation, perception, learning, motivation, emotion, and personality. To be taken concurrently with 1; recommended to students who plan to concentrate in psychology. Enrollment limited. One hour. I, II. Staff.

5 PSYCHOLOGICAL STATISTICS An introduction to statistical technique and research design pertinent to the behavioral scientist. Topics covered include certain descriptive statistics and certain parametric and non-parametric hypothesis-testing statistics. A calculation laboratory is provided. Prerequisite: 1. Three hours. Dr. Ghei.

21 SOCIAL PSYCHOLOGY A psychological approach to social phenomena with emphasis on the concepts and methods used in the study of the behavior of individuals in various social situations. Topics include: the nature, formation, and change of attitudes and norms; group dynamics; leadership; conformity; group conflict and social change; social movements; and language, symbols, and communication. Prerequisite: 1. Three hours. Dr. Perrine.

105 CHILD PSYCHOLOGY Development of the individual from birth to adolescence. Prerequisite: 1. Three hours. Staff.

106 PERSONALITY The individual and life problems from the field-theoretical and phenomenological approach with emphasis on Alfred Adler's viewpoint. Prerequisite: 1; sophomore standing. Three hours. Dr. Ansbacher.

108 ABNORMAL PSYCHOLOGY The more unusual mental processes; methods of observing and interpreting them; their bearing on our understanding of the normal mind. Prerequisite: 1, sophomore standing. Three hours. Dr. Ghei.

109-110 EXPERIMENTAL PSYCHOLOGY (2-4) General knowledge and appreciation of the scientific method in psychology. The student will design, conduct, and interpret the results of experiments in several different areas. Prerequisite: 5. Four hours. Dr. Slamecka.

122 PHYSIOLOGICAL PSYCHOLOGY Relationships between psychological processes and the functions of the nervous system and endocrine glands. Laboratory experiences will be provided and students may undertake original experiments. Prerequisite: 1; sophomore standing. Three hours. Dr. Patterson.

1 On leave 1964-65.
123 **SYSTEMATIC PSYCHOLOGY** A comparative study of the leading contemporary schools of psychological thought. *Prerequisite:* 1; sophomore standing. Three hours. Dr. Chaplin.

225-226 **PSYCHOLOGICAL TESTS (2-2)** Survey of important clinical tests of ability and personality; training in the administration of individual intelligence tests. *Prerequisite:* 110. Three hours. Dr. Ansbacher.

230 **LEARNING** The basic laws of the learning process as revealed by controlled experiments; with emphasis upon specific phenomena and the variables which govern them. Laboratory experiences are provided and students may undertake original experiments. *Prerequisite:* 110. Three hours. Dr. Slamecka.

231 **PERCEPTION** Experimental and theoretical study of the perceptual processes. Traditional problems of space, form and movement perception and consideration of the role of social and motivational factors. Laboratory experiences are provided and students may undertake original experiments. *Prerequisite:* 110. Three hours. Dr. Perrine.

232 **EXPERIMENTAL SOCIAL PSYCHOLOGY (2-2)** A laboratory course in the experimental methods and techniques typically used in social psychological research. Topics include attitude formation and change, conformity, motivation, prejudice, rumor, social perception, and suggestion. Techniques used in attitude measurement and public opinion surveys will also be examined and applied. Laboratory experiences are provided and students may undertake original experiments. *Prerequisite:* 110. Three hours. Dr. Perrine.

234 **MOTIVATION AND EMOTION** The nature and development of motives, emotions and their relation to other psychological processes. *Prerequisite:* 110. Three hours. Dr. Chaplin.

281-282 **SEMINAR** Review and discussion of current psychological research. Required of graduate students and seniors concentrating in psychology. *Prerequisite:* 110, 123. One hour. Staff.

381-382 **ADVANCED READINGS** Readings, with conferences, to provide those working for the M.A. degree with the background for, and specialized knowledge relating to, their research. Credit as arranged. Staff.

391 through 394 **MASTER'S THESIS RESEARCH** Investigations of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.
French
1-2 ELEMENTARY FRENCH The fundamentals of French, with emphasis on the spoken form through pattern drills, use of tapes, and study of the basic grammatical structure of the language. For those who present less than two years of high school French. Credit is given only if Intermediate French is also completed. Four hours. Mr. Fletcher and others.

11-12 INTERMEDIATE FRENCH Re-enforcement and advancement of the four basic language skills, speaking, comprehension, reading and writing, through pattern drills in electronic laboratory, structured discussion in class of cultural and literary texts, and composition on assigned topics. Conducted chiefly in French. Prerequisite: 2 or two years of high school French. Three hours. Dr. Julow and others.

101-102 FRENCH LITERATURE: 19TH CENTURY Outstanding authors of the romantic, realistic, and naturalistic schools. This course is prerequisite for all other courses in French literature. Prerequisite: 12. Three hours. Drs. Daggett, Johnston and Julow.

121-122 COMPOSITION AND CONVERSATION Development of skills in conversation, composition and comprehension through systematic review of phonology and grammatical structure. Intensive discussions of selected literary texts. Written compositions required regularly. Required of those who wish to be recommended to teach French. Prerequisite: good standing in 11-12. Three hours. Mr. Heller and others.

203, 204 FRENCH LITERATURE: 20TH CENTURY Principal movements from 1900 to the present, with emphasis on outstanding works in the novel, drama, and poetry. Prerequisite: 102, 203 for 204. Three hours. Dr. Johnston.

211 FRENCH LITERATURE: 18TH CENTURY Main currents of the literature of the century with emphasis on Montesquieu, Diderot, Voltaire, and Rousseau. Lesage, Marivaux, and Beaumarchais will be studied in the drama. Prerequisite: 102. Three hours. Dr. Johnston. Alternate years, 1965-66.

213 FRENCH LITERATURE: 17TH CENTURY Selected works of the century with emphasis on Corneille, Racine, and Molière. Prerequisite: 102. Three hours. Dr. Julow. Alternate years, 1966-67.

216 FRENCH LITERATURE: 16TH CENTURY Selected works of the period with emphasis on Rabelais, Montaigne and the Pleiade. Prerequisite: 102. Three hours. Dr. Dennis. Alternate years, 1966-67.

1 On leave first semester 1964-65.
217 Special Studies on French Literature  Selected authors and themes, representative of French thought and literary merit. Three hours. Dr. Johnston. Alternate years, 1965-66.

223-224 Advanced Composition and Conversation  Translation into French of difficult English prose, free composition, and discussion of questions of style. Advanced conversation. Required of those who wish to be recommended to teach French. Prerequisite: 122. Three hours. Dr. Daggett and Mr. Las-coumes.

227, 228 Linguistic Structure of French  An analysis of present day French, with emphasis on phonetics, phonemics, morphology, and syntax of the language. Considerable language laboratory practice is expected. Required for all who seek certification for teaching. Prerequisite: 122 and junior standing; 227 for 228. Three hours. Dr. Dennis.

281-282 Senior Seminar  Special readings and research. Required of all senior concentrators. One hour. Staff.

381, 382 Graduate Seminar  Offered for resident candidates for the Master of Arts degree; opportunities for independent work are provided. Three hours. Staff.

391 through 394 Master's Thesis Research  Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

Italian

1-2 Elementary Italian  Study of basic grammar through learning of dialogues, pattern drills in class and in electronic laboratory; reading. Credit for 1-2 granted only if language requirement already satisfied in some other language. Three hours. Dr. Julow.

11-12 Intermediate Italian  Conversation, grammar reviews, and readings in modern Italian. The spoken language is stressed. Prerequisite: 2 or its equivalent. Three hours. Dr. Johnston.

Spanish

1-2 Elementary Spanish  The fundamentals of Spanish, with emphasis on the spoken form through pattern drills, use of tapes, and study of the basic grammatical structure of the language. For those who present less than two years of high school Spanish. Credit is given only if Intermediate Spanish is also completed. Four hours. Mr. Ugalde and others.

11-12 Intermediate Spanish  Review of the fundamentals of grammar. Readings from selected authors. Conducted chiefly in Spanish. Prerequisite: 2 or two years of high school Spanish. Three hours. Mr. Weiger and others.

101 Spanish Literature: 19th Century  Principal literary currents of the 19th Century, from Romanticism to the “Generation of 1898”. Representative readings from the poetry, drama, and novel of the period. Prerequisite: 12 or departmental permission. Three hours. Mr. Ugalde.
102 **Spanish Literature: 20th Century** Origins and main aspects of the intellectual conflicts in modern Spain, as reflected in the literary works from the “Generation of 1898” to the present. *Prerequisite*: 101. Three hours. Mr. Ugalde.

201 **Spanish Syntax** Theory of grammar and analysis of the structure of the language. Recommended for those who plan to teach Spanish. *Prerequisite*: 121-122. Three hours.

202 **Medieval Spanish Literature** Outstanding works from *El cantar de Mio Cid* to *La Celestina*. *Prerequisite*: 102 or 106. Three hours.

213 **Spanish Literature: Golden Age** Selected readings from the novel, poetry, drama of the 16th and 17th centuries. *Prerequisite*: 122 or 106. Three hours. Mr. Weiger.

214 **Spanish Literature: Cervantes** *Los entremeses, las novelas ejemplares, Don Quijote*. *Prerequisite*: 102 or 106. Three hours. Mr. Weiger.

223-224 **Advanced Composition and Conversation** Composition, conversation, stylistics, panel discussions, translation into Spanish of difficult English prose. Required of those who wish to be recommended to teach Spanish. *Prerequisite*: 122. Three hours. Mr. Ugalde.

281-282 **Senior Seminar** Special readings and research. Required of all senior concentrators. One hour. Mr. Ugalde and Mr. Weiger.
Russian

Assistant Professor Paganuzzi

1-2 ELEMENTARY RUSSIAN Spoken and written Russian. Training in modern Russian, designed to help the student gain assurance in self-expression in the language. Practice in pronunciation and aural comprehension in class and through tape recordings. Credit is given only if Intermediate Russian is also completed. Four hours.

11-12 INTERMEDIATE RUSSIAN Rapid and systematic review of basic Russian. Increased stress on pronunciation, conversation, and reading. Readings in works by Puskin, Lermontov, Tolstoi, Chekov, and others. Prerequisite: 1-2. Three hours.

101-102 INTRODUCTION TO RUSSIAN LITERATURE Reading and discussion of selected classic and contemporary works of Russian literature. Practice in hearing, writing, and speaking Russian. Prerequisite: 11-12. Three hours.

103-104 ADVANCED RUSSIAN Guided conversation, discussion, and advanced oral and written drill in Russian. Lectures, readings, and reports on works by classic and modern Russian writers. Prerequisite: 101-102. Three hours.

Sociology and Anthropology

Professor Oren¹ (Chairman); Associate Professor Lewis; Assistant Professors Gulyas, Johnson, Maher and Scheans

21 THE CULTURES OF MAN The culture concept; its use in perceiving and understanding behavioral regularity and the diversity of social systems. The life-ways of non-Western societies of varying social complexity. Prerequisite: sophomore standing. Three hours. I, II. Staff.

41 SOCIAL PROBLEMS A comparative analysis of conflicts and problems in modern American society focusing upon the sources of undesirable behavior in institutional conflict: this is an inquiry into the world of the outcast. It examines the recruitment and training of outcasts and how they manage their relations with "insiders". Prerequisite: 21. Three hours. Dr. Gulyas.

51 THE FAMILY A cross-cultural approach to the study of the family as a social institution: the American family institution; nature of the changes it is undergoing, problems generated by these changes. Prerequisite: 21. Three hours. Dr. Lewis.

¹ On leave 1965-66.
54 MINORITY GROUPS Patterns of dominance and submission among groups of differing "racial" and ethnic designation in modern societies and in "underdeveloped" areas. Prerequisite: 21. Three hours. Dr. Oren.

61 PEOPLES OF THE AMERICAS AND AFRICA A general ethnographic survey of representative Amerindian and African cultures. Emphasis is placed on the social, political, economic and religious institutions of selected societies of all major culture areas. Prerequisite: 21. Three hours. Dr. Johnson.

63 PEOPLES OF ASIA AND OCEANIA A general ethnographic survey of contemporary culture types in Southeast Asia, Polynesia, Micronesia, Melanesia and Australia. Consideration is given to the traditional cultures of these areas and their place in the modern world. Prerequisite: 21. Three hours. Dr. Scheans.

83 APPLIED ANTHROPOLOGY A descriptive and analytical presentation of the place of anthropology in the modern world. Study of the human problems resulting from attempts to direct cultural change in subindustrial societies. Prerequisite: 21. Three hours. Dr. Johnson.

101 SOCIOLOGICAL ANALYSIS Major conceptual tools of sociology; approaches to their use in the analysis of contemporary social processes. Prerequisite: 21 or junior standing. Three hours. I, II. Staff.

205 SMALL GROUP DYNAMICS Analysis of processes and problems in interaction at the level of the social microcosm; implications for the understanding of large-scale social organization. Prerequisite: nine hours of sociology, including 101. Three hours. Dr. Oren.

210 POPULATION ANALYSIS The demographic and ecological analysis of societies; particular reference to contemporary world problems. Prerequisite: nine hours of sociology, including 101. Three hours. Mr. Maher.

212 THE COMMUNITY Analysis of the structure and function of communities as social systems with emphasis on American communities. Ecology, social class and power structure, and social change within the community context; procedures for sociological study of communities. Prerequisite: nine hours of sociology, including 101. Three hours. Dr. Lewis.

214 PUBLIC OPINION Analysis of attitude formation and the bases in social structure of differing tendencies toward collective behavior; implications for the analysis of political institutions. Prerequisite: nine hours of sociology, including 101. Three hours. Mr. Maher.

221 CULTURE AND PERSONALITY Relationship of socialization to the sociocultural milieu; the cross-cultural comparison of personality development; the problem of delineating modal personality types; variations in child-rearing situations according to "social class" in contemporary Western Civilization. Prerequisite: nine hours of sociology, including 101, and psychology 1. Three hours. Dr. Oren.

225 CULTURAL CHANGE The data and theories of sociocultural dynamics: invention, diffusion, acculturation, social mobility, revolution; theories of progress, cycles, cultural evolution, and devolution. Prerequisite: nine hours of sociology, including 101. Three hours. Dr. Scheans.
228 SOCIAL ANTHROPOLOGY Evaluation of the comparative method in anthropology; its use in the formation of generalizations concerning the nature of society. Prerequisite: nine hours of sociology, including 101. Three hours. Dr. Scheans.

251 SOCIAL RESEARCH METHODS The logic and techniques of sociological inquiry. Prerequisite: twelve hours of sociology, and departmental permission. Three hours. Staff.

282 SEMINAR Readings in current sociological literature to acquaint advanced students with contemporary issues in sociology. Prerequisite: twelve hours of sociology, senior standing, and departmental permission. Three hours. Staff.

NOTE: For Introduction to Social Work, formerly Sociology 72, see Home Economics 170.

Speech

COLLEGE OF ARTS AND SCIENCES

Professors Huber (Chairman), Lewis and Luse; Assistant Professors B. Carr, R. Carr, Feidner, London and Willis; Instructors Ackley and Ellenwood.

1 BASIC SPEECH Elements of speech and phonetics for the improvement of voice and articulation in communication. Class exercises and performance. Three hours. I, II. Staff.

3 PARLIAMENTARY PROCEDURE Study and practice in the fundamentals of conducting a meeting. The class meets twice a week with one hour of outside preparation. Prerequisite: sophomore standing. One hour. Dr. Huber.

11 PUBLIC SPEAKING Preliminary analysis, gathering material, organization and delivery of speeches; use of visual aids and speech to inform. Two-thirds of the time devoted to student performance. Three hours. I, II. Staff.

12 ARGUMENTATION Inductive, deductive, casual, and reasoning from analogy as applied to the speaking situation; designed to develop through performance skill in logical expression of thought. Prerequisite: 11. Three hours. I, II. Dr. Huber.

14 GROUP DISCUSSION Methods of procedure in committees, round table discussions, lecture forums, symposiums, panels, and other types of discussion; designed to develop through performance skill in the thought processes involved in discussion leadership. Prerequisite: 11. Three hours. Dr. London and Mr. R. Carr.

31 ORAL INTERPRETATION OF LITERATURE Principles and techniques of oral interpretation of literature; analysis and appreciation of poetry, prose and drama through the development of ability in communicating the logical, emo-
tional and aesthetic values of literature to an audience. **Prerequisite:** 1. Three hours. I, II. Drs. Huber, London, Luse, Willis, and Mr. Feidner.

**41 ACTING** Fundamentals of acting, including improvisation, character analysis, and styles of acting. Performance in short classroom acting projects required. **Prerequisite:** sophomore standing. Three hours. I, II. Mr. Feidner.

**61 INTRODUCTION TO BROADCASTING** Radio and television broadcasting: development, structure, and use. Laboratory in speaking for broadcast and in operation of equipment. **Prerequisite:** 1. Three hours. Dr. Lewis.

**74 INTRODUCTION TO SPEECH CORRECTION** The causes, symptoms and treatment of speech disorders. One-third devoted to articulatory problems of children. Observation of children's therapy in the Speech Clinic. **Prerequisite:** 1; sophomore standing. Three hours. Mr. Ellenwood.

**111 PERSUASION** Human motivation, attitudes and how to change them; emotion, stereotypes, attention, and audience psychology; training in their use through student performance. **Prerequisite:** six hours, including 11. Three hours. Dr. Huber.

**116 SPEECH COMPOSITION** Study of speech style and rhetorical criticism by analysis of great speeches and by writing longer speeches. **Prerequisite:** six hours, including 11. Three hours. Dr. Huber. Alternate years, 1966-67.

**141 ACTING** Acting for those who have demonstrated some ability in speech 41. Periods and styles of acting, intensive character analysis, frequent acting projects, including at least one public performance. **Prerequisite:** 41 and departmental permission. Three hours. Mr. Feidner. Alternate years, 1966-67.

**142 PLAY DIRECTING** Lecture-laboratory in the problems and techniques of directing plays: staging, script analysis, production techniques, and rehearsal techniques. **Prerequisite:** six hours, including 41 or departmental permission. Three hours. Mr. Feidner. Alternate years, 1965-66.

**145, 146 DEVELOPMENT OF WESTERN THEATRE** History of the theatre and drama in western civilization from the earliest rituals to the contemporary theatre. Plays from all major periods are read and discussed. **Prerequisite:** junior standing; English 25, 26 or 27, 28. Three hours. Mr. Willis. Alternate years, 1966-67.

**151 STAGECRAFT AND LIGHTING** Lecture and laboratory in the physical elements of play production; analysis of theatre forms, study and application of basic elements of scenery construction and stage lighting. Three hours. Mr. Ackley.

**161 RADIO AND TELEVISION BROADCASTING** The social, psychological, historical, educational, and technical aspects of radio and television with laboratory work in announcing, interviewing, and production of various types of programs. **Prerequisite:** 61. Three hours. Dr. Lewis.

**162 WRITING FOR RADIO AND TELEVISION** Principles and techniques of writing for radio and television; adaptations, documentaries, and dramatic scripts. **Prerequisite:** 61. Three hours. Dr. Lewis.
163 Broadcast Materials A comprehensive survey and analysis of the style and content of all types of broadcast materials including selected critical and research works. Extensive use is made of source materials such as recordings, tapes, films and kinescopes. Prerequisite: 161. Three hours. Dr. Lewis.

197, 198 Honors or Special Readings For undergraduates only. Three hours. Staff.

201 Phonetics Analysis of English speech sounds used in the International Phonetic Alphabet. Application to standards of English pronunciation in the United States and to foreign dialects. Prerequisite: junior standing and nine hours of speech; or English 25, 26 or 27, 28; or a foreign language through the intermediate level. Three hours. Dr. Luse.

201 General Semantics The theory of communication, both verbal and non-verbal, with emphasis upon the factors of interpersonal and intrapersonal communication breakdowns. Prerequisite: six hours of speech. Three hours.

254 Scene Design Lecture and laboratory. Analysis of the drama from the standpoint of its visual creation upon the stage; audience-stage relationships, styles of production. Prerequisite: 151. Three hours. Mr. Ackley. Alternate years, 1965-66.

271 Speech Pathology I The etiology, symptoms, and principles of habilitation for voice disorders, cleft palate; historical aspects of stuttering; problems of foreign accent. Observation and practicum required. Prerequisite: twelve hours of speech and psychology, including speech 74. Three hours. Dr. Luse.

272 Speech Pathology II The etiology, symptoms, and treatment of retardation of speech, including congenital aphasia, aphasia in adults, and cerebral palsy. Observation and practicum required. Prerequisite: twelve hours of speech and psychology, including speech 74. Three hours. Dr. Carr.

273 Principles of Audiology Anatomy and physiology of the ear; history of audiometry; diagnostic hearing tests. Prerequisite: twelve hours of speech and psychology, including 74. Dr. Vilma Falck. (Offered 1965-66.)

274 Speech Reading and Auditory Training Principles of teaching speech, reading, and auditory training to the hard of hearing. Prerequisite: 273. Dr. Carr.

275, 276 Clinical Study Observation and practice in diagnosis and therapy of speech disorders. Prerequisite: 74 and 271 or 272 and departmental permission. One or two hours. (May be repeated up to five credit hours.) Mr. Ellenwood.

281 Voice Science The anatomical, physiological, and physical factors of speech. Prerequisite: twelve hours of speech and psychology. Three hours. Dr. Luse.

283 Clinical Audiology Advanced audiological testing and clinical procedures. Prerequisite: 273. Three hours. Dr. Falck.
294 **SEMINAR FOR PROSPECTIVE TEACHERS OF SPEECH**  The resources, procedures and methods utilized in teaching the different areas of speech at the various instructional levels. *Prerequisite*: twelve hours, including 1 and 11. Three hours. Dr. London.

385 **SEMINAR IN VOICE**  Study of the research in voice production and speech. Application to pathological and non-pathological problems. *Prerequisite*: 271, 272. Three hours. Dr. Luse.

386 **SEMINAR IN CEREBRAL PALSY**  Study of the pathology, etiology, methods in diagnosis, and the rehabilitative procedures used with the various types of cerebral palsy. *Prerequisite*: 271, 272. Three hours. Dr. Luse.

387 **SEMINAR IN LANGUAGE DISORDERS**  Study of the different types of language disorders, examination procedures, and methods of rehabilitation. *Prerequisite*: 271, 272. Three hours.

388 **SEMINAR IN STUTTERING**  Study of the research in stuttering relative to etiology and rehabilitation. *Prerequisite*: 271, 272. Three hours. Dr. Carr.

396 through 399 **MASTER’S THESIS RESEARCH**  Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

---

World Problems

-College of Arts and Sciences-

101, 102 **WORLD PROBLEMS**  A different major issue of particular importance to men and women in the modern world will be presented, each semester, by various instructors from the humanities, the sciences, and the applied arts. Language and communication, evolutionary thinking, and problems of education are examples of topics recently studied. Lectures, discussion, readings and reports. Not counted toward concentration requirements. *Prerequisite*: senior standing or permission of the director. Three hours.

---

Zoology

-College of Arts and Sciences-

*Professors Bond, Lochhead and Moody; Associate Professors Bell, Glade (Chairman), Potash and Torch; Assistant Professors Chipman and Rothstein; Instructor Keser*

1 **INTRODUCTION TO ZOOLOGY (3-3)**  Fundamental life processes of animals, particularly at the cellular level, to give the general student an appreciation of these processes, and the science student a background for further study

\[1\] Sabbatical leave second semester 1964-65.
in zoology. Prerequisite: a course in high school chemistry is strongly recommended. Four hours. I and II. Dr. Torch and staff.

2 Principles of Evolution (3-2) Biological principles connected with the development of life on earth; evidences that evolution occurs. Prerequisite: 1. Four hours. Dr. Bell and staff.

5-6 Mammalian Anatomy and Physiology (2-2) Structure and function of the mammalian body, with special reference to man. Dissection, primarily of the cat; physiological experiments; microscopic study of tissues. Required of students in the Nursing and Dental Hygiene curricula, elective to others. Three hours. Dr. Chipman.

21 Organic Evolution A nonlaboratory course on the theory of evolution. For material covered see description of 2. A student may not receive credit for both 2 and 21. Prerequisite: sophomore standing. Three hours. Dr. Moody.

41, 42 Comparative Vertebrate Anatomy (2-4) Survey of Phylum Chordata; outline of basic vertebrate body plan; functional anatomy and phy­logeny of the organ systems of vertebrates, beginning with an agnathan and concluding with a mammal. Prerequisite: 1; 41 for 42. Four hours. Dr. Bond.

52 Physiology Chemical and mechanical fundamentals of animal physiology, with special reference to man. Prerequisite: 1, junior standing; some knowledge of chemistry. Three hours. Dr. Lochhead.

104 Animal Ecology (2-4) Relationships between animals and their environments; dynamics of animal populations; aspects of wildlife conservation. Prerequisite: 1, and an additional semester of zoology or botany; inorganic chemistry. Four hours. Dr. Potash.

108 General Entomology (2-4) Study of insects; morphology, physiology, and evolution. Prerequisite: 1, and 2 or 41. Four hours. I. Dr. Potash.

109 Field Zoology (2-4) Collection and identification of animals; study of local habitats, their nature, and the adaptations of animals to them; factors governing distribution of animals; methods of collecting and preparing study specimens. Prerequisite: 1, and an additional semester of zoology or botany. Four hours. Dr. Bell.

111 Embryology (2-4) General principles of development exemplified by typical invertebrate and vertebrate embryos. Prerequisite: 41, junior standing. Four hours. Dr. Glade.

112 Comparative Histology (2-4) Microscopic anatomy of invertebrate and vertebrate tissues. Basic tissue similarities and specializations in relation to function. Prerequisite: 41, junior standing. Four hours. Dr. Glade. Alternate years, 1966-67.

2 May be taken for credit in the College of Arts and Sciences but does not satisfy the requirement of a course in laboratory science for students concentrating in nonscience fields, nor the requirement of a course in biology for premedical and predental students. Students will not receive credit for both this course and zoology 42.
115 Heredity Principles of inheritance and their physical basis. Prerequisite: junior standing and two semesters of courses selected from botany, psychology, and zoology. Three hours. Dr. Moody.

150 Invertebrate Zoology (2-4) Anatomy, physiology, and life histories of representatives of the more important invertebrate phyla. Required of all students concentrating in zoology. Prerequisite: 1, and 41 or 108; junior standing. Four hours. I. Dr. Lochhead.

202 Advanced Comparative Anatomy (2-4) Special topics in vertebrate anatomy, with emphasis on evolutionary changes in form and function of selected structures. Laboratory devoted to individual dissection projects. Seminars for student reports. Prerequisite: 42, 111, and departmental permission. Four hours. Dr. Bond. Alternate years, 1966-67.

207 Vertebrates (2-4) Classification, ecology, behavior, evolution, and distribution of vertebrates other than birds. Prerequisite: 42, either 2 or 21, and a course in zoology numbered above 100. Four hours. Dr. Bell.

212 Avian Biology Anatomy, physiology, behavior, ecology, and evolution of birds. Topics include aerodynamics of flight, navigation, migration, courtship and nesting, habitats and food habits, territoriality, and ontogenetic and phylogenetic relationships. Laboratory study and field work in identification of birds by both sight and sound. Prerequisite: 42, a course in zoology numbered above 100, and departmental permission. Four hours. Alternate years, 1966-67. Dr. Bond.

216 Human Genetics Principles of human inheritance; population genetics; interaction of heredity and environment; application of principles of heredity to human problems on both individual and social levels. Prerequisite: 115 or botany 255. Three hours. Dr. Moody.

220 Protozoology (2-4) Recognition, morphology, reproduction and physiology of the more important taxonomic groups of the Protozoa. Prerequisite: a course in zoology numbered above 100, and inorganic chemistry. Four hours. Dr. Torch.

222 Experimental Embryology (2-6) Theoretical approach to major problems of development based on modern research in embryology, genetics, physiology, bacteriology, and related fields. Prerequisite: 111 and departmental permission. Four hours. Dr. Glade. Alternate years, 1965-66.

231 Cell Physiology (2-4) Study of cell function, with emphasis upon experimental techniques used to elucidate chemical and physical mechanisms within living cells. Prerequisite: a course in zoology numbered above 100; chemistry 131, 132, and departmental permission. Four hours. Dr. Rothstein.

236 Fresh-Water Biology (2-4) Organisms of lakes, ponds and streams; their adaptations to varying physical, chemical and biotic conditions. Prereq-
unisite: a course in zoology numbered above 100, and inorganic chemistry. Four hours. Dr. Potash.

241 Cell Structure Current concepts of cellular anatomy and reproduction as revealed by recent developments in microscopy. Cytological techniques stressed in the laboratory. Prerequisite: a course in zoology numbered above 100; chemistry 131, 132. Four hours. Dr. Torch.

251 Invertebrate Feeding Mechanisms Survey of a wide variety of invertebrates with emphasis on the mechanisms, often complex, by which they obtain their food. Prerequisite: a course in zoology numbered above 100. Four hours. Alternate years, 1966-67. Dr. Lochhead.

255 Comparative Animal Physiology (2-6) General principles of function in invertebrates and vertebrates. Prerequisite: 104 or 150 or 236 and departmental permission; chemistry 131, 132. Four hours. II. Dr. Rothstein.

267 Genetics of Development (2-4) Problems of differentiation and morphogenesis approached from the viewpoint of gene action and biosynthesis; influence of hereditary material during ontogeny. Prerequisite: 111, 115, and departmental permission. Four hours. Dr. Glade. Alternate years, 1967-68.

270 Modern Evolutionary Theory Contributions of modern research in genetics, systematics, distribution, experimental embryology, serology, and related fields to problems of the means and methods of evolutionary change. Prerequisite: a course in evolution and one in heredity or genetics. Three hours. Dr. Moody.

271 Advanced Limnology Analyses of current limnological concepts and problems. Prerequisite: 236. Four hours. Dr. Potash. Alternate years, 1966-67.

281-282 Seminar Review and discussion of current zoological research. Required of graduate students and seniors in zoological research programs; open to others by special permission only. Without credit. Staff.

381, 382 Advanced Reading Readings, with conferences, intended to contribute to the programs of graduate students' advanced study in phases of zoology in which formal courses are not available. Prerequisite: graduate standing; an undergraduate major in zoology. Credit as arranged.

391 through 399 Master's Thesis Research Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

491 through 499 Doctoral Thesis Research Original research under the direction of an assigned staff member, culminating in an acceptable doctoral dissertation. Credit as arranged.
Under an alumni reorganization plan approved at the June 1964 meeting of the Council the purposes were defined as follows: to give organization and aid of the highest efficiency to all efforts of the Alumni of the University of Vermont for the benefit of the University, and more particularly in the following respects; to act as a clearing house for alumni sentiment and the interchange of alumni ideas; to consider, recommend, and approve projects to be put forth in the alumni name; to act as the official spokesman of alumni sentiment to the administration, and as the avenue of approach by which the administration should have access to the Alumni collectively; to recommend on such undertakings, or to provide for their being carried on, as are reasonably within the province of alumni activity, and are of benefit to the University; to plan and activate programs and services for the classes and clubs.

Officers of the Council consist of a president, vice-president, secretary, and treasurer, who shall be the treasurer of the University. The president and vice-president are elected biennially, and neither office may be held by the same individual for more than one term. The secretary shall be a staff member of the University selected in conference between the Executive Committee of the Council, the Director of Alumni Relations, and the President of the University or his delegated representative.

Council membership represents clubs, classes and areas. Members-at-large are nominated by the Nominating Committee as deemed necessary, and are elected for a term of one year. Vacancies may be filled in between elections by appointment of the Council President.

The officers and membership members of the Council follow:

Honorary: The President of the University.
Ex-Officio: Roland J. Delfausse, '35, 30 Baker Rd., Livingston, N. J.
President: Stewart P. Washburn, '51, 33 Chestnut St., Dorchester, Mass.
Vice-President: John S. Burgess, '42, 67 Main St., Brattleboro, Vt.
Council Secretary: Mrs. Constance Dena Zolotas, '32, Alumni House, University of Vermont.

Members-at-Large:
Alfred Beauchamp, '51, 163 No. Church St., Rutland, Vt.
Roland J. Delfausse, '35, 30 Baker Rd., Livingston, N. J.
Mrs. Florence Cudworth Holden, '45, 381 So. Union St., Burlington, Vt.
George W. Kidder, '22, 439 So. Willard St., Burlington, Vt.
Raymond G. Kinsler, '26, 200 Crestview Circle, Longmeadow, Mass.
Richard B. Levine, '53, 215 Willoughby Ave., Brooklyn 5, N. Y.
Nicholas S. Mastrorilli, '54, 207 19th St., Union City, N. J.
Loren Frederick Palmer, '29, 308 Maple St., Burlington, Vt.
Club Areas:
Reginald H. Arnold, '30, Box 313, Bradford, Vt.
Theodore E. Battles, '48, 2100 No. Butternut Lane, Midland, Tex.
Alfred E. Brooks, '26, 100 Hoover Rd., Rochester, N. Y.
John S. Burgess, '42, Brattleboro, Vt.
James F. Burke, '17, Box 205, Dorset, Vt.
Donald B. Carpenter, '38, 308 Rocardo Rd., Strawberry Manor, Mill Valley, Calif.
Max B. Davison, '24, Morrisville, Vt.
Lawrence J. Doolin, '23, 1364 Indian Creek Dr., Philadelphia 31, Pa.
John A. Eliot, '30, 3 Crown St., Milford, Conn.
John Fitzpatrick, '16, 58 Highland St., Goffstown, N. H.
John F. Galascione, '57, 111 Taylor Ave., Somerville, N. J.
Bingham J. Humphrey, '27, 680 Evergreen Ave., Mt. Carmel, Conn.
Jane E. King, '49, 10136 Palmer Dr., Sun City, Ariz.
Douglas L. Liston, '48, 100 Highland St., Holden, Mass.
Elias Lyman, Jr., '38, 125 Ninth St., Wilmette, Ill.
Arthur Q. Penta, M.D., '25, 1301 Union St., Schenectady 8, N. Y.
Kenneth W. Pierce, '49, 244 No. Church St., Rutland, Vt.
Mr. and Mrs. John J. Spayk, '42, Box 98, Cabot, Vt.
Robert D. Taisey, '50, 30 West 60th St., Apt. 2V, New York, N. Y.
Helen M. Wippich, '53, 403 East 63rd St., Apt. 1A, New York, N. Y.

Class Representatives:
Roy R. Allen, '11, South Hero, Vt.
Lyman C. Hunt, '12, 7 Church St., Essex Junction, Vt.
George N. Harman, '13, 1 Olmstead Pl., Rutland, Vt.
Harold F. Johnson, '14, 29 Crestview Circle, Longmeadow, Mass. 01106
Harold A. Mayforth, '15, 237 Shelburne St., Burlington, Vt.

Degrees Granted

JUNE, 1964

School of Dental Hygiene

Myra Annette Anderson, Shoreham
Carole Jean Brush, Middlebury
Nancy Sharon Devenger, Danville
Cheryl Ann Fonda, St. Albans
Barbara Helen Goodman, Bloomsfield, Conn.
Cheryl Rosalinda Hebel, Union, N. J.
Donna Rae Howard, Richmond
Patricia Louise Kiecal, Old Tappan, N. J.

Jane Anderson Miller, West Chester, Pa.
Jeanette Teresa Phillips, Poulney
Judith May Scott, Randolph
Diane Cowles Seehof, Lake Forest, Ill.
Julie Jo-Ann Slobodnajak, Bellows Falls
Sally Ann Tauchert, Fair Haven, N. J.
Kathie Anne Taylor, Waterville, Me.

College of Education and Nursing

Bachelor of Science and Nursing

Nancy Jane Adams, Keene, N. H.
Cynthia Jean Amidon, Burlington
Ruth Anne Barrows, Concord, N. H.
Catherine Sears Bloom, Chevy Chase, Md.
Carol Ann Bryniarski, Elora, N. Y.
Jane Hannah Butler, Columbus, Ohio
Barbara Louise Chatterton, Brattleboro
†Joan LaBelle Cressia, Burlington
Barbara Devone Crist, Bristol, Conn.
Nancy Eleanor DeVore, Belle Mead, N. J.
Marjorie Anne Douglass, Pittsford, N. Y.
Linda June Duba, Burlington
Louise Marie Fernandez, Montpelier
Carol Jean Fish, Roslyn Heights, N. Y.
Eileen Rosalind Giller, Hartford, Conn.
Jane Berrall Hall, Montclair, N. J.
Sheryl Hartford, Andover, Mass.
Nancy Ruth Heppner, Kingston, N. Y.
Helen Lott Johnstone, Fair Lawn, N. J.

Marilyn Elaine Keith, Underhill
Karen Louise Kunzie, St. Albans
Joyce Elma Lahey, Long Lake, N. Y.
Janet Ellsworth Lang, Pittsburgh, Pa.
Jeanette Eloise Laplant, Rutland
Francés Leitner, Harrisburg, Pa.
*Inness Carey Mahoney, Brighton, Mass.
Dorothy Anne Mathews, St. Johnsbury
†Margaret Smith Miller, Little Silver, N. J.
Phyllis Grace Morrison, Belmont, Mass.
Carol Catherine Murray, Burlington
Sharon Bette Newton, Ashland, N. H.
Iris Susan Shmurak, Lynbrook, N. Y.
Rhoda Jane Spaulding, East Fairfield
Susan Elizabeth Treadway, Rochester, N. Y.
Barbara Ann Trinci, Center Rutland
Carole Marie Truitt, Fairfield, Conn.
Carol Lynne Watters, Ho-Ho-Kus, N. J.
†Susan Jane Wichterman, Philadelphia, Pa.

Bachelor of Science in Business Education

Susan Benton, Vergennes
Laurette Julie Dion, Winooski

Judith Ann Miller, Winooski
Marilyn Joyce Smith, Pittsford

Bachelor of Science in Music Education

Diane Knight Bombard, North Hero
Cathy Clarke Craig, New York, N. Y.

Richard Emmons Lombard, Windsor

* As of October 19, 1963.
† As of February 22, 1964.

English

Jane N. Blandin, '64
Gina H. Heaton, '64
Judith F. Ruskay, '64
Michael J. Zieky, '64

Graduate College

Master of Education

*Robert Elmer Brown, B.S. (UVM) 1959; Essex Junction
*Donald Earl Jamieson, B.S. (Univ. of N. H.) 1953; Waterbury, in absentia
*William Orson Jay, B.A. (UVM) 1957; North Hollywood, Calif., in absentia
*Elizabeth Ann Leo, B.S. (UVM) 1953; Wilkes-Barre, Pa.
*Helen Wilson Mach, B.S. (Castleton) 1959; Pawlet, in absentia
Francis Xavier Mahoney, B.S. (Boston College) 1953; Boston, Mass.
*Leora L. Ovitt, B.S. (Johnson) 1911; Burlington
*Carolyn Alice Paine, B.S. (UVM) 1919; Bristol
*Robert James Rhein, B.S. Marine Engr. (Merchant Marine Academy) 1944; B.S. in Ed. (Univ. of Cincinnati) 1950; Burlington
*Clifford Elphinstone Stirling, B.A. (McGill) 1949; Chateauguay Basin, Quebec

Master of Arts in Teaching

†John Franklin Adams, B.S. (UVM) 1951; Middlebury
*Brian Harold Ash, B.A. (Sir George Williams Univ.) 1960; Montreal, Quebec
*Eleanor Wietsner Chisholm, B.A. (McGill) 1953; Hempstead, Quebec

Master of Extension Education

†Keith Traver Bradley, B.S. (McGill) 1949; Knowlton, Quebec

Professional Degree in Electrical Engineering

Master of Science

Agricultural Economics

Christopher George Barbieri, B.S. (Cornell) 1962; Stewart Manor, N. Y., in absentia
Marco Antonio Granados Ruiz, M.S. (Univ. of Central Venezuela) 1959; Caracas, Venezuela
Thesis: The Economic Development of Venezuela in Recent Years.

* As of October 19, 1963.
† As of February 22, 1964.

HAMILTON WATCH COMPANY AWARD to the senior engineer who has most successfully combined proficiency in his major field of study with notable achievements in the social studies and humanities.

HOWARD AWARDS, established by a bequest from Mrs. Hannah T. Howard, for students in the College of Arts and Sciences who have shown excellence in the work of the freshman year.

ELWIN LEROY INGALLS AWARD, established in 1934 to honor Elwin Leroy Ingalls, 1896, who had then completed twenty years of continuous service as State 4-H Club Leader, to be given to a student outstanding in character, 4-H Club work, and scholarship.

INTERFRATERNITY SCHOLASTIC CUP for the fraternity having the highest scholastic average during the preceding semester.

A. ATWATER KENT AWARD to the student who has shown the most improvement in electrical engineering.

LEWIS RALPH JONES AWARD established in 1963 to be given to a student displaying outstanding proficiency in plant sciences.

KIDDER MEDAL established in memory of Dr. F. T. Kidder, 1880, a Trustee of the University, to be awarded to the senior man ranking first in character, leadership, and scholarship.
AWARDS

LAMB FOUNDATION ESSAY AWARDS to students in the College of Medicine showing greatest comprehension and appreciation of the doctor-patient relationship.

ALEXANDER LAMPORT AWARD established in 1962 to be given to an outstanding student in Hebrew.

ROBERT ASHTON LAWRENCE DEBATING AWARDS for students who exhibit the greatest proficiency in debate, established by Edwin Winship Lawrence, 1901, in memory of his brother, Robert Ashton Lawrence, 1899.

ROBERT ASHTON LAWRENCE AND GEORGE EDWIN LAWRENCE DEBATING AWARDS to the four students of the University of Vermont and/or Middlebury College showing the greatest proficiency in a joint debate between the two institutions; these awards established by Edwin Winship Lawrence, 1901, in memory of his brother, Robert Ashton Lawrence, 1899, and his father, George Edwin Lawrence (Middlebury College, 1867).

EDMUND F. LITTLE CUP, established by Arlington, P. Little, 1901, to the outstanding student in mechanical engineering.

ELIZABETH C. LISMAN MEMORIAL AWARD, established in 1962 by Louis Lisman and others, in memory of his wife, to be presented annually for outstanding participation in group discussion.

MERCK CO. INDEX AWARDS for proficiency in chemistry to be given to the outstanding junior and the outstanding senior.

HELMAINE MESCH MEMORIAL AWARD given annually by the Class of 1961 to the most deserving senior in the College of Medicine, to be selected by his classmates.

MORTAR BOARD SCHOLARSHIP CUP to the women's residence hall attaining the highest scholarship average for the first semester.

OMICRON NU CUP to the student in home economics who attains the highest scholastic average during her freshman year.

OUTING CLUB SKI TROPHY to the member of the varsity ski team showing outstanding leadership, character, and athletic attainment in skiing during the past year.

PANHELLENIC CUP awarded to the sorority with the highest scholastic average.

PANHELLENIC PLAQUE awarded to the sorority whose scholastic average shows the greatest improvement in the fall semester.

COMPANY L-12 PERSHING RIFLES TROPHY to the ROTC platoon adjudged to be the most proficient during the year.

PHelps AWARD established by Edward J. Phelps in memory of his son, Edward Haight Phelps, 1872, to be given annually to an outstanding senior in civil engineering.

PHI BETA KAPPA AWARD to the student in the humanities with the highest standing at the end of the first three semesters.

PROFESSOR OF MILITARY SCIENCE AWARD for cadets of the senior class who have made outstanding contribution to the ROTC program.

RETIRED OFFICERS' ASSOCIATION (GREEN MOUNTAIN CHAPTER) AWARD to the sophomore cadet who has contributed the most to the ROTC program.

INSTITUTE OF RADIO ENGINEERING AWARD to the student member who has shown the greatest professional development, accomplishment, and interest in the activities of the student branch.

COLONEL WADSWORTH RAMSEY-SMITH AWARD to the outstanding senior cadet of the ROTC. This was established by Mrs. Ramsey-Smith in honor of her husband.

FREEMAN M. SALTUS AWARD established in 1956 to be given to a student writing an outstanding essay on labor and/or economics.

SEMANS TROPHY, presented by the local chapter of Tau Epsilon Phi Fraternity in memory of Henry Semans, 1924, awarded annually to a senior showing outstanding qualities of leadership, loyalty and service to the University, active participation in athletics, and winning the respect and regard of his fellow students.

UNIVERSITY RESEARCH CLUB AWARD to the undergraduate submitting the best research paper to the Research Club.
SERGEANT’S MEDAL to the outstanding ROTC cadet in the junior class in leadership and drill proficiency.

SEYMOUR HORTICULTURAL AWARD established by William W. Seymour in memory of his father, Henry E. Seymour, 1835, for the senior who has done the best work in original horticultural research.

MARY JEAN SIMPSON CUP to the senior woman who best exemplifies the character, service, and constructive influence which Dean Simpson strove to develop in undergraduate women.

KIRBY FLOWER SMITH LATIN AWARD, established as a memorial to Kirby Flower Smith, 1884, by his wife, for the student having the highest standing in second-year college Latin.

MASTER SERGEANT JOEL SURRELL RIFLE TEAM TROPHY for the member of the ROTC Rifle Team who has the highest average for the season.

LA SOCIETE DES 40 HOMMES ET 8 CHEVAUX AWARD to the Army ROTC cadet in the senior class for the highest academic achievement through the advanced course and who intends to accept a Regular Army Commission.

SONS OF THE AMERICAN REVOLUTION AWARD to the ROTC cadets of the sophomore and freshman classes for their outstanding character, conduct, leadership and practical knowledge of the year’s course.

STROH TROPHY, named for Charles Stroh, 1934, awarded annually to the member of the baseball team who achieves the highest total of runs-batted-in during scheduled games each year.

SUNDERLAND MEMORIAL TROPHY awarded to the senior man who has best exemplified those qualities of character, leadership, and persistence in overcoming obstacles which were outstanding traits in the life of Russel O. Sunderland, 1938.

TAU BETA PI AWARD for the sophomore in engineering who has achieved the highest scholastic average for the first three semesters.

SOCIETY OF UVM CHEMISTS AWARDS for excellence in general freshman chemistry.

THOMAS TROPHY for the senior student in agriculture who most closely exemplifies the character of John M. Thomas.

UNITED BUSINESS EDUCATION ASSOCIATION AWARD for outstanding achievement in business education.

VERMONT CERTIFIED PUBLIC ACCOUNTANTS AWARD for the outstanding student in accounting.

VETERANS OF FOREIGN WARS AWARD to the most proficient member of the freshman ROTC class.

DR. FREDERICK ARNOLD VINTON AWARD established in 1952, for a student displaying proficiency in Latin or Greek.

THE GEORGE H. WALKER DAIRY AWARD established by George H. Walker, one of the founders of the Walker-Gordon Milk Company, to be awarded to an outstanding senior in dairy studies.

WALL STREET JOURNAL AWARD to the senior who shows the greatest proficiency in the field of finance.

WASSON ATHLETIC AWARD established by Mrs. Pearl Randall Wasson in memory of her husband, Dr. Watson L. Wasson, 1901, for the member of the senior class who has maintained the highest standard of academic scholarship and athletic attainment.

WIRTHMORE 4-H AWARD to a freshman 4-H member who has done outstanding work in 4-H dairy or dairy feeding projects.

WOODBURY MEDICAL AWARDS established by Mrs. Pauline S. Woodbury in memory of her husband, Dr. Urban A. Woodbury, 1859, for a senior in the College of Medicine showing the greatest proficiency in the clinical subjects in his senior year; and to a sophomore in the College of Medicine who has received the highest standing of the class in all subjects of the freshman and sophomore years.
