Correspondence:

Please address all inquiries and correspondence concerning applications and admission to the Graduate College should be addressed to the Graduate College Admissions Office, The University of Vermont, Burlington, Vermont 05405; telephone (802) 656-2699. For other matters concerning the Dean, telephone (802) 656-3160.

Requests for transcripts of work done at The University of Vermont should be addressed to the Registrar, The University of Vermont, Burlington, Vermont 05405.

Requests for Summer Session and Evening Division information should be addressed to the Office of Continuing Education, The University of Vermont, Burlington, Vermont 05405.

March 1 — for applications requesting financial aid.

April 1 — for applications to most departments.

See degree program descriptions for exceptions as well as Page 15.

The University of Vermont fully supports and complies with Title VI of the Civil Rights Act of 1964 and does not discriminate in any way in any of its policies on the basis of race, color, religion, sex or national origin.

The University has embarked on a program to remove architectural barriers to make facilities accessible to and usable by the handicapped. Questions may be referred to the Office of Architectural Barrier Control. The University of Vermont does not discriminate on the basis of handicap in the admission of funding of graduate students.

Please be advised that information provided herein is subject to change without notice in accordance with established University procedures. Circumstances occasionally require instructor changes and changes in the timing of specific course offerings.

The University of Vermont

THE GRADUATE COLLEGE

The Graduate College of The University of Vermont administers all advanced degree programs except the program leading to the degree of Doctor of Medicine. As such, it serves the needs of college graduates who desire a broader and more thorough knowledge of the scholarship and research in a particular field.

Many academic departments of the University have a long history of providing formal graduate study. The first master's degree was awarded in 1807. For many years graduate degree programs were under the direction of a University Committee on Graduate Study. The Graduate College was formally established with a full-time dean in 1952; since that time it has served to provide graduate study opportunities in academic fields in which University resources have made sound programs possible.

The Graduate College has developed rapidly since its inception. In 1953, following its formal establishment by the trustees, 46 master's degrees were awarded. In 1980, 329 master's degrees and 29 Doctor of Philosophy degrees were awarded. The Graduate College currently enrolls over 900 students pursuing advanced degrees with about 200 pursuing the doctorate. Scholarships, fellowships, assistantships, and special loan programs are available in limited numbers for students who have achieved a good academic record in their undergraduate and graduate programs. With excellent facilities, library holdings and laboratories, combined with its reasonable size, the Graduate College of the University of Vermont offers unique programs of high quality graduate study.

THE UNIVERSITY OF VERMONT

The University of Vermont was founded in 1791, taking its place among the handful of colleges founded in this country in the eighteenth century for the higher education of young colonials and Americans of the first post-revolutionary generation. The University was the fifth New England college chartered, the second established by a state to grant the bachelor’s degree, and the twentieth in the nation to do so.

Though it has enjoyed a long tradition which has seen it receive substantial private support, University development has been identified closely with that of the State since 1791, when Vermont's founding General Assembly granted a charter to the University and set aside about
29,000 acres throughout the State with the intent that rents from this land would support the new educational institution.

That same Vermont General Assembly established that the bylaws of the University should give no preference to any religious sect or denomination or discriminate against any, making the University of Vermont the first in this country and possibly the first in history to go on public record as supporting freedom of religion upon its campus.

The University of Vermont consists of the Colleges of Agriculture, Arts and Sciences, Engineering and Mathematics, Education and Social Services, Medicine, and the Graduate College; the Schools of Allied Health Sciences, Business Administration, Natural Resources, and Nursing; and the Division of Continuing Education.

The present physical plant is valued at more than $55,000,000, a major share made possible through the interest and support of alumni and private philanthropy.

The University Libraries The main Library was dedicated in 1961, and the physical facilities were expanded to double their original size in 1979, providing additional study space and carrels for student use. At the time of the expansion, it was renamed the Bailey-Howe Library. The Bailey-Howe Library holds the largest book collection in Vermont, and acquires regularly major periodicals, scholarly journals and indexing and abstracting services. The University collections also include books in medicine and health-related sciences, and a strong collection in medical periodical literature maintained in the Dana Medical Library of the Division of Health Sciences.

The Bailey-Howe Library is a depository for United States and Canadian government publications, and acquires newspapers, pamphlets, maps, and materials in microfilm. The Special Collections Department includes books and manuscripts from the library of George P. Marsh, and a significant Masefield poetry collection; its Wilbur Collection is rich in books and manuscripts of those associated with the State, including Ira Allen, Henry Stevens, Dorothy Canfield, Vermont Governors, and members of the State Congressional delegation.

The Physics and Chemistry Library is located in the Clinton D. Cook Physical Sciences Building.

The University Archives in the Waterman Building contain the permanent official records of the University.

The Robert Hull Fleming Museum The Museum houses a notable University collection of Western and non-Western art, and is a center for research and museological studies as well as a place for aesthetic exploration. The Reed Collection of Plains Indian Art and the Schnackenberg Collection of 19th- and 20th-century American Art, for example, are
outstanding and of particular interest to students of American art and history. Exhibits are frequently rotated to serve class and seminar needs. Two galleries are given to changing exhibitions on special topics. These are frequently augmented by lectures, gallery talks, and films. Besides facilities to support the scholarly use of the collections, the Museum also houses class and seminar rooms for art history courses, and the Art Department slide library of 40,000 slides.

The Academic Computing Center   The Academic Computing Center provides computing facilities for the campus community. The Center (DEC 2060) services the computation needs of the varied research projects on campus; its facilities are also used as an integral part of many graduate and undergraduate courses.

The staff of the Computing Center is available at all times to anyone who requires assistance with the use of the machines, or the programming of them. A large up-to-date program library is maintained by the Center for use by University personnel.

The Vermont Seminars   The Vermont Seminar Program augments the focus of teaching and research at the University and enriches educational offerings by bringing to campus individuals from a variety of walks of life, including faculty, statespersons, distinguished citizens, and leaders in special fields.

The George Bishop Lane Artists Series   The George Bishop Lane Artists Series is one of the largest collegiate artists series in the country. It was inaugurated in 1955 by a gift of over $300,000 from the late Mrs. Lane, in honor of her husband, George Bishop Lane of the Class of 1883.

The Lane Series makes it possible for the University to bring annually to the campus and the Burlington area a continuing program of outstanding musical, theatrical, dance and other artistic productions for a moderate admission fee. The Series is planned and produced by a student-faculty committee with townspeople serving with student and faculty members on an advisory committee.

In addition to a major series of concerts, the Lane Series also sponsors a number of special events throughout the year in Burlington and on occasion in other locations.

The George Aiken Lectures   The annual George Aiken lectures, established in honor of Vermont's dean of the United States Senate, focus on issues of national and international importance. They bring together speakers of prominence, University faculty, and the University community to achieve greater understanding of significant human concerns.
The Placement Service  To assist graduates in exploring and selecting among various career employment possibilities, the University operates an extensive placement program. Under the sponsorship of the Center for Career Development, a large number of representatives of business organizations, governmental agencies, and school systems come to the campus each year to interview students for full time positions. Related services include individual career counseling, the preparation of confidential credentials for employers, and educational placement.

The Physical Education Facilities  The University’s extensive physical education plant is available for recreational use by faculty, staff, and students during hours not devoted to specific instruction. Swimming, handball, skating, tennis, squash, and many other individual and group activities are available for interested participants.

Graduate students may not enroll in physical education classes without prior approval by the Dean of the Graduate College. Graduate College tuition scholarships do not cover any fees for physical education activities.

THE BURLINGTON AREA

The University and the people of the Burlington area have long enjoyed cordial relations dating from 1800 when Burlington citizens voluntarily subscribed the necessary funds to provide Vermont’s first institution of higher learning with its first building.

With a population of about 38,000, Burlington is Vermont’s largest city. The greater Burlington area of approximately 115,000 inhabitants is divided between pleasant suburbs and picturesque farm and woodland. Burlington enjoys magnificent views of Lake Champlain and the Adirondack Mountains to the west and Vermont’s Green Mountains to the east. Easily available outdoor activities include swimming, boating, hiking, climbing, and skiing.

Some 200 miles northwest of Boston, 300 miles north of New York City and about 100 miles south of Montreal, Burlington is served by U S Air, Delta Airlines, Air New England, Air North, Vermont Transit and Greyhound Bus Lines, Amtrak, and is contiguous to Vermont’s interstate highway system.
Degree Programs Offered

The Graduate College offers the following programs leading to the Master's degree and to the degree of Doctor of Philosophy.

MASTER OF ARTS
Programs are offered in the following fields:

- English
- French
- Geography
- German

- Greek and Latin
- History
- Political Science
- Psychology

MASTER OF SCIENCE
Programs are offered in the following fields:

- Greek and Latin
- History
- Political Science
- Psychology

- Agricultural and Resource Economics
- Anatomy and Neurobiology
- Animal Sciences
- Animal Pathology
- Biochemistry
- Biomedical Engineering
- Biostatistics
- Botany
- Cell Biology
- Chemistry
- Civil Engineering
- Communication Disorders
- Computer Science
- Electrical Engineering
- Forestry
- Geology

- Historic Preservation
- Human Development and Family Studies
- Human Nutrition and Foods
- Materials Science
- Mathematics
- Mechanical Engineering
- Medical Microbiology
- Medical Technology
- Microbiology
- Natural Resource Planning
- Pathology
- Pharmacology
- Physics
- Physiology and Biophysics
- Plant and Soil Science
- Statistics
- Zoology

MASTER OF ARTS IN TEACHING
This degree is appropriate for teachers who are interested primarily in increasing their knowledge of their subject matter fields and thereby the effectiveness of their classroom instruction. Programs are offered in the following fields:
Botany
Chemistry
English
French
Geography
Geology
German

Greek and Latin
History
Mathematics
Occupational and Practical Arts
Physics
Zoology

MASTER OF SCIENCE FOR TEACHERS

This degree is designed primarily for secondary school teachers already certified who wish to strengthen their backgrounds in their subject matter fields, and who desire flexibility in choosing courses at levels best suited to their needs. Programs are planned on an individual basis.

Biology
(Botany & Zoology)
Geology
Mathematics
Physical Sciences
(Chemistry & Physics)

Please contact the department concerned for prerequisites and minimum degree requirements.

MASTER OF EDUCATION

The Master of Education degree is intended to give those who work in education the kind of background and professional preparation needed for leadership in teaching and functions related to it. Programs are planned on an individual basis with special attention to such areas as:

Administration and Planning
Counseling (Elementary and Secondary Schools; and Community)
Foundations of Education
Occupational and Practical Arts
Organization and Human Resource Development
Reading and Language
(Elementary and Secondary)

Special Education
Student Personnel Services in Higher Education
Teacher Education

MASTER OF BUSINESS ADMINISTRATION

Study leading to the MBA is designed to provide opportunity for the individual to develop knowledge and understanding in a wide range of business activities that will provide foundation for growth and success in a business career. Programs are planned on an individual basis.
MASTER OF EXTENSION EDUCATION
This degree is for persons who have educational responsibilities outside of regular school settings. Programs are individually designed to provide knowledge and competencies associated with a career field. Emphasis is placed upon preparation for educational leadership functions. Programs are planned in the following specializations:

Agricultural Agencies and Organizations
Business and Industry
Youth Organizations

DOCTOR OF PHILOSOPHY
Programs are offered in the following fields:

Anatomy and Neurobiology  Materials Science
Animal Sciences  Mechanical Engineering
Biochemistry  Medical Microbiology
Botany  Pharmacology
Cell Biology  Physiology and Biophysics
Chemistry  Plant and Soil Science
Electrical Engineering  Psychology

FIFTH YEAR CERTIFICATE IN EDUCATION
A special program culminating in a fifth year certificate is offered by the College of Education and Social Services for students who wish to work beyond the bachelor’s degree. It is especially designed to meet the needs of teachers who are developing new teaching fields, advanced students who are meeting requirements for state certification, and experienced teachers who desire flexibility in choice of courses at both graduate and undergraduate levels. Information about the certificate program may be obtained by contacting the Dean of the College of Education and Social Services.

Persons enrolled in the fifth year certificate program transferring to Master of Education programs are subject to the restrictions on validation of credit outlined on page 25.

CERTIFICATE OF ADVANCED STUDY
A Certificate of Advanced Study (sixth year certificate), a 30-36 graduate credit hour program beyond the master’s degree, is offered by the College of Education and Social Services in the following fields:

a. Administration and Planning which is designed to prepare ad-
DEGREE PROGRAMS OFFERED

Administrators and planners for public schools, educational and social agencies, and middle management positions in higher education.

b. Counseling. Individuals who have completed a master’s degree in counseling or a related area may apply for admission to the C.A.S. program. The program is designed to help people further develop skills in counseling, consultation, and program planning and coordination.

c. Integrated Studies which is an inter-area program designed for students who have completed their master’s degree and are interested in exploring a self-designed, integrated program of study drawing upon graduate level experiences currently provided by departments of Organizational, Counseling, and Foundational Studies; Special Education, Social Work, and Social Services; Professional Education and Curriculum Studies; Physical Education, Health and Learning Studies of the College of Education and Social Services and other University departments. The program is under the general administration of the Dean of the College of Education and Social Services with direct supervision by a committee of representative faculty from the participating areas within the college.

d. The Consulting Teacher/Learning Specialist concentration prepares leadership personnel for special education. Applicants must possess the masters degree in special education and have at least two years of leadership experience. The course sequence is individualized according to the applicant’s background and needs and leads to a Certificate of Advanced Study. The concentration includes 30 credit hours of coursework selected from the following: EDSP 301, 310, 312, 316, 322, 323, 384, and 385.

CERTIFICATE IN RUSSIAN AND EAST EUROPEAN AREA STUDIES

A specialization on the area, leading to a Graduate Certificate, obtained in conjunction with a master’s degree program in a particular discipline. The program is designed to serve as a foundation for doctoral study with specialization in the area; for teaching in the area at the secondary level; or for employment in internationally-oriented organizations. Requirements are 30 credit hours of study in the area, of which up to 18 could simultaneously be counted toward the master’s in a discipline and a minimum of 12 hours of additional area work. For details contact the Center for Area and International Studies.
CONCURRENT DEGREES

Post-sophomore fellows in medicine are permitted to use credit from appropriate medical courses toward an M.S. or a Ph.D. They are enrolled in the Graduate College for one or more years to pursue research and enroll in such courses as would normally not be included within a medical program. Such persons, therefore, are working toward both an M.D. and M.S. or Ph.D., even though completion of each degree may occur at a different time.

All courses for which graduate credit is received at UVM in a master’s degree program, whether a master’s degree is received or not, may be applied toward a Ph.D. at UVM provided they are appropriate for the Ph.D. program.

No provision is made for a person to employ the same credit to satisfy two master’s degrees at the University of Vermont.
Regulations of the Graduate College

Persons intending to apply to graduate school are urged to consider future employment opportunities in their proposed field of study. Specific information regarding employment prospects may be obtained on request from the appropriate department chairperson.

ADMISSION

To be eligible for admission a student must hold a baccalaureate degree prior to the date of first enrollment or have completed work equivalent to that required for a baccalaureate. The undergraduate record must indicate a capacity for successful study at the graduate level. Graduates of unaccredited institutions must support their applications with satisfactory aptitude and advanced scores on the Graduate Record Examination. Foreign students, see special instructions on page 16.

Admission is limited to students who intend to become candidates for advanced degrees, other than Doctor of Medicine, and whose enrollment will include courses to be taken for graduate credit. Students who hold bachelors' degrees but whose entire enrollment will be in undergraduate courses should seek admission as non-degree students through the Division of Continuing Education.

Only applicants who desire to work along lines in which the University offers graduate programs will be admitted to the Graduate College. Students in the Graduate College fall into three categories: (1) duly admitted students accepted to candidacy, (2) degree candidates at other institutions who study at the University of Vermont for transfer credit, and (3) duly admitted students not yet accepted to candidacy.

The Graduate College does make provisions for students with a baccalaureate to take graduate level courses on a non-degree basis. These are generally individuals who do not desire to pursue a degree program but merely wish to expand their knowledge in certain areas. It is not necessary to make formal application for admission to the Graduate College in order to take these courses. Non-degree students are limited to a total of six hours per semester. Permission to exceed this amount must be obtained from the Dean of the Graduate College. A non-degree student who has accumulated nine hours of graduate study at the University must seek approval for further enrollment from the Dean of the Graduate College.

Students seeking formal admission to the Graduate College to pursue
an advanced degree must make application on an official form which can be obtained from the Graduate College Admissions Office. All applications must be supported by two official transcripts from each college or university attended and by three letters of recommendation from persons qualified to assess the applicant's capacity for graduate work. For submission of necessary test scores, see Aptitude and Achievement Tests, and Departmental Requirements, page 17. All applications for admission must be accompanied by a $20.00 application fee which is non-refundable. Applications and associated correspondence must be sent directly to the Graduate College Admissions Office.

When to apply The deadline for receipt of completed applications and supporting materials for admission for the fall semester is April 1 for most departments, except that a February 1 deadline is observed in the Psychology programs and a March 1 deadline is observed in the Historic Preservation Program. The part-time program of study in Psychology is open only to Vermont residents. Most departments process applications soon after all the supporting information is received. Applications will not be processed after the openings in a program have been filled. Therefore, for fall admission, it is important to file applications well in advance of April 1, as some programs can accommodate only a limited number of new graduate students.

It is sometimes possible to admit new graduate students at midyear; however, such applications should be initiated at least three months in advance of the date study is to begin.

Students who wish to be considered for financial assistance in the form of fellowships as well as admission must have applications with all supporting materials including GRE scores on file by March 1 of the academic year preceding that for which application is made. Applications for fellowship assistance must include GRE aptitude scores. No special forms are required for requesting Teaching, Research, or Graduate College Fellowships, and Graduate Assistantships. Applicants interested in being considered for such fellowships must so indicate on the appropriate section of the application form. Student Personnel Fellowships must be applied for on a separate form through the Department of Residential Life, Mansfield House, 25 Colchester Avenue. Persons interested in obtaining information on loans and/or work-study should contact the Financial Aid Office, Waterman Building.

Admission to the Graduate College does not mean that a student is automatically accepted as a candidate for an advanced degree.

New England Regional Student Program An opportunity for qualified legal residents of New England states to enroll at reduced tuition rates (currently 125% of resident tuition) for programs which are
not offered by the home state university but are offered in another New England state is available under an arrangement entitled the New England Regional Student Program. A list of available graduate programs may be seen in the Graduate College Office or obtained from the New England Board of Higher Education, School Street, Wenham, MA. 01984 at $2 per copy.

Applicants must indicate clearly, both in their initial inquiries and on their application forms, that they are seeking admission under the terms of the New England Regional Student Program. In cases where the program of study is clearly unique or distinctive to the out-of-state institution, the UVM Graduate Dean’s Office will certify directly. In cases where an apparently similar program of study is available at both institutions involved, the Graduate Deans of the two institutions will determine whether regional student status is appropriate.

Foreign Students In general, only those students who are citizens of the United Kingdom, Australia, New Zealand and Canada should apply directly. Students from other countries studying in the U.S. must submit evidence of proficiency in English and their record of academic achievement from a U.S. institution. Generally preference is given to candidates sponsored by established organizations; Institute of International Education (IIE), the African-American Institute, the American Friends of the Middle East, and the Latin American Scholarship Program of American Universities.

For information concerning eligibility criteria and application procedures for programs administered by IIE, a student may contact the U.S. Embassy, Consulate, or Information Service in his or her country.

Students from Africa, the Middle East, Korea and other areas may also request information about scholarships from the following:

Application through these organizations or the U.S. Consulate is required for adequate evaluation of transcripts and academic rating of institution attended.

Foreign applicants must be highly qualified, and submit evidence of independent financial support (approximately $9,500 U.S. per year) in the form of a signed statement from a bank or scholarship source. In the case of non-English speaking countries, applicants must submit scores from the Graduate Record Examination and Test of English as a Foreign Language. Information on these examinations may be obtained from the
Educational Testing Service, Box 889, Princeton, New Jersey 08540. This information must be submitted to the Graduate College by December 1 of the year prior to enrollment to insure adequate time to process the application.

Scholarships for foreign students are limited in number and awarded on academic criteria.

Foreign applicants interested in services or activities available to foreign students are urged to contact the Advisor to International Students and Scholars, University of Vermont, Burlington, Vermont 05405.

**Aptitude and Achievement Tests**

Applicants for admission to graduate programs in most departments must submit scores on the Graduate Record Examination (see specific department requirements). Business Administration applicants must submit scores on the Graduate Management Admissions Test.

Information about standard graduate admission tests may be obtained from the Counseling and Testing Office, University of Vermont, or from any college testing office. Information on the Graduate Record Examination or the Graduate Management Admissions Test may also be obtained from the Counseling and Testing Office or directly from the Educational Testing Service, Box 889, Princeton, New Jersey 08540.

*All applicants requesting fellowship support must submit scores on the Graduate Record Examination prior to March 1.* Arrangements should be made to take the GRE test no later than January 1982 so that test results will be available by March 1.

**Health Record**

The University requires that students maintain a personal health record with the University Health Service. Generally, this is accomplished by completion of the DASH health form ($10.00 fee) at the time of first enrollment. Persons with special medical problems or those wishing to submit an alternate health record must consult the University Health Service.

*Credentials submitted by the student, such as transcripts and letters of recommendation, become the property of the Graduate College and may not be returned or transferred.*

**ENROLLMENT**

Every student is required to enroll and register at the time and in the manner designated by the Registrar. All charges for the ensuing semester must be paid, or otherwise provided for, before registration is completed. (See Academic Calendar.)

**Enrollment Guidelines**

The range of normal full-time graduate
enrollment for non-funded students is 9-12 hours; maximum enrollment is 15 hours per semester. The normal range of full-time enrollment for funded students is 6 to 10 hours for Graduate Teaching Fellows, Graduate Research Fellows, and Graduate Assistants, and 6 to 9 hours for Student Personnel Fellows. Following completion of all credit requirements, enrollment for Continuous Registration is equivalent to full-time enrollment when the student is working full-time completing degree requirements. Enrollment in excess of the respective normal full-time course load requires the written approval of the Graduate Dean.

Change in Enrollment Any change in enrollment must be approved by the student's advisor and authorized by the Dean of the Graduate College. Specific regulations regarding the adding, dropping or withdrawal from courses are available from the Registrar. The exact dates may be found in the schedule of courses, available at the Graduate College Office, or from the Registrar. Course change forms may be obtained from the department, Registrar, or Graduate College.

Continuous Registration A student who has enrolled for all credits required in the degree program, but has not completed all degree requirements (for example, comprehensive exam, thesis), must enroll for Continuous Registration (see page 32 Fees). Enrollment for Continuous Registration may be accomplished by mail or in person through the Graduate College Office.

Auditing Courses Courses may be taken for audit; however, the credit hours are charged as usual. Under no circumstances will credit or grade be allowed for courses audited. Tuition scholarships which are funded by the Graduate College and accompany fellowship awards do not cover courses enrolled for audit.

Summer and Evening Study Information regarding graduate course offerings and enrollment may be obtained from the Division of Continuing Education. Enrollment in such courses for graduate credit does not imply admission to the Graduate College.

Dismissal A graduate student whose academic progress is deemed unsatisfactory at any time may be requested by the Dean or the department concerned to withdraw from the Graduate College.

Undergraduate Enrollment for Graduate Credit UVM senior undergraduates may enroll for graduate credit at UVM under the following circumstances: the course must be available for graduate credit; total enrollment including the graduate course must not exceed 12 credit hours in the semester in which the course is taken; the course must not be computed as part of the bachelor's degree; permission to seek such graduate credit must be requested of the Graduate Dean in writing by the Dean or Director of the undergraduate college or school prior to enrollment.
Such graduate credit is limited to 6 hours, and is not available for transfer to another institution as graduate credit. It can be used only at UVM if and when the student enters a UVM graduate program and only if the course is judged appropriate by the student’s advisor for the particular graduate program.

**GENERAL REQUIREMENTS**

Each student is expected to be familiar with the general requirements and procedures of the Graduate College and with the specific degree requirements in the chosen field of study. The following requirements define the parameters within which the Graduate College functions. Specific instructions for each department must be consulted in addition to these general requirements.

**Acceptance** Applicants for the master’s degree may be accepted to candidacy concurrent with admission, or candidacy may be deferred pending a period of satisfactory graduate study at the University of Vermont. Acceptance to candidacy for the master’s degree is granted only to those students who have fully met all undergraduate prerequisites for the courses that are required in the graduate degree program. The approval of the department and the Dean is required.

Candidacy for the doctoral degree requires a full year of graduate study in residence at the University of Vermont. A doctoral student is accepted to candidacy upon the approval of the student’s Studies Committee, the department or departments concerned, and the Dean.

**Minimum Residence Requirements** The residency requirement is fulfilled with courses that (1) are taken for graduate credit through the University of Vermont either in the academic year or in summers on the main campus or off-campus locations, and (2) are taken after the student has been admitted to the Graduate College. Each candidate for the master’s degree must satisfactorily complete twenty-one hours in residence. Each candidate for the doctoral degree must satisfactorily complete a minimum of fifty hours in residence.

Some departments may require more than the minimum hours in residence.

**Teaching Requirement** All degree candidates must acquire appropriate teaching experience in their chosen fields prior to the awarding of their degree. The nature and the amount of this teaching, for which no academic credit is allowed by the Graduate College, will be determined by the department concerned.

**Language Requirements** The language requirement may be completed in two ways: (1) Satisfactory performance on the Educational
Testing Service's Foreign Language Examination which is offered three
times a year on campus (All candidates will submit their registration
forms and fees directly to the Graduate Schools Foreign Language Tests,
Educational Testing Service, Princeton, New Jersey 08540. Further in-
formation may be obtained from the Counseling and Testing Service,
University of Vermont), or (2) An examination may be requested by the
student's department and administered by it or in conjunction with the
appropriate language department.

If the department wishes to substitute competence in computer
science, it may be achieved by satisfactory completion of Computer
Science 11 and 241 or by satisfactory completion of an examination (on a
pass-fail basis) set and graded by the staff of the Academic Computing
Center.

Grade Requirements  Letter grades are used to indicate levels of per-
formance in courses as follows: A, excellent; B, good; C, fair; F, failure.
Designations of S, satisfactory, and U, unsatisfactory, are used to in-
dicate levels of performance for credits received in Thesis Research and
may be used to indicate levels of performance in Seminar.

A candidate for a graduate degree must complete the program with a
minimum overall grade point average of 3.0. For the purpose of deter-
mining a grade point average, 4 points are allowed for each credit hour
of A, 3 points for each credit hour of B, 2 points for each credit hour of
C, and 0 points for each credit hour of F. A course may be repeated for
credit only when failed and only once; only the second grade is then con-
sidered.

A student may be dismissed from the Graduate College if more than
two grades below a B, or the designation of U in Thesis Research or
Seminar, are received.

The designation "Inc" applies to work of acceptable quality when the
full amount is not completed because of illness or emergency. It can be
awarded only with the permission of the Graduate College Dean. The
Dean may set the limit of time when the work of the course is to be com-
pleted. In no case shall this time be set longer than the beginning of the corre-
spending semester of the next academic year.

Extended Course. The grade of XC is awarded at the end of the
semester to a student who is enrolled in an identified course the nature of
which makes it unreasonable or impossible for the student to complete
the required work within the regular semester.

Students withdrawing from courses after the date prescribed by the
Registrar will receive a grade of WP - withdrawn passing, or WF -
withdrawn failing, dependent upon the quality of work completed. The
grade WP will not enter into the grade point average (GPA). The grade
of WF will enter the GPA as an F.
Graduate students may elect to take an undergraduate course on a pass-fail basis provided permission is obtained, prior to enrollment, from the department chairperson and the Dean of the Graduate College and a letter grade is not required by the Studies Committee for evaluation. Courses at the 200 level or above may not be taken on a pass-fail basis for graduate credit.

**Maximum Time Limits for Degree Completion**

**MASTER’S DEGREE**

Individual departments may set deadlines within these time limits. *It is important that students complete their programs within the time limits specified. Further educational opportunities or employment responsibilities alone will not justify delay in program completion.*

**Program Outline**  Every graduate student must complete a program outline upon completion of *nine credit hours of graduate work* for those students pursuing a master’s degree and *eighteen credit hours of graduate work* for those students pursuing a doctoral program regardless of whether such credits have been earned at UVM or elsewhere as long as such credits are intended to be applied, if acceptable, to the degree requirements for a particular student. The program outline, completed on a form available from the Graduate College, is an aid to planning, and may be amended during the course of the student’s studies as appropriate.

**Withdrawal from Degree Program**  Students must notify the Graduate College in writing of their intent to withdraw from a degree program.

If a student does not register at the University of Vermont for course work, thesis research, or continuous registration for a period of more than one calendar year, and does not notify the department or the Graduate College in writing, the student will be considered to have withdrawn from the degree program. It will be necessary to apply for reactivation and pay a reactivation fee (page 33) should the student wish to continue the graduate program.

**Leave of Absence**  An approved leave of absence (up to a maximum of twelve months) suspends the time limit for degree completion for the duration of the leave. Students must obtain the approval of their department or program chairpersons and the Dean of the Graduate College on the form available in the Graduate College Office prior to the leave of
absence in order to be considered on approved leave. A leave is not permitted for those who have completed all course credit requirements.

**Previous Credit** Course credit acquired prior to formal admission to the Graduate College may, within limits, be applied toward advanced degree requirements. The maximum number permitted is nine for a master's degree or 24 for a doctoral degree. These limits apply to either transfer credit, validation credit, or any combination of both.

**Transfer of Credit** Upon request from the department and approval by the Graduate College Dean, transfer of credit for appropriate courses completed at other institutions may be accepted by the Graduate College. In cases where such transfer is approved, it is the credit only, and not the grade, which is accepted for transfer. A maximum of nine hours credit in the case of master's candidates and twenty-four hours in the case of doctoral candidates may be accepted in transfer. Such courses must have been taken in a fully accredited college or university which offers graduate study and must be acceptable at that institution in partial fulfillment of its requirements for an advanced degree. Credit cannot be transferred for (1) courses which would not, if taken at the University of Vermont, receive graduate credit, (2) courses in which a grade lower than 80 (B-) was received, (3) correspondence courses, (4) courses which are inappropriate for inclusion in any degree program offered by the Graduate College, (5) courses which were taken more than seven years prior to the completion of a master's degree program or nine years for a Ph.D. program, (6) thesis credits received at another university.

**Validation of Credit** In order to insure effective planning of a graduate program, not more than nine hours of graduate credit acquired at the University of Vermont as a non-degree student prior to admission to the Graduate College may be validated on the student's record as applicable toward the credit requirements of an advanced degree. Validation of credit is subject to the same restrictions as stated for transfer of credit. If an applicant is enrolled as a non-degree student in appropriate graduate courses during the semester in which the application is approved for admission, these credits, up to a maximum of 6 hours, will also be applied to the degree program and will not reduce the number of validation credits available.

**Credit by Examination** A student may, under certain circumstances, receive credit for a course by taking an examination. The total number of credits which may be earned by examination, validation, or transfer may not exceed the total credits which may be transferred into a master's program (9) or into a doctoral program (24). A fee of $25 per credit is charged for each examination for credit.
Conferring of Degrees  Degrees are conferred only at commencement at the end of the academic year. If a student has completed all the requirements for a degree prior to that time, a letter will be issued certifying that the graduate degree program has been completed and that the degree will be conferred at the next commencement.  

*In unusual circumstances, a student may appeal any of the Regulations of the Graduate College by written request to the Dean of the Graduate College and the Executive Committee of the Graduate Faculty.*

REQUIREMENTS FOR A MASTER’S DEGREE

All master’s degree programs require a minimum of thirty semester hours of graduate credit. Departments and individual programs may require additional hours. In programs that require a thesis, the number of credit hours to be earned in thesis research may vary between six (minimum) and fifteen (maximum); these credits are included in the minimum of thirty required for the degree.

MASTER OF ARTS AND MASTER OF SCIENCE

Field of Specialization  At least twenty-one hours of graduate credit, including credit for the thesis and research leading to the thesis, must be earned in the field of specialization. All course credits included in these twenty-one hours must have been earned in courses which have been approved for graduate credit.

Related Study  A graduate program may include advanced courses outside the field of specialization. In order to be included as part of the master’s program, these courses must be approved in advance by the Studies Committee of the department in which the student is specializing.

Studies Committee  A Studies Committee will be appointed by the department chairperson for each candidate for the master’s degree. It shall be the responsibility of this committee to supervise the student’s program and review progress at regular intervals.

Language Requirement  Certain departments require a reading knowledge of an appropriate foreign language. The methods for satisfying the language requirement are described on page 19.

Research and Thesis  If a thesis is required, each candidate will undertake a problem of original research under the direction of a member of the department of specialization. At the conclusion of the investigation the student must present a thesis which embodies the results of the work and which demonstrates capability for independent research.  

In order to be eligible for an advanced degree in a particular academic year, a master’s candidate must submit three copies of the thesis to the
Graduate College Office by the date specified in *Guidelines for Thesis Writing* (available from that office) or an earlier deadline if stipulated by the department.

**Thesis Defense Examination Committee**  Upon submission of a completed thesis, the advisor will nominate a thesis defense examination committee for oral examination of the candidate. The committee will be appointed by the Dean, and consist of 3 members: 2 from the department and one from another field. The representative from the outside field will generally be designated as the chairperson.  

*The thesis must be prepared and submitted in compliance with the detailed instructions presented in the "Guidelines for Thesis Writing" available from the Graduate College Office.*

**Examinations**

a. A written comprehensive examination in the field of specialization.

b. A comprehensive oral examination in the field of specialization.

Satisfactory completion of the written examination is prerequisite to standing for the oral examination. All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination is permitted for any final comprehensive examination.

Three copies of the corrected thesis must be forwarded to the Dean of the Graduate College after the successful defense of thesis.

**MASTER OF ARTS IN TEACHING**

The program leading to the degree of Master of Arts in Teaching is designed primarily for teachers with the purpose of enhancing their teaching ability and strengthening their background in their subject matter fields. Each MAT program is a cooperative venture between the specialist department and the College of Education and Social Services. Students with questions regarding the education component of their program must consult with the College of Education and Social Services Dean’s Office.

A minimum of thirty semester hours is required in courses numbered above 200, of which not less than six semester hours shall be in education courses taken at the University of Vermont. No thesis is allowable in this degree program; a student must complete at least twenty-one hours, and usually twenty-four, in either a single department offering courses for graduate credit or in any acceptable combination of such departments. In order to be accepted to candidacy for this degree, a student must have completed an undergraduate major within the area of specialization, have submitted satisfactory scores on the Graduate Record Examination (Verbal and Quantitative), and be acceptable to the departments con-
cerned. Advanced GRE scores are required for programs as indicated.

Candidates are expected to have completed the necessary courses in education to meet minimum requirements for a teaching certificate during their undergraduate programs. If candidates have not qualified for teaching certification, they cannot expect to complete the degree in one academic year. To qualify for the degree of Master of Arts in Teaching, candidates must present at least eighteen semester hours in education in their combined undergraduate and graduate programs. This requirement is specified to ensure that degree recipients can meet minimum certification requirements. Students without prior teaching experience will be required to complete satisfactorily an internship or an equivalent field experience which may or may not be graded and which would be in addition to the minimum MAT education course requirements. This internship or field experience will be an essential prerequisite to consideration for certification.

Examinations

a. A written comprehensive examination in the field of education.

b. A written comprehensive examination or a comprehensive oral examination in the field of specialization. The choice between written and oral examination is determined by the department after consultation with the candidate.

All examinations are taken on the University campus in Burlington. One re-examination only is permitted for any final comprehensive examination. It is the responsibility of the candidate to notify the respective department and the College of Education and Social Services to schedule the required examinations.

MASTER OF EDUCATION

For admission to a Master of Education program, the applicant must present satisfactory scores for the Graduate Record Examination (Achievement portion) at the time of application for admission. Before the degree is awarded, the candidate must have completed one year of successful teaching experience or other educational service. This requirement may be fulfilled by satisfactory completion of student teaching, an internship, or a practicum.

The graduate program of each student admitted to candidacy for the degree of Master of Education is planned and supervised by an advisor in the respective program area. Program planning takes into consideration the student’s undergraduate curriculum, professional experience, and aims and purposes in pursuing the master’s degree.

Each program must include a minimum of either thirty semester hours
of approved course work or twenty-four hours earned in courses and six hours in thesis research. Contingent on a candidate’s background and interests and on program specification, additional credit hours may be required. If a student’s preparation is inadequate to begin study at the graduate level in certain aspects of the program, additional undergraduate courses will be required. Each Master of Education degree program must include a minimum of six semester hours of graduate work in the foundations of education, unless this requirement or its equivalent has been previously met. Graduate courses which currently fulfill this requirement include: EDFS 204, 205, 206, 209, 252, 302, 303, 354, and EDSS 313 and EDLS 377.

In order to insure effective planning of a graduate program for the degree of Master of Education, no more than nine hours credit will be accepted in partial fulfillment of degree requirements for courses taken prior to acceptance to the Graduate College.

Examinations

A comprehensive examination is required. However, it may be written or oral. The choice between a written or an oral examination, or the decision to require both, will be made by faculty members in the area of specialization after consultation with the advisor and the candidate.

a. The written comprehensive examination will cover the field of education, with emphasis on the area of specialization.

b. The oral comprehensive examination will emphasize the area of specialization.

All examinations are taken on the University campus in Burlington. Only one re-examination is permitted for any final comprehensive examination. It is the responsibility of the candidate to schedule the required examination with the College of Education and Social Services. Since each program has different options for meeting the oral and written comprehensive requirements, candidates must contact the respective program chairperson or advisor regarding program policy.

If the thesis option is elected, there must be an oral examination in defense of the thesis.

MASTER OF SCIENCE FOR TEACHERS

Refer to specific departments for requirements for this degree program.

MASTER OF BUSINESS ADMINISTRATION

Management is the art of applying principles of the mathematical and social sciences to decision making in an organizational environment
characterized by uncertainty and limited resources. The program is designed (1) to develop the individual’s ability to practice the art and (2) to build a foundation that will facilitate and encourage the continuation of this development beyond a formal university setting. Courses in the program emphasize the understanding and critical evaluation of conceptual and theoretical principles relevant to the decision process in the functional areas of business.

Upon completion of the program, students will have been exposed to each functional area, will have been required to demonstrate an ability to engage in individual and group research projects, and will have demonstrated capacity to present coherently and defend their views orally and in writing.

Examinations

Written comprehensive examinations are required in Business Policy and two other areas selected by the student. Normally the comprehensive examinations are administered upon completion of all course work for the degree. One re-examination only is permitted for any final comprehensive examination.

While some MBA courses will be offered during the evening hours, others are offered only during the day. Most 300 level courses in the day program meet in late afternoon.

Not more than nine credit hours of graduate work completed prior to admission to the Graduate College will be applied toward the degree requirements.

MASTER OF EXTENSION EDUCATION

A minimum of thirty semester hours in courses numbered above 200 is required. At least six semester hours will be completed in agriculture, or a related field, and at least six semester hours in education courses offered by the College of Agriculture. A minimum of eighteen additional semester hours will be selected to meet individualized program objectives. Normally, no thesis is required.

The candidate may complete the degree requirements through Summer Session, Evening Division and/or full-time residency. A candidate will be expected to spend at least one semester or a minimum of two summers in residence at the University of Vermont campus in Burlington.

A satisfactory score on the Miller Analogies Test is required. Before the degree is awarded, the candidate must have completed the equivalent of one year of professional experience. This requirement may be completed by an internship or practicum experience approved by the candidate’s studies committee.
Examinations

a. A written comprehensive examination in the field of specialization.
b. A comprehensive oral examination in the field of specialization.

Satisfactory completion of the written examination is prerequisite to standing for the oral examination. All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination is permitted for any final comprehensive examination.

REQUIREMENTS FOR DEGREE OF DOCTOR OF PHILOSOPHY

The degree of Doctor of Philosophy requires of candidates a minimum of seventy-five credit hours to be earned in courses and in dissertation research.

Studies Committee Upon admission to the Graduate College, the prospective candidate for the Ph.D. degree will be assigned an interdepartmental Studies Committee by the department chairperson. This committee will meet as frequently as the progress and development of the student warrant.

All courses taken in the program must be approved by this committee, the department chairperson concerned, and the Dean of the Graduate College.

Courses A minimum of fifteen hours in courses used for compilation of the grade point average must be taken in residence at the University of Vermont. The first year of each doctoral program consists almost entirely of required courses; in the following years appropriate courses are selected by the candidate in consultation with the Studies Committee. Details of each doctoral degree program can be obtained from the appropriate department chairperson or from the Dean.

Language Requirements The determination of language requirements is established by each individual department. Please refer to specific departmental regulations. If knowledge of a foreign language is required, the method of satisfying this requirement, including evaluation of proficiency, will be determined by each individual department.

The language requirement must be fulfilled before the written comprehensive examination is taken and before admission to candidacy.

Completion of an appropriate foreign language at the intermediate college level with a grade of B or better in the final semester may be accepted in fulfillment of a reading knowledge of a foreign language.

Research and Dissertation Each candidate, while in residence at the University of Vermont, must complete an acceptable original research project which contributes new knowledge or techniques in an academic field. Each candidate must enroll in a minimum of twenty credits of
dissertation research. Only a member of the Graduate Faculty may supervise dissertation research for the Ph.D.

In order to be eligible for an advanced degree in a particular academic year, a doctoral candidate must submit four copies of the dissertation to the Graduate College Office by the date specified in Guidelines for Dissertation Writing (available from that office) or an earlier deadline if stipulated by the department.

*The dissertation must be prepared and submitted in compliance with the detailed instructions presented in "Guidelines for Dissertation Writing" available from the Graduate College Office.*

**Dissertation Defense Examination Committee**  Upon submission of the completed dissertation, the Graduate Dean will appoint a dissertation examining committee, nominated by the department, for oral examination of the candidate. The committee shall consist of the members of the student’s studies committee and at least two faculty members from outside of the department who will be nominated by the chairperson of the department concerned for a total membership of six. One of the outside members will be designated chairperson by the Graduate Dean. The acceptability of the dissertation will be determined by the Dissertation Defense Examination Committee. An announcement of the oral defense must be distributed two weeks in advance to all faculty of the department of specialization and to other appropriate departments.

**Examinations**

(a) A comprehensive written examination in the field of study must be passed by the candidate at least six months before the dissertation is submitted. This examination will be prepared by the department concerned, in consultation with the candidate’s Studies Committee. One re-examination only will be permitted.

(b) An oral examination, in which the candidate will be expected to defend the dissertation, must be successfully completed. One re-examination only will be permitted.

Success in the written comprehensive examination is prerequisite to standing for the oral dissertation defense examination. All examinations are taken on the University campus in Burlington.

Four copies of the corrected dissertation must be forwarded to the Dean of the Graduate College after the successful defense of dissertation.
Definition of “Vermont Resident”

ADOPTED BY BOARD OF TRUSTEES, DECEMBER 14, 1974

Amended June 13, 1981.

(Effective July 1, 1981)

The Vermont Legislature has established a lower rate of tuition for students who are Vermont residents. Such a policy appears to have as its objective the attempt to more evenly distribute the cost of operating and supporting the University of Vermont between Vermont residents whose taxes have previously supported the University and non-residents who have not done so.

The Legislature has stated that enrollment at an institution for higher learning or presence within the State for purpose of attending an institution of higher learning shall not constitute residence for tuition purposes.

The following requirements must be met by a student prior to being granted resident status for the purpose of admission, tuition, and other University charges:

1. The applicant shall be domiciled in Vermont, said domicile to be continuous for one year prior to the commencement of the semester next following the date of application. Changes in residency status shall become effective for the semester following the date of application. There shall be one date designated each year for the commencement of each semester and the summer term. A semester shall commence on the day classes begin for that semester. The summer term shall commence on the day classes begin for the summer term.

2. Domicile shall mean a person’s true, fixed and permanent home, to which he/she intends to return when absent. A residence established for the purpose of attending an educational institution or qualifying for resident status for tuition purposes shall not of itself constitute domicile. Domicile shall not be determined by the applicant’s marital status.

3. The applicant must demonstrate such attachment to the community as would be typical of a permanent resident of his/her age and education.

4. Receipt of financial support from the applicant’s family will create a rebuttable presumption that the applicant’s domicile is with his/her family. A student who is the child of divorced parents, where the non-custodial parent or joint custodial parent has been domiciled in Vermont for 12 consecutive months immediately prior to application, and such a parent has contributed in excess of 50% of said child’s support during at least that period, may be granted In-State status. Certified copies of such parent’s IRS returns may be required.
5. An applicant becoming a student at an institution of higher learning in Vermont within one year of first moving to the state shall have created a rebuttable presumption of residence in Vermont for the purpose of attending an educational institution.

6. Eligibility to enroll as a resident student in another state shall create a rebuttable presumption against eligibility to be enrolled at the University of Vermont as a "Vermont Resident."

7. A student enrolling at the University of Vermont shall be classified by the Residency Officer (designated by the President), as a resident or a non-resident. The decision by the Residency Officer shall be based upon information furnished by the student and other relevant information. The Residency Officer is authorized to require such written documents, affidavits, verifications or other evidence as he/she deems necessary.

8. The burden of proof in all cases rests upon the student claiming to be a Vermont resident and shall be met upon a showing of clear and convincing evidence.

9. The decision of the Residency Officer on the classification of a student as a resident or non-resident, may be appealed in writing to the Residency Appellate Officer whose decision shall be final.
Student Expenses

Application Fee  All applications for admission must be accompanied by a $20 application fee. This fee is non-refundable.

Tuition  Rates for the 1981-82 academic year will be as follows: For Vermont residents, $78 per credit hour, $937.50 flat rate for 12 hours, and $78 per credit hour in excess of 12 hours.

For non-residents of Vermont, $212 per credit hour, $2531 flat rate for 12 hours, and $212 per credit hour in excess of 12 hours.

The lower rates for Vermont residents are made possible by a subvention to the University from the State of Vermont.

Continuous Registration Fee  A fee of $50 per semester is charged each graduate student who has paid tuition for all credits required in the degree program but who has not completed all degree requirements in order to maintain continuous enrollment.

Library Bond Fee  A fee of $17 per semester is required of each student enrolled in twelve credit hours or more; a fee of $8.50 per semester is required of each student enrolled for less than twelve credit hours but more than three credit hours. No fee is assessed for registration of three credit hours or less. This fee is assessed by legislative act and turned over to the State of Vermont each year to the extent necessary to fund the debt retirement on the bond issue that was used to fund construction of the main library.

Student Health Fee  A fee of $46 per semester is charged all full-time degree students enrolled at the University. Part-time students will be eligible for University Health Service by paying this fee. Student Accident and Sickness Insurance — Through an arrangement with a commercial insurance company, students are able to procure health insurance which is designed to provide coverage for services beyond those provided by the University Health Service. The 1981-1982 cost for one year’s coverage for single students is $68. Married students may obtain coverage for their spouse and children. Further details are available from the University Health Service. In order to participate in this insurance, the student health fee must be paid each semester.

Athletic Bond Fee  A fee of $24 per semester is required of each student enrolled in twelve credit hours or more. Payment of the athletic fee gives each student the privilege of using the facilities in the University gymnasium. This fee is assessed by legislative act and turned over to the
State of Vermont each year to the extent necessary to fund the debt retirement on the bond issue that was used to fund the construction of Patrick Gymnasium.

**Reactivation Fee**  Reactivation following withdrawal without an approved leave of absence requires payment of a $25.00 reactivation fee.

**Penalty Payments**  Students who are allowed a payment postponement of all or a portion of their financial obligation will be charged a $50 late payment service charge. There is also a late enrollment fee of $10.

**Advanced Degree Fee**  A fee is charged to each recipient of an advanced degree according to the following schedule:

- Doctoral Degree  $25.00
- Master’s Degree (With thesis)  20.00
- Master’s Degree (No thesis)  10.00

This fee may be paid at any time but must be paid prior to the last date established for submission of dissertations or Master’s theses for each of the three graduation periods.

It is the responsibility of the degree candidate to pay the appropriate amount at the Graduate College Office, 335 Waterman in order to have a degree awarded.

**Student Housing**  A limited number of University owned apartments are available for married full-time students. Located just outside Winooski on Route 15 at Fort Ethan Allen, these apartments are on a bus route five miles from the main campus. Detailed rental information may be obtained from the Ethan Allen Housing Office, 600 Dalton Drive, Winooski, Vermont 05404. Telephone (802) 656-3228.

A limited number of University owned apartments for single graduate students are available at Fort Ethan Allen. These spacious apartments, which were formerly army officers’ quarters, will each accommodate approximately eight students. For the 1981-82 academic year, rent, which includes all utilities except telephone, will be $173 per month for half of a double room, $201 per month for a single. A nine-month lease and $50 deposit are required. Summer occupancy is available at the option of the student. Free and frequent transportation to and from campus is provided. Detailed rental information may be obtained from the Ethan Allen Housing Office listed above.

Up-to-date listings for available apartments, houses, and rooms for rent in the area are maintained by the Department of Residential Life. This service allows community landlords and rental agents a way to make known their housing availability to persons associated with the University. Students may examine up-to-date listings at the Billings Center or on a bulletin board just off the College Street entrance of Waterman Building on the main campus. The University is not responsible for the
approval of off-campus housing facilities, and it is impractical to send information concerning individual listings by mail. A catalog of available listings is issued each May, August, and December at the Office of Residential Life, 25 Colchester Avenue, Burlington, Vermont 05405. Telephone (802) 656-3434.

Living Expenses  Rents in the Burlington area vary from approximately $40.00 per week for a single furnished room to $400—$500 or more per month for a two-bedroom apartment. A single student should expect minimum overall living expenses of approximately $500.00 per month. If desired, meals may be obtained in University dining halls.

Bill Adjustment  A refund of 100 percent will be processed for reductions effected prior to the start of the semester; an 80 percent refund will be in effect for reductions in enrollment taking place from the first day of classes through the end of the add/drop period (third week of classes); a refund of 40 percent will be allowed for reductions during the fourth and fifth week of classes; no refund will be processed thereafter. At the end of the semester, an audit will be made of each student’s record. If the audit reveals total hours are greater than at the end of the specified drop period, the student will be financially liable for the number of hours for which he was enrolled. Students will be charged for all hours as specified in policy statements regarding tuition.

Withdrawals  A student may voluntarily withdraw from the University by notifying the Graduate Dean and the Registrar. Withdrawal for reasons of health requires the approval of the University physician. In either case, the student will receive a refund in accordance with the above policy. Date and time of withdrawal normally will be the date the withdrawal notice is received by the Registrar.

Dismissal  If a student is suspended or dismissed, a refund will be processed according to the above schedule.

Death  In case of death of the student, tuition which has been paid for the semester during which the death occurs will be fully refunded.
Students who wish to be considered for fellowships as well as admission must submit completed applications, with supporting material, by March 1 of the academic year preceding that for which application is made. All applicants requesting fellowship and traineeship support must submit scores received on the Graduate Record Examination.

Application for fellowships must be made by completion of the appropriate section on the application form. No separate form is required except where indicated herein.

Tuition scholarships accompanying Graduate Teaching, College, Research, and Student Personnel Fellowships do not cover physical education courses and activities, and cover courses numbered below 200 only upon prior approval of the Graduate Dean.

GRADUATE COLLEGE FELLOWSHIPS

The Graduate College offers ten fellowships in support of master’s degree programs in the social sciences and humanities. Five fellowships provide a full tuition scholarship (36 credit hour maximum) for the degree program. The remaining five fellowships provide both the scholarship and a stipend (currently $2,500).

These fellowships are open to applicants for Fall admission in the social sciences and humanities. Holders of Graduate College Fellowships are expected to carry full-time enrollment towards an advanced degree. The fellowships are not renewable and are not given to students previously enrolled in the Graduate College.

GRADUATE TEACHING FELLOWSHIPS AND GRADUATE RESEARCH FELLOWSHIPS

Graduate Teaching Fellowships are awarded in many of the departments offering graduate work. Graduate Teaching Fellows are generally appointed for nine months with stipends averaging $4,400. Teaching Fellows may enroll for a maximum of 10 hours per semester; the fellowship award includes a tuition scholarship covering the number of hours specified in the award letter but not to exceed 10 hours per semester in addition to the stipend for the period of the fellowship.

Graduate Research Fellowships are awarded in some of the science
departments offering graduate work. Fellows are appointed for nine or twelve months and receive stipends generally ranging from $5,100 to $5,800 (12 months), and a tuition scholarship. A maximum of half-time assistance in the department is expected of Graduate Teaching and Research Fellows, and they must expect that more than one academic year will be necessary to complete the requirements for the master’s degree. If a Teaching Fellow or Research Fellow is a candidate for the doctoral degree, at least four calendar years must be expected for completion of the academic program. While it is customary, it is not obligatory that fellows select their fields of concentration in the departments in which they are appointed.

Appointments will be announced on or about the first week in April.

STUDENT PERSONNEL FELLOWSHIPS
Graduate students, men and women, are eligible to apply for Student Personnel Fellowships. The candidates selected to fill these positions will normally be assigned administrative and advisory positions in the residence halls, although limited opportunities in other student services areas are available as well. Student Personnel Fellows have the opportunity to gain valuable experience in the areas of group advising, administration, personal advising, and educational programming. Such positions are open to either married or single students who have been accepted for graduate work in any of the academic programs of the University of Vermont. Selection is based upon academic record, character, recommendations, and quality of related experiences. A personal interview is required. Student Personnel Fellows receive a stipend of $4,400 plus a tuition scholarship covering a maximum of 9 credit hours per semester for a nine-month period. Room and board is deducted from this stipend for those persons holding Fellowships in the residence halls. Requests for applications and additional information should be addressed to Office of Residential Life, Mansfield House. Applications received after March 1 will be considered only for unanticipated openings. Appointments will be announced on or about May 1.

GRADUATE TRAINEESHIPS
Graduate traineeships are available in certain departments through grants from various state and federal agencies. Traineeships are available currently to graduate students enrolled in the following departments: Biochemistry, Communication Disorders, and Psychology. These traineeships generally carry stipends and include payment of tuition. The chairperson of the department concerned should be contacted for information on the availability of these awards.
GRADUATE ASSISTANTSHIPS

Graduate Assistantships are generally available when a department member receives a grant from a source external to the University. The appointment may be for either nine or twelve months at a starting salary starting of about $5,960 and $7,210 per appointment period. Part of the salary is for tuition at the in-state rate with a maximum enrollment of ten credit hours each semester and six credit hours during the summer.

A maximum of one-half time assistance on the research project is expected and more than one academic year will be necessary for the completion of the master’s degree and at least four calendar years for completion of the doctoral degree. For information on the availability of an assistantship, contact the chairperson of the department concerned.

GEORGE H. WALKER DAIRY FELLOWSHIP

The George H. Walker Dairy Fellowship, which is awarded periodically, provides a stipend plus a full tuition scholarship. It is available to graduate students who, during their undergraduate courses, have studied “agriculture, chemistry, and bacteriology” and who desire to study the problems relating to the production of a sanitary milk supply on comparatively small plants and farms. Applications should be addressed to the Chairperson of the Department of Animal Sciences.

HUMPHREY CHEMICAL COMPANY FELLOWSHIP IN HYDROCARBON SYNTHESIS AND GEICO FELLOWSHIPS

These fellowships are awarded annually to qualified students in the chemistry department working toward a Ph.D. The amount of the stipend is consistent with University policy determined by the Graduate College Office.

OTHER FELLOWSHIPS

A limited number of fellowships established by private donors are available periodically in selected departments.
Financial Aid

The University is able to provide, through the Office of Financial Aid, long-term loans and/or work-study jobs for students who have demonstrable need for such aid.

LOANS
The loans are primarily from the federally funded National Direct Student Loan (formerly National Defense Student Loan). The availability of such loans is dependent on the level of federal allocation to the University. In addition the University has a limited amount of endowed loan funds. Both types of loan are interest-free while the student is in at least half-time attendance in a degree program; repayment and interest at the rate of 4 percent begins when the loan goes into repayment status.

Guaranteed Student Loans (GSL) may be obtained through private lenders, generally banks, and are not part of the financial aid award provided by the university. GSLS are interest-free while the student is at least half-time in a degree program and carry an interest rate of 9 percent when the student drops below half-time or leaves school.

WORK-STUDY
The College Work-Study Program (CWSP) provides financial assistance through employment on campus or with certain kinds of off campus agencies. Every effort is made to place students in jobs related to their field of study, interest, and skills. The amount of CWSP assistance committed reflects both the degree of financial need and a reasonable projection of the amount it is possible to earn at a rate of pay commensurate with the student’s skills and experience.

Additional information and application forms are available from the Office of Financial Aid, 330 Waterman Building. Only one application is needed in order to apply for either type of aid, as the applicant is able to indicate on the application if one or the other, or both are preferred.

Interested students are encouraged to contact the Office of Financial Aid shortly after acceptance to graduate study since time is required for the processing of financial aid applications and awards. Generally, the University is unable to fund the full level of student need through the NDSL and CWSP. As a result, it may be necessary for the student to meet an initial level of need through the GSL program prior to the offer of NDSL and CWSP assistance.
FINANCIAL AID REFUND POLICY

For students receiving financial aid, change in student status or credit hour load may result in revision or loss of that financial aid, depending on the regulations of the particular aid programs involved. Except when aid program regulations specify otherwise, any such change which reduces the student’s University charges will usually result in a matching reduction of the financial aid award, with that reduction prorated among all aid sources making up the award. Such reduction of aid will usually require immediate repayment of the aid so reduced.

VETERANS BENEFITS

Students who are eligible to receive educational benefits from the Veterans Administration should obtain advice from the University Registrar.
Courses of Instruction

Course Numbering

Courses numbered 400 or above are limited to candidates for the degree of Doctor of Philosophy; courses numbered 300 to 399 are limited to graduate students; courses numbered 200 through 299 are advanced courses for undergraduates which may also be taken for graduate credit by graduate students. To obtain graduate credit the graduate student generally is expected to meet higher qualitative or quantitative expectations than the undergraduate student. Courses numbered 100 to 199 may not be taken for graduate credit except upon recommendation of a student’s studies committee and with the authorization of the Dean prior to enrollment. Non-degree students are not permitted to receive graduate credit for courses numbered 100-199. Under no circumstances will graduate credit be allowed for a course numbered below 100.

The form 201, 202 indicates that they may be taken independently for credit.

The form 201-202 indicates that they may not be taken independently for credit and, unless otherwise stated, must be taken in the sequence indicated.

The number of credit hours per semester is indicated in each description.

All prerequisites cited refer to courses as numbered at the University of Vermont.

A student who lacks the stated prerequisites for a course, but is otherwise qualified to take it, may be permitted to enroll by the instructor.

While every attempt has been made to list only courses that actually will be offered, the College necessarily must reserve the right to withdraw scheduled offerings or substitute for them should circumstances make such changes necessary.

AGRICULTURAL AND RESOURCE ECONOMICS

Professors Sargent, Sinclair, Tremblay, and Webster (Chairperson); Associate Professors Fife, Gilbert, and Pelsue; Extension Professors Bevins, Eddy, and Houghaboom.

The department conducts research in agricultural production economics, marketing, and business management. It also has an active research program in the economics of recreation, regional planning and rural development, rural land use and taxation, and environmental quality and control.
The department offers options in two areas: Agricultural Economics and Resource Economics. Students interested in rural planning may select either option. Each student selects an option and then develops, with a studies committee, an academic program.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE**

For the agricultural economics option: an undergraduate degree in agriculture, economics, business administration or a related area. For the resource economics option: an undergraduate degree in resource use, economics, recreation, forestry, or in the natural sciences.

All students must present satisfactory scores on the Graduate Record Examination. Transcripts are evaluated on an individual basis but must include courses in math, statistics, and economic theory, or these courses must be taken for nongraduate credit.

**MINIMUM DEGREE REQUIREMENTS**

Advanced courses in agricultural and resource economics, general economics, or related fields, 21 to 24 hours, thesis research 6 to 9 hours, for a total of 30 hours.

**COURSES OFFERED**

201 **FARM BUSINESS MANAGEMENT** Organization and operation of successful farm businesses with emphasis on resource allocation, production efficiency, and marginal analysis. Field trips required. *Prerequisites:* 61 or Economics 12; Junior standing; College of Agriculture major. Three hours. Tremblay.

205 **RURAL COMMUNITIES IN MODERN SOCIETY** See Sociology 205. Three hours. Schmidt.

207 **MARKETS, FOOD, AND CONSUMERS** Market structure, prices, and economic forces involved in the movement of farm products from producers to consumers. *Prerequisite:* 61 or Economics 12. Three hours. Webster.

208 **AGRICULTURAL AND FOOD POLICY** History and institutional development of agricultural policy. Price and income problems of American agriculture and alternative solutions. *Prerequisite:* 61 or Economics 12. Three hours. Staff.

210 **MARKETING INSTITUTIONS** Agricultural marketing institutions servicing northeastern U.S. Reading, lectures, and extended field trip. *Prerequisites:* Six hours in agricultural economics and permission of instructor. Three hours. Webster and Tremblay.

218 **COMMUNITY ORGANIZATION AND DEVELOPMENT** See Sociology 207. Three hours. Schmidt.

222 **NATURAL RESOURCES EVALUATION** An analysis of economic procedures used in the evaluation of public natural resource developments, with emphasis on benefit-cost analysis. *Prerequisite:* 121. Three hours. Gilbert.
225 ECONOMICS OF OUTDOOR RECREATION AND TOURISM A socioeconomic analysis of recreation and tourism as an industry. Emphasis on regional, state, and community impact. Prerequisites: 61 or Economics 12. Three hours. Gilbert.

233 RURAL PLANNING Study of rural, regional, water, and natural resource planning concepts and principles. Field exercises in plan evaluation, carrying capacity, agricultural land protection, growth control, etc. Prerequisite: Senior standing and 61 or equivalent. Three hours. Sargent.

234 PRACTICUM IN RURAL PLANNING Off-campus planning experience for seniors and graduate students. Prerequisite: 233 and consent of instructor. One to six hours credit. Sargent.

235 LEGAL ASPECTS OF PLANNING AND ZONING An examination of Vermont planning and zoning law with comparisons with other states. Cases in planning and zoning and land use controls. Prerequisite: Senior standing or permission of instructor. Three hours. Staff.

234 PRODUCTION ECONOMICS Principles and application of the economics of production in agriculture; emphasis on factor use, enterprise selection and combination, and decisionmaking. Prerequisites: 61 or Economics 12; Mathematics 18 or 19; or by permission of instructor. Three hours. Pelsue.

254 PRODUCTION ECONOMICS Readings and discussion of selected topics in economics at an advanced level. Prerequisite: Departmental permission. Credit as arranged. Staff.

264 AGRICULTURAL PRICE ANALYSIS AND FORECASTING Analysis and measurement of factors affecting supply, demand, and elasticity; their relation to the level and changes of market prices; and use of quantitative techniques in forecasting. Prerequisites: 61 or Economics 12, Mathematics 18 or 19, or by permission of instructor; Statistics 111 helpful. Three hours. Pelsue.

266 ECONOMICS OF MANAGERIAL DECISIONS Applying economic concepts to problems of capital budgeting, tax planning, pricing, demand analysis, and discounting cash flows. Cases. Prerequisite: Economics 12 or equivalent. Three hours. Fife.

271 AGRICULTURE IN ECONOMIC DEVELOPMENT The role of agriculture in development of less developed countries. Discussion of alternative economic development models. Review of various development programs, including Mexico, China, France, Yugoslavia. Prerequisite: 61 or Economics 12. Three hours. Sargent.

272 SEMINAR ON WORLD FOOD PROBLEMS AND POLICIES Review of recent books and periodical literature; discussion and written or oral reports on topics of contemporary interest. Prerequisite: 271 or permission. Three hours. Staff.

287 SPATIAL ANALYSIS See Geography 287. Three hours. Bodman.
322 ADVANCED RESOURCE ECONOMICS  A critical evaluation of contemporary natural resource allocation procedures in the public sector. *Prerequisite:* 222 or equivalent. Three hours. Gilbert.

351 RESEARCH METHODS  The scientific method, statistical methods, sampling methods, use of electronic computers, linear programming, reporting research results. *Prerequisite:* Three hours of statistics. Three hours. Pelsue.

381 AGRICULTURAL AND RESOURCE ECONOMICS SEMINAR  Discussion problems and research in agricultural and resource economics and regional planning. One hour. Staff.

391 MASTER’S THESIS RESEARCH  Credit as arranged. Staff.

ANATOMY AND NEUROBIOLOGY

*Professors Parsons (Chairperson), and Young; Associate Professors Freedman, Kriebel, Krupp, and Wells; Assistant Professors Ariano, Boushey, Fiekers, Kromer, and Schwaber.*  
Instructor Wait, Lecturer Fonda.

Departmental research activities center around investigations on nervous system structure and function and thyroid cytophysiology. Specific areas of interest include physiology and pharmacology of synaptic transmission, cytochemistry of neurotransmitter and cyclic nucleotide interactions in the basal ganglia, development of monoamine neurons *in vivo* and *in vitro*, neuronal regeneration and plasticity using intracephalic implants of embryonic tissue into adult CNS, analysis of the avian motor system, neural control of circulation, the caudal neurosecretory system of fish, neuronal "sprouting" and recovery of function, and cellular dynamics of thyroid follicular cells. Additional opportunities exist for a multidisciplinary program in Neurobiology. Preference for admission and financial support will be given to Ph.D. applicants.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE**

Bachelor's degree; a course in Organic Chemistry or Biochemistry; at least two semesters of advanced Biology; one course in College Physics; at least one course in Calculus. Graduate Record Examination required.

**MINIMUM DEGREE REQUIREMENTS**

30 credits of courses and research, including Anatomy 301, 302, 311; comprehensive examination. Additional credits as arranged for laboratory research leading to a dissertation (Anatomy 391).

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

Bachelor's Degree; a course in Organic Chemistry or Biochemistry; at least two semesters of advanced Biology; one course in College Physics; at least one course in Calculus. Additional courses in Differential Equations, Statistics, Computer Science, and Physical Chemistry are recommended. Graduate Record Examination required. A Master's degree is not a prerequisite for the Ph.D. degree.
MINIMUM DEGREE REQUIREMENTS

Anatomy 301, 302, 304, 305, 491, Physiology 301, Biochemistry 301, 302. Additional elective courses and teaching assignments as arranged with the department; departmental research rotations; dissertation research; credits as required by the Graduate College. Candidacy examination; successful completion of dissertation.

COURSES OFFERED

Note: Departmental permission for all courses.

201 HUMAN GROSS ANATOMY Emphasizes the structure, function and clinical correlations of the musculoskeletal, peripheral nervous, cardiovascular and respiratory systems. Laboratory includes detailed regional dissections, prosections, other demonstrations and microscopic anatomy of selected tissues. Required for physical therapy students. Five hours. Kriebel, Ariano.

202 NEUROANATOMY AND HISTOLOGY Structural basis of human nervous system function, presented from peripheral nervous system and spinal reflex organization to detailed analysis of motor and sensory systems, with clinical examples. Laboratory includes dissection of the human brain; selected microscopic slides; demonstrations. Required for physical therapy students. Three hours. Schwaber.

301 MEDICAL GROSS ANATOMY This course consists of individualized laboratory instruction, small group conferences and clinically correlated lectures. It provides a sound base of anatomical information and stresses the importance of the relationship between normal human structure and function. Six hours. Krupp, Boushey, Fonda.

302 NEUROSCIENCE A correlated presentation of the neuroanatomy and neurophysiology of the mammalian central nervous system. The course consists of lectures, demonstrations, laboratory, and clinical correlation workshops. Prerequisite: Permission of instructor. Four hours. Anatomy and Physiology Staff.

304 TOPICS IN NEUROSCIENCE A supplementary course to the medical neuroscience course designed for graduate students which will provide more detailed information concerning the neuroanatomy, neurochemistry, and neurophysiology of cellular and systems neuroscience. Prerequisites: concurrent registration with 302, permission of staff. Two hours. Anatomy and Neurobiology and Physiology staff.

305 TECHNIQUES IN NEUROBIOLOGY Discussion and demonstration of a variety of different techniques used in the study of the nervous system. Demonstrations include experience with light, fluorescence, and electron microscopy, microsurgical procedures, electrophysiological stimulating and recording techniques, and neuronal tracing techniques. Prerequisites: 302, 304 and permission of staff. Three hours. Anatomy and Neurobiology and Physiology staff.
311 MEDICAL HISTOLOGY  The course as presented to medical students. Microscopic study of cells, tissues and organs emphasizing the correlation of structure and function. Three hours. Fiekers, Freedman, Wells, Young.

323 NEUROENDOCRINOLOGY  Consideration of the diencephalic regulation of hormonal activity. The major emphasis will be devoted to morphological features of hypothalamic mechanisms controlling pituitary hormone secretion. Prerequisite: Anatomy 302. Two hours. Kriebel, Freedman. Alternate years.

324 ADVANCED NEUROANATOMY  A detailed analysis of the morphology of the nervous system as presented through lectures and laboratory. A regional approach to the anatomy is supplemented by units on development, blood supply, and the autonomic nervous system. Laboratory exercises will consist of brain dissection and microscopic examination of brain stem sections. Prerequisite: Anatomy 302. Three hours. Staff.

342 SPECIAL DISSECTIONS IN GROSS ANATOMY  This course provides for a detailed and independent study of a single anatomical region, utilizing gross, microscopic and embryologic materials. Prerequisite: Anatomy 301. Credit as arranged. Krupp, Boushey.

381 SEMINAR IN ANATOMY AND NEUROBIOLOGY  Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences. Prerequisite: Graduate standing. Credit as arranged.

391 MASTER'S THESIS RESEARCH  Credit as arranged.

392 INDEPENDENT LITERATURE RESEARCH  Reading and literature research of a topic of current interest in Anatomy leading to a review paper. Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH  Credit as arranged.

ANIMAL PATHOLOGY
Professor Bolton (Chairperson); Associate Professors Kunkel and Murray; Extension Professor Wadsworth.

Research interests include virus agents as causes of abortions and breeding problems in dairy cattle, improved diagnostic techniques for bovine brucellosis and a study of growth and milk production from parasite-controlled dairy heifers. Fluorescent antibody techniques are being evaluated as diagnostic aids.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
The degree of Doctor of Veterinary Medicine.

MINIMUM DEGREE REQUIREMENTS
Candidates will elect a major concentration in Anatomy and Neurobiology, Animal Science, Biochemistry, Microbiology, Pathology or Physiology and Biophysics; additional courses in related fields; thesis research (12-15 hours).

391 MASTER'S THESIS RESEARCH  Credit as arranged.
ANIMAL SCIENCES

Professors Atherton, Balch, Bull (Chairperson), Duthie, Foss, Nilson, Smith, and Welch; Associate Professor Simmons; Assistant Professor Gilmore; Extension Associate Professor Gibson; Extension Assistant Professor Wildman.

Research activities in basic and applied science encompass a broad range of interests. The areas of study and research include genetics; nutrition; physiology; dairy and food plant management, chemistry, or bacteriology; quality control aspects of the food industry.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An acceptable undergraduate major in the Animal Sciences, Chemistry, Biology, or a related field. Satisfactory scores on the Graduate Record Examination must be presented.

MINIMUM DEGREE REQUIREMENTS

15-21 hours in Animal Sciences and related fields; thesis research (9-15 hours).

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Satisfactory scores on the Graduate Record Examination must be presented. The applicant must satisfy the prerequisites of the Graduate College and pass the general qualifying examination administered by the Department of Animal Sciences.

MINIMUM DEGREE REQUIREMENTS

The Department of Animal Science believes each graduate program has its individual needs and must be arranged accordingly. The candidate must meet all the requirements as prescribed by the Graduate College for the degree of Doctor of Philosophy. In addition, all courses and seminars as established by the Studies Committee must be satisfactorily met, doctoral research must be completed, and an acceptable dissertation written and defended. In accord with the policy of the Animal Sciences Department, all doctoral students will be provided the opportunity to participate in the department's undergraduate teaching program. Proficiency in a modern foreign language or computer language and programming is optional at the discretion of the Studies Committee.

COURSES OFFERED

211 ICE CREAM AND FROZEN DAIRY PRODUCTS Fundamentals of ice cream manufacturing, the physico-chemical and biological factors involved; calculation of formulas; sherbets and specialties; merchandising; and sanitary control. Prerequisites: ASCI 33 or 153 and 104; credit or concurrent enrollment in 109. Three hours. Nilson. Alternate years, 1981-82.
232 QUANTITATIVE GENETICS IN ANIMAL AND PLANT IMPROVEMENT Principles of quantitative and statistical genetics are studied in relation to animal and plant breeding. Methods of selection schemes of mating are discussed. Prerequisites: Introductory course in genetics; Statistics 111 or permission of instructor. Three hours. Gilmore.

249 NUTRITION SEMINAR See Human Nutrition and Foods 249. Two hours. Staff.

250 ADVANCED DAIRY CATTLE MANAGEMENT The organization and operation of dairy enterprises. Theories and methods of application of feeding, breeding, and management programs and principles. Prerequisite: 140; Minimum, junior standing. Three hours. Wildman.

270 ENDOCRINOLOGY Anatomy, physiology, glandular interrelationships, and assay methods of the endocrine glands and their hormones. Prerequisite: Departmental permission. Four hours. Simmons.

275 PHYSIOLOGY OF REPRODUCTION AND LACTATION Fundamental principles of the physiology of reproduction and lactation with the primary emphasis on farm animals. Three hours. Simmons.

282 ANIMAL SCIENCES SEMINAR Reports and discussions of problems and special investigation in selected fields. One-three hours. Maximum credit three hours. Staff.

291 SPECIAL PROBLEMS IN ANIMAL SCIENCES Reading, discussion, and special laboratory investigation in the field of animal sciences. Prerequisite: Departmental permission. Three hours. Staff.

307 ADVANCED CONCEPTS IN NUTRITION Study of chemistry and physiology of digestion, absorption and metabolism of nutrients. Methods of estimating and meeting dietary requirements for maintenance, growth, and reproduction of several species. Prerequisite: One of the following: 242, Human Nutrition and Foods 242, or a 200 level course in biochemistry. Three hours. Staff. Alternate years, 1981-82.

308 EXPERIMENTAL TECHNIQUES IN NUTRITION Methods of conducting research in nutrition with the various animal species including humans. Physical, physiological and biochemical aspects considered. Experimental design and analyses. Prerequisites: A 200 level course in nutrition and in biochemistry. Two hours. Staff.
391 MASTER’S THESIS RESEARCH  Credit as arranged.
491 DOCTORAL DISSERTATION RESEARCH  Credit as arranged.

ANTHROPOLOGY
Professors Haviland, Mitchell (Chairperson); Associate Professors C. Pastner, S. Pastner, Power, and Woolfson; Assistant Professor Gordon; Research Assistant Professor Thomas.

No Graduate Program Offered
Research activities in anthropology include the investigation of prehistoric social organization and change among the Maya; the study of French Vermonters and biculturalism; the ethnography of pastoral nomads; the archaeology of Vermont; tradition and change in Africa and New Guinea; the organization of American-Jewish kinship; and the study of therapeutic systems in New Guinea and the United States.

200 FIELD WORK IN ARCHAEOLOGY  Methods and techniques of archaeological investigation in field situations and laboratory analysis of data. **Prerequisites:** 24, one 100 level course in anthropology or history, and permission of instructor. Three to six hours. Summers only. Haviland, Power.

210 ARCHAEOLOGICAL THEORY  The development of archaeology from the 19th century to the present including concepts of form, space and time, intellectual attitudes, current systems theory and research strategies. **Prerequisites:** 24 and one 100 level anthropology course; or HP 201; or graduate standing in Historic Preservation Program, or History 105, 106, or 107. Three hours. Power.

212 CULTURE AND PERSONALITY  The crosscultural comparison of personality development; the problem of delineating modal personality types. **Prerequisites:** 21, Sociology 10 and one 100 level course in sociology or anthropology. Three hours. Mabry, Mitchell, Steffenhagen.

225 ANTHROPOLOGICAL THEORY  Schools of Anthropological thought in relation to data on non-western societies and the historical and social context in which the anthropologist works. **Prerequisites:** 21 and one 100 level course. Three hours. C. Pastner.

228 SOCIAL ORGANIZATION  Examination of the basic anthropological concepts and theories used in the cross cultural analysis of kinship, marriage, and associations. **Prerequisites:** 21 and one 100 level course. Three hours. Mitchell.

229 POLITICAL AND ECONOMIC ANTHROPOLOGY  The analysis of traditional exchange and subsistence systems and the ways these relate to interest-based, or political behaviors. **Prerequisites:** 21 and one 100 level course. S. Pastner. (Not offered 1981-82 but not to be dropped.)

283 CULTURE CHANGE  The study of socio-cultural transformations in non-western countries with emphasis on such topics as industrialization, urbanization and modernization and their impact on the lives of previously
traditional peoples. **Prerequisites:** 21 and one 100 level course, or 21 and six hours in the social sciences. Three hours. Alternate years. Gordon.

290 METHODS OF ETHNOGRAPHIC FIELD WORK Examination of the theoretical and ethical premises of field work methodology with practical experience in participant observation, interviewing, the genealogical method and the recording of date. **Prerequisite:** Twelve hours of anthropology. Three hours. Mitchell.

295, 296 ADVANCED SPECIAL TOPICS **Prerequisites:** 21 and one 100 level course.

**ART**

*Professors Janson and Zucker (Chairperson); Associate Professors Davison, Hewitt, Lipke, and Owre; Assistant Professors Blasdel, Fengler, Higgins, McIntyre, Okino, Rindler, and Roland; Instructor Spivak; Lecturers Aschenbach and Liebs.*

**No Graduate Program Offered**

207 STUDIES IN AMERICAN ART OR ARCHITECTURE Selected topics in American art and/or architecture, individual research and reports. Three hours. Janson or Lipke.

282 DIRECTED STUDIES Individual or group study in a special area. **Prerequisites:** Six hours advanced, three in the chosen area and permission. Three hours.

**BIOCHEMISTRY**

*Professors Bresnick (Chairperson), Lamden, Meyer, J. Thanassi, and Woodworth; Associate Professors Auletta, Chiu, Cidlowski, Cutroneo, and Hart; Research Associate Professor Ehrlich; Research Assistant Professors Eastman, Little, N. Thanassi, Tierney.*

Current research programs include studies of mechanisms controlling ovarian function (F. Auletta); the relationship of polycyclic hydrocarbon metabolism to carcinogenesis (E. Bresnick); nuclear protein chemistry (J.-F. Chiu); biochemical endocrinology (J. Cidlowski); the effects of anti-inflammatory steroids on proline metabolism and collagen synthesis (K.R. Cutroneo); DNA repair mechanisms (A. Eastman); neurochemistry of receptor function and molecular mechanisms of neuronal plasticity (Y. H. Ehrlich); the toxicity of cadmium and its reactions in biological systems (B.A. Hart); nutritional biochemistry; vitamins A, C, E and lipid peroxidation (M.P. Lamden); mammalian RNA and ribonucleases and their metabolic regulation and relation to neuromuscular disease (B. Little); regulatory mechanisms for protein and nucleic acid processing and breakdown in muscle (W.L. Meyer); chemistry and biochemistry of vitamin B₆ (J.W. Thanassi); and the nature of the binding of metals to proteins, particularly the ironbinding proteins of blood plasma (R.C. Woodworth).
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Year courses in organic chemistry, physical chemistry, and physics (equivalent to Chemistry 141, 142 or 143, 144, Chemistry 162 and Physics 15, 16); quantitative chemistry; mathematics through differential and integral calculus; a year course in a biological science.

MINIMUM DEGREE REQUIREMENTS

Thirty credit hours, sixteen of which must be taken from graduate courses offered by the Department of Biochemistry, including Biochemistry 301, 302, 303, 381, and 391 or 392.

Thesis Option
Up to fourteen credit hours of Master's Thesis Research (Biochemistry 391.)

Non-thesis Option
Up to eight credit hours of Independent Literature Research (Biochemistry 392.)

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Year courses in organic chemistry, physical chemistry, and physics (equivalent to Chemistry 141, 142 or 143, 144, Chemistry 162, and Physics 15, 16); quantitative chemistry; mathematics through differential and integral calculus; a year course in a biological science.

MINIMUM DEGREE REQUIREMENTS

A total of seventy-five hours, including twenty hours from graduate courses offered by the Department of Biochemistry including Biochemistry 301, 302 or 305-306, 303 and participation throughout residence in Biochemistry Seminars; three hours from graduate courses offered by the Department of Chemistry; ten additional hours from courses in physical or biological sciences; thirty hours of Doctoral Dissertation Research.

COURSES OFFERED

Biochemistry 211-212, 301-302, 303, 305-306, and 381 are offered annually. Advanced courses are given in alternate years.

211-212 BIOCHEMISTRY FOR HEALTH SCIENCES Primarily for medical technology students. Lectures provide a comprehensive study of mammalian biochemistry particularly as it relates to man. Medically-oriented experiments utilizing modern clinical chemistry techniques are performed in the laboratory. Case studies from the files of the MCHV are used to correlate lecture and laboratory material. Prerequisites: 102 or quantitative chemistry; organic chemistry. Physiology is strongly recommended. Four hours per semester. Hart.
301-302 GENERAL BIOCHEMISTRY Survey of biochemistry primarily for students majoring in the sciences. Topics include the chemistry, structure, metabolism, and function of proteins, amino acids, carbohydrates, lipids, and nucleic acids; enzymes; bioenergetics; respiratory processes; cellular and physiological control mechanisms. Prerequisites: Chemistry 141, 142 or 143, 144 and departmental permission. Three hours per semester. Staff.

303 BIOCHEMISTRY LABORATORY Experimental work designed to demonstrate important principles and to illustrate methods and techniques of modern biochemistry. Prerequisites: 301, 302 or 305-306, or concurrent registration therein, and departmental permission. One to four hours. Staff.

305-306 MEDICAL BIOCHEMISTRY For medical students. A survey of physiological and molecular biochemistry with special reference to man: chemistry and metabolism of cellular and dietary constituents; enzymes and bioenergetics; blood, respiration, acid-base balance, and mineral metabolism; metabolic controls. Prerequisites: Chemistry 141, 142 or 143, 144 and departmental permission. Given on a trimester basis in the College of Medicine calendar; equivalent to three hours per semester for two semesters. Staff.

307, 308 SPECIAL TOPICS IN BIOCHEMISTRY Areas of biochemistry not treated in concurrent offerings of advanced courses. Topics are from the fields of intermediary metabolism, organic and physical biochemistry, enzymology, and physiological chemistry. Two areas will usually be covered each semester. Prerequisites: 301, 302 or 305-306; Chemistry 162. Two hours per semester. Staff.

320 GENERAL ENZYMEOLOGY A general consideration of enzyme nomenclature, purification, assay, introductory kinetics, mechanisms, cofactors, active sites, subunit structure, allosteric and regulatory properties, and the control of multienzyme systems. Prerequisites: 301, 302 or 305-306; Chemistry 162. Three hours. Meyer.

331 NUCLEIC ACIDS The structure and function of ribonucleic acids and deoxyribonucleic acids. Prerequisites: 301-302 and 305-306. Two hours. Chiu and Cutroneo.

340 BIOORGANIC CHEMISTRY Organic reaction mechanisms as related to substances or biochemical interest, with emphasis on catalytic mechanisms. Prerequisite: 301, 302 or 305-306. Two hours. Thanassi.

367 BIOCHEMICAL ENDOCRINOLOGY Studies of the biochemical mechanisms by which hormones recognize and interact with eukaryotic cells. Topics will include detailed analysis and comparison of the metabolic action and mechanisms of gene activation by hormones. Prerequisites: 301, 302 or permission. Three hours. Cidlowski.

371 PHYSICAL BIOCHEMISTRY Protein interaction, solubility and fractionation, electrophoresis, sedimentation, phase rule study, diffusion, viscosity, spectrophotometry, and related topics. Prerequisites: 301, 302 or 306; Chemistry 160 or 162. Three hours. Woodworth.
375 CANCER BIOLOGY  Designed to give students in the Health Sciences an overview of cancer biology and to provide the foundation for individuals interested in cancer research. Lecture format; interdisciplinary viewpoint; outside lecturers. Prerequisites: 301-302 or 305-306; under special circumstances, 211-212. Three hours per semester. Bresnick.

381 SEMINAR  A review of recent developments and current literature in the various fields of biochemistry. Prerequisite: Departmental permission. One hour per semester.

391 MASTER'S THESIS RESEARCH  Credit as arranged.

392 INDEPENDENT LITERATURE RESEARCH  Reading and literature research culminating in a paper on a topic of current interest in biochemistry. Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH  Credit as arranged.

BIOMEDICAL ENGINEERING
A cooperative program offered by the Department of Electrical Engineering (S. Rush, Chairperson) and the Department of Physiology and Biophysics (N.R. Alpert, Chairperson).

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
An accredited bachelor's degree in Electrical or Mechanical Engineering satisfies the principal requirements. Courses in biology and chemistry may be recommended as prerequisites. Applicants with backgrounds other than Electrical or Mechanical Engineering will generally be required to make up undergraduate deficiencies.

MINIMUM DEGREE REQUIREMENTS
Physiology and Biophysics 301; twelve hours in Electrical or Mechanical Engineering, Physics and Mathematics; additional approved courses; thesis research (6-12 hours) in the Department of Electrical or Mechanical Engineering. Each applicant should consult the department to determine if the program offered meets his specific educational objectives.

Biomedical engineering is one of the areas of research interest in the graduate programs in Electrical and Mechanical Engineering.

BIOSTATISTICS
This program is administered through the Statistics Program. Dr. D.L. Sylwester is the program director.

The Program offers a concentration in biostatistics leading to the M.S. Degree. The Curriculum takes full advantage of statistics courses taught in the
Statistics Program and includes experience in a variety of health, biomedical and related research projects at the University of Vermont. The curriculum is designed to give trainees maximal opportunity to use their academic training and work experience to assist in defining problems, formulating rational methods of inquiry, and gathering, analyzing, and interpreting data as they relate to the specific problem under investigation.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major which provides a foundation for the application of statistical methodology and concepts to health and biomedical problems. It is anticipated that candidates will have completed three semesters of calculus including matrix algebra methods. However, provisional admission to the program can be given prior to the completion of these requirements. Computer experience would be desirable. The Graduate Record Examination is strongly advised and is required of any applicant who wishes to be considered for a teaching fellowship.

MINIMUM DEGREE REQUIREMENTS

Plan A: Twenty-four semester hours of coursework. This would generally include Probability and Statistical Theory, Biostatistics 211, 221 and six hours of approved thesis research.

Plan B: Thirty semester hours of coursework. This would generally include Probability and Statistical Theory, Biostatistics 211, 221; no thesis required.

All students are expected to participate in the projects of the Biometry Facility and to attend the regular seminar series as part of their training. During the latter part of his training the student will be expected to take major responsibility for some project, including the presentation of the final report for this project.

COURSES OFFERED

211, 221 STATISTICAL METHODOLOGY I, II See Statistics 211, 221.
231 EXPERIMENTAL DESIGN See Statistics 231.
237 NONPARAMETRIC METHODS See Statistics 237.
262 STATISTICAL THEORY See Statistics 262.
254 MEDICAL SOCIOLOGY See Sociology 354.
381 BIOMETRY PRACTICUM See Statistics 281.
391 MASTER’S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

BOTANY

Profs. Etherton, Hyde, Klein, and Vogelmann (Chairperson); Assoc. Prof. Cook, Ulrich, and Worley; Assistant Prof. Barrington; Research Assoc. Prof. Laing and Morselli; Extension Assoc. Prof. Gottlieb; Research Assoc. Prof. Lintilhac.

The Botany Department has ongoing research programs in: ecology including plant communities, biogeography, limnology, phycology, bryology, and pteridology; physiology including growth and development, mineral nutrition, translocation, tissue culture, photobiology, cellular electrophysiology, and membrane function; phytopathology and physiological virology; and cell biology including ultrastructure of cytoplasm and nucleus, and genetics of fungi. The Botany Department participates actively in the Cell Biology Program and provides opportunities for interdisciplinary research with other life science departments.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Six semester courses in botany; supporting courses in other sciences and in mathematics. Satisfactory scores on the aptitude and advanced sections of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

15-21 hours in botany and closely related fields; thesis research (9-15 hours). Each candidate must participate in the teaching of at least one undergraduate course.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS IN TEACHING

The department offers a program leading to the degree of Master of Arts in Teaching: see page 24. Satisfactory scores on the Graduate Record Examination are prerequisites for acceptance to candidacy for this degree.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (BIOLOGY)

A bachelor's degree from an accredited institution and certification as a teacher of biology or an associated field. At least three years of secondary school teaching. Satisfactory scores on the Graduate Record Examinations.

MINIMUM DEGREE REQUIREMENTS

Thirty hours of course work to include a selection of courses in the Departments
of Botany and Zoology which will broaden and balance the undergraduate work in biology. At least two 200 level courses in each department. Courses in four of the five following areas: anatomy; morphology and systematics; genetics; developmental biology; and environmental biology. Up to 12 hours of 100 level courses may be used for the above requirement where approved by the advisor and the Dean. Appropriate courses in related science departments may be used to complete the required thirty hours. No thesis is required; however, each degree recipient must complete a written and oral examination.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

The following courses must have been satisfactorily completed: four semesters in botany; two semesters in zoology; a year of organic chemistry comparable to Chemistry 141, 142; two semesters of calculus comparable to Mathematics 21, 22 and in some cases a third semester of calculus comparable to Mathematics 121; a year of physics comparable to Physics 15, 16. Satisfactory scores in the Graduate Record Examination. In addition, a candidate must have completed one academic year, but not more than two years, in graduate study at the University of Vermont. (With the approval of the Dean of the Graduate College and the Department of Botany, a Master's degree may be accepted as partial or complete fulfillment of this requirement.) The specific language requirement for the candidate is to demonstrate ability to comprehend the contents of articles in the biological sciences in a modern foreign language appropriate to the student specialty and approved by the Studies Committee.

**MINIMUM DEGREE REQUIREMENTS**

The candidate is required to accumulate a minimum of 75 credits from course work and dissertation research. The course requirements are as follows: a total of at least 40 credit hours of which at least 20 must be taken in botany and at least 20 in other sciences. Supervised teaching to the extent of not less than 6 semester contact hours is also requisite.

**COURSES OFFERED**

205 MINERAL NUTRITION OF PLANTS Role of essential elements for plant growth including classical and modern approaches to the study of ion availability and transport. *Prerequisite:* 104. Three hours. Etherton. Alternate years, 1982-83.

213 PLANT COMMUNITIES Plant sociology; structure and organization of the plant community; sampling methods and analysis of data; climatic and edaphic factors; field work. *Prerequisite:* 109 or departmental permission. Three hours. Vogelmann.
229 WATER RELATIONS OF PLANTS  See Forestry 229.

232 BOTANY FIELD TRIP Trips to selected environments outside Vermont. Led by several faculty members representing different fields of Botany. Overall, integrated approach to ecology, structure, and function. One hour. Christmas or spring vacation or end of school year.

234 ECOLOGY OF FRESHWATER ALGAE Environmental factors influencing distribution and seasonal succession; quantitative methods for estimating standing crop productivity; kinetics of algal growth; competitive and synergistic interactions. Prerequisite: 160 or Biology 102. Three hours. Cook. Alternate years, 1982-83.

241 TROPICAL PLANT SYSTEMATICS The diversity of tropical flowering plant communities; recent systematic and evolutionary angiosperm research; anatomy, morphology, ecology and geography of major families. Student presentations on an aspect of recent research. Prerequisite: 109. Three hours. Barrington. Alternate years, 1982-83.

250 MICROTECHNIQUE Theory and practice in the preparation of biological materials for anatomical and cytological study, including histochemistry and photomicrography. Prerequisites: Introductory chemistry; some knowledge of organic chemistry, anatomy, or cytology is desirable. Three hours. Cook. Alternate years, 1981-82.

252 MOLECULAR GENETICS II: REGULATION OF GENE EXPRESSION IN EUKARYOTES Processing of information present in nucleic acids; knowledge generated from recombinant DNA techniques applied to higher cells; control in transposition, transformation, transcription, and processing transcript. Prerequisites: Biology 101 or Biochemistry 301, or equivalents; Medical Microbiology 211 preferred; permission of the instructor. Three hours. Ullrich.

255 STRUCTURE AND FUNCTION OF CHROMOSOMES Analysis of recombination in eukaryotes. Arrangement of DNA and proteins. DNA duplication and mapping of certain DNA regions. Molecular nature of meiotic processes and control of gene expression with particular reference to the nucleolus. Prerequisites: 101; Chemistry 42 or 141, 142. Three hours. Hyde.

257 PHYSIOLOGY OF THE PLANT CELL Detailed study of photosynthesis, plant cell membrane function, and plant cell growth. Prerequisites: 104; Chemistry 141, 142 or Chemistry 42; Physics 11, 12 or 15, 16; Four hours. Etherington. Alternate years, 1981-82.

281 BOTANY SEMINAR Presentations of personal research by faculty, graduate students, and outside guest speakers. Attendance required of botany graduate students and seniors in botanical research programs. Without credit.

295 SPECIAL TOPICS For advanced students within areas of expertise of faculty and staff. Aspects of ecology, physiology, genetics, cytology, bryology, pteridology, paleobotany, photobiology, membrane physiology, cell biology. Prerequisite: Permission of instructor. Credit as arranged.
301 CELL BIOLOGY  Advanced survey of cell organelles, their composition, origin and the relationship between their structure and function. Stress will be placed on recent literature and current controversies. **Prerequisites:** Chemistry 142, graduate standing in biology or permission of instructor. Three hours. Hyde.

381 SELECTED PROBLEMS IN MODERN BOTANY Subject matter varies but will stress recent botanical inquiries, particularly where they border on mathematics, physics, and chemistry. **Prerequisite:** Departmental permission. One to three hours credit.

391 MASTER'S THESIS RESEARCH  Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH  Credit as arranged.

**BUSINESS ADMINISTRATION**

*Professors Grinnell, Laber, and Severance (Chairperson); Associate Professors Gatti, Michael, Shirland, Squire and Tashman; Assistant Professors Battelle, Gurdon, Parke, and Rogowski.*

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF BUSINESS ADMINISTRATION**

The MBA program consists of three Tiers of courses. Tiers I and II must be completed successfully before a student is admitted to candidacy for the degree. Students will be admitted to the Graduate College before Tiers I and II are completed, and enrollment in Tier II courses will be restricted to students who have applied for admission to the Graduate College.

Elementary knowledge of computer programming is expected and may be acquired through the non-credit course available at UVM.

In addition to transcripts of prior undergraduate and graduate training, the applicant is required to submit scores on the Graduate Management Admissions Test. (GMAT scores are accepted in lieu of Graduate Record Examination scores for financial assistance in this program.)

**MINIMUM DEGREE REQUIREMENTS**

Students must complete all of the courses listed in Tiers I, II, and III. Tier I must be completed before enrollment in any Tier II courses.

**TIER I**

Electives from 300-level courses 9 hours

27 hours

A minimum of 30 hours of 300-level credit must be completed at UVM for the MBA degree.

COURSES OFFERED

304 FUNDAMENTALS OF MANAGERIAL DECISION-MAKING. An accelerated introduction to mathematical, statistical, and economic bases of managerial of managerial decision-making. Topics include mathematical techniques of optimization and linear programming, statistical measurement of demand, production and cost functions, and economics of output and price determination. Prerequisites: Tier I, MBA standing. One and one-half hours.

305 FUNDAMENTALS OF MARKETING MANAGEMENT An accelerated course focusing on marketing principles and theory. An analytical approach is taken to the study of product and pricing strategies; distribution, communication, and promotional; consumer behavior and the development of corporate marketing strategy. Prerequisite: MBA standing. One and one-half hours.

306 FUNDAMENTALS OF FINANCIAL ACCOUNTING An introduction to the basic concepts, assumptions, and conventions which provide the founda-
tion for developing financial statements. Emphasis is placed on analysis and interpretation of the income statement, balance sheet, and statement of changes in financial position. Prerequisite: MBA standing. One and one-half hours. Battelle/Grinnell.

307 FUNDAMENTALS OF MANAGEMENT AND ORGANIZATIONAL BEHAVIOR An accelerated study of individual and group behavior in organizational settings. A managerial perspective is used to examine theories of motivation, perception, communication, group dynamics, leadership, organization design, and organization development. Prerequisite: MBA standing. One and one-half hours. Battelle/Grinnell.

308 FUNDAMENTALS OF FINANCIAL MANAGEMENT An accelerated introduction to the principles of financial management. Tools and techniques of financial decision making are developed and applied through cases and problems to various decision faced by financial managers. Prerequisites: BSAD 306, MBA standing. One and one-half hours. Gatti/Laber/Rogowski.

309 FUNDAMENTALS OF LEGAL ENVIRONMENT OF BUSINESS A general overview of the areas of interaction between businesses and governments is developed. The course will examine governmental policy toward business and review the laws governing business-government interactions. Prerequisite: MBA standing. One and one-half hours. Squire.

340 QUANTITATIVE METHODS IN MANAGEMENT The application of statistical tools to management problems. Sampling, decision making, and strategy selection are covered. Prerequisite: MBA standing. Three hours. Shirland.

341 REGRESSION, TIME SERIES, AND FORECASTING. Application of regression analysis and of modern time-series techniques to managerial decision-making and forecasting. Case method approach. Instruction in use of computer programs included. Prerequisites: MBA standing. Three hours. Tashman.

359 MARKETING POLICY Concepts from quantitative methods, economics and the behavioral sciences are applied to marketing management. Included for consideration are: marketing opportunities, organizing for marketing, planning the marketing program and the control of marketing effort. Case book method. Prerequisite: MBA standing. Three hours.

360 CONTEMPORARY FINANCIAL ACCOUNTING AND REPORTING A study of current financial accounting and reporting practices, focusing on contemporary issues and problems. The impact of pronouncements of the Accounting Principles Board, the Financial Accounting Standards Board, the Securities and Exchange Commission, and other bodies is reviewed. Prerequisite: MBA standing. Three hours. Grinnell.

365 MANAGEMENT ACCOUNTING A study of the development and utilization of accounting information for product costing and pricing purposes, for routine planning and control of organizational activities, and for decision-making purposes. Prerequisite: MBA standing. Three hours. Grinnell.
371 PERSONNEL ADMINISTRATION The emphasis is on critical examina­tion of contemporary problems and controversies in the field of personnel administration. Current issues and topics such as affirmative action, and discrimination in employment will be covered alongside the more traditional topics of wage and salary administration, etc. Prerequisite: MBA standing. Three hours. Parke.

375 ORGANIZATION THEORY Organization theories are examined for insights into the behaviors of organizations and their members. An open systems perspective is used to identify contingencies in organization design based on human, structural, technological and environmental variables. Prerequisite: MBA standing. Three hours. Parke.

376 THE MANAGEMENT OF CHANGE IN ORGANIZATIONS This course adopts an applied behavioral science perspective to identify conceptual issues, develop diagnostic skills and examine alternative intervention strategies relevant to the accomplishment of planned changes in organizational systems. Prerequisite: MBA standing. Three hours.

380 MANAGERIAL FINANCE This course focuses on key financial decisions that affect the value of the firm. Topics include capital structure, leasing, mergers and acquisitions, and capital market theories and evidence. Prerequisite: MBA standing. Three hours. Laber.

382 INVESTMENT AND PORTFOLIO ANALYSIS Examination of the investment decision process. Specific topics include operations of equity securities markets, market efficiency, capital asset pricing model, and portfolio management. Prerequisites: 308, MBA standing. Three hours. Rogowski.

384 FINANCIAL MARKETS AND INTEREST RATES A study of the mechanism determining the level and structure of interest rates. Specific subjects include: flow of funds accounting, market vs. natural rate of interest, interest rate structure, and behavior of interest rates over the business cycle. Prerequisite: MBA standing. Three hours. Gatti.

394 INDEPENDENT READINGS & RESEARCH This course is intended to allow a student to pursue independent research under the direction of a faculty member. Normally, the course will include a research paper. Prerequisite: Permission of the Graduate Studies Committee. One to three hours.

395 SPECIAL TOPICS This course will include topics and material that may develop later into a regular course offering; in addition, it may include topics and material offered only once. Prerequisite: Permission of the Graduate Studies Committee. One to three hours.

396 BUSINESS POLICY A case course focusing on the resolution of complex cases involving simultaneous solutions of problems in two or more functional areas. Prerequisite: 21 hours of graduate credit. Three hours. Staff.
CELL BIOLOGY (Interdisciplinary)

Participating faculty are from the following departments: Botany; Biochemistry; Medical Microbiology; Medicine; Microbiology and Biochemistry; Pathology; Pharmacology; Physics; Physiology and Biophysics; Zoology.

An interdisciplinary program leading to M.S. and Ph.D. degrees in Cell Biology is offered under the direction of a committee composed of faculty members drawn from the participating departments. The program provides the flexibility necessary for a student to gain competence in the area of his choice. The extensive research facilities of the participating departments are available to all graduate students enrolled in the program. Inquiries should be directed to the Cell Biology Program Chairman, William Meyer, Department of Biochemistry.

Research includes: (Absher) cellular aging and cellular mechanisms of pulmonary fibrosis; (Adler) role of contractive proteins in secretion and non-muscle cells; (Albertini) human somatic cell genetic mutations, histocompatibility genetics; (Bresnick) effects of cancer-producing agents on replicative and transcriptional mechanisms; (Chiu) regulation of gene activities in developing and neoplastic tissues; (Cidlow) action of steroid hormones on cultured cells as they relate to cellular differentiation; (Clemmons) biochemistry and pathology of embryonic growth and development; (Craighead) pulmonary disease viral infections, carcinogenesis; (Cutroneo) regulation of collagen synthesis; (Davison) population regulation in fresh-water invertebrates; (Etherton) electrophysiology and membrane transport in plants; (Glade) morphogenesis in amphibian limb and tail regenerates investigated by transplantation; (Happ) hormonal control of differentiation in insects; (Hart) metal toxicity in the lung; (Hyde) plant cytogenetics, nuclear ultrastructure; (Jaffe) biochemical parasitology and chemotherapy of filariasis; (Kelleher) control of protein synthesis in mammalian cells, oncodevelopmental gene products; (Kelley) connective tissue proteins and in vitro models of disease; (Kilpatrick) electrophoretic and chromosomal analysis of populations; (Landesman) gene control and the role of morphogenic information during amphibian limb development; (Little) RNA turnover and ribonucleases in skeletal muscle; (Low) protein metabolism in eukaryotic systems; (McCormack) biology and chemistry of pteridine compounds; (Meyer) physiological control of neutral proteases, ribonucleases and esterases in normal and diseased skeletal muscle, other tissues and cultured cells, relationships to interferon; (Moehring) cell culture; mechanisms of pathogenesis of toxins; biochemical genetics; and cytogenetics; (Morselli) tissue and organ culture studies on growth and differentiation of woody plants; chemistry and microbiology of maple sap, wood and bark; (Mossman) carcinogenesis of tracheo-bronchial tree; (Novotny) isolation and expression of genes in the mushroom Schizophyllum; (Nyborg) biophysics of ultrasound; (Pennypacker) influence of extracellular matrix on cell behavior; (Racusen) biochemistry of plant proteins; (Schaeffer) transformation of normal rat liver cell cultures to the tumorigenic state using the carcinogen aflatoxin B1; (Sjogren) microbial ecology and fungal metabolism; (Smith) physicochemistry and metabolism of oncodevelopmental proteins; (Stevens) tumor immunology; (Ullrich) regulation of
gene expression and cellular differentiation in eukaryotes; (VanHouten) genetic analysis of the behavior and physiology of chemoreception in paramecium; (Weller) structure and function of ribosomes and ribonucleases; (Woodworth) biochemistry of iron-binding and transport proteins and cellular iron metabolism.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE**

Biology (3 semesters, including Genetics), Chemistry through Organic, Mathematics through Calculus, Physics (2 semesters). Satisfactory scores on Graduate Record Examination. Students who do not have all of the courses listed but who have a good academic record will be considered for admission to the program. Minor deficiencies can be made up after matriculation.

**MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE**

30 hours of graduate level credit including 301 and one course in each of the three following areas: genetics, biochemistry (one year), and cell physiology; cell biology seminar each semester; thesis research.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

15 graduate credit hours of courses as listed under Master of Science requirements. Minimum of one semester of Physical Chemistry, equivalent to Chemistry 140.

**MINIMUM REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

Minimum of 20 additional hours of course work. Studies Committee will advise course selection. Dissertation research, minimum 20 credits. Regular participation in seminar program.

**COURSES OFFERED**

- 252 MOLECULAR GENETICS II See Botany 252.
- 295 SPECIAL TOPICS Credit as arranged.
- 301 CELL BIOLOGY See Botany 301.
- 381 SEMINAR One hour. Staff.
- 391 MASTER’S THESIS RESEARCH Credit as arranged.
- 491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

**CHEMISTRY**

Professors Allen, Brown, Bushweller (Chairperson), Flanagan, Krapcho, Kuehne, Strauss, White, and Wulff; Associate Professors Geiger, and Weltin; Assistant Professors Carrano and Leenstra.
Current research in organic chemistry includes dynamic NMR studies of intramolecular stereodynamics, syntheses of medicinally valuable natural products, isolation and structure determination of natural products, studies of the stereochemistry of C-alkylation of α-anions, decarboxylation of geminal diesters, biomimetic syntheses, preparation of benzomorphans and their analogues which have chemotherapeutic potential, and mechanistic studies of organic chemical reactions.

Physical chemistry research projects include hydrogen absorption by metals, alloys and intermetallic compounds with a view toward storage of hydrogen as a fuel, theoretical studies of the electronic structure of chemical bonds in small molecules using \textit{ab initio} variation calculations, chemical thermodynamics, statistical mechanical modeling of chemical systems, and optically detected magnetic resonance studies of porphyrins and related compounds.

Research in inorganic chemistry includes investigations of the syntheses, structure, and spectroscopic properties of main-group ring systems and polymers with an emphasis on phosphazenes and sulfur nitrides, syntheses and characterization of new molecular metals, metal ion catalysis in carbon-carbon bond formation, syntheses of new platinum complexes for potential use in cancer chemotherapy, studies of the roles of metal ions in the modification and/or control of properties of proteins and other biologically important molecules, and dynamic NMR studies of restricted rotation about metal-phosphine bonds in various metal-phosphine complexes.

Research in analytical chemistry includes electrochemical studies of transition metal complexes and organometallic complexes, electron spin resonance studies of materials in unusual oxidation states, novel reactions of reactive compounds generated electrochemically under high vacuum, and studies of factors influencing heterogeneous electron transfer processes in non-aqueous media.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS OF PHYSICAL SCIENCES**

The requirements for admission to candidacy for the degree of Master of Science for Teachers of Physical Sciences are: (1) Completion of at least one full year of teaching, (2) Successful completion of Physics 128, Chemistry 141 and 162, and Mathematics 121, or their equivalents. (These courses may have been taken at the undergraduate level, as part of this graduate program, or credit may be obtained by transfer or examination.) Satisfactory scores on the Graduate Record Examination.

A program is also offered leading to the degree of Master of Arts in Teaching, see page 24.

**MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS OF PHYSICAL SCIENCES**

The above prerequisites for admission to candidacy must be supplemented by: (1) Completion of thirty hours of credit, of which at least eighteen must be in Physical Sciences Option (A) or (B) as described below. The remaining twelve credits may be chosen, with the consent of the Joint Advisory Committee, from appropriate courses above 100 in science, engineering, mathematics and educa-
tion (credit in education courses is limited to six semester hours); (2) Successful completion of a comprehensive examination administered by the Joint Advisory Committee.

Physical Sciences Option (A): Nine semester hours of Physics numbered 128 and above, Chemistry 231 and six semester hours of Chemistry chosen from Chemistry 163, 232, 201, 264 and 241. This option is primarily for teachers of chemistry.

Physical Sciences Option (B): Nine semester hours of Chemistry numbered 131 and above and nine hours of Physics in courses numbered above 200. This option is primarily for teachers of Physics.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

The requirements for admission to candidacy for the master of science degree are: (1) proficiency in four areas of chemistry evidenced by the biannual qualifying examinations or completion of designated courses at this university; (2) one semester of residence; (3) at least fifteen hours of formal course work including (a) six hours of graduate-level courses in the chemical field of specialization, (b) three hours of graduate-level chemistry courses not in the area of concentration, (c) Chemistry 386 (only for those electing Plan A), (d) Chemistry 381 (Seminar), and (e) Chemistry 231; and (4) maintenance of an overall point-hour ratio of 3.00. Students studying in the master of science degree program are advised to take the cumulative examinations in their specialty.

MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

The above prerequisites for admission to candidacy must be supplemented in either of the following two ways:

Plan A: Completion of 12 hours of Masters Thesis Research (Chemistry 391) and submission of a satisfactory thesis; (2) completion of at least 30 hours of graduate credit (courses and Masters Thesis Research); and (3) Two additional hours of Chemistry 381 (Seminar).

Plan B: Completion of 6 hours of Independent Literature Research Project (Chemistry 375); (2) completion of at least 30 hours of graduate credit (courses and Literature Research Project); and (3) Two additional hours of Chemistry 381 (Seminar).

M.S. students should decide at the beginning of their program whether they will pursue Option A or Option B and inform the department and Graduate College of their decisions.

A reading knowledge of German is also expected.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

It is expected that a student will ordinarily complete the following requirements for admission to candidacy by the end of the second year of residence: (1) at least
fifteen hours of research (Chemistry 491); (2) satisfactory performance in the cumulative examinations in his or her specialty field; (3) demonstration of basic competence in four fields of chemistry (analytical, inorganic, organic and physical) through the biannual qualifying examinations or completion of prescribed courses at the University of Vermont; (4) three hours of teaching; (5) one year of residence; (6) the following courses are required: Chemistry 386 and 381 (4 credits), 3 semester hours credit of advanced level work in three of the four areas of chemistry (analytical, inorganic, organic and physical). The remainder of each student's program will be determined by a departmental studies committee on the basis of qualifying examination performance, background, and research interests. In the normal course of events a student should expect to devote much of the first year to formal course work, and (7) maintenance of an overall point-hour ratio of 3.25.

**MINIMUM REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

In addition to the above requirements a student must: (1) complete a doctoral research project, write an acceptable dissertation, and defend it; (2) present a total of 75 hours of credit in course work and thesis research, and (3) make an oral and written presentation of an original research proposal, Chemistry 388, (at least six months prior to the submission of the dissertation). The student must also demonstrate a reading knowledge of scientific German and of either French, Russian or computer programming.

**COURSES OFFERED**

201 ADVANCED CHEMISTRY LABORATORY (2-6) Lectures emphasize analytical instrumentation (spectroscopic instrumentation, electrochemistry, electronics, synthetic techniques as applied primarily to inorganic systems. **Prerequisites:** 146, credit for or concurrent enrollment in 162 or 163. Four hours.

202 ADVANCED CHEMISTRY LABORATORY (1-8) Laboratory and discussion only. Problems require modern analytical, physical, and synthetic techniques. **Prerequisite:** 146, credit for or concurrent enrollment in 162 or 163. Note: Although it is highly recommended that 201 be taken before 202, in special cases this may not be necessary. Four hours.

211 CHEMICAL KINETICS AND MECHANISM Important aspects and applications of chemical kinetics. Theoretical and mathematical aspects are covered at an introductory level. Considerable emphasis is placed on interpretation of experimental rate laws in terms of mechanistic hypotheses for selected reactions. **Prerequisites:** 142, 162, 163. Three hours.

221 ADVANCED ANALYTICAL CHEMISTRY. A systematic survey of modern methods of chemical analysis. Principles and applications of analytical
and molecular spectroscopy, electrochemistry, and separation techniques. **Prerequisites:** 162, 163. Three hours. Geiger.

222 ELECTROANALYTICAL CHEMISTRY Principles of modern electrochemical analysis focusing mainly on finite current methods — voltammetry, polarography, chronoamperometry, cyclic voltammetry, etc. Introduction to modern operational amplifier instrumentation. Double layer theory and electron transfer kinetics. **Prerequisites:** 163. Three hours. Geiger.

227, 228 SPECIAL TOPICS IN ANALYTICAL CHEMISTRY Selected topics of current interest in the area of analytical chemistry. New techniques and methodologies, especially in chemical instrumentation, are typically covered. Credit as arranged. Geiger.

231 INORGANIC CHEMISTRY Fundamental concepts and facts of inorganic systems. Molecular symmetry, models for structure and bonding, acid-base chemistry, descriptive chemistry of ionic and covalent compounds, introductory crystal field theory, reaction mechanisms. **Prerequisites:** 162. Three hours. Allen, Brown, Carrano.

232 ADVANCED INORGANIC CHEMISTRY Selected topics include applications of group theory to vibrational spectroscopy and electronic structure, multiple bonding in main group and transition metal compounds, electron-deficient bonding, bioinorganic chemistry. **Prerequisite:** 231. Three hours. Allen, Brown, Carrano.

234 ORGANOMETALLIC CHEMISTRY A systematic survey of the syntheses, properties, structures, bonding and reactions of both main group and transition series organometallic compounds. Variation of the structure and stability of the metal-carbon bond throughout the periodic system. **Prerequisite:** 231. Three hours. Allen, Brown.

236 PHYSICAL INORGANIC CHEMISTRY The fundamental physical basis for spectroscopic techniques and other observable phenomena important to the field of inorganic chemistry. Topics include ligand field theory, magnetism, magnetic resonance, Mossbauer spectroscopy, and optical activity. **Prerequisites:** 163, 232. Three hours. Allen, Brown.

237, 238 SPECIAL TOPICS IN INORGANIC CHEMISTRY Advanced theoretical treatment of bonding and of physical properties of transition metal complexes; detailed treatment of inorganic reaction mechanisms. Credit as arranged. Allen, Brown, Carrano.

242 ADVANCED ORGANIC CHEMISTRY Detailed mechanistic descriptions of processes which may include enolate reactions and stereochemical considerations, addition processes such as halogenation, cycloadditions, hydroboration, hydride and metal-ammonia reductions, annelations such as biomimetic cyclizations, oxidation processes, rearrangements, eliminations, and examina-
tions of approaches to multi-step syntheses. **Prerequisite:** 241. Three hours. Krapcho, Kuehne, Strauss, White.

251 PHYSICAL ORGANIC CHEMISTRY Structure-reactivity relationships, molecular properties and their interpretation. Methods and results of investigations of mechanisms of common organic reactions. **Prerequisites:** 142, 162. Three hours. Bushweller, Krapcho, White, Strauss.

257, 258 SPECIAL TOPICS IN ORGANIC CHEMISTRY Advanced level discussion of specific topics in organic chemistry of current interest such as photochemistry, carbenes, bio-organic chemistry, magnetic resonance, etc. Credit as arranged. Bushweller, Krapcho, Kuehne, Strauss, White.

262 CHEMICAL THERMODYNAMICS Systematic study of the application of thermodynamics to chemical problems. Concepts of statistical thermodynamics to be introduced. **Prerequisites:** 162, 163. Three hours. Flanagan.

263 INTRODUCTION TO QUANTUM MECHANICS General consideration of quantum mechanics. Development of techniques pertinent to the application of quantum mechanics to chemical problems. **Prerequisite:** 162, 163. Three hours. Weltin.

264 FUNDAMENTALS OF SPECTROSCOPY A general discussion of molecular spectoscopy, rotational and vibrational states of molecules, symmetry of vibrations; introduction to electronic spectra. **Prerequisite:** 162, 163, mathematics 121. Three hours. Weltin, Leenstra.

265 STATISTICAL MECHANICS Development of statistical mechanics and its application to problems of chemical interest. **Prerequisite:** 162, 163; 263 recommended. Three hours. Flanagan.

267, 268 SPECIAL TOPICS IN PHYSICAL CHEMISTRY Advanced level discussion of specific topics in physical chemistry and chemical physics; group theory, solid state theory; irreversible thermodynamics, solution theory. Credit as arranged. Flanagan, Leenstra, Weltin.

285, 286 SPECIAL TOPICS Selected topics of an interdisciplinary nature, designed particularly for advanced undergraduate chemistry majors. Possible subjects include environmental chemistry, chemical technology, chemical economics. Offered as occasions arise. Variable credit.

342 NATURAL PRODUCTS — THE ALKALOIDS The major classes of alkaloids will be surveyed from a biogenetic point of view. Classical and modern degradation methods, total syntheses and biosynthetic incorporation of labeled compounds. **Prerequisites:** Credit or concurrent enrollment in 242. Three hours. Alternate years. Kuehne.

344 NATURAL PRODUCTS — THE TERPENES The chemistry of mono,
sesqui, di and triterpenes, including degredations, structure proofs, total syntheses, rearrangement reactions and biogenesis. Prerequisite: Credit or concurrent enrollment in 242. Three hours. Alternate years. Kuehne.

363 QUANTUM CHEMISTRY Applications of quantum mechanical techniques to problems of chemical interest. Prerequisite: 263. Three hours. Offered as occasion warrants. Weltin.

381 SEMINAR Current problems and literature. One hour.

386 METHODS OF CHEMICAL INVESTIGATION Introduction to advanced modern chemical methods. Prerequisite: Permission of department. Two hours.

388 RESEARCH PROBLEM CONCEPTION AND SOLUTION Independent origination of research problems and the methods of their solution. Required of all doctoral candidates. Prerequisites: Permission of department. This course shall be completed at least six months in advance of the Ph.D. thesis defense, and in no case later than the end of the seventh semester of graduate studies at UVM. One hour.

395 INDEPENDENT LITERATURE RESEARCH PROJECT Reading and literature research culminating in the preparation of a comprehensive and critical review of a topic of current interest in chemistry. Credit as arranged.

391 MASTER'S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

CIVIL ENGINEERING

Professors Cassell, Dawson, and Oppenlander; Associate Professors Downer, Hemenway, Laible, Olson (Acting Chairperson); Assistant Professor Kapuscinski; Lecturer Dunham; Adjunct Professor Knight.

The Department of Civil Engineering is presently conducting research in environmental engineering, structures, transportation, and urban planning.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

A Bachelor's degree and the approval of this Department. Additional course work may be required of candidates who lack a strong science background. Satisfactory scores on the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

The above prerequisites for acceptance to candidacy must be supplemented in either of the two following ways.

Plan A: Completion of advanced courses in civil engineering, mathematics, other approved courses and six to nine hours of thesis research for a total of thirty hours.
Plan B: Completion of thirty credit hours of advanced courses in civil engineering, mathematics, and other approved courses in lieu of the thesis.

The student should decide which option he intends to pursue at the beginning of his program.

RECOMMENDED CORE COURSES

It is recommended that the student’s plan of study include one course in each of the following areas: advanced statistics, engineering economics, systems engineering, and computer-based numerical methods.

COURSES OFFERED

210 AIRPHOTO INTERPRETATION Techniques in aerial photographic interpretation; principles of stereoscopic viewing and identification of the airphoto features related to landform, vegetation, drainage, soil color and tone, topography; use of airphoto interpretation in soil identification. Three hours. Olson.

226 CIVIL ENGINEERING SYSTEMS ANALYSIS Graph theory, dynamic programming, linear programming, scheduling, resource allocation, simulation; applications to public works problems; comparison of solution models and selection of models for complex problems. Three hours. Dawson.

227 DISCRETE SIMULATION Discrete simulation using monte-carlo techniques and the GPSS simulation processor; mathematical modeling of systems; validation and sensitivity analyses. Prerequisite: Statistics 111, 141, or 151. Three hours. Dawson.

230 COMMUNITY PLANNING TECHNIQUES Size, spacing, and functions of cities; economic, social, and physical determinants of land-use elements; studies for urban planning; and the process of land-use planning Three hours. Oppenlander.

231 COMMUNITY PLANNING ANALYSIS History and development of urban planning; approaches to planning with attention to city design and appearance, quantitative methods in planning, and social welfare planning; plan implementation; organization and administration of planning agencies; and financial planning. Three hours. Downer, Oppenlander.

232 COMMUNITY DESIGN Basic principles and methods of planning and designing the community; site selection and elements of physical layout and design. Design projects dealing with community elements such as subdivisions, industrial parks, new towns, etc. Three hours. Downer, Oppenlander.

233 REGIONAL PLANNING See Resource Economics 233.

240 TRAFFIC ENGINEERING CHARACTERISTICS Basic components of highway travel including driver, vehicle, roadway, environmental, and pedestrian characteristics; traffic flow and intersection characteristics; highway and intersection capacities; performance of traffic systems; and techniques for measuring traffic characteristics. Three hours. Dawson.
241 TRANSPORTATION SYSTEMS ENGINEERING Interdisciplinary aspects of transportation systems and their technological characteristics; mathematical analysis and synthesis of system problems; economic consideration of transportation; fiscal studies and financial planning; and administration of transportation systems. Three hours. Oppenlander.

244 URBAN TRANSPORTATION SYSTEMS Transportation planning process for urban areas; inventory, use, and desire studies for urban transportation; techniques of travel forecasting and trip generation, distribution, and assignment; planning, design, and operation of mass transit systems; and location and design of terminal facilities. Three hours. Oppenlander.

250 ENVIRONMENTAL FACILITIES DESIGN-WATER Design of water supply systems including: source evaluation, transmission, distribution; water treatment plant design; equipment selection, and wells. Prerequisite: 151. Three hours. Cassell.

251 ENVIRONMENTAL FACILITIES DESIGN-WASTEWATER Design of wastewater conveyance and treatment facilities; sewage-treatment plant design, and equipment selection. Prerequisite: 151. Three hours. Cassell.

252 INDUSTRIAL HYGIENE Industrial hygiene problems; effects of pollutants on health; threshold limit values, and emphasis on the engineering evaluation of the hazard and control techniques. Prerequisites: Chemistry 5 and Physics 25. Three hours. Hemenway.

253 AIR POLLUTION Sources of air pollution, methods of measurement, standards, legal aspects and control techniques available. Emphasis placed on source testing and source control. Prerequisites: Chemistry and Mathematics 21. Three hours. Hemenway.

254 SOLID WASTES Significance of solid wastes from municipal, industrial, agricultural, mining; optimization and design of collection, disposal, recycle systems; and sanitary landfills, incineration, composting, material recovery. Prerequisites: Chemistry 5 and Physics 25. Three hours. Staff.

255 WATER RENOVATION PROCESSES — CHEMICAL/PHYSICAL Design theory of chemical/physical processes for treating waters and wastewaters; mass transfer, coagulation/precipitation, sedimentation, filtration, mixing, absorption, ion exchange, and membrane processes; and pilot plant experimentation. Prerequisites: 160, Chemistry 5, Mathematics 22. Three hours. Kapuscinski.

256 WATER RENOVATION PROCESSES-BIOLOGICAL Design theory of biological processes for treating waters and wastewaters; aerobic, anaerobic, photosynthetic processes; disinfection; and pilot plant experimentation. Prerequisite: Mathematics 22. Three hours. Kapuscinski.

257 ANALYSIS OF AQUATIC SYSTEMS Quantitative study of biological, chemical and physical phenomena in lakes, streams and estuaries; and mathematical modeling applied to management of water quality. Prerequisites: 150 and 160. Three hours. Kapuscinski.
258 ENVIRONMENTAL FACILITIES DESIGN-AIR Advanced design principles for air pollution control equipment including scrubbers, precipitators, cyclones, and filter. Prerequisites: 150 and 252 or 253. Three hours. Hemenway.

259 MEASUREMENT OF AIRBORNE CONTAMINANTS Quantifying airborne contaminants from processes and ambient levels. Laboratories demonstrate calibration and measurement, stack sampling and ambient air monitoring of specific contaminants. Prerequisite: 252 or 253. Three hours. Hemenway.

260 HYDROLOGY The basic theory of precipitation, run-off, infiltration, and ground water; precipitation and run-off data; and application of data for use in development of water resources. Prerequisite: 160 or Statistics 141. Three hours. Downer.

261 OPEN CHANNEL FLOW Application of the basic laws of fluid mechanics to flow in open channels; design of channels and transition structures including riprap and culverts; and gradually-varied flow problems including flood plain and floodway studies. Prerequisite: 160. Three hours. Downer.

263 MEASUREMENTS IN APPLIED HYDROLOGY Design of hydrologic experiments; observational methods, equipment and problems in data reduction and handling techniques; and application to the instrumentation and study of the hydrology of a small watershed. Prerequisite: 163 or 260. Three hours. Downer.

270 ADVANCED INDETERMINATE STRUCTURES Matrix analysis of framed structures; finite element theory and application in structural mechanics and hydrodynamics; emphasis on computer applications and numerical analysis techniques. Prerequisites: 171 and a basic knowledge of matrix algebra and computer programming. Three hours. Laible.

271 PRESTRESSED CONCRETE STRUCTURES Ultimate strength theory for concrete structures with emphasis on prestress effects; prestressed beam analysis, load balancing methods, column and pile design, bent analysis, yield-line theory, and circular prestressing in domes and tanks; and discussion of current design specifications. Prerequisite: 173. Three hours. Staff.

280 APPLIED SOIL MECHANICS Use of soil mechanics in the evaluation of building foundations, braced excavations, earth structures, lateral earth pressures, pile foundations, pier and caisson foundations, slope stability, and construction problems. Prerequisite: 180. Three hours. Olson.

282 ENGINEERING PROPERTIES OF SOILS Study of soil properties that influence the engineering behavior of soils; subject areas include soil mineralogy, physiochemical concepts, plasticity properties, permeability, and compaction; and laboratory study of soil index properties, permeability, and compaction tests. Prerequisite: 180. Three hours. Olson.

290 ENGINEERING INVESTIGATION Independent investigation of a special topic under the guidance of a staff member. Preparation of an engineering report is required. Three hours. Staff.

333 ADVANCED REGIONAL PLANNING See Resource Economics 333.
360 ADVANCED HYDROLOGY Application of statistics to problems in engineering hydrology; the concept and use of the instantaneous unit hydrograph; study of run-off models; flow through porous media; and design techniques for water resources projects. Prerequisites: 260, Mathematics 271. Three hours. Offered as occasion warrants. Downer.

390 ADVANCED TOPICS IN CIVIL ENGINEERING Special topics to intensify the programs of graduate students in civil engineering. Hours and credits to be arranged. Staff.

391 MASTER'S THESIS RESEARCH Credit as arranged.

CLASSICS
Emeritus Professors Bliss and Kidder; Professors Ambrose (Chairperson), Davison, Gilleland, and Schlunk; Assistant Professor B.S. Rodgers, Adjunct Professor R.H. Rodgers.

Current research interests include Early Greek Literature; the Attic orators; Greek Drama; archaeology; philosophy; Mycenaean and Homeric Greece; Hellenistic economics; political theory; Cicero's rhetorical works; Vergil; lyric and elegiac poetry; Petronius; satire; Roman Imperial Families; Mythology; Etruscology; Medieval Studies.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS IN GREEK AND LATIN
An undergraduate major or minor or the equivalent; a reading knowledge of French or German.

MINIMUM DEGREE REQUIREMENTS
Eighteen hours of advanced courses in Greek and Latin, six hours of which must be 381; 6 additional hours in Greek and Latin, History or Philosophy; thesis research (normally 6 hours). Comprehensive examinations in Greek and Latin translation, Greek and Roman history, literature, and philology are required. In addition to course work, students will have a reading list of authors in Greek and Latin.

Those who hope for the department's recommendation to go on for a Ph.D. elsewhere must show competence in both German and French by the end of their first year of graduate study.

A program is also offered leading to the degree of Master of Arts in Teaching: See page 24. Satisfactory scores on the Graduate Record Examination are prerequisite for acceptance to candidacy for this degree.

Consult the Summer School catalogue for occasional offerings for graduate credit.

COURSES OFFERED
GREEK
201 GREEK ORATORS Selected speeches of Lysias and Demosthenes. Three hours. Rodgers. Alternate years, on request.

203 GREEK HISTORIANS  Thucydides, Books I and II; selections from Herodotus and Xenophon's Hellenica. Three hours. Rodgers, Davison. Alternate years, 1980-81.

204 GREEK TRAGEDY  Sophocles, Antigone and Euripides, Medea, or two equivalent plays. Three hours. Ambrose. Alternate years, on request.

205 GREEK PHILOSOPHERS  Plato, Republic, Books I and II; selections from the Pre-Socratics and from Aristotle. Three hours. Schlunk. Alternate years, on request.

206 GREEK EPIC  Readings in the Iliad and Odyssey. Problems of epic composition and language together with mythological and historical background. Three hours. Davison. Alternate years, on request.

LATIN

203 REPUBLICAN PROSE  Extensive reading in Caesar and Sallust, and in the speeches of Cicero. Three hours. Rodgers.

204 EPIC POETS  Extensive reading in Lucretius, Vergil, Ovid, and others. Three hours. Ambrose, Schlunk.

252 COMEDY  Two plays of Plautus and Terence. Study of the precursors of this literary form. Three hours. Ambrose. Alternate years, on request.

253 ROMAN ORATORY  Selections from Cicero's De Oratore, Orator, Brutus, and from his speeches. Historical development of forensic and other rhetorical canons. Three hours. Gilleland. Alternate years, on request.

255 HISTORIANS OF THE EMPIRE  Augustus, Res Gestae; Tacitus, Annals, I-IV; selections from Suetonius and Ammianus Marcellinus. Three hours. Davison. Alternate years, on request.

271 SILVER LATIN  Extensive reading of post-Augustan authors not included in other advanced courses. Three hours. Gilleland. Alternate years, on request.

GREEK AND LATIN

300 PRO-SEMINAR  Introduction to philology. Students will normally take this their first semester. Three hours. Staff.

381 SEMINAR  Intensive study at the graduate level of Greek and Latin authors not read in the candidate’s undergraduate program. Credit as arranged. Staff.
COMMUNICATION

Professors Lewis, London, Manchel (Chairperson); Associate Professors Worden, Yadav; Assistant Professor Creps.

No Graduate Program Offered.

Communication faculty interest and research centers in two major areas: Mass Media in Society or Communication Studies. Current interests and research in the area of Mass Media in Society include film study of movie genres and motion picture history; international broadcasting with emphasis on Canada, Britain, China, and India; creative filmmaking; evaluation of mass media campaigns; and studies of violence on television. Research in Communication Studies involves communication in the recreational setting; leadership emergence and decision-making in the small group; cross-cultural communication, political rhetoric and movement theory, and rhetorical theory and criticism.

COURSES OFFERED

201 THEORIES OF HUMAN COMMUNICATION The relationship of language, perception, thinking, and social context to human communication. Prerequisite: Nine hours of related courses, including 1. Three hours. Yadav.

210 CLASSICAL ORIGINS OF COMMUNICATION THEORY Major trends in rhetorical thought. An examination of outstanding works of criticism, speaking, and writing. Selected works from classical and contemporary sources. Prerequisite: Nine hours of related courses. Three hours.

211 PERSUASIVE COMMUNICATION The study of recent research contributions to such areas as theories of persuasion, source credibility, and argument and controversy. Prerequisite: Nine hours of related courses including 111 or 112 or 113. Three hours.

213 THEORIES OF SPEECH ANALYSIS (RHETORICAL CRITICISM) An in-depth study of major theories of criticism of public address and an application of those theories to speakers, speeches, and religious, social, and political movements. Prerequisite: Nine hours of related courses. Three hours.

214 ISSUES IN PUBLIC ADDRESS Each semester this course will emphasize analysis of specific speakers, movements, theses and strategies encompassed by a selected topic of public address. Prerequisite: Nine hours of related courses. (May be repeated up to nine credit hours.) Three hours.

215 GROUP COMMUNICATION Each semester, one of the following topics will be studied in depth: (1) Group Communication Theory, (2) Leadership in Groups, and (3) Communication in Organizations, (4) Communication
in the Classroom. **Prerequisite:** Nine hours of related courses, including 14. Three hours. May be repeated up to nine credit hours. Schultz.

223 INTERPERSONAL COMMUNICATION A study of human communication on the interpersonal level. **Prerequisite:** Nine hours of related courses, including 121. Three hours. Lewis, Yadav.

225 CROSS-CULTURAL COMMUNICATION A study of the conceptual perspective and the basic fund of knowledge necessary for viewing those variables which are central to the study of cross-cultural communication. **Prerequisite:** Nine hours of related courses. Three hours. Yadav.

260, 261 SEMINAR IN MASS MEDIA An intensive examination of selected areas of study related to mass media. **Prerequisite:** Nine hours of related courses, including 63. Three hours.

262 WRITING FOR MASS COMMUNICATION A comparative study of the principles of writing for the mass communications media. **Prerequisite:** Nine hours of related courses, including 63. Three hours. Lewis, Worden.

263 INTERNATIONAL MASS COMMUNICATION Mass media systems of other countries, i.e., Britain, China and India. **Prerequisite:** Nine hours of related courses. Three hours. May be repeated up to nine credit hours. London.

264 ADVANCED TELEVISION PRODUCTION Emphasis on the following types of programs: educational, news, documentary, dramatic and variety. **Prerequisite:** 164. Three hours.

265 CINEMATOGRAPHY Advanced study of film expression and production of student films. **Prerequisite:** 167 or permission of the instructor. Three hours. Worden.

266 SEMINAR IN FILM A study of various topics, film criticism and research. **Prerequisite:** Nine hours of related courses, including 165 or 166. Three hours. May be repeated up to nine credit hours. Manchel.

267 THE CONTEMPORARY CINEMA Lectures, screenings, and reports on modern filmmakers, recent trends and new techniques. **Prerequisite:** Six hours of related courses. Three hours. Manchel.

268 THE BLACK MAN IN FILM A study of black artists in movies from 1895 to the present, with an emphasis on American films. **Prerequisite:** Six hours of related courses. Three hours. Manchel.

283, 284 SEMINAR Discussion and research in the selected areas of communication. **Prerequisite:** Departmental permission. Three hours. Staff.

293 CANADIAN MASS MEDIA A study of Mass Communications in Canada to include an analysis of radio-television-film and press, and how they reflect that nation’s social, political, and cultural components. Field trip to CBC, the National Film Board, and other Montreal-based media centers will be included. **Prerequisite:** Six hours of related courses. Three hours. London.

294 SEMINAR FOR PROSPECTIVE TEACHERS OF COMMUNICATION A study of the resources, procedures and methods utilized in teaching
the different areas of communication at the various instructional levels. **Pre-requisite:** Twelve hours. Three hours. London.

**300 RESEARCH METHOD AND DESIGN** Research method and design, bibliographical resources, and professional writing in the field of communication and theatre. Three hours.

**365 ADVANCED CINEMATOGRAPHY** An exploration of the limitations and possibilities of the motion picture media through familiarization with equipment and production techniques. **Pre-requisite:** 265. Three hours. Worden.

**381,382 ADVANCED READINGS** Readings, with conferences, intended to contribute to the programs of graduate students in phases of communication for which formal courses are not available. Credit as arranged up to three hours each semester.

**COMMUNICATION SCIENCE AND DISORDERS**

*Professors Daniloff (Chairperson), and Wilson; Associate Professor Guitar; Assistant Professors Hoffman, Kramer; Lecturers Houghton, Turnbaugh.*

Faculty members in the department are engaged in ongoing research in language development and disorders, articulation processes and disorders, fluency management, speech perception, biofeedback and hearing disorders.

The Master's Degree program in Communication Disorders is accredited by the Education and Training Board of the American Board of Examiners in Speech Pathology and Audiology (ABESPA). The Eleanor M. Luse Center for Communication Disorders, the primary practicum site, holds accreditation from the Professional Services Board of ABESPA. Students are required to fulfill academic requirements for the Certificate of Clinical Competence from the American Speech and Hearing Association. Students may major in either Speech Pathology or Audiology. All students are supervised by members of the faculty as well as staff members of the E. M. Luse Center.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE IN COMMUNICATION DISORDERS**

A minimum of 30 hours in communication disorders and selected areas to include 101, 270, 281 (or their equivalent), a course in Statistics, and a Course in Child Psychology. These courses may be taken after a student is admitted to graduate study, but are prerequisite to degree candidacy, and will not be considered as a part of the 30 hours required for the Master's Degree. Satisfactory scores on the Graduate Record Examination (aptitude only).

**MINIMUM DEGREE REQUIREMENTS**

**Thesis Option.**

The student will take 30 hours of graduate level courses; 6 require the degree candidate to write a quality M.S. thesis. All students who appear to be research-oriented or who are considering a higher degree will be encouraged to pursue this option.
Non-Thesis Option
The student will take 36 hours of graduate level coursework without completing a master's thesis. In lieu of the thesis requirement, students will take two additional courses in clinical disorders of communication: one course in research methods which requires the completion of a clinical research project, and 3 credits of Clinical Study (CSD 275-76). As a part of the latter 3 credits, students will be required to give a diagnostic and/or therapeutic presentation which will be critiqued by the faculty as a whole.

COURSES OFFERED

270 LEARNING AND DEVELOPMENT OF SPEECH AND LANGUAGE Speech and language acquisition in relation to current learning theory and methods of linguistic analysis. **Prerequisite**: Nine hours of related courses. Three hours. Wilson.

271 COMMUNICATION DISORDERS Etiology, symptomatology, and principles of habilitation for voice disorders (including the laryngectomized), articulation disorders. **Prerequisites**: 74, 101 and 270. Three hours. Staff.

273 PRINCIPLES OF AUDIOLOGY An introduction to clinical audiology including a consideration of hearing disorders, tests of the hearing function, and hearing conservation programs. **Prerequisites**: Twelve hours of speech (including 74) and psychology. Three hours. Houghton.

275, 276 CLINICAL STUDY Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. **Prerequisites**: Twelve hours in speech and hearing science courses, including 271; departmental permission. Credit as arranged. Staff.

278 NEUROLOGICAL BASES OF COMMUNICATION Study of the neurological bases of communication and various behavioral correlates; structure and function of sensory-motor systems and higher centers. **Prerequisite**: Nine hours of speech and psychology, including 74. Three hours. Wilson.

281 ANATOMY-PHYSIOLOGY OF SPEECH Anatomy and physiology of speech and language processes. **Prerequisites**: Nine hours of speech and psychology including 74. Three hours. Hoffman.

282 ANATOMY-PHYSIOLOGY OF AUDITION Anatomy and physiology of the normal auditory system. Basic acoustics and subjective correlates of the auditory stimulus. **Prerequisites**: Nine hours of speech and psychology including 74. Three hours. Daniloff.

283, 284 SEMINAR Discussion and research in the selected areas of communication. **Prerequisite**: Departmental permission. Three hours. Staff.

287 CURRENT RESEARCH IN LANGUAGE ACQUISITION Recent advances in child language. **Prerequisite**: 270. Three hours. Wilson.

377 HABILITATION AND REHABILITATION PROCEDURES FOR THE HEARING IMPAIRED **Prerequisite**: 273. Three hours. Houghton.
381, 382 ADVANCED READINGS  Readings, with conferences, intended to contribute to the programs of graduate students in phases of communication science and disorders for which formal courses are not available. Credit as arranged, up to three hours each semester. Staff.

383 SEMINAR IN SPEECH PATHOLOGY  An intensive study of selected topics in speech pathology. Prerequisite: 271. Three hours. Staff.

384 ARTICULATION DISORDERS  Etiology, diagnosis, pathology, and habilitation and rehabilitation of articulation. Prerequisite: 271. Three hours. Hoffman.

385 VOICE DISORDERS  Study of the research in voice production and speech. Application to pathological and non-pathological problems. Prerequisite: 271. Three hours. Staff.

386 NEUROMOTOR DISORDERS  Etiology, pathology, diagnosis, and principles of habilitation of cerebral palsy and related conditions. Emphasis on disorders of oral communication and associated disturbances. Prerequisite: 271. Three hours. Staff.

387 SEMINAR IN LANGUAGE DISORDERS  Identification, evaluation, and rehabilitation procedures for the preschool and school-age child with language disabilities. Prerequisite: 270. Three hours. Wilson.

388 SEMINAR IN STUTTERING  Study of the research in stuttering relative to etiology and rehabilitation. Prerequisite: 271. Three hours. Guitar.

389 SEMINAR IN APHASIA IN ADULTS  Study of the symbolic and communicative disturbances in aphasic adults, principles and procedures in a rationale for rehabilitation. Prerequisite: 271. Three hours. Staff.

390 ADVANCED AUDIOLOGY  Audiological procedures: site of lesion testing, electrical response testing, impedance, adaptation, recruitment and special speech tests. Prerequisite: Permission of Instructor. Three credits. Mitchell Kramer.

391 MASTER'S THESIS RESEARCH  Credit as arranged.

COMPUTER SCIENCE

Professors Absher, Dawson, Hill (Chairperson); Associate Professor Shub; Assistant Professors Davis and Margolis; Lecturers Charbonneau, Fischl, Halsted, and Thomas.

Research activities in Computer Science encompass a broad range of topics including Formal Language Theory, Operating Systems, Simulation, Architecture, and Performance Evaluation.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE IN COMPUTER SCIENCE

Bachelor's degree from an accredited institution; Mathematics 21, 22, 104, 124 or the equivalent; Computer Science 11, 101, 102, 103, 104, or the equivalent.
Satisfactory scores on the aptitude portion of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS
Thirty semester hours of acceptable graduate credit. Thesis is optional. Required courses are Computer Science 201, 202, 222, 241, 242, and Electrical Engineering 231. CS 311 and 312 are recommended for the student selecting the non-thesis option. Up to 9 hours from an area of minor concentration may be used to fulfill degree requirements. CS 301 is suggested for entering students with an undergraduate major other than computer science.

COURSES OFFERED
200 DISCRETE SIMULATION See Civil Engineering 227.
201 OPERATING SYSTEMS An introduction to the principle components and algorithms involved in operating systems design and implementation. Memory, processor, device and file management techniques are presented and compared. Protection and security schemes are examined for both memory and file organizations. Synchronization primitives are discussed. Prerequisite: 222. Three credits. Shub.
202 COMPILER CONSTRUCTION Organization of a compiler including compile and run time symbol tables, lexical scan, syntax scan and object code generation. Prerequisite: 104. Three hours. Staff.
204 ADVANCED SYSTEMS PROGRAMMING Advanced study and research in a selected area of systems programming. Prerequisite: 301. Three hours. Staff.
222 COMPUTER ARCHITECTURE The architecture of computing systems. Levels of computer description. Taxonomy of computing machines. Addressing structures, memory concurrency, processor concurrency. Hardware features desirable for various software systems. Hardware, software, firmware tradeoffs. Prerequisites: 102, Mathematics 104, Electrical Engineering 231 or 237. Three hours. Staff.
242 INTRODUCTION TO THE THEORY OF COMPUTING A study of various theoretical models of computing devices including the basics of automata theory, recursion theory, formal grammars and Turing machines. Prerequisite: Mathematics 104. Three hours. Margolis.
295 SPECIAL TOPICS IN COMPUTER SCIENCE Lectures, reports and directed readings on advanced topics. Prerequisite: Permission of instructor. Three hours. Staff.
301 INTRODUCTION TO COMPUTER SOFTWARE FOR GRADUATE STUDENTS Language translation, operating systems fundamentals, data base organization. Prerequisite: 101. Three hours. Halsted.

311 LITERATURE SEMINARS The literature seminar introduces students to the Computer Science research literature through directed readings. A complete literature survey and a state of the art report is required of all students: Prerequisite: 12 hours of Computer Science courses numbered 200 or above. Three hours.

312 PROBLEM SEMINAR Solution of advanced problems of current interest in Computer Science. Prerequisite: 311. Three hours.

391 MASTER'S THESIS RESEARCH Credit as arranged.

ECONOMICS

Professors Alnasrawi, Campagna, Chase (Chairperson) and Nadworny; Associate Professor Bates; Assistant Professors Woolf, Gaspari, Gedeon; Instructor Heaps.

No Graduate Program Offered

200, 201 ECONOMIC HISTORY OF THE UNITED STATES Economic development and the evolution of capitalism in the United States. First Semester (200): Origins and growth of the economy to 1900. Second Semester (201): The American Economy in the Twentieth Century. Prerequisite: 186 or 190 or permission of the instructor. Three hours.

210 INCOME, WEALTH AND WELFARE Analysis of the distribution of income and wealth and policies which affect them. Prerequisite: Nine hours in economics. Three hours.

216 ECONOMIC DEVELOPMENT Theories of economic growth applied to underdeveloped areas of the contemporary world, including the political and social determinants of economic progress. Prerequisites: 11, 12; 190 recommended. Three hours.

217 URBAN AND REGIONAL ECONOMICS Economic analysis applied to the problems of cities, states and regions. Prerequisite: Nine hours in economics. Three hours.

234 ADVANCED MACRO AND MONETARY THEORY Analysis of classical, Keynesian and modern macroeconomic models; micro and macro demand for and supply of money; portfolio choice and the influence of financial intermediaries. Prerequisites: 101 and 190. Three hours.

241 HUMAN RESOURCES The theory and policy, the labor sector, and human capital in an advanced economy. Prerequisite: 141. Three hours.

242 LABOR-MANAGEMENT RELATIONS Economic influences of unionization. The grievance process, arbitration and labor relations laws. Prerequisite: 141. Three hours.
258 PROBLEMS OF COMMUNISM  A comparative study of economic and political problems of applied communism with particular emphasis on current developments in selected Communist countries. Prerequisites: Twelve hours in history and/or other social sciences. Three hours.

267 ECONOMETRICS  A combination of economic theory, mathematics, and statistics for the testing of economic hypotheses and developing economic models. Prerequisites: 131, 186, 190; 130 recommended. Three hours.

290 THE SOVIET AND EASTERN EUROPEAN ECONOMIES  Analysis of the economic development, structure, performance and direction of the Soviet and related economies. Prerequisite: Nine hours in economics or permission of the instructor. Three hours.

295 DEVELOPMENT OF ECONOMIC THOUGHT  Development of economic ideas. The pre-Classical, Classical, Socialist, Neo-classical, Keynesian Schools and individual theoreticians. Prerequisites: 186 and 190 or concurrent enrollment; 190 recommended. Three hours.

296 SEMINAR AND SPECIAL TOPICS

297 READINGS AND SPECIAL RESEARCH

300, 301 INDEPENDENT READINGS AND RESEARCH  Designed to meet the special research problems of graduate students. Prerequisite: Twelve graduate credits. Credit as arranged.

EDUCATION

The College of Education and Social Services offers numerous opportunities for graduate study in preparation for special competencies in a variety of fields which include practicums, research problems, and in-service relationships with cooperating school systems and social service agencies. The programs in various areas of specialization are described below.

Satisfactory performance on the aptitude sections (verbal and quantitative) of the Graduate Record Examination is required for admission to the Graduate College for students pursuing the degrees of Master of Education and Master of Science.
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF EDUCATION

Eighteen hours of Education and related areas or appropriate professional certification and satisfactory score on the Graduate Record Examination (Attitude only). The Education course prerequisites may not apply to the Student Personnel Services in Higher Education, Counseling, Administration and Planning, or Interdisciplinary Major Programs in OHRD. This is particularly true of persons seeking positions which do not require public school certification.

MINIMUM DEGREE REQUIREMENTS

Eighteen hours in courses in Education numbered above 200, including a minimum of six graduate hours in the foundations of education, twelve additional hours in approved courses or six additional hours and thesis research; a year of successful experience in teaching or in a related educational activity.

DEPARTMENTS

I. ORGANIZATIONAL, COUNSELING, AND FOUNDATIONAL STUDIES

This department consists of Administration and Planning, Counseling, Student Personnel Services in Higher Education, and Foundational Studies Programs. In addition to the four previously mentioned graduate level programs, a fifth option is available which is referred to as an Interdisciplinary Major in Organizational and Human Resource Development. Inquiries regarding this program and the specialization listed below should be addressed to the Chairperson.

Programs

1. Administration and Planning  This program is designed to prepare administrators and planners for public schools, educational and social agencies and middle management positions in higher education. The M.Ed. program usually requires 30-36 credit hours of courses, seminars, practicums, and research experiences. The Certificate of Advanced Study (C.A.S.) Program usually requires 30-36 credit hours of study beyond the M.Ed. requirements.

Courses with an administration/planning focus include 264, 266, 268, 295, 332, 333, 335, 337, 352, 353, 354, 355, 356, 358, and 386.

2. Counseling  This degree program provides preparation for the individual who intends to become a school counselor (program is state-approved for certification in school counseling); a director of pupil personnel services, or a community counselor. The program, which requires 42-48 credit hours of coursework, covers four broad areas of study: (1) personal growth and development, self-awareness, interpersonal relations, physical and mental health; (2) the foundations and dynamics of human development and behavior; (3) theory and skill for individual, group and family counseling; (4) administrative and planning concepts and skills as related to guidance, social service, and psychological education programs. Particular emphasis is placed upon the implementation of
theory in practice with opportunities provided for student-counselors to work under supervision in schools and community agencies.

Program planning is done with the assistance and approval of a faculty advisor. When relevant, the student may take courses from other areas of the University.

Courses in the counseling program include 220, 221, 258, 291, 293, 295, 350, 351, 368, 370, 374, 381, 384, 386, 388, 389, 393, 394, 397.

In addition to the general admissions procedures a personal or group interview is required for this program. For a more detailed description of the program contact the departmental office, 228 Waterman Building.

3. **Student Personnel Services in Higher Education**  
   This program area is aimed at providing a general background for the individual who is preparing to work within the broad area of student personnel services in colleges and universities. The program allows flexibility for the student to strengthen his/her major area of interest (i.e., admissions, residential life, Dean of his/her major area of interest (i.e., admissions, residential life, Dean of Students, career development, student programs, student activities, financial aid, counseling, and others), while pursuing a strong academic core. Emphasis is on the dynamics of the college student’s growth and development, human behavior, and a practical and conceptual understanding of the culture of higher education and its organizational structure and its impact on the individual student. The student personnel program seeks to link the theoretical and conceptual knowledge of higher education and student development with its most immediate practical applications. To implement this aspect of the program, a comprehensive program of practicums and internships has been developed to provide experiences in a variety of University offices and departments as well as in nearby colleges. The program attempts to prepare student development educators to serve as teachers, counselors, facilitators, and leaders in higher education. It defines education broadly to consciously reflect a basic understanding of the teaching-learning process and the role of the student development educator in perpetrating this process.

Program planning is done with the assistance and approval of a faculty advisor. When relevant, the student may take courses from other areas of the University.

Courses in the student personnel services program include 220, 295, 301, 319, 351, 360, 362, 374, 381, 383, 385, 387, and 397.

4. **Foundations of Education**  
   This degree program area is designed to meet the personal-professional needs of the following students: (1) research scholars who wish to undertake protracted and intensive study of education as a disciplined, systematic field of inquiry; (2) inservice teachers and community college educators who are interested in the broad theoretical foundations of education, beyond specific specialization; (3) administrators, school-board members, and community leaders who wish a broad background in the theoretical-practical underpinnings of education; (4) laymen who wish to study broadly the field of education in order to make reasoned and critical judgments about the many educational proposals to which they are constantly exposed; (5) professionals
outside the field of education (for example, journalists, writers, clergymen, businessmen) who want a general, multi-disciplinary understanding of education in all of its components; and (6) innovators who are interested in critical, in-depth studies of alternative educational structures (for example, inner-city and rural community schools), and (7) individuals concerned with international education and service to developing countries.

Courses in foundations of education include 204, 205, 206, 209, 252, 255, 302, 303, 354, and EDSS 313 and EDLS 377.

Inquiries regarding this program should be addressed to Professor David A. Shiman.

5. Interdisciplinary Major This degree program is for students who wish to pursue a self-designed, integrated program of study. The program draws primarily from graduate courses in Administration and Planning, Counseling, Student Personnel Services in Higher Education, and Foundational Studies. It may include courses from other departments within the College and the University. A minimum of 36 credit hours is required for completion of the program. The program is ideally suited for persons whose personal and professional development requires a combination of coursework not readily available in other graduate programs, or for individuals who plan to assume new or emerging roles in the fields of Education or Social and Human Services.

Applicants should have a clear understanding of how the Interdisciplinary Program will serve their career goals. For this reason, major emphasis in admission is placed upon the applicant’s Statement of Purpose. Applicants are strongly encouraged to contact the Department of Organizational, Counseling, and Foundational Studies, 228 Waterman Building, prior to making application for admission. Detailed information about the program and admissions criteria will be supplied upon request.

II. SPECIAL EDUCATION, SOCIAL WORK, AND SOCIAL SERVICES

The Special Education Graduate Program in this department prepares teachers of preschool, elementary, secondary and multihandicapped children and youth. The following concentrations are available:

Intensive Special Education The Intensive Special Education concentration prepares educators of the moderately, severely and multi-handicapped. Only certifiable educators or experienced mental retardation service providers are considered. The course sequence consists of 36 credit hours of coursework, laboratory (practicum) experience and internship. Courses in Intensive Special Education include: EDSP 217, 228, 290, 301, 302, 310 and 386. A six credit summer course is followed by a full-time year or a part-time sequence of at least two years.

Essential Early Education The Essential Early Education prepares educators of preschool handicapped children. Only certifiable educators or experienced service providers are considered. The course sequence consists of 36 credit hours of coursework, laboratory (practicum) experience and internship. Courses in Essential Early Education include: EDSP 217, 301, 302, 310, 312 and 386. A six credit summer course if followed by a full-time year or a part-time sequence of at least two years.
Elementary and Secondary Special Education  The Elementary and Secondary concentrations prepare Mainstream, Special Class Resource Teachers and Vocational Educators. Only certifiable educators currently employed as service providers are considered. The course sequence consists of 36 credit hours of in-service coursework and laboratory (practicum) experience. Courses include: EDSP 301, 310, 312, 319 and approved electives.

Inquiries regarding the Special Education Graduate Program should be addressed to the Chairperson.

III. PROFESSIONAL EDUCATION AND CURRICULUM DEVELOPMENT
In the event of restrictions on enrollment, preference will be given to Vermont residents holding professional positions in education and social services.

1. Teacher Education (Curriculum and Instruction)  This masters program is designed to develop leadership in such educational settings as teaching, curriculum theory, curriculum development, and related areas of research for elementary and secondary public and private school settings. The program is also appropriate for those with teaching roles in human services agencies.

Programs are developed to provide a comprehensive background in fields basic to instruction and curriculum development as well as the application of that knowledge to a specialized field. They include courses aimed at the examination and improvement of instructional practices in elementary and secondary schools, and understanding of curriculum theory and the application of curriculum theory to instruction and curriculum development. Opportunities for independent, research are encouraged in the specializations represented in the course offerings of the Department of Professional Education and Curriculum Development.

As in the education of teachers enrolled for pre-service degrees, work at the graduate level also draws upon other divisions of the University, thus enabling the College to develop strong programs of professional education which include academic offerings in the various teaching fields in elementary and secondary education.

Degree concentrations, in addition to those listed below, can be developed on an interdisciplinary basis responding to student strengths and needs.

Courses in teacher education include 211, 217, 218, 225, 227, 228, 241, 242, 244, 248, 256, 257, 259, 270, 271, and 333.

Inquiries regarding these programs should be addressed to the Chairperson.

Within the Teacher Education Program Area, it is possible to concentrate in school library media. This satisfies the need for the practicing teacher to cope with computer-assisted instruction, programmed learning, tape cassettes, film, and video tape. The individual will pursue a specialization that allows the acquisition of a perspective that broadens that potential use of a school media-library. Depending upon the coursework selected, the graduate could become certified as an elementary or secondary school librarian. A minimum of eighteen hours of study beyond the six hours of foundational study is necessary for a concentration in school library-media education. Minimally, the graduate is conver-
sant with the tools available to the classroom teacher in a school library-media center and the graduate has practical application of those skills. Inquiries regarding this program should be addressed to Professor Helene Lang.

2. Reading and Language Arts The purpose of this program area is to prepare teachers and specialists in the field of reading. Classroom teachers, reading specialists or consultants, supervisors and administrators are responsible for developing programs which will enable every student to attain his maximum proficiency in the use of reading and language. To meet this end several courses have been devised with focus on both classroom reading instruction and reading difficulties. Through the Reading Center program students also have opportunities for laboratory experiences as well as for research and study in reading, literature, and language arts.

Courses in reading and language arts include 222, 223, 234, 275, 276, 378, and 379.

Inquiries regarding this program should be addressed to Professor Lyman Hunt.

MASTER OF SCIENCE
The Master of Science degree is offered in Human Development and Family Studies. The course of study is designed to provide for thorough study of the principles of Human Development across the life span, current issues and research, and applications to practical situations. Special emphasis is placed on development within family relationships and on the transactions between developing individuals and social institutions.

Admission to the Program requires, in addition to the Graduate College Application, respectable scores on the Graduate Record Examination indicating aptitude for graduate study and an interview leading to preparation of a proposed plan of study and statement of goals. Applicants are admitted only if the faculty and applicant agree mutually that the plan of study is appropriate to the student's goals and the capabilities.

Inquiries regarding this Master of Science program should be addressed to Professor Lawrence Shelton.

COURSES OFFERED
The College of Education and Social Services offers the following courses on a program basis. Departmental permission is required for enrollment.

200 CONTEMPORARY ISSUES Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisites: Twelve hours in education and related areas. Two to six hours.

295 LABORATORY EXPERIENCE IN EDUCATION Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences. Credit as arranged.
319 INTERNSHIP FOR SPECIALIZED PERSONNEL IN EDUCATION Students will undertake and approved internship in an institution which reflects the particular area of interest and needs of the student. **Prerequisite:** Permission of instructor. Credit as arranged.

380 PROFESSIONAL PROBLEMS IN EDUCATION Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area. Three hours.

382 TEACHING INTERNSHIP Supervised teaching experiences on a fulltime basis, with related seminars in teaching subject. **Prerequisite:** Permission of coordinator of Professional Laboratory Experiences, College of Education and Social Services. Three to eight hours.

391 MASTER'S THESIS RESEARCH Thesis topic must be approved by a faculty committee. Credit as arranged.

397 PROBLEMS IN EDUCATION Individual work on a research problem selected by the student in consultation with a staff member. **Prerequisites:** Twelve hours in education and related areas; endorsement by a sponsoring faculty member. Credit as arranged.

**EDSS — GENERAL EDUCATION**

211 EDUCATIONAL MEASUREMENTS The essential principles of measurement in education. Topics include validity, reliability, principles of test construction, item analysis and analysis of standardized tests as they apply to the classroom. **Prerequisite:** Twelve hours in education and related areas. Three hours.

236 PROFESSIONAL WRITING Course will focus on problems in writing faced by professionals in educational and human service settings. Students will write reports, critiques, and reviews; analyze examples of published work in similar odes; and receive detailed critiques of their work. Three hours.

238 TEACHING FOR GLOBAL AWARENESS Focus on three important value issues — peace and the prevention of war, social and economic justice, and environmental harmony — and their relationship to global problems. Curriculum materials will be developed and shared. Ways of teaching about global issues will be stressed and links made between local and global concerns. **Prerequisite:** Twelve hours of education and related areas. Three hours.

248 EDUCATIONAL MEDIA Modern instructional aids, theory and practice; educational media related to psychology of teaching and learning. **Prerequisite:** Twelve hours in education and related areas. Three hours.

313 STATISTICAL METHODS IN EDUCATION AND SOCIAL SERVICES An introductory course covering the basic concepts of descriptive and inferential statistics. Topics include frequency distributions, measures of central tendency and dispersion, correlation, and hypothesis testing. Special emphasis will be placed upon the application of these concepts to educational situations. Three hours.
333 CURRICULUM CONCEPTS, PLANNING & DEVELOPMENT An overview of conceptions of curriculum for elementary and secondary education; examination of contemporary curriculum trends and issues; processes for initiating, planning and developing curriculum activities and programs. Prerequisites: Twelve hours of education or permission of instructor. Three hours.

EDLS — LEARNING STUDIES

212 CHILD AND ADOLESCENT PSYCHOLOGY An examination of children and adults as emerging individuals and the impact of socio-cultural ethics, values, and institutions on that individual. A variety of themes will be explored including human needs, values, self concept, personal freedom, bureaucratic society, cross cultural issues; as relative to children and youth. Prerequisite: Twelve hours in education and/or related areas. Three hours.

237 SEMINAR IN EDUCATIONAL PSYCHOLOGY Examination of personal values, attitudes, and beliefs related to learning, psychological research of the teaching-learning process, use of such research in analyzing the process of education, and the creation of applications for educational settings of all kinds. Prerequisite: Twelve hours in education and related areas. Three hours.

EDFS — FOUNDATIONS

204 SEMINAR IN EDUCATIONAL HISTORY Struggles for Freedom and Equality. Study of selected topics in the history of education. Special attention to education in democratic and authoritarian social orders. Discussions and research around such topics as the education of women, black heritage, and American higher education in transition. Prerequisite: Twelve hours in education and related areas or permission of the instructor. Three hours.

205 HISTORY OF AMERICAN EDUCATION Educational principles and practices in the United States as they relate to the main currents of social history. Discussions will focus on key ideas of historic and contemporary significance. Prerequisite: Twelve hours in education and related areas or permission of the instructor. Three hours.

206 COMPARATIVE EDUCATION A cross-cultural examination of education and selected social services in several countries, e.g. China, U.S.S.R., England. Ideology, social class, and social change are some of the themes to be explored. Prerequisite: Twelve hours in education and related areas. Three hours.

209 INTRODUCTION TO RESEARCH METHODS IN EDUCATION AND SOCIAL SERVICES Seminars and research projects will introduce the students to the methods of historical, descriptive, experimental, quasi-experimental, field studies, and survey research. Three hours.

252 SEMINAR IN AESTHETIC EDUCATION A critical examination of aesthetic values in contemporary society. The aesthetic quality of natural and
built environments with implications for present and future educational practice will be given special attention. **Prerequisite:** Twelve hours in education and related areas. Three hours.

255 SCHOOL AS A SOCIAL INSTITUTION. Examination of the school and related social institutions, with particular focus on the following themes: social class, race, and ethnicity, socialization, role of the family, and social change. **Prerequisite:** Twelve hours of education and related areas. Three hours.

302 PHILOSOPHY OF EDUCATION A critical examination of key beliefs and values which underlie such current philosophies of helping, e.g. phenomenological, behavioral, and holistic, as these are practiced in a variety of educational and social service institutions. **Prerequisite:** Twelve hours in education and related areas. Three hours.

303 THE ETHICS OF HELPING RELATIONSHIPS The general objectives of the course will be to clarify the ethical dimensions of professional rights and obligations for educators, counselors, administrators, and other helping professionals. This course will examine selected ethical controversies currently facing the helping professions. **Prerequisite:** Twelve hours in education and related areas. Three hours.

354 ANTHROPOLOGICAL PERSPECTIVES ON EDUCATION AND SOCIAL SERVICES An introduction to ideas and research in cultural anthropology and its relationship to education, popular culture, and human services. An anthropological perspective on teaching, learning, and helping as these occur in selected American institutions. A cultural appraisal of media influences on education is included. **Prerequisite:** Twelve hours in education and related areas. Three hours.

**EDEL — ELEMENTARY EDUCATION**

222 IMPROVEMENT OF READING INSTRUCTION IN THE ELEMENTARY SCHOOL Analysis of philosophies, program, and instructional practices for teaching reading. Examination and evaluation of basal textbook, individualized, and specialized reading programs. **Prerequisites:** Twelve hours in education and/or related areas including an introductory course in reading or permission of the instructor. Three hours.

234 LITERATURE AND LANGUAGE FOR CHILDREN AND YOUTH Characteristics, interests, and reading habits of children and young people; criteria for selection and evaluation of literature: organizing book units for teaching literature and for content areas with an emphasis on the development of oral and written expression. **Prerequisite:** Twelve hours in education and related areas or consent of instructor. Three hours.

241 SCIENCE FOR THE ELEMENTARY SCHOOL This course will examine a number of elementary school science programs. Emphasis on the methods and materials relating to the construction and use of science units for children in grades K-6. **Prerequisite:** Twelve hours in education and related areas and permission of instructor. Three hours.
242 MODERN TRENDS IN ELEMENTARY EDUCATION Study of modern educational principles and practices in today's elementary schools. Emphasis on communication in the classroom, interaction between students and teachers, materials, and emerging trends as they affect the elementary school. The course will deal with different teaching modes that may assist in the development of more critical analysis of the teaching act. **Prerequisite:** Twelve hours in education and related areas. Three hours.

244 SOCIAL STUDIES IN THE ELEMENTARY SCHOOL Study of literature, research, and problems in teaching social studies in the elementary school. **Prerequisite:** Twelve hours in education and related areas. Three hours.

256 METHODS AND MATERIALS IN ELEMENTARY SCHOOL MATHEMATICS Topics include the evolution of mathematical concepts and notations, the meaning of numbers and number systems, the theory underlying fundamental operations, metric measurement, and an analysis of the modern approach to mathematics. Emphasis on a manipulative approach to teaching mathematics in the elementary school. **Prerequisite:** Twelve hours in education and related areas. Three hours.

270 KINDERGARTEN METHODS AND ORGANIZATION Objectives, organization, curriculum, methods and materials, and relationships of kindergarten to Head Start and other pre-school experiences. **Prerequisite:** Twelve hours in education and related areas. Three hours.

271 KINDERGARTEN EDUCATION WITH LABORATORY EXPERIENCES Designed to acquaint the prospective kindergarten teacher with educational research conducted by Piaget, Bruner, Montessori, and others with experiences provided for working with children of kindergarten age. **Prerequisite:** Twelve hours in education and related areas. Three hours.

375 ANALYSIS OF READING AND RELATED DIFFICULTIES Analysis and evaluation of learning difficulties with emphasis on reading and writing; nature of difficulties; procedures and materials for assessing reading performance. Involvement with children is required. **Prerequisite:** Six hours in reading and three hours in education or permission of instructor. Three hours.

376 LABORATORY EXPERIENCES IN READING AND RELATED LANGUAGE INSTRUCTION Approaches to be used for the prevention and correction of reading and written language difficulties. Supervised teaching of individuals and/or small groups experiencing reading and language problems. Apprenticeships in reading instructional programs. **Prerequisite:** 375. Three hours.

378 ADVANCED STUDY AND RESEARCH IN READING AND RELATED LANGUAGE ARTS Survey of research, comparison and evaluation of emerging programs design and development of projects in reading. **Prerequisite:** Fifteen hours in education including nine hours in the field of reading and language education, or permission of instructor. Three hours.
379 SEMINAR IN READING INSTRUCTION  Study of reading relative to total curriculum. Significant trends and concepts related to specific problems and programs in reading and language arts instruction; role of the supervisor and the reading consultant. Prerequisites: Fifteen hours in education including nine hours in the field of reading and language education or permission of instructor. Three hours.

EDSC — SECONDARY EDUCATION

217 SECONDARY SCHOOL CURRICULUM  Principles and problems in curriculum development. An analysis of recent curricular innovations in American secondary schools. Prerequisite: Twelve hours of education and related areas. Three hours.

223 READING PROGRAMS IN SECONDARY SCHOOLS AND COLLEGES  Relationship of reading to learning: study of organization, instructional procedures, and materials for developing reading improvement programs for secondary and college students; reading in content areas. Prerequisite: Twelve hours in education and/or related areas or consent of instructor. Three hours. (Also offered for undergraduates under 137.)

225 TEACHING SOCIAL STUDIES IN SECONDARY SCHOOLS  Includes multiple teaching modes, questioning techniques, microteaching laboratory, analysis of historical content to determine students’ prerequisite cognitive skills and processes for construction of historical scenarios. Prerequisite: Twelve hours of education and related areas. Three hours.

227 TEACHING SCIENCE IN SECONDARY SCHOOLS  Consideration of science curricula for grades 7-12. The following is a representative listing of topics to be examined: Teaching science as problem-solving, research in science teaching, evaluation strategies, instructional techniques, and affective education through science. Prerequisites: Twelve hours in education and related areas and permission of instructor. Three hours.

228 LITERATURE IN THE JUNIOR—SENIOR HIGH SCHOOL CURRICULUM  (Literary Criticism for Teachers). Three hours.

229 COMMUNICATIVE ARTS IN SECONDARY SCHOOLS  (Teaching English in Secondary Schools). Three hours.

257 TEACHING MATHEMATICS IN SECONDARY SCHOOLS  Three hours.

259 TEACHING FOREIGN LANGUAGE IN THE (Secondary) SCHOOL  Three hours.

282 SEMINAR FOR PROSPECTIVE TEACHERS OF ENGLISH  (See English 282.)

294 SEMINAR FOR PROSPECTIVE TEACHERS OF COMMUNICATIONS  (See Communication 294.)

303-304 PROBLEMS AND RESEARCH IN TEACHING SECONDARY SCHOOL ENGLISH  See English 303-304.
EDMU — MUSIC EDUCATION

240 MUSICAL CREATIVITY IN THE GENERAL MUSIC CLASS Designing a course of study for the general music class. Developing musical concepts and perception through individual differences. Aural approach through class performance on recorders. Prerequisite: An undergraduate major in music education or permission of instructor. Three hours.

243 RECENT RENDS IN MUSIC EDUCATION Study of recent thought and practices in music education. Examination of current trends. Prerequisite: An undergraduate major in music education or permission of instructor. Credit variable, one to four hours.

253 PRACTICUM IN MUSIC EDUCATION Current methodology in music education for music specialist and classroom teacher. Each year the emphasis will be in a different area of concentration. Prerequisites: An undergraduate major in music education or elementary education and teaching experience or permission of instructor. Credit variable. Course may be taken for one to four hours each semester and may be repeated for a maximum of eight hours of credit.

290 BASIC CONCEPTS IN MUSIC EDUCATION Disciplinary backgrounds; historical and philosophical foundations; fundamental consideration of the functions of music in the schools; development of a personal philosophy. Three hours.

390 ORGANIZATION AND ADMINISTRATION OF MUSIC EDUCATION Study of the organization and administration of vocal and instrumental music in the public schools. Prerequisites: Graduate standing in music education and teaching experience or consent of instructor. Three hours.

ECHD — EARLY CHILDHOOD AND HUMAN DEVELOPMENT

260 FAMILY ECOSYSTEM The family will be viewed in and as an environment for human development. The family ecological approach will be applied to practical family concerns. Prerequisite: Senior standing or permission of instructor. Three hours. Edwards.

263 ADVANCED CHILD DEVELOPMENT A survey of the professional literature in child development with special emphasis on the influence of early life experiences throughout the life cycle. Prerequisite: 80-81 or equivalent. Three hours. Goldhaber.

264 CONTEMPORARY ISSUES IN PARENTING Contemporary cultural factors that influence adult lifestyles and their relationship to successful parenting. Prerequisite: Nine hours in human development or permission of instructor. Three hours. Goldhaber, Jameson.

265 TEACHING HUMAN DEVELOPMENT Designed for individuals who teach or plan to teach human development. Emphasis on group-building skills and interpersonal relationships. Prerequisites: Six hours in human development and permission of instructor. Three hours. Barbour.

266 SEMINAR IN HUMAN DEVELOPMENT Intensive study of issues in human development and their application in a wide variety of professional areas.
May be taken more than once up to a maximum of 12 credits. **Prerequisites:** Junior standing, nine hours of human development or equivalent. Three hours.

281 INFANCY Development and rearing from conception to 18 months and the relationship to subsequent development. **Prerequisites:** Nine hours in human development, nutrition, and physiology or biology or permission of instructor. Three hours. Shelton.

291 SPECIAL PROBLEMS Reading, discussion, and special field and/or laboratory investigations. **Prerequisite:** Departmental permission. Students may enroll more than once for a maximum of twelve hours. One to six hours.

295 SPECIAL TOPICS Lectures, laboratories, readings or projects relating to contemporary areas of study. Enrollment may be more than once; accumulation up to twelve hours. **Prerequisite:** Departmental permission.

296 FIELD EXPERIENCE Professionally oriented field experience under joint supervision by faculty and business or community representative. Credit arranged up to fifteen hours. **Prerequisite:** Departmental permission.

EDPE — PHYSICAL EDUCATION

201 ADMINISTRATION OF ATHLETIC PROGRAMS Designed to provide the athletic director, school administrator, and teacher-coach with a background for effective administration of the athletic program of schools. Including scheduling, budgeting, management, equipment, policy, public relations, and educational justification. **Prerequisites:** Twelve hours of education and psychology. Three hours.

203 PRINCIPLES OF PHYSICAL EDUCATION Principles basic to sound philosophy of physical education for appraisal of historical development; relationship to health education, recreation and other areas; foundation and functions of physical education in contemporary society. **Prerequisites:** Admission to the program and junior standing. Three hours.

240 PRINCIPLES OF MOTOR LEARNING AND HUMAN PERFORMANCE A study of the nature of motor learning; factors affecting motor learning, such as motivation, emotion, and stress; concepts of transfer and retention; alternatives in teaching and coaching methodologies based upon applied principles in motor learning. **Prerequisites:** 166 and EDSS 145 or 146. Three hours.

241 SEMINAR IN PHYSICAL EDUCATION AND ATHLETICS Examination and analysis of contemporary issues and trends in physical education and athletics not especially appropriate within the boundaries of an existing course. **Prerequisites:** Twelve hours in physical education and related areas. Variable credit (two-four hours).

253 CURRICULUM DESIGN IN HEALTH AND PHYSICAL EDUCATION Philosophy and techniques of curriculum innovation in health and physical education. Emphasis upon inter-relationships between student needs and interests, teaching methodology, evaluative procedures, community involvement, and administrative organization patterns. **Prerequisites:** Junior standing and 104, 105, 46 or 155. Three hours.
260 ADAPTIVE PHYSICAL EDUCATION Recognition, prevention, and correction of functional and structural deviations from normal body mechanics. The organization of programs adapted to the needs of handicapped individuals in both special class and mainstreamed settings. **Prerequisites:** 155, 104, 105 or equivalent teaching experience. Three hours.

**EDHE — HEALTH EDUCATION**

208 SCHOOL HEALTH PROGRAMS Organization of the total school health program. Problems and administration in the area of school environment, health services, health education, and school-community relationship. **Prerequisite:** 46 or equivalent. Three hours.

**EDLI — LIBRARY SCIENCE**

272 PUBLIC AND SCHOOL LIBRARY SERVICES **Prerequisite:** Twelve hours in education and related areas, or permission of instructor. Three hours.

273 CATALOGING AND CLASSIFICATION **Prerequisite:** EDLS 272 or equivalent. Three hours.

274 REFERENCE MATERIALS AND TEACHING THE USE OF LIBRARIES **Prerequisite:** EDLS 272 or equivalent. Three hours.

275 SELECTION OF BOOKS AND MATERIALS FOR YOUNG ADULTS **Prerequisite:** EDLS 272 or equivalent. Three hours.

276 REFERENCE SOURCES AND SERVICES **Prerequisite:** EDLS 274. Three hours.

277 LIBRARY MATERIALS AND SERVICES FOR MEDIA PERSONNEL **Prerequisites:** EDLS 272, 273. Three hours.

278 CATALOGING AND ORGANIZATION OF MEDIA MATERIALS **Prerequisite:** EDLS 273.

279 SELECTION OF LIBRARY MATERIALS FOR CHILDREN **Prerequisite:** EDLS 272 or equivalent. Three hours.

**EDHS — HUMAN SERVICES**

209 INTRODUCTION TO RESEARCH METHODS IN EDUCATION AND SOCIAL SERVICES Seminars and research projects will introduce the students to the methods of historical, descriptive, experimental, quasi-experimental, field studies, and survey research. Three hours.

258 COMMUNITY ORGANIZATIONS AND RESOURCES Introduction to the range of clients served by Human Service Agencies and response patterns typically initiated. Survey of facilities and services available. **Prerequisite:** Permission of instructor. Three hours.

291 SPECIAL TOPICS IN ORGANIZATIONAL AND HUMAN RESOURCE DEVELOPMENT Designed to accommodate various special issues in counseling, administration and planning, social work, or higher educa-
tion which are not appropriate to the content of an existing course. Courses will reflect the social services orientation of OCFS. Variable hours.

366 SOCIAL WELFARE AND SOCIAL WORK AS SOCIAL INSTITUTIONS Critical survey of the philosophy and purpose of social welfare and systems of service delivery in welfare agencies. Investigation of basic concepts of social work practice. Three hours.

EDSP — SPECIAL EDUCATION

201 FOUNDATIONS OF SPECIAL EDUCATION An examination of historical and current trends in the treatment of handicapped individuals, including the effects of litigation, legislation and economic considerations on educational and residential service delivery systems. Prerequisite: Twelve hours in education and related areas, or permission of instructor. Three hours.

207 COOPERATIVE LEARNING Theoretical and experiential instruction in procedures to increase social acceptance and academic achievement of exceptional learners in mainstream settings through cooperative learning is provided. Prerequisite: Permission of instructor. Three hours.

216 INSTRUCTION FOR MILDLY HANDICAPPED INDIVIDUALS An introduction to curriculum for instruction of children with learning disabilities, mental, retardation and behavior disorders with emphasis on objectives, assessment, task analysis, curriculum and evaluation is provided. Prerequisite: Permission of instructor. Three hours.

217 INSTRUCTION FOR SEVERELY HANDICAPPED INDIVIDUALS Individualized instruction for severely handicapped learners with emphasis on objectives, assessment, task analysis, curriculum and evaluation is provided. Prerequisite: Permission of instructor. Three hours.

224 INSTRUCTION FOR MILDLY HANDICAPPED INDIVIDUALS Students apply principles of behavior analysis to improve academic and social skills of individuals with learning disabilities, mental retardation and behavior disorders. Prerequisite: Permission of instructor. Three hours.

228 INSTRUCTION FOR SEVERELY HANDICAPPED INDIVIDUALS Students apply advanced principles of behavior analysis to improve skills in learners severely handicapped in motor, social, communication or self-care areas. Prerequisite: Permission of instructor. Three hours.

275 DEVELOPING VOCATIONAL INSTRUCTION FOR STUDENTS WITH SPECIAL NEEDS (See Voc. Ed. & Tech. 275.)

290 CURRICULUM FOR HANDICAPPED INDIVIDUALS This course provides intensive study of that aspect of curriculum that constitutes the basic skills and knowledge to be learned at a given instructional level. The curriculum is specified in terms of instructional objectives and an evaluation system is developed to measure each learner's achievement. Prerequisite: Permission of instructor. Three hours.

296 SPECIAL EDUCATION PRACTICA FOR CLASSROOM TEACHERS Credit as arranged.
297 CURRICULUM FOR HANDICAPPED INDIVIDUALS Students develop and implement an objectives-based curriculum for learners with learning disabilities, mental retardation, behavior disorders and/or multihandicaps. **Prerequisite:** Permission of instructor.

298 SPECIAL EDUCATION PRACTICUM Students provide direct instruction for six learners with learning disabilities, mental retardation, behavior disorders and/or multi-handicaps. **Prerequisite:** Permission of instructor. Credit as arranged.

301 HISTORY AND SYSTEMS OF SERVICES FOR HANDICAPPED INDIVIDUALS An examination of historical and current trends in the treatment of handicapped individuals, including the effects of litigation, legislation and economic consideration on educational, vocational and residential service delivery systems. **Prerequisite:** Acceptance as candidate for M.Ed. degree in special education, or permission of instructor. Three hours.

302 PHYSICAL AND DEVELOPMENTAL CHARACTERISTICS OF INDIVIDUALS WITH MULTI—HANDICAPS Students will study normal development—birth through six years, developmental disorders and handicapping conditions, medical and health considerations for the multi-handicapped and management of the multi-handicapped learner through the employment of appropriate handling and positioning, feeding and toileting procedures. **Prerequisite:** Permission of instructor. Three hours.

310 CURRICULUM AND TECHNOLOGY IN SPECIAL EDUCATION Development and application of procedures for curriculum analysis, curriculum sequencing, and assessment of learning for instruction of learners with learning disabilities, mental retardation, behavior disorders, and multi-handicaps. **Prerequisite:** Permission of instructor. Variable credit.

312 ADVANCED BEHAVIORAL PRINCIPLES IN SPECIAL EDUCATION A survey on behavior theory and research applications for learners with learning disabilities, mental retardation, behavior disorders and multi-handicaps. **Prerequisite:** Permission of instructor. Variable credit.

316 RESEARCH SEMINAR IN SPECIAL EDUCATION Students apply social psychology and learning theory to promote education and socialization of handicapped and nonhandicapped learners in integrated home, school and community settings. Students are required to design and conduct a research project. **Prerequisites:** EDSP 310, 312 or permission of instructor. Three hours.

317 DESIGN AND EVALUATION OF EDUCATION FOR SEVERELY HANDICAPPED INDIVIDUALS Students analyze and adapt curricula for the severely handicapped, utilizing knowledge of normal and abnormal motor development, feeding techniques, adaptive and prosthetic devices, medical aspects, parent professional partnership, socialization and normalization, and legal aspects. **Prerequisites:** Permission of instructor. Three hours.

319 INTERNSHIP FOR SPECIALIZED PERSONNEL IN EDUCATION Students will undertake an approved internship in an institution which reflects the particular area of interest and needs of the student. Competency-based instruction in the development and implementation of effective programs for learners eligible for special education services is provided. **Prerequisite:** Permission of instructor. Credit as arranged.

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>320</td>
<td>LABORATORY EXPERIENCE IN EDUCATION: EDUCATIONAL PROGRAMMING FOR THE SEVERELY HANDICAPPED</td>
<td>Students identify and evaluate severely handicapped learners and demonstrate competency in handling, positioning and feeding. Additionally, they assess current skill levels and design educational programs, including objectives, teaching/learning procedures, evaluation and measurement. Prerequisites: Master's Degree or equivalent and permission of instructor. Three hours.</td>
<td></td>
</tr>
<tr>
<td>322</td>
<td>INTERNSHIP IN SPECIAL EDUCATION: THE TRIADIC MODEL OF CONSULTATION</td>
<td>Competency-based instruction in oral and written communication, consultation and workshop level training is provided. Students apply the consultation model in an educational setting. Prerequisites: EDSP 310, 312 or permission of instructor. Three hours.</td>
<td></td>
</tr>
<tr>
<td>323</td>
<td>INTERNSHIP IN SPECIAL EDUCATION: SYSTEMS DEVELOPMENT</td>
<td>Competency-based instruction in planning for system level development and change is provided. Students apply systems theory in an educational setting. Prerequisites: EDSP 310, 312 or permission of instructor. Three hours.</td>
<td></td>
</tr>
<tr>
<td>384</td>
<td>TEACHING INTERNSHIP IN SPECIAL EDUCATION: COURSE DEVELOPMENT AND IMPLEMENTATION</td>
<td>Instruction in developing competency-based courses in special education for inservice teacher training is provided. Practicum involves team teaching with University special education faculty. Prerequisites: Certification as a Consulting Teacher/Learning Specialist and permission of instructor. Six hours.</td>
<td></td>
</tr>
<tr>
<td>385</td>
<td>TEACHING INTERNSHIP: ADVANCED SYSTEMS DEVELOPMENT AND MANAGEMENT IN SPECIAL EDUCATION</td>
<td>Competency-based instruction in developing and adapting technological programs for system-level change is provided. Prerequisite: EDSP 319 (6 hours) and permission of instructor. Three to six hours.</td>
<td></td>
</tr>
<tr>
<td>386</td>
<td>TEACHING INTERNSHIP: MANAGEMENT OF LEARNING ENVIRONMENTS FOR THE SEVERELY HANDICAPPED</td>
<td>Implementation of data-based individualized education in one-to-one, small group and large group instruction for severely handicapped student(s) in special or regular classrooms. Prerequisites: EDSP 217, 290, 228 or permission of instructor. Variable credit.</td>
<td></td>
</tr>
<tr>
<td>264</td>
<td>EVALUATION IN EDUCATION AND SOCIAL SERVICES</td>
<td>This course is designed to acquaint educational and social service personnel with an overview of the state-of-the-art of evaluation, emerging concepts, related models and potential applications to settings requiring data to be systematically analyzed. Twelve hours in education or permission of instructor. Three hours.</td>
<td></td>
</tr>
<tr>
<td>266</td>
<td>EDUCATIONAL FINANCE</td>
<td>Consideration will be given to the National and State statues and practices in Educational Finance and Taxation; local practices in taxation; other revenue sources; methods for school budgeting; and financial expenditure procedures. General opinions; Special Education procedures; Vermont State Board and State Education Department policies and regulations. **Prerequisites:** Twelve hours in education or permission of instructor. Two-three hours.

**291 SPECIAL TOPICS IN ORGANIZATIONAL AND HUMAN RESOURCE DEVELOPMENT** Designed to accommodate various special issues in counseling, administration and planning, social work, or higher education which are not appropriate to the content of an existing course. Courses will reflect the social services orientation of OCFS. Variable hours.

**332 SEMINAR IN ADMINISTRATION AND PLANNING** Provides an opportunity for the students to experience and apply selected administration and planning concepts and skills through seminar and selected simulations of public school and social service organizational settings. Three hours.

**335 STAFF EVALUATION AND DEVELOPMENT** Supervisory roles, behavior, responsibilities, and relationships in educational and social service organizations; processes for evaluating the performance and promoting the development of staff, and increasing organization effectiveness. Three hours.

**337 POLITICAL PROCESSES IN EDUCATION AND SOCIAL SERVICE ORGANIZATIONS** Political and operational relationships of social organizations to multiple publics and governmental bodies at the local, state, and national levels. Three hours.

**352 ANALYSIS OF EDUCATIONAL AND SOCIAL SERVICE ORGANIZATIONS** Organizations and open or closed systems; examination of goals, power and conflict, leadership and decision making, roles, communication; diagnosing causes of organizational problems; factors aiding and impeding organizational change. Three hours.

**353 SEMINAR IN ORGANIZATIONAL LEADERSHIP** Administrative roles, functions, and responsibilities in maintaining and changing organizations; hierarchical relationships; leadership styles and behavior appropriate for managing in contemporary and future organizations. Three hours.

**354 GENERAL AND SOCIAL SYSTEMS THEORY** General Systems Theory is analyzed in terms of its utility for examining social systems, macrosystems analysis of research, planning, and interdisciplinary dialogue. Three hours.

**355 SYSTEMS ANALYSIS AND PLANNING** An analysis of and experience with planning theories and techniques that derive from General Systems Theory. Three hours.

**356, 357 SEMINAR IN FUTURISM AND PLANNING** Knowledge, values, and attitudes relating to the concept of the future; ways of looking at the future; alternative futures, trend analysis, and goal setting; planning processes applied to educational and social service organizations. Six hours (each semester can be taken independently).

**358 SEMINAR IN COMMUNITY EDUCATION** The seminar participants will analyze the Community Education process, relate the process to community development, and develop strategies for the planning and implementation of Community-Education. Three hours.
386 ORGANIZATION AND HUMAN RESOURCE DEVELOPMENT The concept and practice of organization development, analysis of and laboratory experience in the utilization of intervention methodologies. Prerequisite: One course relating to human relations and one course relating to organizations or equivalent (e.g., 220, 332, 352, 353, 355, 374, 383), or permission of instructor. Three hours.

EDHI — HIGHER EDUCATION

291 SPECIAL TOPICS IN ORGANIZATIONAL AND HUMAN RESOURCE DEVELOPMENT Designed to accommodate various special issues in counseling, administration and planning, social work, or higher education which are not appropriate to the content of an existing course. Courses will reflect the social services orientation of OCFS. Variable hours.

360 HIGHER EDUCATION IN AMERICA A critical, contemporary overview of the American university in crisis. The American university will be examined from the perspectives of differing value positions, and the implications of these conflicting value philosophies for the theory and practice of higher education. Three hours.

362 THE AMERICAN COLLEGE STUDENT Study of the American college student within his living-learning environment. Emphasis upon sociological and psychological aspects in relation to student personnel work and counseling. Prerequisite: Twelve hours in education, psychology, and sociology or related areas. Three hours.

385 STUDENT DEVELOPMENT IN HIGHER EDUCATION Purposes, organization, and administration of student personnel services in higher education. Focus on general practices, current research, and future trends within a human development framework. The various personnel services will be examined as they assist the student to grow and develop within the unique college culture and environment. An understanding of the role, objectives and philosophical assumptions of student development education will be provided. Three hours.

387 SEMINAR IN HIGHER EDUCATION Designed for graduate students concentrating in programs in Higher Education. Analysis and discussion of current issues and problems in higher education. Prerequisite: Permission of instructor. One to three hours.

EDCO — COUNSELING

220 PERSONALITY DEVELOPMENT Approaches to understanding human behavior in applied settings. With emphasis on behavior development as an interpersonal process. Prerequisite: Twelve hours in education and psychology. Three hours.

274 COUNSELING THEORY AND PRACTICE A theoretical and practical approach to understanding the dynamics of the counseling process. Emphasis placed upon the refinement of a personal philosophy and theory of counseling and the implementation of it in practice. Prerequisite: Graduate standing, twelve hours in education and/or psychology, and permission of instructor. Three hours.
291 SPECIAL TOPICS IN COUNSELOR EDUCATION  Designed to accommodate various special issues in counseling, administration and planning, social work, or higher education which are not appropriate to the content of an existing course. Courses will reflect the social services orientation of OCFS. Variable hours.

293 GROUP DYNAMICS: THEORY AND EXPERIENCE  Encounter group experience for prospective counselors geared to provide them with increased awareness of self and of their modes of relating to others. Study of theory and practice of group dynamics. Prerequisites: Twelve hours in education and psychology and permission of instructor. Three credits.

295 LABORATORY EXPERIENCE IN COUNSELING  Supervised practice in counseling techniques. Students develop skills and receive feedback. Use is made of videotape facilities. Prerequisites: Counseling majors only, concurrently enrolled in EDCO 274 or consent of instructor. Three hours.

321 CONSULTATION SKILLS  The consultation relationship in educational and Social Service settings. Prerequisites: EDCO 220, permission of instructor. Three hours.

350 FOUNDATIONS OF THE HELPING PROCESS  Critical analysis of the various facets of counseling within the current cultural setting. Special emphasis upon goals of the helping process and their justification. Prerequisite: Twelve hours in education and psychology. Three hours.

351 USING TESTS IN COUNSELING  Techniques used to explore the psychology of individual differences and group assessment. Experience given in talking, administering, interpreting various tests: study project for application to any setting. Prerequisite: Twelve hours in education and psychology. Three hours.

368 LIFE STYLE APPRAISAL  A specialized technique for developing and understanding of an individual’s subjective method of perceiving life events. Applications of the technique in various counseling modalities. Practice in the use of the technique. Prerequisites: EDOH 220, 374, and permission of instructor. Three hours.

370 ELEMENTARY SCHOOL GUIDANCE  The development of counseling programs in the elementary school. Use of techniques appropriate to elementary school settings: classroom discussions, parent education, teacher consultation, appraisal techniques, etc. Emphasis placed on utilizing the total social milieu to enhance the development of positive self-concept in the child. Prerequisites: 220 and 350. Three hours.

381 COUNSELING FOR CAREER DEVELOPMENT  Psychology of career development with emphasis upon counseling for career decision-making within the current cultural context. Prerequisite: Graduate standing. Three hours.

384 PRACTICUM IN COUNSELING  Supervised experiences in individual and small-group counseling situations. A minimum of 30 hours in actual counseling relationships, with analysis and evaluation of verbatim samplings. For students nearing completion of Master’s in Guidance. Prerequisites: 374 and permission of instructor. Three hours.

386 ORGANIZATIONAL AND HUMAN RESOURCE DEVELOPMENT PROGRAM  The concept and practice of organization development, analysis
of and laboratory experience in the utilization of intervention methodologies. 

**Prerequisites:** Permission of instructor. Three hours.

388 PROCEDURES IN FAMILY COUNSELING Theory and process of counseling with families. Live demonstrations of family counseling with opportunities for student involvement. **Prerequisites:** EDOH 220, EDOH 374, and permission of instructor. Three hours.

389 ADVANCED PRACTICUM IN FAMILY COUNSELING Supervised practice in family counseling. **Prerequisites:** EDOH 388, permission of instructor.

393 ADVANCED STUDY IN THE THEORY AND PRACTICE OF GROUP COUNSELING Advanced study of group counseling theory as it applies to group establishment and intervention strategies. A field experience in group counseling is required. Three hours.

**OTHER COURSES IN EDUCATION**

In addition to the courses previously described, the following courses are also offered, usually in the Summer Session and Evening Division.

**ELECTRICAL ENGINEERING**

*Professors Absher, Anderson, Evering, Handelsman, Lai, Mirchandani, Roth, Rush (Chairperson) and Williams; Adjunct Associate Professor Koss; Adjunct Lecturer Bullis.*

Master of Science and Doctor of Philosophy programs are offered. Candidates normally have obtained the Bachelor of Science Degree in Electrical Engineering prior to application for admission but other applicants are encouraged to consider the program if they have extensive background in mathematics and the basic sciences. In such cases, it may be necessary for a student to complete his entrance qualifications without receiving credit toward his graduate studies. The general requirements for admission as outlined under the "Regulations of the Graduate College" must be met. Areas of research interests are control systems, biomedical engineering, electromagnetic fields, instrumen-
tation, solid state physical electronics, information processing, pattern recognition and communication theory, semiconductor materials, devices and integrated circuits.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE**

An accredited Bachelor's degree in Electrical Engineering or equivalent training.

**MINIMUM DEGREE REQUIREMENTS**

Advanced courses in electrical engineering, physics, and mathematics (18-24 hours) with at least 15 credit hours appropriately distributed in basic areas of study in the Electrical Engineering Department; thesis research (6-12 hours). Although a thesis is normally required in the program leading to the M.S. in Electrical Engineering, for students having substantial professional level engineering experience or having written high-quality technical reports which can be submitted as evidence, the thesis may be waived, with departmental approval, in favor of additional courses.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

Successful completion of Ph.D. comprehensive examinations. The majority of students will have completed the core program — comprising graduate courses in controls, fields, solid state circuits, communications, mathematics and physics — before taking the comprehensive examination.

**MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

At least 42 credit hours in courses and seminars and 30 credit hours in dissertation. Normally, 12 additional credit hours in an area of specialization are found necessary. The language requirement for the Electrical Engineering Ph.D. program is comprised of the following: satisfactory passing of a reading proficiency examination in one foreign language. The selection typically shall be made from French, German, Japanese or Russian. The requirements specified under the Regulations of the Graduate College must also be met.

**COURSES OFFERED**

201 LINEAR SYSTEM THEORY (3-0) Basic methods for analysis of systems and application to problems in electrical engineering. Modelling and analysis of both discrete and continuous-time linear systems in the time and frequency domains. Continuous-time and discrete-time Fourier transforms. Approximation and model reduction techniques using state-space methods. **Prerequisite:** Graduate standing in Electrical Engineering. Three hours. Mirchandani.

202 NETWORK ANALYSIS (3-0) Characterization of and computational methods for the analysis of linear and nonlinear circuits with emphasis on large-

209 TRANSIENT PHENOMENA Study of complex variable basis of Laplace and Fourier Transforms; applications to transient behavior of lumped and distributed parameter systems, root locus, Nyquist criterion and two dimensional field problems. Prerequisite: 171. Three hours. Rush.

231, 232 DIGITAL COMPUTER DESIGN Hardware components and design. Hardware organization and realization. Design concepts and procedures illustrated through the design of a small instructional computer. Microprogrammed control units, memory organization, hardware realization of high-speed arithmetic operations. Interrupt and I/O systems, interfacing and inter-system communications. Prerequisite: 171. Three hours. Rush.

233, 234 MICROPROCESSOR-BASED SYSTEMS AND THEIR APPLICATIONS (2-3) Introduction to mini/microcomputers; description of major types of peripheral components; programming peripheral devices; interface designs of analog and digital systems to mini/microcomputers; principles of microprogramming; bit-slice-based microcomputers. Prerequisites: Departmental permission. Three hours. Absher, Lai.

237 DIGITAL COMPUTER LOGIC, CIRCUITS & SYSTEMS The logical design of digital computers. Boolean algebra as an aid to circuit design. Circuits and components for the transmission, storage and modification of information and their combination into arithmetic units, memory devices, program controls and microprocessors. Prerequisite: Graduate standing or departmental permission. Three hours. Absher.

238 COMPUTER APPLICATIONS TO DESIGN AND MANUFACTURING (3-0) Computer hardware and software concepts. Basic and advanced APL (Program Language), practical computer applications in information management and process control. Prerequisite: Departmental permission. Three hours. Staff.

239 COMPUTER ASSISTED DESIGN (2-0) Circuit design, modeling and analysis via visual display computer terminals. Use of ASTAP system to analyze device characteristics and diffusion parameters. Prerequisites: 261 and departmental permission. Two hours. Staff.

240 BOUNDARY VALUE PROBLEMS IN ELECTROMAGNETISM Solution of classical problems of Electromagnetism using images, conformal mapping and separation of variables methods. Prerequisite: 141. Three hours. Rush.

242 THEORY AND APPLICATIONS OF TIME-VARYING FIELDS Maxwell's equations and boundary conditions for time varying systems. Propagation and reflection of electromagnetic waves, guided electromagnetic waves, and antennas. Prerequisite: 240 or departmental permission. Three hours. Handelsman.
244 RADAR SYSTEMS ENGINEERING. Radar theory including antennas, propagation, signal detection and parameter estimation. Applications including search and track radars, aircraft landing, radio/radar astronomy, and phased array radars. Prerequisite: 174 or departmental permission. Three hours. Han-delsman.

262 SEMICONDUCTOR DEVICES AND MATERIALS II. Operating principles of bipolar junction transistors and field effect transistors. Derivation of equivalent circuits. Applications to integrated circuits, charge-transfer devices, integrated injection logic. Prerequisite: EE 261. Three hours. Williams, Anderson.

263 SOLID STATE PHYSICAL ELECTRONICS I (3-0). Introduction to the physics of atoms and crystals through quantum and statistical mechanics. Application of these principles to semiconductor devices. Prerequisite: Physics 128. Three hours. Anderson.

264 SOLID STATE PHYSICAL ELECTRONICS II (3-0). Electronic properties of dielectric, magnetic and superconducting materials. Applications to devices. Prerequisite: EE 263. Three hours. Anderson.

281 SEMINAR Presentation and discussion of advanced electrical engineering problems and current developments. Prerequisite: Graduate engineering enrollment. One hour. Staff.

285 CREATIVE ENGINEERING Creative techniques applied to problems in process control, biomedical engineering, communications, circuit design. Prerequisite: Graduate standing in Electrical Engineering or departmental permission. Three hours. Staff.

295 SPECIAL TOPICS Formulation and solution of theoretical and practical problems dealing with electrical circuits, apparatus, machines or systems. Prerequisite: 4. Three hours. Staff.

311, 312 INTRODUCTION TO OPTIMUM CONTROL SYSTEMS Review of conventional s-plane design of linear systems. Introduction to the optimal control problems, parameter optimization, and least-square optimization in the frequency domain. Optimization using the calculus of variations, Pontryagin’s maximum principle, Hamilton Jacobi theory, and Dynamic programming. Computational methods for finding optimal controls and trajectories. Examples of optimum systems control. Introduction to stochastic control problems. Prerequisites: 111; 311 for 312. Three hours. Absher.

340, 341 SPECIAL TOPICS IN ELECTROMAGNETIC FIELD THEORY For advanced students in the field of electromagnetism. Topics selected from special interests of staff with lectures and readings from current literature. Three hours. Staff.

365 OPTICAL PROPERTIES OF SOLIDS Optical and optoelectronic properties of semiconductors. Applications to photodetectors, solar cells, light emitting diodes and lasers. Prerequisites: EE 262, EE 242, Phys. 273. Three hours. Anderson.

373, 374 DIGITAL COMMUNICATION (3-0, 3-0) Modulation and coding in digital communication systems. Baseband pulse transmission. Linear modulation systems. Digital FM and PM. Error-correcting codes: block codes and convolution codes. Applications. Prerequisites: Graduate standing in Electrical Engineering or 174; 373 for 374. Three hours. Lai.
366, 367 SOLID STATE THEORY Quantum mechanical free electron theory of metals. Quasi-free electron theory for periodic structures. Calculation of energy bands for the most common crystal structures employing the tight binding approximation. Introduction to the Boltzmann transport equation, Onsager Relations, and transport coefficients. Prerequisites: Physics 342; 366 for 367. Three hours. Staff.

378 SPECIAL TOPICS IN STATISTICAL COMMUNICATION AND RELATED FIELDS Coding for communication or computer systems, pattern recognition and learning machines, artificial intelligence, etc., selected from special interests of staff with lectures and readings from current literature. Prerequisite: Graduate standing in Electrical Engineering. Three hours. Lai.

391 MASTER'S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

The following courses are offered infrequently but may be taught where sufficient student interest is demonstrated.

220 ELECTRONIC INSTRUMENTATION FOR SCIENTISTS Three hours.

235, 236 HYBRID COMPUTERS Three hours.

251 APPLICATIONS OF LINEAR ALGEBRA Three hours.

272 INFORMATION THEORY Three hours.

317, 318 THEORY OF OPTIMUM CONTROL SYSTEMS Three hours.

319, 320 SPECIAL TOPICS IN CONTROL SYSTEM THEORY Three hours.

345 ELECTROMAGNETIC ANTENNAS AND PROPAGATION Three hours.

ENGLISH

Professors Bogorad, Bradley, Broughton, Clark (Chairperson), Cochran, Eschholz, Howe, Huddle, Jones, Long, Orth, Poger, Rosa, Rothwell, and Shepherd; Associate Professors Dickerson, Edwards, Gutman, Hall, Stanton (Director of Graduate Studies), Stephany, and Thompson; Assistant Professors Biddle, Simone, and Sweterlitsch.

The research interests of the faculty of the Department of English and library resources permit graduate students to undertake thesis subjects in virtually all the fields of the discipline.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

An undergraduate major in English or its equivalent; satisfactory scores on the Aptitude and Advanced Graduate Record Examinations; demonstration of proficiency in writing by a detailed statement concerning the purpose in pursuing graduate study in English.
MINIMUM DEGREE REQUIREMENTS

The Department also offers a program leading to the degree of Master of Arts in Teaching: see page 24.
For MA and MAT: Eighteen hours in English, including 302; 311 and 318, and six additional hours in English or a related field. Also for MA: 371; six hours of thesis research; and reading knowledge of a foreign language, normally French or German.

Note: The written comprehensive examination for the degrees of Master of Arts and Master of Arts in Teaching covers both English and American literature.

COURSES OFFERED

At the 200 level, the Department of English offers several seminars each semester which are numbered as described below. The specified topics vary each semester, depending on the instructors assigned. However, over the normal course of a graduate student's program, every member of the department's graduate faculty will offer a seminar in his area of special interest and expertise.

201, 202 Seminar in Language, Criticism or Rhetoric.
211, 212 Seminar in British Literature to 1660.
221, 222 Seminar in British Literature, 1660-1900.
231, 232 Seminar in Modern British Literature.
241, 242 Seminar in American Literature to 1900.
251, 252 Seminar in Modern American Literature.
261, 262 Seminar in Literary Themes, Genres or Folklore.
282 Seminar for Prospective Teachers of English. Grammar and language; literary interpretation and criticism; allied problems useful to teachers of English. Three hours. Biddle.
302 GRADUATE SEMINAR A seminar for graduate students only. The topic varies from semester to semester, depending on the faculty member assigned to the course. One seminar is required of all graduate students in English. Three hours.
303-304 PROBLEMS AND RESEARCH IN TEACHING SECONDARY SCHOOL ENGLISH Consideration of problems, curricular materials, teaching procedures and research methods in secondary school language, literature, and composition. Prerequisites: Twelve hours of education; acceptance as qualified to earn graduate credit in English. Three hours. Biddle.
311 CHAUCER Study of the principal works of Chaucer, with emphasis on Chaucer's literary scope, talents, and position in medieval literature. Three hours. A.I. Dickerson; Stephany.
318 MILTON Study of *Paradise Lost*, *Paradise Regained*, *Samson Agonistes*, minor poems, and selected prose works. Three hours. Bogorad.

371 PRINCIPLES OF LITERARY RESEARCH Methods of literary study, research, and scholarship. Required of all MA candidates in English. Three hours. Orth, Stanton. (Not offered 1981-82.)

391 MASTER'S THESIS RESEARCH Credit as arranged.

397, 398 SPECIAL READINGS AND RESEARCH Directed individual study of areas not appropriately covered by existing courses. Not to exceed three hours per semester.

EXTRA-DEPARTMENTAL COURSES

AREA STUDIES 297, 298 Seminar for area studies majors and other qualified students conducted by a team of area specialists and covering selected topics through interdisciplinary and comparative approaches. *Prerequisites:* Permission by the executive committee of Area Studies. Three hours. Staff.

ENVIRONMENTAL STUDIES 295 Advanced Seminar. Credit as arranged. Staff.

ENVIRONMENTAL STUDIES 296 Special Topics. Credit as arranged. Staff.

GENERAL LITERATURE 251, 252 STUDY OF MOVEMENT, GENRE, OR TOPIC Precise content of the course to be announced before the registration period, chosen from the following (or similar) topics: 1. *Medieval Epic* (French, Germanic, Spanish); 2. *Comedy* (Classics, English, French); 3. *Enlightenment* (French, English, German); 4. *European Romanticism* (English, French, German); 5. *Political Literature in the Nineteenth Century* (English, French, German); 6. *Existentialism in Literature* (French, German, Spanish); 7. *Avant-Garde Theater* (French, German, American); 8. *Tragedy* (Classics, French, German). *Prerequisite:* Any 100-level literature course in any of the cooperating departments. Three hours. Staff.

GRADUATE COLLEGE 301 SEMINAR IN COLLEGE TEACHING Practical assistance to the beginning teacher in developing an effective, individual teaching style. Activities include analysis of approaches to teaching; discussion with faculty from various departments; micro-teaching exercises. *Prerequisites:* Graduate Teaching Fellowship and selection by department. Three hours. Holmes.

GRADUATE COLLEGE 395 SPECIAL TOPICS Workshop in the Social Sciences. Staff.

TECHNOLOGY 201 SYSTEM DYNAMICS SEMINAR Review of system-dynamics literature. Detailed study of conceptualization, paradigms, generic structures, validation and implementation. Term project and paper in field of interest of student are required. *Prerequisite:* TECH 101 Principles of System Dynamics. Three hours. Roth.
FRENCH

Associate Professors Carrard, Crichfield, T. Geno, Julow, and Whatley (Chairperson); Assistant Professors Senecai, Whitebook, Wiley-Sandier; Lecturer M. Geno.

Opportunities for thesis research in French literature are offered in all areas from the medieval through the 20th century, as well as French-Canadian literature and African literature of French expression.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

An undergraduate major in French or equivalent. Satisfactory scores on the Aptitude and Advanced Graduate Record Examinations.

MINIMUM DEGREE REQUIREMENTS

Twenty-four hours in French, which may include six hours in a related field, and in addition:

Plan A: Thesis research (six hours)

Plan B: In lieu of a thesis the candidate may write a series of master’s essays with variable credit of up to three credits per paper (six hours).

A program is also offered leading to the degree of Master of Arts in Teaching. Satisfactory scores on the Graduate Record Examinations (Aptitude and Advanced) are prerequisite for acceptance to candidacy for this degree.

COURSES OFFERED

The following courses are available for graduate credit. They are divided into courses concerned primarily with advanced language study and those which treat literature. In literature, the two-hundred level courses, open to both undergraduates and graduates, cover the history of French literature from its origins to the present time by means of division into centuries and genres. Emphasis is placed on major figures and works, with a view to studying them for their intrinsic value as well as in their historical context. For more detailed information on specific courses, consult with department chairperson and the course instructor.

FRENCH LANGUAGE

209 ADVANCED GRAMMAR  Designed to help the student progress from an average workable knowledge of French grammar to a much more sophisticated level of speaking and writing French. Written and oral exercises are employed. Three hours. M. Geno.

210 ROMANCE PHILOLOGY  Phonological and morphological development of French, Spanish and Italian from their Latin origins, with emphasis on study of existing documents. Permission of the instructor. Course will be taught in English. Three hours. Whitebook.

215 METHODS OF TEXT ANALYSIS  An introduction to procedures and terminology used in the analysis of texts of various genres. Three hours. Carrard.
216 STYLISTICS On a comparative basis, study of the main idiomatic difficulties faced by English-speaking people who learn French; translation; analysis of the various "levels of speech" in French, with their stylistic features. Three hours. Carrard.

FRENCH LITERATURE AND CIVILIZATION

225, 226 MEDIEVAL FRENCH LITERATURE (1100-1500) Lectures and readings on aspects of Medieval culture, history, philosophy, and their relation to the literature of the period. Prerequisite: 225 for 226. Three hours. Whitebook. Alternate years, 1981-82.

235 16TH CENTURY FRANCE: A WORLD IN TRANSITION The 16th Century as a pivotal era between medieval and modern society, focusing on literary and esthetic movements, related to their historical and social contexts. Texts presented will illustrate the changing attitudes towards man and his place in the world. Three hours. Wiley-Sandler. Alternate years, 1983-84.

236 THE DEVELOPING RENAISSANCE IN FRANCE The cultural, historical, social and esthetic origins of Renaissance ideals, their development through the years 1530-1560, the breakdown of their influence, and some of their lasting effect in French thought. Among the topics to be covered: Humanism, the Italian influence, classical models and imitation, educational reforms, women writers, Rabelais, Du Bellay, Scève, Ronsard, Montaigne. Three hours. Wiley-Sandler. Alternate years, 1981-82.

245 THE BAROQUE AGE, 1600-1650 A study of the literature after France's religious civil wars, up to the triumph of Classicism. Readings may include religious, lyric and political poetry; idealistic, picaresque and fantastic novels; Corneille and Rotrou; the Pensees of Pascal. Three hours. Whatley. Alternate years, 1982-83.

246 17TH CENTURY Selected works of the Century with emphasis on Corneille, Racine and Molière. Three hours. Julow. Alternate years, 1982-83.

255 18TH CENTURY LITERATURE Readings in writers of the early 18th century such as Bayle, Fontenelle, Montesquieu, Marivaux, Prevost, Voltaire. Topics to be treated might include the impact of the new science on thought and art; the reflection in literature of new social types; the "pursuit of happiness"; the early evolution of the novel. Three hours. Whatley. Alternate years, 1983-84.

256 18TH CENTURY LITERATURE Readings in writers such as Rousseau, Diderot, Laclos, Bernardin de Saint-Pierre, Sade: the literature of the generation before the Revolution. Topics to be treated might include the attempts to define "natural man"; the relationship between the arts and morality; the relationship between liberty and libertinism. Three hours. Whatley. Alternate years, 1981-82.

265 THE ROMANTIC PERIOD Major figures, themes and tenets of the Romantic movement, including Chateaubriand, Madame de Stael, Hugo, Balzac, Stendhal, Constant, Musset, Vigny. Topics may include the revolt against Classicism, the Romantic view of nature, and the roman d'analyse, among others. Three hours. Crichfield. Alternate years, 1981-82.
266 THE SECOND EMPIRE THROUGH 1900  The rise of modern literary Realism, Naturalism, Symbolist poetry, Decadence. Authors will include Flaubert, Zola, Maupassant, Baudelaire, Verlaine, Rimbaud, Mallarme, Huysmans. Topics may include the image of la bourgeoisie, the theme of Paris vs. la Province, Symbolism and Impressionist painting and music, the influence of Positivism on the novel, and others. Three hours. Julow. Alternate years, 1981-82.

275, 276 TWENTIETH CENTURY LITERATURE  Selected topics, dealing with poetry and/or narrative related either to an historical period or a literary movement. Subjects may include the novel in the entre-deux-guerres, politics and the novel, World War II and literature, Surrealism, the literature of existentialism, the new novel, the development of modern poetry (1870-1940), etc. Each may be repeated up to six hours. Three hours. Carrard. Alternate years, 1982-83.

277 TOPICS IN 20TH CENTURY FRENCH THEATRE  Subjects may include 1) le theatre traditionnel: Claudel, Sartre, Giraudoux, Salacrou, Anouilh, (2) le theatre "de l'absurde": Ionesco, Beckett, Genet, Arrabal, (3) le theatre de la marge: Ghelderode, Pinget, Vian, Shehade, Audiberti, (4) la vision totale: a combination of all the above. Each may be repeated up to six hours. Three hours. T. Geno. Alternate years, 1982-83.

285 FRENCH CANADIAN LITERATURE  A study of fiction and poetry from 1835 to 1940. Three hours. Senecal. Alternate years, 1982-83.

289 AFRICAN LITERATURE OF FRENCH EXPRESSION  A study in La Francophonie drawing our attention to Africa by way of the Antilles and the USA. A survey of oral literature, poetic expression, theatrical expression and the novel seen through the culture and civilization of Africa's past and present and through the influence of France's colonial empire. Authors studied will include Senghor, Damas, Cesaire, Fanon, Diop, Oyono, Kane. Three hours. T. Geno. Alternate years, 1982-83.

291 CIVILIZATION OF FRANCE  A study of the geographical, political, social, economic and intellectual development of France from the Middle Ages to the present. Three hours. M. Geno.

295, 296 ADVANCED SPECIAL TOPICS

297, 298 ADVANCED READINGS AND RESEARCH

391 MASTER'S THESIS RESEARCH  Credit as arranged.
GEOGRAPHY

Professors Gade, Miles, and VandreMeer (Chairperson); Associate Professors Barnum, Lind, and Meeks; Assistant Professors Bodman, and Ryerson.

Faculty research interests include most systematic aspects of geography, especially from an historical perspective. Technique interests are in cartography, remote sensing, and quantitative methods. Regional interests and field experiences are almost world-wide in scope.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

Twelve semester hours or its equivalent in geography and supporting courses in related fields or demonstrated proficiency in geography which would be assurance of success in graduate study. Satisfactory scores on the aptitude portion of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Twenty-one hours in geography courses at the 200 and 300 level, including Geography 201, including Geography 287 or a reading knowledge of a foreign language, and including up to 6 hours in Geography 391; nine additional hours at the 200 and 300 level in geography and/or related fields; a satisfactory thesis. For additional information, please write to the Graduate Program Coordinator, Department of Geography.

The Department also offers a program leading to the degree of Master of Arts in Teaching: See p. 24.

COURSES OFFERED

Admission to the following courses for graduate credit requires the approval of the Graduate Program Coordinator in geography.

201 PERSPECTIVES ON GEOGRAPHY Geographic concepts and research methodology; the formulation, conduct, and presentation of a research effort. Three hours.

210 SPECIAL TOPICS IN REGIONAL GEOGRAPHY Specialized study of a particular region. Prerequisite: Permission of instructor. Three hours.

216 BIOGEOGRAPHY Processes and patterns of distribution, domestication, and human utility of plant and animal species and communities in varying environmental and historical contexts. Prerequisite: Nine hours in geography or biology. Three hours. Gade.

233 RURAL PLANNING See Agricultural and Resource Economics 233.

242 PROBLEMS IN PHYSICAL GEOGRAPHY Three hours. Gade, Lind, Meeks, Ryerson.

261 PROBLEMS IN VERMONT GEOGRAPHY Three hours.

270 PROBLEMS IN HUMAN GEOGRAPHY Three hours. Barnum, Bodman, Gade, Meeks, Miles, VanderMeer.

281 PROBLEMS IN CARTOGRAPHY Special laboratory projects. Prerequisite: 81. Three hours. Barnum, Ryerson.
REMOTE SENSING AND ENVIRONMENTAL PROBLEMS (Same as Geology 219). Research projects in remote sensing; application of multi-spectral data for environmental studies. Prerequisite: 85, Civil Engineering 210, or Forestry 142. Three hours. Lind.

SPATIAL ANALYSIS (Same as Agricultural and Resource Economics 287) Analysis of spatial pattern and interaction through quantitative models; introduction to measurement, sampling, and covariation in a spatial framework. Prerequisite: Graduate standing in geography or planning. Three hours. Bodman.

READINGS AND RESEARCH Credit as arranged.

GRADUATE TUTORIAL Readings and research on topics arranged individually by students with instructors; attendance in appropriate undergraduate courses may be required. Prerequisite: Permission of instructor. Three hours.

MASTER'S THESIS RESEARCH Credit as arranged.

GEOLOGY

Professors Hunt, and Stanley; Associate Professor Drake (Acting Chairperson); Assistant Professors Bucke, Doolan and Mehrtens; Adjunct Professors Ratte, and Hatch.

Research programs are oriented in the following areas: Selected problems in mineralogy; crystal chemistry of amphiboles; petrogenesis of mafic schists and ultramafic intrusions in Vermont; metamorphic and structural evolution of Vermont, with emphasis on Northern Vermont; structural geology of sedimentary and metamorphic terrains, including structural analysis of strain features of various sizes; petrofabric studies of strain features in selected minerals; geologic history and recent sedimentation of Lake Champlain; evolution, ecology and ontogeny of invertebrate fossils; sedimentary geology of western Vermont; glacial geology of Green Mountains and Champlain Lowland; problems in environmental geology. Interdisciplinary studies are available. Thesis topics should be in accord with faculty interests.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in Geology, year courses in Chemistry, Physics or Biology, and Calculus. Open to undergraduate majors in physics, chemistry, biology, engineering or mathematics who have accumulated 12 semester hours in geology. Satisfactory scores on Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Thesis and advanced courses in Geology must total at least thirty semester hours. Advanced courses in related sciences are encouraged and may be substituted for some selected Geology courses on approval by the departmental advisor. All students must complete successfully a course in field geology before graduation.
This can be satisfied by Geology 238, a comparable course at another institution, recognized experience with a state survey, U.S. Geological Survey, and oceanographic institute, a geolimnological group or industry. Satisfactory completion will be determined by the Departmental Studies Committee.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE IN TEACHING (GEOLOGY)
1. A bachelor's degree from an accredited institution;
2. Certification as a teacher of a physical or natural science;
3. Satisfactory scores on the Graduate Record Examination (aptitude portion).

MINIMUM REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE IN TEACHING (GEOLOGY)
Thirty hours of course work that will strengthen the student's background in earth science. Up to 12 hours of 100-level courses may be chosen if applicable. Course work may be chosen from supporting subject areas as well as from geology. Each student, in conference with his adviser, will develop a program suited to his needs and background. No thesis is required; however, each degree recipient must complete a general written or oral examination.

A program is also offered leading to the degree of Master of Arts in Teaching, see page 24.

COURSES OFFERED
211 SEMINAR IN SEDIMENTARY PROCESSES Selected readings and field studies emphasizing the interpretation of sedimentary deposits including transportation and geomorphology of ancient and recent sedimentary environments. *Prerequisite:* 155. Three hours.

212 SEMINAR IN SEDIMENTARY PROCESSES Paleoenvironmental analysis of carbonate rocks including selected readings, field investigations, and petrographic studies. *Prerequisite:* 155. Three hours. Bucke.

216 GLACIAL GEOLOGY Quaternary history of North America with emphasis on the origin, mechanics and effects of past and present glaciations. *Prerequisite:* Geology 105; junior standing or above. Three hours.

218 HYDROGEOLOGY The origin, occurrence, movement, and character of ground water with particular emphasis on pump test methods. *Prerequisite:* Junior standing or above. Three hours.

219 SPECIAL TOPICS IN REMOTE SENSING OF THE ENVIRONMENT See Geography 285. Three hours. Lind.

235 ADVANCED STRUCTURAL GEOLOGY Selected topics in analytical structure. *Prerequisite:* 166. Three hours. Stanley.

238 FIELD GEOLOGY Field mapping in Vermont. Methods of analysis of field data. Geological reports. Held in late summer. Prerequisite: 166 or departmental permission of instructor. Three hours. Stanley.

240 PLATE TECTONICS Development and current status of plate-tectonic concepts with applications to selected parts of the globe. Prerequisites: 156 or 166, permission of instructor. Three hours. Stanley.

242a, b REGIONAL GEOLOGY (a) Discussion of the geology of a selected region of North America; (b) A 4 week summer field trip to the area in question. Prerequisites: 105, 111; 242a for 242b. Four hours.

245 GEOLOGY OF THE APPALACHIANS Origin of mountain belts; Appalachian mountain system discussed in terms of sedimentation stratigraphic, structural, tectonic and petrologic processes active in modern continental margins. Prerequisites: 105, 111, Junior standing. Three hours. Doolan.

250 ADVANCED MINERALOGY Crystallographic, chemical, and physical properties of the common rock-forming minerals. Laboratory stresses technique of mineral identification and analysis of mineral assemblages. Prerequisite: 111. Three hours. Doolan.

252 CLAY MINERALOGY The structure, composition, properties, occurrence, origin, distribution, environmental significance of the various clay minerals. Laboratory techniques in identification of clay minerals and measurement of their physical and chemical parameters. Prerequisite: Permission of instructor. Three hours. Bucke.

254 GEOCHEMISTRY The application of basic concepts in chemistry to geological problems, including solution geochemistry, weathering, mineral paragenesis, and the effects of pressure and temperature. Prerequisite: 250, 155 or 156 or permission of instructor. Three hours. Drake.

262, 263 SEMINAR IN PETROLOGY Modern concepts of the evolution of igneous and metamorphic rocks. Emphasis directed toward application of petrologic concepts to interpretations of earth history and tectonophysics. Prerequisite: 156 or equivalent. Three hours. Doolan.

270 INVERTEBRATE PALEONTOLOGY Classification, geological distribution, evolution, paleoecology and morphology of major invertebrate fossil groups. Prerequisite: 121, or permission. Three hours. Hunt.

272 RECENT SEDIMENTATION Investigation of recent sedimentary environments using geolimnological and oceanographic techniques. Group and individual projects. Field oriented with use of the University research boats. Prerequisites: 155 or 42 and permission of instructor. Three hours. Hunt.

275 GEOLOGY OF OIL AND GAS Origin, migration and entrapment of
petroleum. Geology and classification of source and reservoir rocks and traps. Methods of subsurface analysis of sedimentary rocks and basin analysis. *Prerequisite:* 155 or permission. Three hours.

277 STRATIGRAPHY Study and interpretation of development and distribution of the sedimentary rocks. *Prerequisite:* 155. Three hours. Bucke.

291 SEMINAR IN GEOLOGY Selected topics of current interest. *Prerequisite:* Senior or graduate standing. One to three hours. Staff.

371 ADVANCED READINGS Readings and research problems intended to contribute to the program of graduate students in phases of geology for which formal courses are not available. *Prerequisite:* Graduate standing in geology. One to three hours. Staff.

391 MASTER'S THESIS RESEARCH Credit as arranged.

GERMAN

Professor Mieder (Chairperson); Associate Professors Richel, and Scrase; Assistant Professors Doane, and Mahoney.

Current research interests include East German literature; history of the German language; medieval literature; literature of the eighteenth, nineteenth and twentieth centuries; and folklore.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

An undergraduate major in German, including a year course in literature and a year course in advanced composition and conversation or the equivalent. Satisfactory scores on the Graduate Record Examinations.

MINIMUM DEGREE REQUIREMENTS

Thirty hours of graduate level courses including German 281, 282; additional courses in German, which may include two advanced courses in a related field (6 hours), thesis research (6-12 hours).

The department also offers a program leading to the degree of Master of Arts in Teaching: see page 24. Satisfactory scores on the Graduate Record Examination are prerequisite to acceptance to candidacy for this degree.

COURSES OFFERED

203 DEVELOPMENT OF GERMAN INTELLECTUAL MOVEMENTS A comprehensive survey of the history of ideas as a framework for the study of German literature. *Prerequisites:* 101, 102 or the equivalent. Three hours. Mahoney. Alternate years.
204 COURTLY EPIC AND MINNESANG Cultural background and major works of medieval classicism. Prerequisite: 101, 102 or the equivalent. Three hours. Mieder. Alternate years.

205, 206 GOETHE AND SCHILLER AND THEIR TIME Origin, development, characteristics and criticism of German Classicism. Prerequisites: 101, 102 or the equivalent. Three hours. Mahoney, Richel, Scrase. Alternate years.

207 NINETEENTH CENTURY PROSE Masterpieces of narrative prose by representative authors such as Kleist, Drost-Hülshoff, Stifter, Storm and Keller. Prerequisite: 101, 102 or the equivalent. Three hours. Mieder. Alternate years.

208 NINETEENTH CENTURY DRAMA Works by Kleist, Büchner, Grillparzer, Hebbel, Wagner and the early Hauptmann. Prerequisites: 101, 102 or the equivalent. Three hours. Richel. Alternate years.

209, 210 THE TWENTIETH CENTURY Selected works in poetry, prose and drama by Brecht, George, Hauptmann, Hofmannsthal, Kafka, Thomas Mann, Rilke, and others. Prerequisites: 101, 102 or the equivalent. Three hours. Doane, Scrase. Alternate years.

211, 212 ADVANCED COMPOSITION AND CONVERSATION Guided conversation, discussion and advanced oral and written drill in German. Study of modes of expression and stylistic devices of modern German based on analysis of selected texts. Prerequisites: 121, 122 or equivalent. Three hours. Doane, Mieder.

232 HISTORY OF THE GERMAN LANGUAGE Introduction to Germanic linguistics, the comparative method, and linguistic reconstruction. The linguistic development of German from Indo-European to the present. No knowledge of older stages of the language is presupposed or required. Prerequisites: 121, 122 or the equivalent. Three hours. Mieder. Alternate years.

281, 282 SEMINAR Special readings and research. Three hours. Staff.

391 MASTER'S THESIS RESEARCH Credit as arranged.

HISTORIC PRESERVATION

Chester H. Liebs, (Director); Professors Conrad, Hand, Haviland, Janson, Lipke, Sargent, Stout; Associate Professor True; Assistant Professors McGovern, Power; Philip Marshall (Architectural Conservator), Peter Thomas (UVM Contract Archeologist); Distinguished Visiting Faculty Eric N. DeLony, Maximilian L. Ferro, Margaret Garland, Kathlyn Hatch, Edmund Kellogg, Roger Lang.

An interdisciplinary graduate program leading to a Master of Science in Historic Preservation is offered by the History Department in partnership with the Department of Art, and with the cooperation of the Departments of Anthropology and Agricultural and Resource Economics, and the Environmental Studies Program. Enrollment is limited to a small number of qualified participants who are seeking an intensive, community-oriented educational ex-
perience which effects a balance between academic and professional training. As its underlying philosophy, the program recognizes the diverse contributions, both high-style and vernacular, that every generation has made to the built environment and views historic preservation as a form of management which keeps these contributions in balance. The program is designed to develop future leaders to help foster economic growth through the stewardship of historic resources and to provide a focus within northern New England for research on and public awareness of the region’s outstanding built environment. The program publishes a news journal, Possibilities, on the built environment of Vermont and New Hampshire, is headquarters of the Society for Commercial Archeology, and cosponsors numerous special training workshops and a Historic Preservation Summer Institute. The program also has a newly-organized Architectural Conservation and Education service which provides technical preservation and educational services on a contract basis.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE IN HISTORIC PRESERVATION

1) A baccalaureate degree with a major in a preservation-related field such as architecture, architectural history, history, planning, business administration, economics, engineering, interior design, law, or environmental studies. 2) Applicants must take the graduate record examination, the advanced test, if one exists, in their field of specialization, and submit a sample independent research paper, design project, or other evidence of preservation-related professional ability.

MINIMUM DEGREE REQUIREMENTS FOR THE MASTER OF SCIENCE

1) Thirty-six credit hours of course work. A minimum of eighteen credit hours (including an internship or thesis) must be taken in historic preservation. Participants are urged to choose electives that will fill in gaps in their previous training. 2) A comprehensive examination given during the third semester. 3) An internship in a preservation agency, or a written thesis. This may be undertaken upon completion of two or three semesters of concentrated course work. At the conclusion of the internship, an oral presentation describing work accomplished will be given before a jury of practicing professionals for evaluation. 4) Historic Preservation 201, 301, 302 and 303 or 304 are required courses for the degree. Students will also normally take History 351 (Proseminar in American Cultural History) and Art 207 (History of American Architecture) unless they have had sufficient backgrounds in these areas.

COURSES OFFERED

201 ARCHITECTURE AND THE ENVIRONMENT (Same as Art 223) An introduction to the basic concepts and skills necessary to identify, document, and manage the nation’s historic resources. Three hours. Liebs.

202 SPECIAL TOPICS Courses are offered yearly by visiting faculty under this number, in specialized areas of historic preservation, through the Division for Continuing Education. Current offerings include:
CONSERVATION TECHNIQUES FOR HISTORIC STRUCTURES  An examination of the structural systems and materials most frequently found in historic resources and methods for their conservation. Techniques for the preservation of brick, stone, wood, plaster, metals, paints, etc., will be demonstrated. The problem of introducing new mechanical, electrical, and safety systems into existing structures without violating historical integrity will also be addressed. Three hours. Ferro.

HISTORIC PRESERVATION: DEVELOPMENT ECONOMICS  A survey of the economic and financial aspects of real estate development which pertain to preservation and adaptive use including market studies and proformas. Course includes field trips and actual proposal development for underutilized historic properties. Three hours. Lang.

HISTORIC PRESERVATION LAW  This course acquaints students with legal issues in the conservation of the built environment. Basic legal techniques for the protection of historic structures will be discussed including historic districts, protective legislation, easements and covenants. Participants will study the histories of court decisions significant in the development of American Historic Preservation Law. Three hours. Kellogg.

HISTORIC PRESERVATION: COMMERCIAL ARCHEOLOGY  An exploration of the origin and evolution of the structures, signs and symbols of the recent past and techniques for their documentation and selective conservation. Field trips and a class project will supplement course work for a comprehensive look at the mid-20th-century built environment. Three hours. Liebs.

301 HISTORIC PRESERVATION CONTEMPORARY PRACTICE  A detailed study of current historic preservation practice through field trips, seminars with practicing professionals, and technical training in architectural taxonomy, environmental impact review, funding solicitation, and preservation agency administration. Six hours. Liebs, Hatch, and distinguished visiting lecturers.

302 PRESERVATION ADVOCACY PROJECT  Third-semester graduate students apply developed professional skills to actual community preservation problems. Projects include strategy development, securing and allocating funds, research, advocacy, and implementation. Three hours. Liebs.

303 INTERNSHIP  Participants will devote a semester to preservation within an appropriate institution or agency. Three hours. Liebs and Stout.

304 MASTER'S THESIS RESEARCH  Credit as arranged.

305 SPECIAL TOPICS  Credit as arranged.

306 SPECIAL READINGS AND RESEARCH  Credit as arranged.
HISTORY

Professors Daniels, Davison, Evans (Emeritus), J. Felt, Hand, Metcalfe (Chairperson), Schmokel, Schultz (Emeritus), Seybold, Spinner, Steffens, and Stout (Director of graduate studies); Associate Professors Andrea, Hutton, Liebs (Director, Historic Preservation Program); Overfield, Stoler, and True; Assistant Professors Kenny, McGovern and Rodgers; Adjunct Professor Morrissey.

Research interests include American history of the colonial, early federal, Civil War, and twentieth-century periods; American social and legal history; American foreign relations; American military history; Medieval Europe; the Renaissance and the Reformation; French history; English history (Tudor-Stuart and recent); twentieth-century German, Russian and Chinese history; the Communist movement and Soviet foreign policy; East European nationalism; Canadian history (including French Canada); Latin American history; African history; music history; history of science; and historic preservation. Two scholarly journals (The American Review of Canadian Studies, and Chinese Education) are edited by members of the History Department. For ancient history, see Greek and Latin.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS AND MASTER OF ARTS IN TEACHING

An undergraduate major in history, or in a related field of the social sciences or humanities with the equivalent of a minor in history. Competency in a foreign language as appropriate to the student’s intended program.

Applicants must take the Graduate Record Examination (aptitude and advanced history), and submit a sample independent research paper or term paper written in the course of undergraduate study.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF ARTS

Twenty-four hours in History, including thesis research (six hours), and History 301; six additional hours in History or a related field.

The Department also offers a program leading to the degree of Master of Arts in Teaching (See page 24.) Satisfactory scores on the Graduate Record Examination are prerequisite for acceptance to candidacy for this degree.

COURSES OFFERED

210, 211 SEMINAR IN HISTORY OF TRADITIONAL SOCIETIES Three hours.
220, 221 SEMINAR IN HISTORICAL METHODS, HISTORIOGRAPHY, HISTORY OF IDEAS Three hours.
222 SEMINAR IN COMPARATIVE HISTORY Three hours.
230, 231 SEMINAR IN THIRD WORLD HISTORY Three hours.
250, 251 SEMINAR IN MODERN EUROPE Three hours.
261 SEMINAR IN VERMONT HISTORY  A topical approach to the Vermont experience through original research utilizing primary sources available at the University of Vermont, the Vermont Historical Society and the Vermont State Library. Prerequisites: History 71 or permission of instructor. Three hours. Hand.

278 SEMINAR IN FOREIGN POLICY OF THE USSR (Same as Political Science 278)  An historical topical study of Soviet foreign relations since 1917, including the international Communist movement and ideological, economic, and strategic aspects. Three hours. Daniels.

280, 281 SEMINAR IN EARLY AMERICAN HISTORY  Three hours. Stout.

282, 283 SEMINAR IN MODERN AMERICAN HISTORY  Three hours.

284 SEMINAR IN CANADIAN HISTORY  Three hours. Metcalfe and Kenny.

285 SEMINAR IN FRENCH CANADA  Three hours. Kenny.

300 GRADUATE TUTORIAL  Readings and research in a specific area; topics to be individually arranged; attendance in appropriate undergraduate courses may be required (see undergraduate catalog). Prerequisite: Permission of instructor. Variable credit. Staff.

301 INTRODUCTION TO GRADUATE STUDY IN HISTORY  Study of historical method, philosophy of history, and the history of history writing. Each student will prepare and report on an individual research paper in the prospective area of his/her master’s thesis, in consultation with a member of the department specializing in that area. Three hours. Staff.

351 PRO-SEMINAR IN AMERICAN CULTURAL HISTORY  Intended primarily for students in Historic Preservation, but open to other graduate students. Three hours. Stout.

379 INTERPRETATIONS OF AMERICAN HISTORY  An intensive reading course covering the major periods and events in America from the Revolution to the Cold War. Three hours. Hand and Staff.

380 INTERPRETATIONS OF EUROPEAN HISTORY  An intensive reading course covering the major periods and events in Europe from the Renaissance to the Cold War. Three hours. Overfield and Staff.

391 MASTER’S THESIS RESEARCH  Required of all candidates for the M.A., except Cultural History students. Normally arranged for two semesters at three hours each.

397 SPECIAL READINGS AND RESEARCH  Directed individual study of areas not appropriately covered by existing courses. Variable credit.
HUMAN NUTRITION AND FOODS

Professor Carew; Associate Professors Livak, Schlenker (Chairperson); Assistant Professors Ross, Soule, Tyszbir; Instructor F. Emanuel; Lecturer Guild; Extension Professor Coffey; Extension Assistant Professor Wright; Research Associate Professor Hopp; Research Assistant Professor Clarke; Adjunct Professor Stowell.

Departmental research encompasses both basic and applied aspects of human nutrition. Research is being conducted on metabolism of brown and white adipose tissue and dietary influences upon mitochondrial energy metabolism and kidney function. Other activities focus upon food nutrient analysis; the relationship between dietary fiber, intestinal microflora and colon cancer; and food habits and nutrient requirements of the aged. Studies also include testing methods of nutrition education for various age groups and educational levels.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in nutrition or a science-related field. Satisfactory scores on the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Thirty hours including thesis research (6-15 hours). Twenty-one hours should be earned in the field of specialization; nine hours may be selected from related areas; a course in statistics is strongly recommended.

COURSES OFFERED

235 RECENT ADVANCES IN FOODS AND NUTRITION Interpretation, and application of particular topics and trends in foods and nutrition as evidenced through literature and research. May be taken more than once for a maximum of nine hours. Prerequisites: chemistry, physiology, 43 and permission of instructor. Three hours.

236 INTRODUCTION TO FOOD RESEARCH Independent laboratory study of problems in food analysis, preparation, processing or product development. Prerequisites: 135 and a course in biochemistry with laboratory. Three hours.

237 READINGS IN FOOD Critical survey of the literature on the recent developments in food research. Prerequisite: 135 and biochemistry. Three hours.

239 INSTITUTIONAL ORGANIZATION AND MANAGEMENT Institutional organization and management; personnel policies; laws and regulations; promotion and advertising. Prerequisites: 138, 139, or equivalent. Three hours. Emanuel.

240 METHODS IN NUTRITION EDUCATION Nutrition education in a community, school or institutional setting including observation, needs assessment, and planning appropriate methods and materials for the identified au-
HUMAN NUTRITION AND FOODS | 123

dience. **Prerequisites:** a college course in nutrition; 130; permission based upon an interview. Three hours. Soule.

241 NUTRITION AND AGING Study of the physiologic, psychologic, sociologic and economic factors which influence the nutrient requirements, nutritional status and food habits of older people. **Prerequisite:** 144. Three hours. Schlenker.

242 ADVANCED NUTRITION A study of nutrients and their specific functions in metabolic processes integrating cellular physiology, biochemistry and nutrition. Prerequisites: 3 hours in nutrition and a course in biochemistry and physiology. Three hours. Tyzbir.

245 NUTRITIONAL BIOCHEMISTRY I Comprehensive study of metabolism of carbohydrates, lipids and protein with emphasis on hormonal control, nutritional and metabolic interrelationships and dietary abnormalities (e.g. starvation and obesity). **Prerequisites:** 242 and permission of instructor. Three hours. Tyzbir.

247 DIET THERAPY Adaptations of the normal diet in conditions affected by or affecting the utilization of food. **Prerequisites:** 130, 144 and 242. Four hours. Ross.

249 NUTRITION SEMINAR A review of recent developments in nutrition research. **Prerequisite:** 242 and permission of instructor. Two hours.

290 INTRODUCTION TO RESEARCH Research procedures with lectures and discussions of problem selection, objectives, bibliographical techniques, and analysis of data. **Prerequisite:** Departmental permission. Two hours.

291 SPECIAL PROBLEMS Reading, discussion, and special field and/or laboratory investigations. **Prerequisite:** Departmental permission. Students may enroll more than once for a maximum of twelve hours. One to six hours.

294 HISTORY OF NUTRITION Foremost investigators and methods involved in the development of present day nutritional knowledge. **Prerequisite:** Three hours in nutrition. One hour.

295 SPECIAL TOPICS Lectures, laboratories, readings or projects relating to contemporary areas of study. Enrollment may be more than once; accumulation up to twelve hours. **Prerequisite:** Departmental permission.

296 FIELD EXPERIENCE Professionally oriented field experience under joint supervision by faculty and business or community representative. Credit arranged up to fifteen hours. **Prerequisite:** Departmental permission.

307 ADVANCED CONCEPTS IN NUTRITION See Animal Science 307. Three hours.

308 EXPERIMENTAL TECHNIQUES IN NUTRITION See Animal Science 308. Two hours.

391 MASTER’S THESIS RESEARCH Credit as arranged.
MATERIALS SCIENCE (Multidisciplinary)

Participating faculty are from the following departments: Electrical Engineering, Mechanical Engineering, Physics, and Chemistry.

The program in Materials Science is multidisciplinary. It is involved with the mechanical, electrical, chemical and physical properties of materials — primarily solids — and applications of these materials. It is multidisciplinary in the sense that it combines the theoretical and experimental capabilities of a variety of disciplines and applies them to the solution of complex scientific and engineering problems. Problems such as corrosion, analysis and synthesis of electronic materials, development of bulk and thin film electronic devices and integrated circuits, optimization of mechanical properties of structural materials, and failure analysis are typical examples requiring such an interdisciplinary approach. The course program gives a broad background in materials. It also provides flexibility allowing specialization in particular areas of interest.

The program in Materials Science offers the Master of Science Degree and the Doctor of Philosophy Degree. Each student must meet the general requirements for admission as outlined under the Regulations of the Graduate College in the Graduate College Catalogue. Students in the program are sponsored by the participating department which best reflects the students' backgrounds and interests. Inquiries should be directed to Richard Anderson, Department of Electrical Engineering.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in Physics, Chemistry, Metallurgy, Engineering, or Mathematics. Applicants with other backgrounds would be evaluated individually.

MINIMUM DEGREE REQUIREMENTS

The above prerequisites for admission to candidacy must be supplemented in either of the following ways:

Plan A: With Thesis: thirty graduate credit hours of an approved program of study including at least 18 credit hours of course work; completion of at least one three-credit hour course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids; satisfactory completion of a comprehensive examination, and satisfactory completion of an M.S. thesis including its defense at an oral examination.

Plan B: Without Thesis: thirty credit hours of an approved program of study; completion of at least one three-credit hour course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids, and satisfactory completion of a comprehensive examination.
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE
DEGREE OF DOCTOR OF PHILOSOPHY

Successful completion of a Ph.D. comprehensive examination in Materials Science and demonstrated competence in computer programming. The comprehensive examination includes the areas of quantum mechanics, solid state theory, applied mathematics, thermodynamics, and materials properties of solids.

MINIMUM DEGREE REQUIREMENTS

In addition to the above, the following are required:

A minimum of 75 graduate credit hours including a minimum of 20 in dissertation research. An overall grade point average in graduate courses of 3.25 or better. Completion of at least one three-credit hour course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, thermodynamics and kinetics, and one course in each of two categories dealing with materials properties of solids. Satisfactory completion of a Ph.D. dissertation including its defense at an oral examination.

COURSES OFFERED

The program of Materials Science offers no courses of its own. All courses in a student's program are offered by the individual departments — primarily Electrical Engineering, Mechanical Engineering, Mathematics, Statistics, Physics and Chemistry.

MATHEMATICS

Professors Chamberlain, Cooke, Izzo, Meserve, Moser (Chairman), Riggs, Schoonmaker, Sylvester and Wright; Associate Professors Ashikaga, Burgmeier, Dwork, and Haugh; Assistant Professors Dinitz, Kadas, Margolis and Pence; Lecturers Johansson, Kost, Lawlor, Morency, and Puterbaugh. Research Assistant Professor Costanza.

The Department of Mathematics offers Master's degree programs which are sufficiently flexible to accommodate diverse career interests of its graduate students and prepare them for further graduate study. A majority of the advanced courses and current research interests of the faculty are in applied mathematics, including differential equations, probability and statistics, numerical analysis and discrete mathematics.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE
DEGREE OF MASTER OF SCIENCE

Thirty semester hours beyond intermediate calculus, including a year of advanced calculus. Satisfactory scores on the aptitude and advanced sections of the Graduate Record Examination.
MINIMUM DEGREE REQUIREMENTS

Plan A: Twenty-four semester hours of acceptable graduate credits in advanced Mathematics courses; six semester hours in thesis research.

Plan B: Thirty semester hours of acceptable graduate credits in advanced Mathematics courses; no thesis required.

Under both Plan A and Plan B students must already have, or must acquire a knowledge of the content of the following courses: Mathematics 251, 331, 333, and 252 or 274. Also, students must satisfactorily complete at least four 300-level Mathematics courses and the seminar 382. For a concentration in applied mathematics the department recommends Mathematics 238, 330 and 332.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS

A bachelor's degree from an accredited institution and certification as a teacher of mathematics. Three years of experience teaching secondary school mathematics. Satisfactory scores on the Graduate Record Examination (aptitude portions.)

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS

Thirty hours of course work in Mathematics, Statistics and Computer Science which will broaden and balance the undergraduate work in the mathematical sciences. Each student, in conference with his faculty advisor, will develop a program suited to his needs and background. Up to twelve hours of 100-level courses may be chosen if applicable. No thesis is required; each degree recipient must pass a written or oral comprehensive examination.

REQUIREMENTS FOR THE DEGREE MASTER OF ARTS IN TEACHING

The department offers a program leading to the degree of Master of Arts in Teaching: (See page 24.)

COURSES OFFERED

207 a,b PROBABILITY THEORY See Statistics 251 a,b.

217 INTRODUCTION TO THE THEORY OF COMPUTING See Computer Science 242.

221 DETERMINISTIC MODELS IN OPERATIONS RESEARCH Techniques of linear and dynamic programming and game theory. Graphs and tree models. Classical problems are discussed, and problem formulation stressed. Prerequisites: 124; 121 desirable. Three hours. Alternate years, 1982-83. Staff.
222 STOCHASTIC MODELS IN OPERATIONS RESEARCH  Stochastic processes and their use in analysis of industrial problems. Markov chains, queueing theory, linear and dynamic programming under uncertainty. Prerequisites: 151 or 207; 221. Three hours. Alternate years, 1982-83. Staff.

223 INTRODUCTION TO FORMAL LANGUAGE THEORY  Introduction to the theory and applications of context-free languages. Phrase structure and context free grammars, normal forms, pushdown automata, decision problems, power series in non-commuting variable, applications to parsing. Prerequisites: 104, 217 and/or 218 highly recommended. Three hours. Staff. Alternate years, 1982-83.

230 ORDINARY DIFFERENTIAL EQUATIONS  Solutions of linear ordinary differential equations, the Laplace transformation, and series solutions of differential equations. Prerequisites: 121, 124. Three hours. Staff.

237 NUMERICAL ANALYSIS I  Concept of error, polynomial approximation, summation techniques, solution of equations, linear systems, eigenvalues. Prerequisites: 121, 124 and knowledge of computer programming. Three hours. Staff.

238 NUMERICAL ANALYSIS II  Finite differences, differentiation and integration, ordinary and partial differential equations, linear programming. Prerequisite: 237. Three hours. Staff.

240 OPERATIONAL MATHEMATICS  Orthogonal functions, transforms and boundary value problems. Prerequisite: 230 or 271. Three hours. Staff.

241 ADVANCED CALCULUS I  Calculus of several variables, Euclidean spaces, open and closed sets, limits, continuity, differentiation (emphasizing the linearity), maxima and minima, Lagrange multipliers and integration of functions of several variables. Prerequisites: 121 and 124. Three hours. Staff.

242 ADVANCED CALCULUS II  Jacobians, change of variables in a multiple integral, line and surface integrals, Green’s, Gauss’ and Stokes’ Theorems, Fourier Series, Fourier and Laplace transforms. Prerequisite: 241. Three hours. Staff.

251 MODERN ALGEBRA  Fundamental concepts of Abstract Algebra. Sets, mappings, groups, rings, integral domains, fields, homomorphisms and isomorphisms. Prerequisites: 22 and 104; highly desirable. Three hours. Staff.
252 ADVANCED LINEAR ALGEBRA Linear transformations and vector spaces, including Jordan forms. Symmetric, Hermitian, orthogonal and unitary matrices, and quadratic forms. Prerequisites: 124; 251 desirable. Three hours. Staff. Alternate years, 1981-82.

253, 254 TOPOLOGY The elements of point set topology: closed sets and open sets in metric spaces, continuous mappings, connection, Peano curves, separation theorems and homotopy. Prerequisites: 104; 253 for 254. Three hours. Staff. Alternate years, 1981-82.

255 ELEMENTARY NUMBER THEORY Divisibility, prime numbers, Diophantine equations, congruence of numbers, and methods of solving congruences. Prerequisite: One year of calculus. Three hours. Staff.

257 THEORY OF GROUPS The study of the various kinds and structures of groups. Prerequisite: 251. Three hours. Staff. Alternate years, 1981-82.

258 GALOIS THEORY The study of Galois theory leading to the insolvability of general quintic equations by radicals and theorems on constructions with straightedge and compass. Prerequisite: 257. Three hours. Staff. Alternate years, 1981-82.

260 FOUNDATIONS OF GEOMETRY Geometry as an axiomatic science; various non-Euclidean geometries; relationships existing between Euclidean plane geometry and other geometries; invariant properties. Prerequisite: One year of calculus. Three hours. Izzo, Meserve.

261 THE DEVELOPMENT OF MATHEMATICS Historical development of the mathematical sciences with emphasis on interrelations among them. Individual assignments correspond to background and interests of students. Prerequisite: Nine hours of college mathematics. Three hours.

264 VECTOR ANALYSIS Introduction to general vector methods including the elements of vector algebra and vector calculus with applications to physics and mechanics. Prerequisite: 121. Three hours. Alternate years, 1981-82. Staff.

271 APPLIED MATHEMATICS FOR ENGINEERS AND SCIENTISTS I Matrix theory, vector analysis, linear ordinary differential equations. Emphasis on methods of solution, including numerical methods. No credit for mathematics majors. For a mathematics concentration, a sequence beginning with 230 is advised. Prerequisite: 121. Three hours. Staff.

272 APPLIED MATHEMATICS FOR ENGINEERS AND SCIENTISTS II Partial differential equations of mathematical physics, calculus of variations, functions of a complex variable, Cauchy's theorem, integral formula, conformal mapping. Prerequisite: 230 or 271. Three hours. Staff.

273 INTRODUCTION TO COMBINATORICS Combinatorial relations, elementary problems of existence, enumerative combinatorics; generating functions and graphs. Applications to problems in probability, mathematics of computers, graph theory and number theory. Prerequisite: 104. Three hours. Staff. Alternate years 1982-83.
274 COMPUTATIONAL LINEAR ALGEBRA Efficient computer algorithms for Gaussian elimination, stable orthogonal and least-squares matrix computations, and for matrix eigenvalue computations. Analysis of numerical stability of algorithms, determination of conditioning of matrices. **Prerequisites:** 124 or 271, modest experience with digital computer programming. Three hours. Alternate years, 1982-83.

276 MATHEMATICS OF SPACE FLIGHT Topics include orbit determination and prediction of natural and artificial satellites and projectiles. Astrodynamical coordinate systems and their transformations. Integration schemes and perturbation theory. Attitude determination. **Prerequisites:** 237 and modest experience with digital computer programming. Three hours. Alternate years, 1982-83.

295 SPECIAL TOPICS Lectures, reports and directed readings on advanced topics as announced. **Prerequisite:** permission of instructor. Credit as arranged. Offered as occasion warrants. Staff.

325 ADVANCED AUTOMATA THEORY Algebraic structure theory of automata, monoids, semigroups and semiautomata; homomorphisms, simulation and realization. Decomposition theory, including permutation and reset machines. Topics of current interest in complexity of automata. **Prerequisite:** 218. Three hours. Alternate years, 1982-83.

330 ADVANCED ORDINARY DIFFERENTIAL EQUATIONS Linear and non-linear systems, approximate solutions, existence, uniqueness, dependence on initial conditions, stability, asymptotic behavior, singularities, self-adjoint problems. **Prerequisite:** 230. Three hours. Alternate years, 1982-83.

331 THEORY OF FUNCTIONS OF COMPLEX VARIABLES Differentiation, integration, Cauchy-Riemann equations, infinite series, properties of analytic continuation, Laurent series, calculus of residues, contour integration, meromorphic functions, conformal mappings, Riemann surfaces. **Prerequisite:** 242. Four hours. Staff. Alternate years, 1981-82.

332 APPROXIMATION THEORY Interpolation and approximation by interpolation, uniform approximation in normed linear space, spline function, orthogonal polynomials. Least square, Chebychev approximations, rational functions. **Prerequisites:** 124, 238. Three hours. Staff. Alternate years, 1982-83.

333 THEORY OF FUNCTIONS OF REAL VARIABLES The theory of Lebesgue integration, Lebesgue measure, sequences of functions, absolute continuity, properties of L^p spaces. **Prerequisite:** 242. Four hours. Staff. Alternate years, 1981-82.

335, 336 ADVANCED REAL ANALYSIS L^2 spaces and L^p spaces, Hilbert and Banach spaces, linear functionals and linear operators, completely continuous operators, Fredholm alternative, completely continuous symmetric operators, Hilbert-Schmidt theory, unitary operators, Bochner's Theorem, Fourier-Plancherel and Watson transforms. **Prerequisites:** 333; 335 for 336. Three hours. Alternate years, 1982-83.

382 SEMINAR  Topical discussions with assigned reading. Required of MS degree candidates. One hour. Staff.

391 MASTER'S THESIS RESEARCH  Credit as arranged.

MECHANICAL ENGINEERING

Professor Emeritus Duchacek, and Martinek; Professors Francis, Hundal (Acting Chairperson), Marshall, McIay, Outwater, Pope, Tuthill, and von Turkovich; Associate Professor Carpenter; Adjunct Professor Liu.

Master of Science and Doctor of Philosophy programs are offered. Candidates holding degrees other than those in Mechanical Engineering are encouraged to apply. In such cases it may be necessary for the student to complete the entrance qualifications without receiving credit toward his graduate studies. The general requirements for admission, as outlined under the Regulations of the Graduate College, must be met. Areas of research interest include brittle materials; fracture mechanics of composite materials; shell structural analysis; non-linear vibrations; biomechanics; stability of fluid jets; radiative heat transfer; matrix methods in structural mechanics; continuum mechanics; physical and mechanical metallurgy; solidification; mechanical and thermal processing of metals.

**PREREQUISITE FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE**

An accredited Bachelor's Degree in Mechanical Engineering or its equivalent. Satisfactory scores on the Graduate Record Examination.

**MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE**

Approved courses in engineering, mathematics and sciences with thesis research; thirty credit hours.

**PREREQUISITE FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

Successful completion of the Ph.D. comprehensive written examinations.

**MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**

The degree of Doctor of Philosophy requires of candidates a minimum of seventy-five credit hours to be earned in course and in dissertation research. At
least 40 credit hours must be earned in courses and seminars and a minimum of 25 credit hours must be earned in dissertation research. Each candidate must be able to comprehend the literature of his field in at least one foreign language provided it is required for his dissertation work. The requirements specified under Regulations of the Graduate College must also be met.

COURSES OFFERED

206 APPLICATION OF COMPUTERS IN ENGINEERING  Utilization of computer as an engineering tool for the solution of complex engineering problems. Three hours. Hundal.

211 ADVANCED MECHANICAL STRUCTURES I  Energy methods; topics in solid mechanics, introduction to elasticity. Three hours. McLay.

222 ADVANCED MECHANICAL STRUCTURES II  Elasticity; matrix methods. Three hours. McLay.

231 MATERIALS PROCESSING II  Fundamental theory of selected mechanical and thermal processing techniques with applications. Prerequisites: 233 or equivalent. Three hours. von Turkovich.

243 ADVANCED FLUID MECHANICS  Foundations of compressible flow; isentropic flow; normal shock waves; flow in ducts with friction and with heating or cooling; generalized solution of combined effects. Prerequisites: 143 and Mathematics 271. Three hours. Martinek.

246 AERODYNAMICS  Application of the principles of fluid mechanics to the design and performance of aircraft; transition and separation on various shapes; compressibility phenomena. Prerequisite: 143. Three hours. Martinek.

252 ENGINEERING DESIGN II  Application of the principles of engineering mechanics, material science, and thermal science to the design of mechanical systems and their components; optimization, fracture mechanics, product design. Group projects from industry. Prerequisite: 135. Three hours. Carpenter.
262 THERMAL SYSTEMS Application of engineering thermodynamics to the analysis of thermodynamic machines and processes; problems on gas turbine, jet propulsion, nuclear power plants, energy conversion devices and other areas of current interest. Prerequisite: 261. Three hours.

272 MECHANICAL BEHAVIOR OF MATERIALS Elastic and plastic behavior of single crystals and polycrystals; dislocations; approximate plastic analysis; anisotropic materials; hardness; residual stress; brittle, transitional and ductile fractures; fatigue; damping; creep and surface phenomena. Three hours. von Turkovich.

281, 282 SEMINAR Presentation and discussion of advanced mechanical engineering problems and current developments. Prerequisite: Graduate engineering enrollment. One hour. Staff.

297 NUCLEAR ENGINEERING Fission and fusion chain reactions; criticality; neutron diffusion; fast and breeder reactors; design considerations and accident delineation; high pressure and boiling heat transfer; liquid metals; fuel-coolant interaction; transient phenomena; safety. Prerequisite: Senior or graduate standing. Three hours. Martinek, von Turkovich.

301 ADVANCED ENGINEERING DESIGN ANALYSIS AND SYNTHESIS Application of the fundamental concepts and principles of advanced mathematics, physics, mechanics, electricity, thermodynamics, fluid dynamics and heat transfer combined with decision-making processes to the design, analysis and synthesis of complex engineering systems. Four hours. Hundal.

302 ENGINEERING ELASTICITY Tensors, complex variables, variational methods. Four hours. McLay.

307 ADVANCED FLUID DYNAMICS Stress in continuum; kinematics and dynamics; potential fields; Wing theory; Navier-Stokes equation; hydrodynamic stability; turbulence; laminar and turbulent boundary layer theory; transient flows; free laminar and turbulent flows; mixing. Four hours. Martinek.

309 ADVANCED ENGINEERING THERMODYNAMICS Microscopic thermodynamics; Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; kinetic theory of gases; transport properties, compressed gases, liquids and solid states; chemical systems; irreversible processes; fluctuations. Three hours. Martinek.

310 ADVANCED HEAT TRANSFER Generalized equation of heat conduction; classical integral transforms and approximate solutions; thermal boundary layers; forced and free convection; condensation, boiling and ablative cooling; radiation, statistical theory; mass transfer. Three hours. Martinek.

311 ADVANCED GAS DYNAMICS Compressible flow in ducts; friction and heat transfer; shock waves; small perturbation theory; similarity in high
speed flows; transonic, supersonic and hypersonic flows; methods of characteristics. Aerodynamic heating; rarified gas flows. Three hours. Martinek.

320 SPECIAL PROBLEMS IN ELASTICITY Advanced topics in the theory of elasticity in which there is a particular student and staff interest. Three hours. McLay.

322 SPECIAL PROBLEMS IN DYNAMICS Advanced topics in dynamics in which there is a particular student and staff interest. Three hours. Hundal.

323 SPECIAL PROBLEMS IN THERMODYNAMICS Advanced topics in thermodynamics in which there is a particular student and staff interest. Three hours. von Turkovich.

324 SPECIAL PROBLEMS IN HEAT TRANSFER Advanced topics in heat transfer in which there is a particular student and staff interest. Three hours. Martinek.

325 SPECIAL PROBLEMS IN MATERIALS Advanced topics in behavior of materials in which there is a particular student and staff interest. Three hours. Outwater, von Turkovich.

330 MATRIX METHODS IN STRUCTURAL DYNAMICS Matrices, eigenvalue problems, forced vibration, wave propagation. Three hours. McLay.

391 MASTER'S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

The following courses offered infrequently but may be taught where sufficient student interest is demonstrated.

251 TECHNOLOGY AND SOCIETY SEMINAR Three hours.

303 STRESS ANALYSIS (THEORY AND EXPERIMENT) Three hours.

306 CONTINUUM MECHANICS Three hours.

321 SPECIAL PROBLEMS IN FLUID MECHANICS Three hours.

MEDICAL MICROBIOLOGY

Professors Johnstone, T. Moehring, Schaeffer (Chairperson), and Stinebring; Associate Professors Albertini, Boraker, Fives-Taylor, Gump, and Novotny; Research Professor J. Moehring; Adjunct Associate Professor Smith.

Research activities include: host-parasite interactions with emphasis on cellular and molecular aspects of mechanisms of pathogenesis; non-antibody resistance mechanisms especially concerning production, storage, and mode of action of interferon; studies of cellular aging; T-lymphocyte antigen recognition; enzyme-antibody immunoassays; mechanisms of transmission of bacterial DNA; studies
of infectious hepatitis and other viruses; studies of in vitro carcinogenesis; mechanisms involved in assembly of bacterial surface structures; the role of bacteria, fungi and viruses in pulmonary hypersensitivity diseases and chronic bronchitis; somatic cell genetics studies; studies of immunocompetence and tumor immunity in cancer bearing patients and isolation of fungal genes controlling incompatibility and development of recombinant DNA techniques.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Two years of biological science; mathematics through elementary calculus (Mathematics 12 equivalent); one year course in physics (Physics 15 and 16 equivalent); chemistry including one year of inorganic chemistry, quantitative analysis and one year of organic chemistry (equivalent of Chemistry 1, 2, 123, 131, 132). Chemistry 140 (Physical Chemistry for Biological Science Students) would be helpful but is not required. Satisfactory scores on the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Medical Microbiology 381-384, Thesis Research; approved selected courses from among Medical Microbiology 203, 211, 220, 223, 302, 305, 325; Biochemistry 301-302, 303; passage of a comprehensive examination in Medical Microbiology and related subjects. Twenty-four hours of course credits and six hours of research credits are required. Chemistry 140 (Physical Chemistry for Biological Science Students) would be helpful but is not required.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Two years of biology; chemistry through physical chemistry (equivalent to Chemistry 1, 2, 123, 131, 132, 140 or 141, 142) mathematics through calculus; one year of physics (Physics 15 and 16 equivalent); additional courses required by the Department depending on the aims of the student. Satisfactory scores on the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Participation in seminars offered by the Department during residency of students; Biochemistry 301-302, 303; approved selected courses from programs in medical microbiology, biochemistry, microbiology and biochemistry, physiology and biophysics, botany and zoology or others at the discretion of the Department.

The student is expected to develop proficiency in the use of computer language and programming. There is no other formal language requirement. Knowledge of a particular language may be required by the candidate's studies committee if his/her research problem warrants this decision.

A maximum of thirty-five hours for dissertation research will be allowed for the degree.
COURSES OFFERED

203 THE MAMMALIAN CELL IN BIOMEDICAL RESEARCH  Cellular and molecular biology of vertebrate cells in culture; principles and techniques of vertebrate cell, tissue and organ culture and their application to problems of current interest in cell biology and medicine, including: cell regulation, differentiation, senescence, cytogenetics and cell genetics, carcinogenesis, virology, and mechanisms of pathogenesis. Laboratory exercises provide practical experience in technique and methods of analysis as a foundation for the lectures. Application of techniques to one's own research is possible. Designed for biology students of varied training. Prerequisite: Permission of instructors. Four hours. T. Moehring, Schaeffer.

211 MOLECULAR GENETICS I  Analysis of organization, replication, and expression of genetic material in procaryotes. The standard methods of bacterial and bacteriophage genetics, including the fundamentals of recombinant DNA technology are presented. Recommended prerequisite for MOLECULAR GENETICS II (see Botany 252). Prerequisite: Permission of instructor. Three hours. Novotny.

220 CLINICAL MICROBIOLOGY A comprehensive study of human pathogenic micro-organisms and their disease states in man. The course deals with collecting and handling specimens, pathogenic bacteriology, medical mycology and virology. Laboratory sessions provide practical experience in handling and identifying these pathogens. Prerequisite: Microbiology 55 or its equivalent. Immunology recommended but not required. Four hours. Fives-Taylor. Alternate years.

223 IMMUNOLOGY  Analysis of the immune response with respect to structure and function of immunoglobulins, cytokinetics and immunocompetence, tolerance, ontogeny and phylogeny of adaptive immunity, immunogenetics of transplantation, hypersensitivity states, and theories of antibody formation. Prerequisite: Permission of instructor. Four hours. Boraker.

302 MEDICAL MICROBIOLOGY  Fundamentals of pathogenic microbiology with emphasis on mechanisms of disease production and mechanisms of resistance to infection. The ecologic rather than taxonomic approach is stressed. Primarily for medical students. Prerequisite: Departmental permission. Four hours. Staff.

303 SPECIAL PROBLEMS IN MEDICAL MICROBIOLOGY  Supervised investigations in microbiology. Credit as arranged. Staff.

305 PATHOGENIC BACTERIOLOGY  Studies of major species of pathogenic bacteria with emphasis on mechanisms of disease production, epidemiology, control measures and diagnosis. Designed for graduate students interested in the phenomenon of parasitism. Prerequisite: Permission of the instructor. Four hours. Stinebring.

325 VIROLOGY  Introduction to the nature of viruses, their physical, chemical, and biological characteristics with special reference to cell-virus interaction,
viral replication, pathogenesis, viral inhibitors, and oncogenic viruses. Prerequisite: Permission of department chairman. Three hours. Staff. Alternate years.

330 SPECIAL TOPICS IN CELL TISSUE AND ORGAN CULTURE This course is offered in association with the W. Alton Jones Cell Science Center located in Lake Placid, New York. It is designed for students enrolled in courses offered by the Center for which they wish to obtain graduate credit. Credits are variable but a maximum is placed at three credit hours.

381 SEMINAR Current problems in medical microbiology. One hour. Staff.

391 MASTER’S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

MEDICAL TECHNOLOGY

Associate Professors Breen, Lachapelle (Chairperson), Reed, and Sullivan; Instructors Czerniawski and Russell.

The Department of Medical Technology offers a Master of Science degree with emphasis in the preparation of medical technology educators. The student may also concentrate in administration, clinical chemistry, clinical microbiology or the student may design a program which fulfills his/her needs.

Areas of research and interest: clinical enzymology; anaerobes; streptococcus identification; mycological techniques; hematological techniques; admission criteria; curriculum design.

In addition, various departments and facilities in the College of Medicine and Medical Center Hospital of Vermont offer other opportunities for research.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Undergraduate major in Medical Technology; certification as MT (ASCP) (or equivalent), minimum of one year’s experience as a medical technologist. GRE Aptitude Score required.

MINIMUM DEGREE REQUIREMENTS

Medical Technology 381 (2 credits), thesis research (6 credits); six credits biochemistry lecture, such as Biochemistry 301, 302; six credits clinically related sciences; additional approved courses. In addition, a noncredit teaching practicum is required.

COURSES OFFERED

381 SPECIAL TOPICS Review and discussion of current areas of importance to students in medical technology. The seminar will emphasize administration, clinical pathophysiology and education. Selected topics are presented by the student with occasional supplemental discussions led by faculty members or guests. One hour per semester. Staff.

391 MASTER’S THESIS RESEARCH Credits as arranged. Staff.
MICROBIOLOGY AND BIOCHEMISTRY

Professors Johnstone, Racusen (Chairperson), and Weller; Associate Professor Sjogren; Assistant Professor Currier; Teaching Associate Husted; Visiting Associate Professor Kent.

Research currently involves the identification and metabolism of plant proteins, the isolation and characterization of ribosomes, chemotaxis and root nodulation, the synthesis and regulation of isozymes in the glyoxylate bypass of fungi, and the role of microorganisms in aquatic environments. Members of our faculty participate in the interdisciplinary Cell Biology Program (see separate listing in this catalogue).

BIOCHEMISTRY PROGRAM

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in chemistry or biology which shall include courses in organic chemistry, quantitative analysis and biochemistry. Courses in microbiology and physical chemistry are strongly recommended.

MINIMUM DEGREE REQUIREMENTS

Microbiology and Biochemistry 201, 202, 203, 381-384; thesis research (12-15 hours).

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

One year each of a laboratory course in organic chemistry, physical chemistry, and biology, a reading knowledge of one foreign language, French, German or Russian, and the Ph.D. candidacy requirements of the Graduate College. This program is co-sponsored with Biochemistry (College of Medicine).

MINIMUM DEGREE REQUIREMENTS

Biochemistry 301, 302, 303; satisfactory participation in biochemistry seminars during residency; advanced courses in chemistry (9 hours); 10 hours of courses other than biochemistry and chemistry; balance of course work from microbiology and biochemistry; and doctoral dissertation research (30 hours).

MICROBIOLOGY PROGRAM

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in biological science, including several courses in microbiology and one year of organic chemistry. A course in biochemistry is strongly recommended.

MINIMUM DEGREE REQUIREMENTS

Medical Microbiology 205, Microbiology and Biochemistry 381-384; thesis research (10-15 hours).
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

One year of organic chemistry and biology and sufficient mathematics and physics to provide background for the candidate's program, a reading knowledge of one foreign language French, German or Russian, and the Ph.D. candidacy requirements of the Graduate College.

MINIMUM DEGREE REQUIREMENTS

Medical Microbiology 205; the balance of courses from medical microbiology, microbiology and biochemistry, biochemistry, botany and zoology according to student's need as determined by a studies committee; participation in microbiology seminars throughout residency; doctoral dissertation research twenty to thirty-five hours. This program is co-sponsored with Medical Microbiology.

COURSES OFFERED

201 GENERAL BIOCHEMISTRY Broad coverage of biochemistry including principles of analytical biochemistry. Prerequisite: Chemistry 41 or 141. Four hours. Offered each semester.

202 ADVANCED BIOCHEMISTRY A study of metabolic cycles with emphasis on research methods involving radioisotopes and chromatography. Prerequisite: 201 or 203 or permission of the instructor. Four hours. Racusen.

203 MOLECULAR BIOLOGY The structure and biological function of nucleic acids, proteins, and enzymes. Emphasis is on optical, electrophoretic, and ultracentrifugal methods. Prerequisite: A semester of physical chemistry or permission of instructor. Four hours. Currier.

220 ENVIRONMENTAL MICROBIOLOGY The activities of microorganisms, primarily bacteria, in air, soil, and water. Prerequisite: A previous course in microbiology. Four hours. Sjogren. Alternate years, 1981-82.

254 MICROBIAL BIOCHEMISTRY The chemical composition and metabolism of microbial cells. Prerequisites: 55, 201, or permission of instructor. Four hours. Sjogren. Alternate years, 1980-81.

295 SPECIAL TOPICS Lectures, readings, laboratory studies, or field trips. Format and subject matter at the instructor's discretion. Spring, summer, and fall. Prerequisite: Departmental permission. Credit to be arranged. Staff.

301 SPECIAL PROBLEMS Prerequisite: Departmental permission. Credit as arranged. Staff.

381-384 SEMINAR A topical seminar with discussion of assigned and collateral reading. Required of graduate students. One hour.

391 MASTER'S THESIS RESEARCH Credit as arranged.

491 DOCTOR'S THESIS RESEARCH Credit as arranged.
MUSIC

No Graduate Program Offered

Research traditionally includes stylistic study and analysis of selected works with emphasis on structural organization. Graduate research is also conducted in the areas of historical musicology, music education, development of performance techniques and pedagogy, and Americana.

COURSES OFFERED

203, 204 ORCHESTRATION Instrumental characteristics, arranging for orchestra; second semester: advanced orchestral scoring. Prerequisites: 116, 203 for 204. Three hours.

205, 206 COUNTERPOINT First semester: Tonal counterpoint; second semester: canon and fugue. Prerequisite: 116. Three hours.

208, 209 FORM AND ANALYSIS Creative approach to aural and sight analysis of musical construction. Prerequisites: 116; 205 recommended. Three hours.

211, 212 CONDUCTING Baton technique, score reading, laboratory practice; second semester: preparation and performance of selected scores, including score reading at the piano and rehearsal procedures. Prerequisites: 16; 211 for 212. Three hours.

215, 216 COMPOSITION Creative work in free composition according to the needs and capabilities of the individual student. Prerequisites: 205 and 208 or permission of instructor. May be repeated for credit. Three hours.

245, 246 CHAMBER MUSIC LITERATURE Study through analysis and performance of masterworks for small groups leading to public performance. Prerequisites: Twelve hours or the equivalent in performance field and permission of instructor. May be repeated for credit. One hour.

281 INDEPENDENT STUDY Studies in theory, composition, history, or literature under the direction of an assigned staff member for advanced students and candidates for honors. Credit as arranged.

NATURAL RESOURCES

Two Master of Science degree programs, one in the Department of Forestry and the other through the interdisciplinary Natural Resource Planning Program, are offered within the School of Natural Resources.
FORESTRY

Professors Hannah, John (Director), Reidel, and Whitmore; Associate Professors Armstrong, Donnelly, Forcier, and Newton; Assistant Professors Bergdahl and DeHayes; Lecturer Turner; Extension Assistant Professors Bousquet and McEvoy.

The goal of this Master of Science Program is to provide graduate students with initial training as forest scientists or the opportunity to further their knowledge and proficiency in some specialized aspect of forest resource management. The faculty has research interests which span the broad areas of biometry, ecology and silvics, genetics, economics and management, pathology, policy and administration, silviculture, and utilization. A student’s thesis research is often an integral part of on-going research projects in the Department.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE IN FORESTRY

Successful completion of a four-year forestry curriculum or a strong background of specified (by the Department) undergraduate forestry courses. Satisfactory scores on the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Advanced forestry and related courses (15-24 hours); thesis research (6-15 hours), and oral defense.

NATURAL RESOURCE PLANNING

Professors Cassell, John (Director), Reidel, and Sargent; Associate Professors Forcier, Hirth, Gilbert, LaBar, Lindsay and Newton; Assistant Professors Capen, Fuller, Hendrix, and Manning; Lecturer Flinn; Extension Instructor Marek.

This interdisciplinary program prepares students for professional careers with public and private organizations engaged in various aspects of natural resource planning. Theoretical and practical education is offered in planning the location, development, and coordination of resource uses, services, and related facilities.

In addition to faculty members from the School of Natural Resources there is participation by faculty members from other departments, including Agricultural and Resource Economics, Civil Engineering, Geography and Sociology.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE IN NATURAL RESOURCE PLANNING

Undergraduate degree in an appropriate field and satisfactory scores on the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

Plan A: At least 24 hours in individually prescribed courses numbered above the 200 level and six hours of thesis research, for a total of 30 hours. Thesis preparation and defense required.

Plan B: Completion of 36 hours of advanced courses and independent study prescribed by the candidate’s faculty studies committee. A planning project which must be defended is included in the 36 hours.
Irrespective of the plan chosen, students in the Natural Resource Planning Program usually are in residence for two years.

COURSES OFFERED

FORESTRY

205 MINERAL NUTRITION OF PLANTS  See Plant and Soil Science.

221 FOREST SOILS AND SITE RELATIONS  Forest soils from an ecological perspective. Profile development, physical properties, roots, water relations, nutrient cycling, topographic factors, site quality and the potential to produce biomass. Prerequisites: 120, Plant and Soil Science 161 and permission. Three hours. Hannah. Alternate years, 1981-82.

222 ADVANCED SILVICULTURE  Scientific bases for selected silvicultural practices. Prerequisite: Permission of instructor. Three hours. Hannah.

242 ADVANCED FOREST BIOMETRY  Advanced principles of estimation, prediction, inventory and evaluation of forest resources. Use of system analysis techniques in natural resource management. Prerequisite: 144 or permission of instructor. Three hours. Newton. Alternate years, 1980-81.

252 FOREST VALUATION  Principles of valuation of forest land, growing stock, and other forest resources. Prerequisites: 136 and 151 or concurrent enrollment. Two hours. Armstrong.

254 ADVANCED NATURAL RESOURCE POLICY  Advanced seminar in natural resource policy; with emphasis on current issues in forest policy. Prerequisites: Graduate or advanced undergraduate standing; 251 or permission of the instructor. Three hours. Reidel.

271 APPLIED FOREST MANAGEMENT DECISION THEORY  Operations research procedures in forest management. Management strategies for industrial and public forestry operations. Prerequisites: 123 and 140. Three hours. Armstrong.

282 SEMINAR  Review and discussion of selected topics and forestry research. Prerequisites: Graduate standing and permission of instructor. One hour.

285 ADVANCED SPECIAL TOPICS  Advanced special topics courses or seminars in forestry beyond the scope of existing formal courses. Prerequisites: Graduate or advanced undergraduate standing and permission of instructor. Credit as arranged.

385 SELECTED PROBLEMS IN FORESTRY  Advanced readings, or a special investigation dealing with a topic beyond the scope of existing formal courses. Prerequisite: Graduate standing and permission of instructor. Credit as arranged.
391 MASTER'S THESIS RESEARCH  Credit as arranged.

NATURAL RESOURCES

235 LEGAL ASPECTS OF PLANNING AND ZONING  Comparison of Vermont planning and zoning law with that of other states. Case studies in planning, zoning and land use controls. Prerequisite: Senior standing. Three hours.

254 ADVANCED NATURAL RESOURCE POLICY  (See Forestry 254.) Three hours. Reidel.

272 ENVIRONMENTAL IMPACT ASSESSMENT  Comprehensive perspective on methods and problems of assessing environmental and social impacts arising from natural resource management. Prerequisite: Permission of instructor. Three hours. Hendrix.

276 WATER QUALITY FOR NATURAL RESOURCE MANAGERS  Study of major contaminants and their behavior in surface and groundwater systems. Field methods for water quality analysis. Extensive field project. Prerequisites: Senior standing and permission. Three hours. Cassell.

278 WATER RESOURCES: ANALYSIS, PLANNING AND MANAGEMENT  Study of the physical, chemical and biological phenomena in rivers, streams and lakes. Concepts of water resources modeling, planning and management. Prerequisite: Permission of instructor. Three hours. Cassell.

391 MASTER'S THESIS/PROJECT RESEARCH  Credit as arranged.

RECREATION MANAGEMENT

235 OUTDOOR RECREATION PLANNING  The planning of large wildland areas for outdoor recreation use. Prerequisites: 150 or Forestry 140; PSS 161 or Geol. 1. Three hours. Lindsay.

240 WILDERNESS AND WILDERNESS MANAGEMENT  An interdisciplinary examination of wilderness as a land use. Emphasis on maintaining recreation and quality and controlling environmental impacts in wilderness, backcountry, and related areas. Prerequisites: RM 235 or permission. Three hours. Manning.

WILDLIFE BIOLOGY

232 ICHTHYOLOGY  Biology of fishes. Study of the structure and function of
systems; behavior and ecology of modern fishes. **Prerequisites:** Zoology 104 or 219 or equivalent, Wildlife Biology 161. Three hours. LaBar.

264 NONGAME WILDLIFE MANAGEMENT Selected topics which emphasize nongame birds and mammals: endangered species, vertebrate pests, urban wildlife, specialized survey and management practices. **Prerequisite:** Wildlife Biology 174. Three hours. Capen.

271 WETLANDS WILDLIFE ECOLOGY Life histories and management emphasizing North American waterfowl and furbearers: Integration of aesthetic, ecological, recreational, and socioeconomic values with contemporary uses of land and water. Field studies and one weekend trip. **Prerequisites:** Courses in ornithology and mammalogy, Wildlife Biology 174. Four hours. Fuller.

272 UPLANDS WILDLIFE ECOLOGY Integration of ecological principles, wildlife biology, land use, and human dimensions in wildlife. Emphasis on development and maintenance of wildlife habitat, and population regulation of uplands species. **Prerequisites:** Courses in ornithology and mammalogy, Wildlife Biology 151, 174. Four hours. Hirth.

285, 286 ADVANCED SPECIAL TOPICS Credit variable.

**SELECTED RELEVANT COURSES IN OTHER COLLEGES**

AREC 222 NATURAL RESOURCES EVALUATION
AREC 233 RURAL PLANNING
AREC 234 PRACTICUM IN RURAL PLANNING
CE 210 AIRPHOTO INTERPRETATION
CE 230 URBAN PLANNING TECHNIQUES
CE 231 URBAN PLANNING ANALYSIS
CE 232 COMMUNITY DESIGN
GEOG 287 SPATIAL ANALYSIS I
SOC 205 RURAL COMMUNITIES IN MODERN SOCIETY
SOC 207 COMMUNITY ORGANIZATION AND DEVELOPMENT

**PATHOLOGY**

*Professors Clemmons, Craighead (Chairman), Korson, Stark, and Trainer; Associate Professors Howard, Perl, Tindle, and Winn; Assistant Professors Hardin, Lapenas, Lee, Little, MacPherson, McQuillen, Mossman, and Ukena; Research Assistant Professor Adler.*

Research interests are in the fields of anatomic, clinical, and experimental pathology. Current studies include histochemistry, connective tissue pathology and biochemistry, electron microscopy, neoplasia, teratology, immunopathology, virology, and lung diseases.
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory undergraduate or graduate course work in chemistry and the biological sciences. Microbiology and immunology are also recommended but not required. Satisfactory scores on the Graduate Record Examination. Persons interested in a Ph.D. program may wish to consider the interdisciplinary program in Cell Biology in which Pathology participates.

MINIMUM DEGREE REQUIREMENTS

Anatomy 311 (3 hours), Pathology 305 (3 hours), Biochemistry 301-302 (6 hours); additional approved courses; thesis research (6-15 hours).

COURSES OFFERED

301 GENERAL PATHOLOGY A study of the processes of injury, repair, neoplasia, degeneration, etc., as they affect cells, tissues, and the human patient. For medical students. Prerequisite: Departmental permission. Three hours. Staff.

302 SYSTEMIC PATHOLOGY An introduction to diseases and pathologic processes with particular reference to their effects on various organ systems. Instruction in clinical laboratory medicine is correlated with the work in systemic pathology. Prerequisites: 301 and departmental permission. Eight hours. Staff.

305 PATHOBIOLOGY OF DISEASE Basic mechanisms of disease are discussed in the general context of their morphologic effects on cells and tissues. Overview serving as fundamental basis of research pathology. Prerequisites: Graduate status. Histology and biochemistry required. Microbiology highly recommended. Four hours. Staff.

391 MASTER’S THESIS RESEARCH Investigation of a research topic under the direction of an assigned staff member, culminating in an acceptable thesis. Credit as arranged.

PHARMACOLOGY

Professors Gans (Acting Chairperson), Jaffe, Krakoff, and McCormack; Associate Professor Reit; Assistant Professors Hacker, Newman, Redmond and (part-time) Scollins; Visiting Professor Maxwell.

Research interests of the staff include: pharmacokinetics and pharmacodynamics of antiparasitic and anticancer drugs; synthesis, properties and structure-activity relationships of biologically active nitrogen heterocyclic compounds; effects of methylxanthines on reproduction; mechanisms of adaptation to chemical injury in mammalian liver — DNA metabolism; functions of neurohumoral substances in synaptic transmission and microcirculatory regulation; hormonal influences on drug metabolism and effects of drugs on neuroendocrine regulation of growth.
A pre- and post-doctoral training program in clinical pharmacology is offered in cooperation with the Department of Pediatrics: pharmacotherapy of developmental and endocrine disorders. Another pre- and post-doctoral training program in the clinical pharmacology of anticancer drugs is offered in cooperation with the Vermont Regional Cancer Center.

**PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREES OF MASTER OF SCIENCE AND DOCTOR OF PHILOSOPHY**

Year courses in Biology, Organic Chemistry, Physics, Analytic Geometry and Calculus; Physical Chemistry and/or a reading knowledge of one foreign language may be additional prerequisites, depending on the requirements of the research supervisor; acceptable scores on the verbal, quantitative and advanced sections of the Graduate Record Examination.

**MINIMUM REQUIREMENTS FOR THE MASTER OF SCIENCE DEGREE**

Pharmacology 301, 302, 303, 372, 381, 391; supporting courses in Biochemistry and Physiology.

**MINIMUM REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY DEGREE**

Physiology and Biophysics 301; Biochemistry 301, 302. Pharmacology 301, 302, 303, 328, 372, 381, 491; Biometrics and Applied Statistics 308.

**COURSES OFFERED**

301 **MEDICAL PHARMACOLOGY** The chemical and biological properties of drugs. *Prerequisite:* Departmental permission. Six hours. Staff.

302, 303 **PHARMACOLOGICAL TECHNIQUES** Experiments conducted under supervision in the areas of drug metabolism, modes of drug action, physicochemical properties of drugs, bioassay, and toxicology. Prequisite: departmental permission. Two hours, by arrangement. Staff.

328 **INTRODUCTION TO MEDICINAL CHEMISTRY** Important classes of drugs are surveyed. Emphasis is placed on relationships between physiochemical properties and pharmacologic activity; synthetic aspects are considered. *Prerequisites:* Chemistry 131-132. Open to undergraduates with permission of instructor. Three hours. McCormack.

372 **SPECIAL TOPICS** Topics of current interest and importance in pharmacology are considered in depth through presentations by staff, students and visiting scientists. *Prerequisite:* Departmental permission. Credit variable one to three hours. Staff.
373 READINGS IN PHARMACOLOGY  Intensive directed reading in one area of pharmacology. Students in the department must choose a topic outside their area of thesis research. A term paper and a seminar on the selected topic are required. **Prerequisite:** Departmental permission. Two hours, by arrangement. Staff.

381 SEMINAR  Current developments in pharmacology are presented for discussion by students. **Prerequisite:** Departmental permission. One hour. Staff.

391 MASTER’S THESIS RESEARCH  Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH  Credit as arranged.

**PHILOSOPHY**

*Professors Dykhuizen (Emeritus), Hall, Mann (Chairperson), and Sher; Associate Professors Hansen, Kitcher, Kitcher, and Moneta; Assistant Professors Kornblith, Kuflik, and Miller; Adjunct Professor Cahn.***

Research interests of the Department include virtually every period in the history of philosophy and every major area of philosophical inquiry.

No Graduate Program Offered

**COURSES OFFERED**

201 THEORY OF KNOWLEDGE  A critical examination of the nature and sources of knowledge: belief, truth, evidence, perception, memory, and induction. **Prerequisite:** 102 or 112. Three hours. P.S. Kitcher, Sher.

202 METAPHYSICS  A critical examination of such topics as the nature of space and time, the concept of change, the identity of the self, the nature of the world and man's place in it. **Prerequisite:** 101 or 102 or 110. Three hours. Mann, Moneta, Sher.

210 PHILOSOPHY OF MIND  Major philosophical theories of the mind and its relation to the physical world, the nature of sensation, desire, and belief, and the relation between thought and action. **Prerequisite:** 102 or 110. Three hours. P.W. Kitcher, Sher.

212 PHILOSOPHY OF SCIENCE  A thorough investigation of one or two problems in the philosophy of science. There will be emphasis on modern attempts to solve them. **Prerequisite:** 112 or any 100 level history of science course or Junior or Senior standing in a science major. Three hours. P.S. Kitcher.

213 MATHEMATICAL LOGIC  A study of important advanced results in mathematical logic, including Godel's Incompleteness Theory and recursive function theory. **Prerequisite:** 113. Three hours. P.S. Kitcher.

215 PHILOSOPHY OF MATHEMATICS  A study of the philosophical problems connected with mathematics. The course will attempt to answer the following questions. What (if anything) is mathematics about? How do we acquire our mathematical knowledge? Is there an important difference between mathematics and natural science? Could all our mathematical beliefs be false?
Prerequisite: 113 or 213 or extensive background in mathematics. Three hours. P.S. Kitcher.

217 PHILOSOPHY OF LANGUAGE A philosophical study of the nature of language. Prerequisite: 113 or linguistics 100 and 102. Three hours. Hansen, P.S. Kitcher, Sher.

240 CONTEMPORARY ETHICAL THEORY An analysis of the ideas of contemporary moral philosophers in normative ethics and metaethics. Prerequisites: 140, 142, or 144. Three hours. Offered once every other year. Kuflik, Sher.

260 PHENOMENOLOGY II A critical and intensive investigation of the thought of a major twentieth century phenomenologist, e.g. Husserl, Heidegger, Merleau-Ponty, or Gadamer. Prerequisite: 160. Three hours. Moneta.

262 EXISTENTIALISM A study of existentialism as a philosophy, and an examination of its background, as displayed in the literary and philosophical writings of Pascal, Kierkegaard, Camus, Heidegger, and Sartre. Prerequisites: Any two of 101, 102, and 107. Three hours. Hall, P.W. Kitcher.

265 AMERICAN PHILOSOPHY The thought of such leading American philosophers as Peirce, James, Royce, Santayana, Dewey and Whitehead. Prerequisites: 101 and 102. Three hours. Miller.

271, 272 SEMINAR: MAJOR PHILOSOPHICAL AUTHOR OR SCHOOL A study of the major philosophical texts by a single author or school of thought. May be repeated for credit when different authors are studied. Prerequisite: An appropriate 100-level course in philosophy. Three hours. Staff.

281, 282 SEMINAR: SELECTED TOPICS IN PHILOSOPHY. Prerequisite: An appropriate 200-level course in philosophy. Three hours. Staff.

297, 298 READINGS AND RESEARCH Independent study with an instructor on a specific philosopher or philosophical problem. Prerequisite: An appropriate 200-level course in philosophy. Staff.

PHYSICS
Professors Arns, Brown, Crowell, Detenbeck, Juenker, Krizan, Lambert (Chairperson), Nyborg, and Scarfone; Associate Professors Rankin, and Sachs; Assistant Professor Sparralan; Research Assistant Professor Miller.

The Department of Physics offers experimental and theoretical opportunities for research in the fields of astrophysics, biological physics, solid state physics, and the physics of materials.

Astrophysical research in the Department is in the general area of experimental radio astronomy, particularly of pulsars and of the interstellar medium. Observations are carried out using the major instruments of the U.S. National Observatories and generally involve computer analysis and interpretation.

In the field of biophysics the experimental projects are concerned with the application of Mössbauer spectroscopy, with biophysical and medical ultrasound and with light scattering. Mössbauer experiments are carried out to determine the electronic structure at the active site of iron-containing proteins and en-
zymes. In biophysical ultrasound the research is aimed at understanding the physical principles involved when ultrasound interacts with and perturbs living systems. Medical applications include ultrasonic tissue characterization, ultrasonic thermometry, perfusion monitoring and analysis of the geometry of brain function. The scattering of highly coherent laser light is being applied to measurements of the mobility of single-celled organisms and to other time-dependent changes in their structures. There are theoretical research programs devoted to both the interpretation of the ultrasonic work and to the applications of statistical mechanics and quantum mechanics to fundamental properties of biomacromolecules and biomembranes.

Materials research includes experimental programs concerned with the interaction of gas molecules with metal surfaces using ultra high vacuum, radiotracer, photoelectron emission, and thin film techniques. The mechanisms of photoelectron emission, and the general area of electromagnetic interactions in metals are being investigated using vector photoelectric methods in near and far ultraviolet regions of the spectrum. Additional research involves the optical properties of solids and vapor streams as well as device physics, and the properties of semiconductor-oxide or electrolytic interfaces.

Theoretical and computational research programs in condensed matter physics are concerned with the electronic, lattice dynamical, magnetic and superconducting properties of a variety of materials including transition and rare earth metals, amorphous metals, liquid metals, ordered and disordered alloys, mixed crystals, and heavily doped elemental and compound semiconductors. The analytical and numerical methods of self-consistent band theory, multiple scattering theory, many-body theory, and Green's function formalism are some of the general approaches used in this research. In addition, theoretical work is conducted on the interactions between intense laser radiation and solids in such processes as heating, melting, vaporization, and plasma production.

Theoretical research in the statistical mechanics of plasmas, quantum field theory and particle physics, multiple-time scale perturbation theory, relativity, and many-body theory is carried on, as well.

Some of the above projects are carried out with the active cooperation of faculty in other science departments and opportunities exist for collaborative research with such other departments and groups of the University as Chemistry, Physiology and Biophysics; Cell Biology, Electrical and Mechanical Engineering, Medical Radiology and the Academic Computer Center.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in Science, Engineering or Mathematics; Physics 211, 213 and 273; two additional semester courses in physics above the sophomore level; two semester courses in mathematics above the sophomore level; satisfactory scores in the Graduate Record Examination (Aptitude and Advanced Section).
MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

A total of thirty credit hours, at least twelve of which shall be Physics courses numbered above 300 and including thesis research.

The department also offers programs leading to the degrees of Master of Arts in Teaching and Master of Science for Teachers of Physical Science. Details are available elsewhere in the catalog and also from the Physics Department.

COURSES OFFERED

201, 202 EXPERIMENTAL PHYSICS Experiments in classical and modern physics. Each student selects laboratory experiments appropriate to his background and interests. Prerequisites: 16 or 128, Mathematics 121 or 123; junior standing. Three hours per semester, four semesters maximum.

211 MECHANICS Newtonian dynamics of particles and systems of particles. Extensive use is made of descriptive, analytical, and approximational techniques. Prerequisites: 16 or 24; Mathematics 121 or 123. Three hours.

213 ELECTRICITY AND MAGNETISM Theory of electrostatic fields, and magnetic fields of steady currents. Electrical and magnetic properties of matter and electromagnetic energy relationships. Vector analysis developed as necessary. Prerequisites: 16 or 25; Mathematics 121 or 123. Three hours.

222 ADVANCED BIOLOGICAL PHYSICS Sound and electromagnetic waves, the latter including light, micro-waves and x-rays; ionizing particles and radiation. Interaction of these physical agents with biological systems. Prerequisites: Chemistry 2; Mathematics 121 or 123; experience in applying differential equations. Departmental permission required. Four hours. Alternate years, 1980-81.

254 ATOMIC AND NUCLEAR PHYSICS Phenomenological study of electronic structure of atoms, including vector model and various coupling modes. Development of quantum theory. Structure of the nucleus and properties of elementary particles. Prerequisite: 211. Three hours. Alternate years, 1981-82.

258 RELATIVITY Development of Einstein's theory of special relativity. Lorentz transformation, time dilation, length contraction, mass variation, relative velocities. Introduction to four dimensional space. Concepts of general relativity. Applications selected from astrophysics, elementary particles. Prerequisite: 128. Three hours. Alternate years, 1981-82.
265 THERMAL PHYSICS Basic concepts of thermodynamics including equilibrium conditions in homogeneous and heterogeneous systems. Introduction to kinetic theory and statistical mechanics. Prerequisites: 128 and Mathematics 121 or 123. Three hours. Alternate years, 1980-81.

273 INTRODUCTORY QUANTUM MECHANICS Introduction to non-relativistic quantum mechanics. Schroedinger equation and applications to simple systems. Prerequisites: 128 and 211. Three hours.

301 MATHEMATICAL PHYSICS Introduction to basic mathematical methods of theoretical physics; vector and tensor analysis, partial differential equations, orthogonal functions, complex variables and variational techniques. Prerequisites: 211 and 214. Four hours. Alternate years, 1981-82.

311 ADVANCED DYNAMICS Classical Mechanics presented as the basis of the concepts and methods of modern physics. Variational, Lagrangian and Hamiltonian formulations, canonical transformations, continuous systems. Prerequisite: 211. Four hours. Alternate years, 1980-81.

313 ELECTROMAGNETIC THEORY Development of Maxwell's theory of electromagnetism with emphasis on its physical basis and the modes of mathematical description. Prerequisite: 214. Four hours. Alternate years, 1980-81.

321 SEMINAR IN THEORETICAL PHYSICS For research students interested in pursuing topics of general and departmental research interest in theoretical physics. Prerequisite: Permission of instructor. Offered as occasion warrants. Credit as arranged.

322 SEMINAR IN CONTEMPORARY PHYSICS Topics of current interest in physics to be offered as student and faculty interest warrant. May be repeated for credit with departmental approval. Prerequisite: Permission of instructor. Credit as arranged.

331 SEMINAR IN BIOLOGICAL PHYSICS For research students in the field of biological physics. Lectures, reports and directed readings related to the research of the department and the field generally. May be repeated for credit with departmental approval. Prerequisite: Permission of instructor. Credit as arranged. Offered as occasion warrants.

341, 342 SOLID STATE PHYSICS Introduction to crystal symmetry and the reciprocal lattice. Crystal binding and lattice vibrations. Thermal, electrical, and magnetic properties of solids, free electron theory of metals, and band theory. Prerequisites: 214, 265, and 273 or their equivalents; permission of instructor. Three hours. Alternate years, 1981-82.

351 SEMINAR IN PHYSICS OF MATERIALS For research students in the field of the physics of materials. Lectures, reports and directed readings related to the research for the department and the field generally. May be repeated for credit with departmental approval. Prerequisite: Permission of instructor. Credit as arranged. Offered as occasion warrants.

362 QUANTUM MECHANICS Mathematical and physical foundations of
non relativistic quantum mechanics from the unifying point of view of Dirac. Symmetry operations and the algebraic structure of quantum mechanics are emphasized. \textit{Prerequisite:} 273. Four hours. Alternate years, 1980-81.

391 MASTER'S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

The following courses are offered as the occasion warrants by members of the Department. For descriptions see the Department Chairperson.

314 CLASSICAL ELECTRODYNAMICS

343 ADVANCED SOLID STATE PHYSICS

373 ADVANCED QUANTUM MECHANICS

374 ADVANCED QUANTUM THEORY

376 STATISTICAL MECHANICS

PHYSIOLOGY AND BIOPHYSICS

\textit{Professors Alpert (Chairman), Gibbons, Low, McCrorey; Associate Professors Halpern, Hendley, Webb, Whitehorn; Assistant Professors Hamrell, Kimura, McLaughlin, Patlak; Research Assistant Professors Brann, Evans, Harder, Litten, Maughan, Mulieri.}

Specific areas of interest include mechanics and energetics of cardiac and skeletal muscle; respiration; properties of vascular and bronchial smooth muscle; cardiac electrophysiology and excitation-contraction coupling; molecular basis of contraction of skeletal and cardiac muscle; neurochemistry of brain function; protein turnover; synaptic physiology and pharmacology; cholinergic and adrenergic receptor function; cation transport; and electrophysiology of the central nervous system. Opportunities exist in the Department of Physiology and Biophysics for multi-disciplinary studies in neurobiology, cardiovascular biology, cell biology, and biological motility. For example, coordinated studies are underway on the biochemistry, mechanics, and excitation-contraction coupling of muscle from hypertrophied hearts, and on the neurochemistry, central nervous system regulation of the circulatory system, and vascular smooth muscle properties of hypertensive rats.

Preference in admission and awarding financial support will be given to Ph.D. applicants.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Year courses in Biology, Organic Chemistry and Physics. These requirements must be completed by the end of the first year of residency. Graduate Record Examination required.
MINIMUM DEGREE REQUIREMENTS

Physiology and Biophysics 301; Neuroscience 302; other graduate courses as arranged (3 hours minimum); thesis research (6-15 hours).

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Biology, 1 year; Chemistry, organic and physical; Physics, 1 year; Mathematics, through calculus. A reading knowledge of French or German is recommended. These requirements must be completed by the end of the first year of residency. A Master's degree is not a prerequisite for the Ph.D. degree. Graduate Record Examination required.

MINIMUM DEGREE REQUIREMENTS

Physiology and Biophysics 301, Neuroscience 302; additional approved courses amounting to at least 40 hours, 16 of which must be in the Department; dissertation research, minimum 20 hours; language requirement is flexible and will be determined for each individual after consultation with the Studies Committee.

COURSES OFFERED

301 PHYSIOLOGY AND BIOPHYSICS Function in the whole human organism, and at the cellular, tissue, and organ levels, considered biologically and physically. Prerequisite: Permission of department chairman. Eight hours. Staff.

302 NEUROSCIENCE A correlated presentation of the neuroanatomy and neurophysiology of mammalian CNS. Same course as Anatomy 302. Prerequisite: Permission of instructor. Four hours. Anatomy and Physiology Staff.

303 SPECIAL PROBLEMS IN PHYSIOLOGY Various problems are covered by means of lectures, reports and directed reading. Prerequisites: 301; permission of department chairman. Credit as arranged. Staff.

308 BIOMETRICS AND APPLIED STATISTICS This course is designed as an introduction to the rational use and evaluation of statistical methods in the planning of experiments and the interpretation of biological data. The course includes a biometrics laboratory. Course limited to twelve students. Prerequisites: Math 110 or equivalent, and permission of instructor. Five hours. McCrorey.

309 SYNAPTIC AND CONDUCTING MEMBRANES The mechanisms of synaptic transmission and nerve and muscle conduction will be explored with particular emphasis on molecular structure and function. Prerequisites: 301 and 302, Biochemistry 301, 302, permission of instructor. Three hours. Webb. Alternate years, 1982-83.

310 MOLECULAR BASIS OF BIOLOGICAL MOTILITY This is an advanced course dealing with the molecular basis of muscle contraction and biological movement. The problems of energetics, mechanics and chemistry of
biological motility will be considered in detail. Special emphasis will be given to the contraction of skeletal muscle. Lectures and conferences. Prerequisites: 301, 302, Biochemistry 301, 302, permission of instructor. Three hours. Alpert. Alternate years, 1981-82.

313 SEMINAR ON ENDOCRINE PHYSIOLOGY The course will be devoted to a study of current problems in endocrine research with major emphasis on the molecular mechanism of action of hormones. Prerequisites: 301 or Endocrinology 271; Biochemistry 301-302; permission of instructor. Three hours. Low. Alternate years, 1981-82.

317 ADVANCED NEUROSCIENCE This course emphasizes current multidisciplinary approaches to the study of brain and behavior, particularly systems neuropysiology and transmitter neuropharmacology. Students pursue areas of special interest. Prerequisite: 302, Psych. 222, or permission. Three hours. Whitehorn and Hendley. Alternate years, 1982-83.

323 PRINCIPLES AND ELEMENTS OF BIOMEDICAL INSTRUMENTATION This course is designed for the biologically trained researcher to provide a firm understanding of instrument methodology. Topics include basic electrophysics; transducers; the concepts and manipulation of bioelectric and other signals; physiological instrument systems. A laboratory supports these theoretical ideas. Prerequisite: Permission of instructor. Five hours. Halpern, staff. Alternate years, 1982-83.

381 SEMINAR Presentation and discussion by advanced students and staff of current developments and research in the field. Prerequisite: Permission of department chairman. One hour per semester.

391 MASTER’S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

PLANT AND SOIL SCIENCE

Professors Bartlett, Boyce, MacCollom, Wiggans, and Wood; Associate Professors Gotlieb (Acting Chairman), Magdoff, Murphy, Parker, and Pellett; Extension Professor Way; Extension Associate Professor Flanagan; Extension Assistant Professors Costante, and Nielsen; Lecturers Flinn, Watson, and Whipkey; Extension Lecturer Desrosier.

Current research projects are concerned with the solution of horticultural and agronomic problems with special emphasis on environmental physiology, soil chemistry, and plant nutrition. Areas of research include winter hardiness of grasses, fruits and woody ornaments; chemical and environmental control of plant growth; cultural and environmental interrelationships as they affect plant growth, crop adaptation and variety testing; crop establishment and soil productivity; soil chemistry of the rhizosphere; behavior of nitrogen in the soil; nutrient availability to plants; agricultural waste management; temperature effects on soil water retention and transmission. A student’s thesis research will be an integral part of the on-going research efforts of the department.
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Satisfactory completion of one academic year of graduate study in the Department of Plant and Soil Science, a written comprehensive examination, and satisfactory scores on the Graduate Record Exam.

MINIMUM DEGREE REQUIREMENTS

18-22 hours in Plant and Soil Science and closely related fields; satisfactory participation in seminars during residency; thesis research (8-12 hours).

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Satisfactory completion of two academic years of graduate study in the Department of Plant and Soil Science at the University of Vermont. With the approval of the Dean of the Graduate College and the Department of Plant and Soil Science, a master’s degree may be accepted in partial fulfillment of this requirement.

Satisfactory completion of a written and oral qualifying doctoral examination as prescribed by the Department and satisfactory scores on the Graduate Record Exam.

A reading knowledge of a modern foreign language appropriate to the student’s specialty. Proficiency in other areas appropriate to the student’s specialty may be substituted for the language requirement with the approval of the Studies Committee. This proficiency does not count toward course requirements for the degree.

MINIMUM DEGREE REQUIREMENTS

The course requirements are as follows: a total of at least 40 credit hours of which a minimum of 30 must be taken in Plant and Soil Science and closely related disciplines (e.g. Botany, Chemistry, Forestry, Microbiology and Biochemistry, Geology). Satisfactory participation in seminars during residency is required. All doctoral students must take part in the Department’s undergraduate teaching program.

COURSES OFFERED

202 MICROMETEOROLOGY  Theoretical and practical considerations of the micrometeorological factors that affect plant growth and agricultural practices. Prerequisite: 11. Three hours. Whipkey. Alternate years, 1981-82.

204 PLANT RESEARCH TECHNIQUES  Methods of conducting research with plants including the organizing and planning of experiments. Prerequisites: 11, Botany 104. Three hours. Wiggins. Alternate years, 1981-82.

205 MINERAL NUTRITION OF PLANTS  See Botany 205. Alternate years, 1981-82.
207  WATER RELATIONS OF PLANTS  See Forestry 207. Alternate years, 1981-82.

221  ADVANCED TREE FRUIT CULTURE  Theory and practice of modern commercial fruit science. Nutrition and cultural responses to various management practices. Prerequisites: 11 and 61. Three hours. Boyce.

261  SOIL CLASSIFICATION AND LAND USE  Classification of soils throughout the world as they relate to soil development and land use. Three Saturday field trips. Prerequisite: 161 or a total of six hours in ecology, geography, or geology. Three hours. Bartlett, Watson. Alternate years, 1982-83.

264  SOIL CHEMISTRY  Behavior of surfaces in soils at interfaces among minerals, humus, roots, microbes, water, and air. Prerequisites: 161, two semesters chemistry. Four hours. Bartlett. Alternate years, 1981-82.

266  SOIL PHYSICS  Mathematical and physical principles of the soil-water-plant interaction and its relationship to production and management. Prerequisites: 161, Physics 5-6 or Chemistry 1-2. Three hours. Bartlett. Alternate years, 1982-83.

281  SEMINAR  Presentation and discussion of papers on selected topics of current interest by students and staff. Prerequisite: Senior standing. One hour. Staff.

301  PLANT SCIENCE COLLOQUIUM  Graduate student and staff discussion of current research topics in plant science. One hour. Staff.

302  SOIL SCIENCE COLLOQUIUM  Graduate student and staff discussion of current research topics in soil science. One hour. Staff.

381  GRADUATE SPECIAL TOPICS  Advanced readings and discussion of horticulture, crops, or soils research literature. Three hours. Staff.

391  MASTER'S THESIS RESEARCH  Credit as arranged.

491  DOCTORAL DISSERTATION RESEARCH  Credit as arranged.

POLITICAL SCIENCE

Professors Hilberg, Kinnard, Little, Staron, and Wertheimer (Chairperson); Associate Professors Nelson, Pacy, and Simon; Assistant Professors Bann, Bryan, Hoffman, Holland, Johnson, Mahler, and Nivola; Visiting Assistant Professor Amen.

Research interests of the Department of Political Science and the various library and data processing resources available enable graduate students to undertake research in American political institutions; public law; public policy; political behavior; comparative political systems; international relations; political philosophy and empirical political theory.
PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

Twelve hours of Political Science at the junior-senior level; supporting courses in other social sciences; satisfactory scores on the Graduate Record Examination, including the advanced examination in political science.

MINIMUM DEGREE REQUIREMENTS

An approved program of 24 hours in course work, including Political Science 283 and not more than 6 hours in related fields; thesis research (6 hours).

COURSES OFFERED

Admission to the following courses for graduate credit requires the approval of the Department.

211, 212 HISTORY OF POLITICAL THOUGHT First semester: political thought from Plato to Burke. Second semester: Political thought of the 19th and 20th centuries with emphasis on socialist ideologies from Marx to Marcuse. Prerequisite: Six hours in political science. Three hours. Staron.

213 CONTEMPORARY POLITICAL THOUGHT Writings of several twentieth-century political thinkers, including works in related fields such as psychology and economics. Prerequisite: Six hours in political science. Three hours. Wertheimer.

216 AMERICAN POLITICAL THOUGHT American political thought from the colonial period to recent times. Prerequisite: Six hours in political science. Three hours. Simon.

221, 222 CONSTITUTIONAL LAW First semester: emphasis on developing skills of legal analysis. Historical origins and general principles of constitutionalism. Second semester: selected topics in constitutional law. Prerequisites: Six hours in a social science; 221 for 222. Three hours. Hoffman.

223 COMPARATIVE CRIMINAL POLICY Research seminar focusing on the political bases of criminal law and law enforcement policy: conventional criminal behavior as well as repression of political activity and deprivation of human rights in cross-national perspective. Prerequisite: 121, 122, or permission of instructor. Three credits. Holland.

227, 228 INTERNATIONAL LAW Principles and applications of public international law. Prerequisite: Six hours in political science. Three hours. Little.

231 THE LEGISLATIVE PROCESS Organization, procedure, and behavior of legislative chambers with special attention to the U.S. Congress. Prerequisite: Six hours in political science. Three hours. Nelson.

232 LAWMAKING AND PUBLIC POLICY Influence of the executive and problems of congressional and parliamentary control. Prerequisite: Six hours in political science. Three hours. Nivola.

233 THE NATIONAL EXECUTIVE Functions and organization of the
Presidency and the bureaucracy in American national government. *Prerequisite:* Six hours in political science. Three hours. Johnson.

239 AMERICAN POLITICS The politics of decision-making in the American political system. *Prerequisite:* Six hours in political science. Three hours. Simon.

242 PROBLEMS OF BUREAUCRACY Bureaucracy and bureau pathology, scientific management, human relations, decision making, and leadership in the context of public organization. *Prerequisite:* Six hours in political science. Three hours. Johnson.

250 THE CRAFT OF DIPLOMACY Emphasis on experiences and reflections of diplomatic personalities, supplemented by studies of specialists. *Prerequisite:* Six hours in political science. Three hours. Pacy.

251, 252 AMERICAN FOREIGN POLICY First semester: constitutional principles, institutional factors, and historic traditions in the formation of foreign policy. Second semester: contemporary policies toward specified countries. *Prerequisite:* Six hours of political science. Three hours. Kinnard, Hilberg.

256 INTERNATIONAL ORGANIZATION Theory and practice in supranational institutions. *Prerequisite:* Six hours in political science. Three hours. Pacy.

258 PROBLEMS OF COMMUNISM See Economics 258. Three hours. Staff.

261 URBAN GOVERNMENT AND POLITICS An analysis of metropolitan areas in terms of their governments, problems and roles. *Prerequisite:* Six hours of political science. Three hours. Nivola.

264 STATE ADMINISTRATION Problems in planning, policy development, and program coordination. *Prerequisite:* Six hours in political science. Bryan.

273 COMPARATIVE POLITICAL ANALYSIS An intensive examination of selected topics in comparative politics. *Prerequisite:* Sophomore standing. Three hours. Mahler.
274 ETHNIC POLITICS Theories of ethnic group identification, ethnic roots of political behavior, impact of ethnicity on the political structure. **Prerequisite:** Six hours in political science. Three hours. Staff.

276 MASSES AND ELITES Structural and attitudinal linkages between governors and governed. Modern as well as more traditional societies. **Prerequisite:** Permission of instructor. Three hours. Staff.

281 POLITICAL PARTIES Political parties with emphasis upon voting behavior and campaign techniques. **Prerequisite:** Six hours in political science. Three hours. Nelson.

283 SCOPE AND METHODS OF POLITICAL SCIENCE Approaches, sources of information, research methods and systematization in the study of political phenomena. **Prerequisite:** Graduate student or permission of instructor. Three hours. Bann.

291 through 293 READING AND RESEARCH For advanced undergraduates and graduate students. Three hours. Staff.

295, 296 SEMINAR Selected topics in political science. Three hours. Staff.

391 through 393 MASTER'S THESIS RESEARCH Credit as arranged.

**PSYCHOLOGY**

Professors: Achenbach, Albee, Ansbacher, J. Burchard, Forgays, Joffe, Lawson, Leitenberg and Musty (Chairperson); Associate Professors: Damkot, Gordon, Hasazi, Howell, Kapp, Kessler, Leff and Rolf; Assistant Professors: Bond, Rosen; Adjunct Assistant Professors: Dietzel and Thomson; Visiting Assistant Professors: Barrera, Bouton, Compas, Fitzhenry-Coor, Lobato, Lorenz, and Miller; Research Assistant Professors: S. Burchard, Saxby; Clinical Assistant Professor: Peyser; Adjunct Associate Professor: Copeland.

The Ph.D. program in General and Experimental Psychology began in 1964, and now includes ongoing research in a variety of areas. Details of ongoing research available on request from the Chairperson, Department of Psychology. Students in this program are involved early in independent research projects. Further information on specific program specialties can be obtained from the Chairperson, Department of Psychology.

The Ph.D. program in Clinical Psychology began in 1969. It stresses early placement in a variety of clinical facilities and emphasizes the development of research and service techniques relevant to clinical problems encountered in those settings. The clinical program is fully accredited by the American Psychological Association. Further information on the types of clinical facilities and the research interests of the clinical faculty can be obtained from the Chairperson, Department of Psychology.

Applicants should apply for the Ph.D. degree only. Students whose goal is a terminal Master's degree are not accepted. The application deadline for admission is February 1. All supporting materials, including GRE scores, must be received by February 1.
In 1974, a small number of students were admitted to the Ph.D. programs on a part-time basis. The intention is to serve neglected Vermont constituencies such as full-time mental health workers with families, and persons with responsibilities at home. The part-time graduate program is not otherwise possible. A justification of the necessity to attend part-time must accompany the candidate’s application. To be eligible for acceptance, applicants must have fulfilled prerequisites and minimum requirements listed below.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

A major or its equivalent in undergraduate psychology including courses in statistics and experimental psychology; satisfactory scores on the Graduate Record Examinations, including the Advanced Psychology sub-test.

MINIMUM DEGREE REQUIREMENTS FOR MASTER OF ARTS DEGREE

Twenty-four hours of psychology courses and seminars, including Psychology 301, 302, 340, 341; thesis research for 6 credits. The requirement of the specific courses (301, 302, 340, 341) may be exempted by examination. There is no foreign language requirement.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

For the General/Experimental Program, satisfactory completion of minimum degree requirements for Master of Arts degree or equivalent; For the Clinical Program, satisfactory performance on the Ph.D. comprehensive examination.

MINIMUM DEGREE REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY DEGREE

The General/Experimental Program requires a minimum of 80 credit hours and the Clinical Program, 83 credit hours (in addition to Psyc. 301 & 302 courses); 20 credits must be accumulated in dissertation research credits, and the remainder in course credits numbered in the 200 through the 400 sequences of the psychology curriculum, or acceptable courses at the 200 or 300 level from other curricula. Detailed information on courses of study is available from the Department. Satisfactory performance on the departmental final oral examination. There is no foreign language requirement.

COURSES OFFERED

205 LEARNING Examination of classical and recent research on the learning process, including respondent and operant learning, discrimination learning, and human learning and memory. Prerequisite: 110. Three hours. Forgays, Musty, Bouton.

206 MOTIVATION Research and theorizing on the nature and development of motives, emotions and their relation to other psychological processes. Prerequisite: 110. Three hours. Joffe, Musty, Forgays.

210 PRINCIPLES OF HUMAN PERCEPTION Focuses upon basic sensory and perceptual mechanisms that support acquisition and processing of information through auditory, visual, chemical and hapticsomatic sensory systems of animals and humans. *Prerequisite:* 109. Three hours.

221 PHYSIOLOGICAL PSYCHOLOGY I The structure and function of the mammalian nervous system, with emphasis upon neurological correlates of sensory experience and perception. Individual laboratory experience. Four hours. Musty, Lorenz.

222 PHYSIOLOGICAL PSYCHOLOGY II The study of the role of central nervous system mechanisms in the determination of sleep arousal, motivation, learning, and memory. Individual laboratory experience. *Prerequisite:* 221. Four hours. Musty, Lorenz.

223 PSYCHOPHARMACOLOGY An intensive analysis of the effects of drugs on behavior. Topics such as drug effects on learning, memory, motivation, perception, emotions, and aggression will be considered in both animal and man. *Prerequisites:* 110 and 121 or 222 or permission of instructor. Three hours. Musty.

230 ADVANCED SOCIAL PSYCHOLOGY Advanced survey covering current research in various fields of social psychology. *Prerequisite:* 110. Three hours. Leff.

233 PSYCHOLOGY OF ENVIRONMENTAL EXPERIENCE An intensive examination of different ways of thinking (and feeling) about environments, including cognitive theory and research as well as applications to design creativity, aesthetic experience, and various types of environmental awareness. *Prerequisite:* Advanced background in psychology or in environmental studies or education. Three hours. Leff.

234 PSYCHOLOGY OF SOCIAL AND ENVIRONMENTAL CHANGE An examination of how psychology can increase our understanding of potential social and environmental transformations, with special emphasis on (a) implications for the quality of human experience and (b) devising effective change strategies. *Prerequisite:* Advanced background in psychology or in environmental studies or a social science. Three hours. Leff.

241 INDUSTRIAL PSYCHOLOGY (S) Survey of psychological issues and research in organizations. Personnel selection and training, motivational theories, leadership and group dynamics, workplace analysis and design will be critically examined. *Prerequisites:* 109 or Business Administration 170, advanced standing in business administration, permission of the instructor. Three hours. Damkot.
242 HUMAN FACTORS PSYCHOLOGY (S) Examination of anthropometrics and psychophysical characteristics applied to designing things for human use. Critical review of research on human performance capabilities. Prerequisites: 109 or Mechanical Engineering 119 (123, 124), advanced standing in engineering, permission of instructor. Students may not receive credit for both 242 and Mechanical Engineering 275. Three hours. Damkot.

250 INTRODUCTION TO CLINICAL PSYCHOLOGY Examination of some of the critical issues in clinical psychology; its scientific status, problems of research; and probable future trends. Prerequisites: 110, 119, 152. Three hours.

251 BEHAVIOR DISORDERS OF CHILDHOOD A review of the empirical and theoretical literature regarding disorders of cognition, affect, and social behavior of children. Emphasis will be placed on etiological factors and therapeutic methods. Prerequisites: 1 and 151 or 122. Three hours. Hasazi.

253 ADVANCED BEHAVIOR MODIFICATION Application of technique for the manipulation and control of human behavior in a variety of educational and social situations involving the collection and analysis of behavioral data. Prerequisites: 153, 109. Burchard.

261 COGNITIVE DEVELOPMENT Research and theory concerning developmental changes in modes of processing information, from infancy to adulthood. Topics include early concepts, language and thought, play and imitation, and cross-cultural issues, focusing on the theory of Jean Piaget. Prerequisite: 161 or 109 (concurrently), or permission of instructor. Three hours. Bond.

262 SOCIAL DEVELOPMENT Theory and research concerning interpersonal development in humans from infancy through adulthood. Topical areas include development of person perception, social inference, role-taking, moral judgment, and ego development. Relationships between language and cognition and social development emphasized. Prerequisite: 161, or 109, 110 (concurrently), or permission of instructor. Three hours.

281-282 SEMINAR Review and discussion of current psychological research. One hour. Staff.

295, 296 CONTEMPORARY TOPICS Three hours. Staff.

The prerequisite for all of the courses listed below is acceptance to the graduate psychology program, which involves the satisfactory completion of undergraduate courses in experimental psychology, systematic psychology, and statistics. In special cases, these prerequisites may be waived by permission of the instructor.

301, 302 FACULTY SEMINAR This course serves as an overview of the field. It will emphasize empirical findings from the frontiers of the field and relate them to the body of psychology as it is developing today. Staff.

315 SEMINAR IN ALCOHOL AND BEHAVIOR A study of the influences of alcohol upon selected aspects of psychological processes including perception, attention, cognition, learning, motivation, and emotion. Three hours. Musty, Damkot.
326 CENTRAL PROCESSES: CORTICAL MECHANISMS Advanced studies of the prosencephalic systems in cognitive behavior, with reference to cortical function and its relationship to input and output systems. Three hours. Kapp, Musty.

331 INTERPERSONAL PROCESSES: MODES OF INTERACTING Examination of interpersonal conflict, cooperation, power relations, information transfer, and persuasion. Prerequisite: Permission of instructor. Three hours. Leff.

332 INTERPERSONAL PROCESSES: COGNITION IN SOCIAL BEHAVIOR Examination of social attribution, interpersonal set, problems of reciprocal perspectives in social encounter and the formulation of interpersonal strategies. Prerequisite: Permission of instructor. Three hours. Leff.

340 ADVANCED STATISTICAL METHODS I Study of statistical methods as aids for understanding and evaluating psychological data. Critical study of such topics as sampling theory, statistical estimation, analysis of variance, and correlational techniques. Three hours. Howell.

344 EXPERIMENTAL DESIGN Extended coverage of problems in the design and analysis of behavioral experiments to including repeated measures, interactions, confounding, comparisons, missing data, modeling, Latin squares, and other complex designs, and covariance designs and interpretations. Prerequisites: 340. Three hours. Howell, Gordon.

347 MEASUREMENT AND SCALING Traditional psychophysical methods, Thurstonian judgmental methods, and recent topics in unidimensional scaling. Techniques and applications in multidimensional scaling. Relation of these to mental test theory, factor analysis, and cluster analysis. Prerequisites: 340 and 341. Three hours. Gordon.

349 SPECIAL TOPICS IN APPLIED STATISTICS A course for advanced graduate students. Topics might include factor analysis, discriminate function analysis, multivariate analysis of variance, advanced experimental design, introduction to Bayesian statistics, computer application in data collection and analysis. Prerequisite: Permission of the instructor. Three hours. Gordon and Howell.

351, 352 BEHAVIOR THERAPY A review of the literature relating to theory, practice, and research. Emphasis will be placed on the evaluation as a variety of procedures applied to behavior disorders in adults and children. Prerequisite: Permission of the instructor. Three hours. Leitenberg.

353 INTRODUCTION TO CLINICAL HUMAN NEUROPSYCHOLOGY A clinical seminar on the effects on human behavior of neocortical dysfunction. Review of theoretical and clinical approaches to brain function with emphasis on recent developments in diagnostic techniques and ensuing theoretical developments. Prerequisite: 221, 222 or equivalent. Three hours. Rosen.
356 MENTAL RETARDATION Study of abnormal behavioral development in the intellectual area. Etiology, assessment, and modification of mental retardation. Prerequisite: Permission of instructor. Three hours. Hasazi.

357 RESEARCH IN SCHIZOPHRENIA An advanced seminar intended to investigate the adequacies of past and current research methodologies with respect to environmental, genetic, and biochemical theories of the etiology of schizophrenia. Prerequisite: Permission of instructor. Three hours. Rolf.

358 ANTISOCIAL BEHAVIOR A review of the literature related to the development and modification of antisocial behavior. Evaluation of previous research and the preparation of practical research proposals which will extend existing knowledge in the field. Prerequisite: Permission of instructor. Three hours. Burchard.

360 METHODS AND MODELS OF CLINICAL PREDICTION A study of clinical versus actuarial problems in applied psychology. Historical antecedents, examples of problems of reliability, validity, and utility including models of intelligence and personality, will be discussed. Modern day solutions are covered. Prerequisite: 340 or permission of instructor. Three hours. Kessler.

361 ADVANCED PERSONALITY THEORY A survey of present day personality theories according to issues involved and explanatory demands made on a theory. With emphasis on usefulness to psychotherapy, an organism-operational-Adlerian type theory is favored. Prerequisite: Permission of instructor. Three hours. Ansbacher.

362 COMMUNITY CLINICAL PSYCHOLOGY A seminar in a current philosophy and approach to mental health problems. Topics will include: History and development of community mental health and of community clinical psychology, consultation methodology, and research problems. Prerequisites: Permission of instructor. Three hours. Staff.

363 PSYCHOPATHOLOGY An advanced course dealing with models, epidemiology, research approaches to disturbed behavior; major patterns of mental disturbances and interpersonal pathology are considered; an overview of intervention and primary prevention of mental disorders is covered. Prerequisites: Graduate standing, permission of instructor. Three hours. Albee.

364 PROFESSIONAL AFFAIRS AND ETHICS The origins of professions and of psychology in particular. Accreditation, laws affecting psychology, organization of the progression, licensing certification, and the code of ethics for psychology. Prerequisites: Graduate standing, permission of instructor. Three hours. Albee.

365 GROUP PROCESSES A comprehensive review of encounter, training, and psychotherapy group issues. Discussions focus on group composition, leadership styles, group stages, group problems, ethical issues, and research questions. Prerequisites: Graduate standing or permission of instructor. Three hours. Dietzel.

366 SEMINAR IN ADVANCED DEVELOPMENTAL PSYCHOLOGY This seminar critically analyzes new topics of current significance in Developmental Psychology. Research, theory, applied and professional issues are considered, including, for example, moral development, infancy, early con-
ceptual development, professional writing. *Prerequisites:* Graduate standing or permission. Three hours. Bond.

370, 371 INTRODUCTORY PRACTICUM: ASSESSMENT AND THERAPY I & II Assessment practicum concerns role of psychologist as consultant and emphasizes evaluation of mental abilities, and behavioral and personality adjustment. Therapy practicum covers basic psychotherapy, case management, and utilization of supervision. *Prerequisites:* Graduate standing and permission of instructor. Three hours. Rosen.

372 through 377 ADVANCED CLINICAL PRACTICUM Supervised experience in a variety of clinical settings including the Medical Center Hospital; the State Hospital; Community Mental Health Facilities; Behavior Therapy Center; Counseling Center. *Prerequisites:* Graduate standing and permission of instructor. Three hours. Leitenberg, Staff.

380 CONTEMPORARY TOPICS Selected topics in depth, with emphasis on critical analysis of original literature in a given area. Recent topics include: anxiety, behavioral pharmacology, biological bases of memory, depression, psycholinguistics, psychotherapy research, primate behavior, skilled performance, issues in industrial psychology. Three hours.

385 ADVANCED READINGS AND RESEARCH Readings, with conferences, to provide graduate students with backgrounds and specialized knowledge relating to an area in which an appropriate course is not offered. One to three hours.

391 MASTER'S THESIS RESEARCH Credit as arranged.

491 DOCTORAL DISSERTATION RESEARCH Credit as arranged.

The following courses are offered infrequently but may be taught where sufficient student interest is demonstrated.

305 SEMINAR IN LEARNING THEORY Three hours.

308 SEMINAR IN OPERANT CONDITIONING Three hours.

310 SEMINAR IN PERCEPTION Three hours.

333 INTERPERSONAL PROCESSES: MOTIVATION IN HUMAN INTERACTION Three hours.

RELIGION

*Associate Professors Andrews, Martin (Chairman) and Paden; Assistant Professors Brenneman, Gussner, Sugarman and Yarian.*

No Graduate Program Offered

291, 292 TOPICS IN THE HISTORY AND PHENOMENOLOGY OF RELIGION *Prerequisites:* Nine hours in religion; junior standing. Three hours. Staff.
SOCIOLOGY

Professors Folta (Chairperson), Lewis, Mabry, Sampson, and Stanfield; Associate Professors, Danigelis, Finney, Loewen, McCann, Nixon, and Steffenhagen; Assistant Professors Berkowitz, Fengler, Mintz, Schmidt and Stedman.

No Graduate Program Offered

Emphasis of the Department is on the development of sociological theory and methods for the understanding of human social relations and behavior and for application toward the resolution of major social problems. Current research activities include studies of population and social structural change; complex organizations, interorganizational relationships and organizational development; changes in age and sex role relationships and family values and structure; rural and urban community development change; structures of societal inequality and poverty; alcohol and drug use and abuse; criminal deviance and corrections; race and ethnic relations; school desegregation; the social impacts of death and dying; kinship, political and economic networks; human service delivery systems; epidemiology and medical sociology; small group processes; the structure and role of religion, leisure and sports in modern society; methodological problems in theory construction, quantitative research, and applied sociology.

COURSES OFFERED

Courses numbered 200 to 299 require a minimum of six hours of sociology, three of which must be at the 100 or intermediate level, equivalent preparation as indicated or permission of the instructor.

202 POPULATION DYNAMICS Analysis of the factors affecting human population growth and distribution, migration patterns, and the relationship between economic activity and population trends. Prerequisites: Six hours of sociology or Soc. 10 and an introductory course in biology, economics, geography or zoology. Three hours. McCann, Stedman.

204 ECOLOGICAL PERSPECTIVE ON HUMAN COMMUNITIES Analysis of relationships between the social, economic, and technological organization of communities and their physical and sociocultural environments. Emphasis upon community land use and settlement patterns. Prerequisites: Six hours of sociology or Anthropology/Geography 179. Three hours. Mabry, Schmidt, Stedman.

205 RURAL COMMUNITIES IN MODERN SOCIETY The changing structure and dynamics of urban social organization in the context of modernization and urbanization. Emphasis on rural communities in United States. Prerequisites: Six hours of sociology. Three hours. Finney, Schmidt.

206 URBAN COMMUNITIES IN MODERN SOCIETY The changing structure and dynamics of urban social organization in the context of modernization and urbanization. Emphasis on cities and metropolitan areas in the United States. Prerequisites: Six hours of sociology. Three hours. Lewis, Loewen, Stedman.
207 COMMUNITY ORGANIZATION AND DEVELOPMENT Communities as changing sociocultural organizational complexes within modern society. Special attention will be given to problems of the formulation and implementation of alternative change strategies. **Prerequisites:** Six hours of sociology. Three hours. Finney and Schmidt.

209 SMALL GROUPS An examination of the structure and dynamics of small groups and the interpersonal, informal network of relations that characterize the interaction of members. **Prerequisites:** Six hours of sociology. Three hours. Nixon, Steffenhagen.

211 SOCIAL MOVEMENTS AND COLLECTIVE BEHAVIOR Examination of origins, development, structure, and consequences of crowds, riots, crazes, rumors, panics, and political and religious movements and their relationships to cultural and social change. **Prerequisites:** Six hours of sociology. Three hours. Danigelis, Finney, Folt, Sampson, Schmidt, Stanfield.

214 DELINQUENCY Analysis of the nature and types of juvenile behavior that violates law, the mechanisms for defining such behaviors as delinquent, and their causes and consequences. **Prerequisites:** Six hours of sociology. Three hours. Folt, McCann.

216 CRIMINAL JUSTICE Analysis of the social structures and processes involved in the identification and labeling of individuals as criminal offenders: criminal law, its enforcement and the courts. **Prerequisites:** Six hours of sociology. Three hours. Folt, Stanfield.

217 CORRECTIONS Analysis of the social structures and processes involved with individuals designated as offenders of criminal law; probation, prison, parole, and programs of prevention and rehabilitation. **Prerequisites:** Six hours of sociology. Three hours. Stanfield.

219 RACE RELATIONS Examination of American racial subordination in social and historical perspective. Analysis of interracial contacts, racial subcultures and social structures, and responses to racial prejudice and discrimination. **Prerequisites:** Six hours of sociology. Three hours. Danigelis, Loewen.

225 ORGANIZATIONS IN MODERN SOCIETY Examination of basic classical and contemporary theory and research on the human relations, internal structures, environments, types, and general properties of complex organizations and bureaucracies. **Prerequisites:** Six hours of sociology. Three hours. Berkowitz, Finney, Folt, Sampson.

228 ORGANIZATION DEVELOPMENT AND CHANGE Examination of basic and applied research on problems of organizational effectiveness and innovation. Includes presentation of organizational development and change techniques and practical class exercises. **Prerequisites:** Six hours of sociology, or one college course on organizations, or equivalent organizational experience with permission of instructor. Three hours. Berkowitz, Finney.

229 THE FAMILY AS A SOCIAL INSTITUTION Examination of the institution of the American family in crosscultural and historical perspective.
Theories and research on family continuity, change and institutional relationships will be explored. *Prerequisites:* Soc. 129 or six hours of sociology. Three hours. Berkowitz, Fengler, Folta, Lewis and Mabry.

**232 SOCIAL CLASS AND MOBILITY** Comparative and historical analysis of the causes, forms, and consequences of structured social inequality in societies. Examination of selected problems in contemporary stratification theory and research. *Prerequisites:* Six hours of sociology. Three hours. Danigelis, Finney, Nixon, Mabry, McCann, Mintz, Sampson, Schmidt, Stedman.

**237 OCCUPATIONS AND PROFESSIONS** Analysis of social organization of economic roles in industrial societies, the institutional relationships of occupations and professions, and impact of work structure on the individual. *Prerequisites:* Six hours of sociology. Three hours. Finney, Folta, Mintz.

**240 POLITICAL SOCIOLOGY** Examination of the social organization of power and authority in modern societies and the dynamics and institutional relationships of political institutions, interest groups, parties, and publics. *Prerequisites:* Six hours of sociology. Three hours. Berkowitz, Danigelis, Finney, Nixon, Loewen, Mintz.

**241 METHODS OF PUBLIC OPINION RESEARCH** Methods used in conducting public opinion research, emphasizing design, sampling, questionnaire construction, administration, data control, and the analysis of cross-sectional, longitudinal and time series data. *Prerequisites:* Sociology 100 or equivalent with permission of instructor. Three hours. Berkowitz, Danigelis.

**249 SOCIOLOGY OF KNOWLEDGE** Reviews the development and current status of sociological theory and research concerning the emergence and roles of belief and normative systems in sociocultural organization and change. *Prerequisites:* Six hours of sociology. Three hours. Loewen, Sampson, Steffenhagen.

**254 SOCIOLOGY OF HEALTH AND MEDICINE** The social organization and institutional relationships of medicine in society and the role of sociocultural factors in the etiology, definition, identification, and treatment of illness. *Prerequisites:* Six hours of sociology. Three hours. Berkowitz, Folta, Mabry, Stedman.

**255 SOCIOLOGY OF MENTAL HEALTH** Analysis of the social structures and processes involved in the identification, definition, and treatment of mental illness and its sociocultural etiology and consequences. *Prerequisites:* Six hours of sociology. Three hours. Folta, Mabry, Steffenhagen.

**258 SOCIOLOGY OF LAW** Analysis of the socio-cultural structure of the legal institution and its relationships to other institutions: the social organization of the legal profession, lawmaking, and the courts. *Prerequisites:* Six hours of sociology. Three hours. Folta, Stanfield.

**274 METHODS OF DATA GATHERING IN SOCIAL RESEARCH** Techniques for generating and using observational, interview,
survey, and existing source data to systematically test sociological ideas; includes design, sampling, measurement, and ethical issues. **Prerequisites:** Sociology 100 or equivalent with permission of instructor. Three hours. Berkowitz, Danigelis, Loewen, Finney, Folta, Sampson, Schmidt, Stedman.

275 METHODS OF DATA ANALYSIS IN SOCIAL RESEARCH Quantitative analysis of sociological data; includes table, regression, and path analysis, scaling and factor analysis, and the analysis of variance with emphasis on multivariate techniques. **Prerequisite:** Sociology 100 or equivalent with permission of instructor. Three hours. Berkowitz, Danigelis, Finney, McCann, Stedman.

278 THE DEVELOPMENT OF SOCIOLOGICAL THEORY Major classical traditions in sociological theory and their contemporary research relevance. Includes detailed critical examination of the contributions of Marx, Spencer, Durkheim, Weber, Simmel, Pareto, and Mead. **Prerequisites:** Six hours of sociology or equivalent preparation in another social science with permission of instructor. Three hours. Loewen, McCann, Schmidt, Sampson.

279 CONTEMPORARY SOCIOLOGICAL THEORY Critical examination of contemporary functional, conflict, exchange, interactionist, and structural theoretical approaches. A number of other theoretical approaches selected by seminar participants may also be examined. **Prerequisite:** Sociology 278. Three hours. Folta, McCann, Sampson.

281, 282 SEMINAR Presentation and discussion of advanced problems in sociological analysis. **Prerequisites:** Twelve hours of sociology and permission of instructor. Three hours. Staff.

288, 289 SEMINAR: RESEARCH AND METHODS OF TEACHING SOCIOLOGY The development and evaluation of the teaching of sociology. **Prerequisites:** Twelve hours of sociology and permission of department. Open only to graduate students and advanced undergraduate sociology students who serve concurrently as teaching assistants in the department. Three hours. Staff.

295, 296 SPECIAL TOPICS
297, 298 READINGS AND RESEARCH

SPANISH

*Professors Ugalde, Weiger, and Zarate; Associate Professors Wesseling, and Whatley (Chairperson); Assistant Professor Murad.*

No Graduate Program Offered

Opportunities for research exist in Spanish literature of the 16th, 17th, 19th and 20th centuries and in Spanish-American literature of the 20th century.

COURSES OFFERED

The following courses are available for graduate credit. In literature, the two-hundred level courses, open to both undergraduates and graduates, cover the
history of Spanish literature from the Golden Age to the present time, by means of division into centuries and genres. Emphasis is placed on major figures and works, with a view to studying them for their intrinsic value as well as in their historical context. For more detailed information on specific courses, consult with department chairman and the course instructor.

For undergraduate courses see the undergraduate catalogue.

**SPANISH LANGUAGE**

209 ADVANCED GRAMMAR An in-depth study of Spanish grammar, its rules and practices, going beyond conventional good usage into the reasons and theories for same. Three hours. Ugalde.

**SPANISH LITERATURE**

235, 236 GOLDEN AGE The picaresque novel, the drama and poetry of the 16th and 17 centuries, with emphasis on Lope de Vega, Calderon, Quevedo, Tirso de Molina. Three hours each course. Weiger. Alternate years, 1982-83.

245, 246 CERVANTES *Don Quijote*, the *Novelas Ejemplares*, and the theatre of Cervantes. Three hours each course. Weiger. Alternate years, 1981-82.

276 THE REAWAKENING IN THE 20th CENTURY Origins and main aspects of the intellectual conflicts in modern Spain as reflected in the literary works from the “Generation of 1898” to the present. Three hours. Ugalde. Alternate years, 1981-82.

285, 286 SPANISH-AMERICAN LITERATURE OF SOCIAL PROTEST The literature of the Spanish-American peoples as a reflection of and contribution to the social problems of the area, following the various directions of social protest against the Spanish political system, local governments, and imperialism. 286 will stress the contemporary scene. Three hours each course. Zarate. Alternate years, 1982-83.

291 CIVILIZATION OF SPAIN Topical approach to the study of Spanish civilization, with emphasis on ideas, art, literature and music. Three hours. Ugalde. Alternate years, 1982-83.

293 LATIN AMERICAN CIVILIZATION A study of history and culture of Latin American people from the formation of the Indian civilization to the present ideals and problems. Pre-Hispanic civilization, colonization and modern states. Artistic, literary and musical manifestations of these periods will be covered. Three hours. Zarate. Alternate years, 1981-82.

295, 296 ADVANCED SPECIAL TOPICS

297, 298 ADVANCED READINGS
STATISTICS

Steering Committee Members: Professors McCrorey and Sylwester (Director); Associate Professors Ashikaga, Gordon, Haugh, Howell, Newton, and Tashman; Assistant Professor Costanza; Associate Research Professors Aleong, McAuliffe; Adjunct Assistant Professors Dorsey and Whitmore.

The Statistics Program offers statistics and probability courses for the entire University community along with traditional degree programs and individually designed degree programs emphasizing statistics applied to other fields. The degree programs are designed primarily for students who plan careers in business, industry and government or advanced training in disciplines that make extensive use of statistical principles and methods. The Program faculty is deeply involved in consulting and collaborative research in a wide variety of fields, especially in agriculture and in the basic and clinical medical sciences. These research activities along with the research of participating faculty from psychology, natural resources, business administration, etc., offer students unique opportunities to apply their classroom training to “real world” problems. Qualified students with the goal of learning statistics to use in a specialized area of application are especially encouraged to take advantage of these cooperative arrangements.

Program faculty have active statistics research efforts in areas such as time series analysis, survival data analysis, discriminant analysis and experimental design. Students seeking the traditional graduate degree in statistics (along with coursework in mathematics and computer science, if desired) have excellent opportunities to participate in the faculty research.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

A baccalaureate degree. Three semesters of calculus, a course in matrix methods and one semester of statistics. Provisional acceptance can be given prior to the completion of these requirements. Satisfactory scores on the aptitude portion of the Graduate Record Examination are required for some sources of financial aid. Computer experience is highly recommended.

MINIMUM DEGREE REQUIREMENTS

Plan A (Thesis): Twenty-four semester hours of approved graduate credits in statistics, mathematics, and other quantitative methods and (if appropriate) a specialized field of application, and six semester hours of thesis research.

Plan B (Non-thesis): Thirty semester hours of approved credits in statistics, mathematics and other quantitative methods and (if appropriate) a specialized field of application, with no thesis required.

Under both plans students must acquire a graduate level knowledge of the following areas in statistics: six semester hours of introductory methods (211 and 221) and at least six semester hours of probability and statistical theory. Addi-
tional specific courses may be required depending on the student’s background and interest. Other courses are selected with the approval of the student’s advisor, from statistics, mathematics, computer science, and (if appropriate) graduate level courses from the student’s intended area of specialty application (e.g. business administration, engineering, ecology, genetics, psychology). The student is expected to participate in the Seminar series of the Program. Plan A and Plan B require successful completion of a comprehensive examination which includes coverage of theoretical and applied aspects of advanced statistics courses taken by the student. A specialized application may be included as part of the comprehensive exam if appropriate. Under Plan B a student, in lieu of a thesis, must carry out an approved comprehensive data analysis culminating in both an oral and written report to the faculty.

COURSES OFFERED

211 STATISTICAL METHODS I Fundamental ideas and techniques of statistics, with applications, used in experimental design and data analysis; descriptive and inferential statistics, including descriptive and inferential statistics, correlation, regression, and analysis of variance. Prerequisite: Junior standing, college algebra. Three hours.

221 STATISTICAL METHODS II Continuation of 211 concentrating on multiple regression, experimental design, analysis of variance and covariance, and non-parametric methods. Realistic data is used in projects, with calculations performed on UVM computer. Prerequisite: 141 with instructor permission or any one of 211, 241 or 262; Junior standing. Three hours. Aleong.

225 APPLIED REGRESSION ANALYSIS The nature and applications of basic regression-correlation models in investigating relationships, testing hypotheses and making predictions. Emphasis on developing appropriate models and evaluating existing research. Same as BSAD 244. Prerequisite: Any one of 111, 141, 211, 241, or 262. Three hours.

227 STATISTICAL METHODS FOR THE BEHAVIORAL SCIENCES See Psychology 341 for course description.

229 STATISTICAL METHODS FOR THE ENGINEERING SCIENCES Multiple regression and response surface modeling, factorial design of experiments, statistical quality control. Probability distributions used in reliability and life testing. Prerequisite: Any one of 141, 211, 241 or 262. Three hours.

231 EXPERIMENTAL DESIGN Basic experimental designs, complete and incomplete blocking, factorial designs; response surface method, fixed and random effects models. Prerequisite: Any one of 225, 241, or 262 with permission of instructor; or any one of 221, 227, 229 or 313. Three hours. Aleong.

233 SAMPLE SURVEY METHODS Analysis, applications and comparisons of various sampling schemes: simple and stratified random, systematic, and cluster sampling. Prerequisite: Any one of 141, 211, 241, 261 or 313 plus any one of 51, 151 or 251. Three hours. Ashikaga. Alternate years, 1981-82.
235 MULTIVARIATE METHODS Properties and statistical methods, with applications, for the multivariate normal distribution including discriminant and factor analysis. **Prerequisites:** 241 or 261 plus any one of 221, 225, 227, 229, or 313. Three hours. Ashikaga. Alternate years, 1982-83.

237 NONPARAMETRIC METHODS Nonparametric procedures for hypothesis tests and confidence intervals, including rank and chi-square tests. **Prerequisite:** Any one of 141, 211, 241, or 261. Three hours. Alternate years, 1981-82.

241 INTRODUCTION TO STATISTICAL INFERENCE Introduction to statistical theory: parameter estimation, hypothesis testing, chi-square tests, regression analysis, and analysis of variance. **Prerequisites:** 151 or 251 or 12 hours of calculus and 3 hours of calculus-based probability. Three hours.

251 PROBABILITY THEORY Non-measure theoretic course in probability, meeting for just 11 weeks of fall semester. Derivation of classical distributions, laws of large numbers and central limit theorems. **Prerequisite:** MATH 121. STAT 151 recommended. Three hours. Sylwester.

252a, b, c STOCHASTIC PROCESSES AND TIME SERIES Three one-credit mini-courses: 252a, Discrete processes: Random walks, Markov chains and discrete branching processes. **Prerequisite:** 151 or 251. 252b Continuous Processes: Poisson, birth and death, and queueing processes. **Prerequisite:** 151 or 251. 252c, Time Series Analysis: Autoregressive-moving average models, auto and partial correlation functions, computer modeling. **Prerequisite:** Any one of 141, 211, 225, 241, or 262.

261, 262 STATISTICAL THEORY I,II Methods of point and interval estimation, hypothesis testing, and decision theory. Application of general principles to specific areas such as non-parametric tests, sequential analysis, and linear models. **Prerequisite:** For 261: 151 with instructor permission or 241 or 251. For 262: 241 with instructor permission or 261. Credits: 261: one hour, meeting last 4 weeks of Fall semester. 262: four hours. Sylwester.

281 STATISTICS PRACTICUM Intensive experience in carrying out a complete statistical analysis for a research project in a substantive area with close consultation with the project investigator. 1-4 credit hours. **Prerequisites:** One year of statistics and elementary computer programming.

295 SPECIAL TOPICS For advanced students. Lectures, reports and directed readings on advanced topics. **Prerequisite:** As listed in course schedule. 1-4 credit hours as arranged.

313 BIOMETRICS See Physiology 308 for course description.

391 MASTER'S THESIS RESEARCH Credit as arranged.
VOCATIONAL EDUCATION AND TECHNOLOGY

Professor Fuller (Chairperson); Associate Professors Albright, Bloom, Ferreira, Harris, Kelly and Shimel; Assistant Professor Hasazi; Extension Associate Professors Moore, Patterson and Wells; Lecturers Mohler and Zimmerman.

The department offers two areas of concentration:

(a) Occupational and Practical Arts Education — which leads to either an M.A.T. or an M.Ed. degree, and

(b) Extension Education — which leads to a Master of Extension Education degree

Individuals seeking a maximum amount of flexibility in a program based upon both undergraduate and graduate courses are encouraged to consider the Fifth Year Certificate in Education. (See page 11 of this bulletin.)

OCCUPATIONAL AND PRACTICAL ARTS EDUCATION

The Master of Arts in Teaching Degree Program

The goal of this program is to strengthen an individual’s background in a teaching field. The specialized areas of interest include agriculture and natural resource education, home economics education, industrial arts, industrial education and vocational-special needs education.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS IN TEACHING

An undergraduate degree in an appropriate field of specialization. Completion of the necessary courses to meet the minimum requirements for a teaching certificate. Acceptable scores on the aptitude portion of the Graduate Record Examination.

Candidates who do not qualify for a teaching certificate, but have satisfactory teaching field preparation and Graduate Record Examination scores may be admitted. A professional field experience will need to be completed in addition to the minimum degree requirements.

MINIMUM DEGREE REQUIREMENTS

See pages 23 and 24 for regulations of the Graduate College.

The Department expects a candidate to complete at least eighteen semester hours in professional education in his or her combined undergraduate and graduate programs, which includes preparation in the areas of Foundations of Education, methods for teaching, and learning and human development. Usually not more than six hours of independent study are allowed. A candidate is expected to complete at least one semester or two summers in residence on the University of Vermont campus in Burlington. Inquiries should be directed to Professor Gerald R. Fuller.

The Master of Education Degree Program

The goal of this program is to prepare the individual for professional leadership in occupational and practical arts education. Programs are planned jointly with the College of Education and Social Services in guidance and counseling, oc-
cupational education for the mentally retarded, or to meet individual goals as they relate to occupational and practical arts education.

The department expects each candidate to include study in one or more of the following areas as they relate to occupational and practical arts education: improvement of instruction, principles and problems involved in curriculum development, planning and managing educational programs, and/or research.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF EDUCATION

An undergraduate degree in an appropriate area. Eighteen hours of education courses or appropriate certification. Acceptable scores on the aptitude portion of the Graduate Record Examination.

MINIMUM DEGREE REQUIREMENTS

See pages 23 and 25 for regulations of the Graduate College.

A candidate is expected to complete at least one semester or two summer sessions in residence on the University of Vermont campus in Burlington. Additional information on this degree program may be found on pages 23 and 25 of this bulletin. Inquiries should be directed to Professor Gerald R. Fuller, College of Agriculture.

EXTENSION EDUCATION

The goal of this program is to improve the knowledge and competencies of the student in a career field coupled with preparation for educational leadership functions. Programs of study may be designed for educational responsibilities in one of the following specializations in the non-school based setting: agricultural or related agencies and organizations, business and industry, and youth programs and organizations.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF EXTENSION EDUCATION

An undergraduate degree with an acceptable major area of specialization. An acceptable score on the Miller Analogies Test. One year of satisfactory professional experience. A person may be admitted who does not have one year of appropriate professional experience, but it will be necessary to complete a field experience in addition to the minimum degree requirements.

MINIMUM DEGREE REQUIREMENTS

See page 27 for regulations of the Graduate College. A candidate is expected to complete at least six semester hours in the Vocational Education and Technology Department. Usually courses in political science, sociology, and/or research will be taken. Not more than six hours of independent study are allowed in a candidate’s program. A candidate is expected to complete at least one semester or two summers in residence on the University of Vermont campus, Burlington, Vermont. Inquiries should be directed to Professor Gerald R. Fuller.
COURSES OFFERED

270 EDUCATING STUDENTS WITH SPECIAL NEEDS IN VOCATIONAL EDUCATION (3-0) Examines legal, social & economic forces affecting vocational programming for special needs students (handicapped & disadvantaged) various programs, resources & procedures for educating special learners in vocational education are presented. Prerequisite: Admission to an approved teacher certification program or permission of instructor. Three hours. Albright.

271 WORKSHOP IN TEACHING STUDENTS WITH SPECIAL NEEDS IN VOCATIONAL SETTINGS Intensive preparation in selecting contemporary instructional strategies & materials and in adapting and using equipment in regular and special vocational education programs. Prerequisites: Completion of 12 credits in Vocational or Special Education at the 100 or 200 level or permission. Offered during summer sessions. Variable credit; one to three hours; may enroll more than once for total of six credits. Albright, Fuller.

275 DEVELOPING VOCATIONAL INSTRUCTION FOR STUDENTS WITH SPECIAL NEEDS (3-0) Focus on the development of instructional strategies for including handicapped students in vocational education. Procedures for developing, implementing and evaluating individualized vocational plans are presented. Prerequisites: Admission to an approved teacher certification program or permission of instructor. Three hours. Albright, Hasazi.

283 TEACHING ADULTS Problems related to organizing and planning adult education programs for schools, community organizations, government agencies or business. Techniques for teaching adults will be analyzed. Prerequisites: Senior standing, 82 or 52 and 182, or permission of instructor. Three hours. Kelly.

292 SEMINAR Reports, discussions and investigations in selected fields. Prerequisites: Students may enroll more than once for total of six hours. Six hours 100 level and permission of instructor. One to three hours. I, II.

295 SPECIAL TOPICS Lectures, laboratories and/or readings and reports, relating to a contemporary area of study. A student may enroll more than one time and accumulate up to nine hours. Prerequisite: Six hours 100 level and Departmental permission. Credit as arranged. I, II. Staff

377 PRACTICUM IN VOCATIONAL AND EXTENSION EDUCATION Advanced supervised practicum designed to provide students with direct involvement in vocational or extension education settings. Individually planned to apply course related learning in an applied setting. Prerequisites: Completion of at least 6 hours in appropriate 200 level VOTC courses or permission of instructor. Variable credit; one of three hours. Summer I, II.

ADDITIONAL GRADUATE COURSE

The following course is offered by the Vocational Education and Technology Department upon request, usually in the Summer Session and in the Evening Division.
251 METHODS FOR TEACHING OCCUPATIONALLY ORIENTED SUBJECTS  Three hours.

ZOOLOGY

Professors Bell, Glade, Happ (Chairperson), Heinrich, Henson, and Potash; Associate Professors Davison, Kilpatrick, Landesman and Stevens; Assistant Professors Herbers, Pennypacker, Schall, and VanHouten; Research Assistant Professor Wilson.

Faculty research interests fall into two broad groupings, Developmental Biology/Cellular Biology/Physiology and Ecology/Evolution/Natural History. Current ongoing research projects include: taxonomy and natural history of insects, particularly Rhysodid beetles; aquatic ecology, wetlands ecology, limnology, running water systems; parasite-host ecology, population and community ecology of lizards; evolution of insect societies, behavioral ecology; population genetics and molecular systematics; regulation of reproduction in freshwater invertebrates; physiological energetics of insects; establishment of amphibian axiation and limb regeneration; mechanisms of growth control in amphibians; cell and matrix interactions in development; developmental genetics of juvenile hormone and oogenesis in *Drosophila*; cell biology of insect development; insect reproductive biology; genetics of chemoreception and chemotactic behavior of protozoa; electrophysiologica basis of swimming behavior; cellular basis of immunological response.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

An undergraduate major in zoology or its equivalent. Satisfactory scores on the Graduate Record Examination. Acceptability to the faculty member with whom the candidate wishes to do thesis research. Satisfactory completion of a qualifying examination.

MINIMUM DEGREE REQUIREMENTS

Zoology Graduate Colloquia, 4 hours; 11-18 additional hours in zoology and related fields; thesis research (8-15 hours). Each candidate must participate in the teaching of at least one undergraduate course.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS IN TEACHING

The department offers a program leading to the degree of Master of Arts in Teaching: see page 24. Satisfactory scores on the Graduate Record Examination are prerequisites for acceptance to candidacy for this degree.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE FOR TEACHERS (BIOLOGY)

A bachelor's degree from an accredited institution and certification as a teacher
of biology or an associated field. At least three years of secondary school teaching. Satisfactory scores on the Graduate Record Examinations.

MINIMUM DEGREE REQUIREMENTS
Thirty hours of course work to include a selection of courses in the Departments of Botany and Zoology which will broaden and balance the undergraduate work in biology. At least two 200 level courses in each department. Courses in four of the five following areas: anatomy, morphology and systematics; genetics; developmental biology; and environmental biology. Up to 12 hours of 100 level courses may be used for the above requirements where approved by the advisor and the Dean. Appropriate courses in related science departments may be used to complete the required thirty hours. No thesis is required; however, each degree recipient must complete a written and oral examination.

PREREQUISITES FOR ACCEPTANCE TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
Satisfactory completion of: a year of mathematics and one of physics (college courses of appropriate level for students majoring in science); organic chemistry; at least one year of zoology; the Graduate Record Examination; the qualifying examination; a reading knowledge of two appropriate foreign languages, or one foreign language and an adjunct area of special competency as determined by the studies committee; at least one but not more than two academic years of graduate study at the University of Vermont; and acceptability to the faculty member with whom the candidate wishes to do dissertation research. Students whose programs are to include physical chemistry should have had, or should take, mathematics through Mathematics 121 or its equivalent.

MINIMUM DEGREE REQUIREMENTS
Of the 75 credit hours required for the degree, at least 40 hours must be earned in courses suitable for graduate credit and must include 6 hours of Graduate Colloquia. The selection of courses will be designated for each student by his Studies Committee. Of these courses a minimum of 13 credits must be in courses other than zoology. At least 20, but not more than 40, credits must be earned in dissertation research. Each candidate must participate in the teaching of at least one undergraduate course.

COURSES OFFERED
201 CONTROL OF GROWTH AND DIFFERENTIATION Three hours. Prerequisites: Biology 101 and Chemistry 141, 142. Davison.

202 QUANTITATIVE BIOLOGY Mathematical concepts applied to biological problems such as growth, metabolism, temperature effects, kinetics, and graphic interpretation of data. Statistics will not be treated. Prerequisite: An intermediate level course in biology, Mathematics 9, or permission of instructor. Three hours. Davison.

203 POPULATION ECOLOGY (Biology 203) Analysis of growth, regula-
tion, and interrelations of biological populations in theoretical, laboratory, and natural systems. Prerequisite: Biology 102. Three hours. Herbers. Alternate years, 1981-82.

204 BIOLOGICAL ASPECTS OF WATER QUALITY MANAGEMENT For students who are developing careers in any of the various aspects of water resources. The biological viewpoints of lakes and streams; methodology and interpretation in the field and laboratory. Credit will not be given for both Zoology 236 and this course. Prerequisite: Upperclass or graduate standing, a year of chemistry, two advanced courses in a related area, and permission of the instructor. Four hours. Henson.

208 GENERAL ENTOMOLOGY Morphology, physiology, and evolution of insects. Prerequisite: 104 or Biology 102. Four hours. Bell. Alternate years, 1982-83.

209 FIELD ZOOLOGY Collection and identification; study of local habitats, their nature, and adaptations to them; factors governing distribution; methods of preparing study specimens. Prerequisite: 104 or Biology 102. Four hours. Bell.

211 EMBRYOLOGY Principles exemplified by typical invertebrate and vertebrate embryos. Prerequisite: 104. Four hours. Glade.

212 COMPARATIVE HISTOLOGY Anatomy of tissues, chiefly vertebrate. Tissue similarities and specializations of organs among the various groups of animals in relation to function. Prerequisite: 104. Four hours. Glade.

216 HUMAN GENETICS Inheritance; population genetics; interaction of heredity and environment; application to human problems. Prerequisite: Biology 101. Three hours. Kilpatrick.

217 MAMMALOGY Classification, identification, morphology, evolution, behavior, and distribution. Prerequisite: Biology 102. Four hours. Alternate years, 1981-82.

219 COMPARATIVE AND FUNCTIONAL VERTEBRATE ANATOMY Structure, function, and phylogeny; evolutionary and functional trends; investigation of the structure of all chordate groups. Prerequisite: 104. Four hours. Kilpatrick. Alternate years, 1981-82.

222 EXPERIMENTAL EMBRYOLOGY Theoretical approach based on research in embryology, genetics, physiology, bacteriology, and related fields. Prerequisites: 211 and permission of instructor. Four hours. Glade. Alternate years, 1982-83.

223 BIOCHEMICAL EMBRYOLOGY Biochemical and structural differentiation of cells and tissues during oogenesis and embryogenesis. Prerequisites: Biology 101, 211; a course in biochemistry is recommended. Three hours. Landesman. Alternate years, 1981-82.

225 ENVIRONMENTAL PHYSIOLOGY Processes by which animals cope with moderate, changing, and extreme environments. Prerequisites: Biology 102 and 104. Four hours. Heinrich.

231 CELL PHYSIOLOGY Experimental techniques used to elucidate chemi-
cal and physical mechanisms within living cells. **Prerequisites:** Biology 103; Chemistry 141, 142 and permission of instructor. Four hours. Pennypacker. Alternate years, 1981-82.

236 **LIMNOLOGY** The ecology of standing waters; the biota of lakes as related to the geological, physical, and chemical conditions of lakes. **Prerequisite:** Biology 102, chemistry. Four hours. Henson. Not offered 1981-82.

237 **ECOLOGY OF RUNNING WATERS** Stream and river environments, adaptations of organisms to varying physical, chemical, and biotic conditions. **Prerequisites:** Biology 102, chemistry. Four hours. Potash. Not offered 1981-82.

250 **INVERTEBRATE ZOOLOGY** Anatomy, physiology, and life histories of representatives of the more important phyla. Four hours. Henson. Not offered 1981-82.

251 **INSECT STRUCTURE AND FUNCTION** Anatomy and physiology with emphasis upon growth, reproduction, and sensory physiology. **Prerequisite:** 104 or permission of the instructor. Four hours. Happ.

255 **COMPARATIVE ANIMAL PHYSIOLOGY** General principles of function in invertebrates and vertebrates. **Prerequisites:** 104; Chemistry 141, 142; and permission of instructor. Four hours. Davison.

262 **BIOLOGICAL BASIS OF BEHAVIOR** The structure and function of neural and hormonal mechanisms involved in animal behavior with emphasis on phylogeny. **Prerequisite:** Biology 103 or permission of instructor. Three hours. Stevens. Alternate years, 1982-83.

270 **MODERN EVOLUTIONARY THEORY** Contributions of modern research in genetics, systematics, distribution, experimental embryology, serology, and related fields to problems of evolutionary change. **Prerequisite:** Biology 101 (102 recommended). Three hours. Kilpatrick. Alternate years, 1982-83.

271 **ADVANCED LIMNOLOGY** Analysis of current concepts and problems. **Prerequisite:** 236. Four hours. Henson. Not offered 1981-82.

281 **SEMINAR** Review and discussion of current zoological research. Graduate students and seniors in zoological research programs may enroll. Without credit.

295 **SPECIAL TOPICS**

371 **GRADUATE COLLOQUIA** Topics of current faculty and graduate student interest presented in a seminar-discussion format. Specific titles for colloquia will be listed in the course schedule. One hour.

381 **SPECIAL TOPICS** Readings with conferences, small seminar groups, or laboratories intended to contribute to the programs of graduate students in phases of zoology for which formal courses are not available. **Prerequisite:** An undergraduate major in zoology. Credit as arranged.

391 **MASTER'S THESIS RESEARCH** Credit as arranged.

491 **DOCTORAL DISSERTATION RESEARCH** Credit as arranged.

Professor of Animal Sciences

KAREN S. EDWARDS  
M.S. (Pennsylvania State), Ph.D. (Michigan State)  
Assistant Professor of Human Development

MARGARET F. EDWARDS  
M.A., Ph.D. (Stanford)  
Associate Professor of English

YIGAL H. EHRLICH  
M.Sc. (Tel-Aviv Univ.), Ph.D. (Weizmann Institute/Israel)  
Associate Professor of Biochemistry

CLINTON A. ERB  
M.S. (Syracuse), Ph.D. (Ohio State)  
Associate Professor of Professional Education and Curriculum Development

PAUL ANDERSON ESCHHOLZ  
M.A. (Vermont), Ph.D. (Minnesota)  
Professor of English

BUD ETHERTON  
Ph.D. (Washington State)  
Professor of Botany
JEREMY POLLARD FELT
M.A. (Duke), Ph.D. (Syracuse)  Professor of History

DOROTHY J. FIKE
M.S. (Cleveland State)  Assistant Professor of Medical Technology

HENRY C. FINNEY
M.A. (Michigan), Ph.D. (California)  Associate Professor of Sociology

INA FITZHENRY-COOR
M.A., Ph.D. (Washington)  Visiting Assistant Professor of Psychology and Psychiatry

PAULA FIVES-TAYLOR
M.S. (Villanova), Ph.D. (Vermont)  Associate Professor of Medical Microbiology

TED BENJAMIN FLANAGAN
Ph.D. (Washington)  Professor of Chemistry

JEANNETTE R. FOLTA
Ph.D. (Washington)  Professor of Sociology

DONALD GABRIAL FORGAYS
M.A., Ph.D. (McGill)  Professor of Psychology

DONALD CUSHING FOSS
M.S. (Wisconsin), Ph.D. (Massachusetts)  Professor of Animal Sciences

WAYNE LENIS FOX
Ph.D. (Arizona)  Professor of Special Education, Social Work, and Social Services

STEVEN LESLIE FREEDMAN
Ph.D. (Rutgers)  Associate Professor of Anatomy and Neurobiology

DANIEL WAYNE GADE
M.S., Ph.D. (Wisconsin)  Professor of Geography

JOSEPH HERBERT GANS
V.M.D. (Pennsylvania), Ph.D. (Jefferson Medical)  Professor of Pharmacology

JAMES FRANCIS GATTI
M.A., Ph.D. (Cornell)  Associate Professor of Business Administration

WILLIAM E. GEIGER, JR.
Ph.D. (Cornell)  Associate Professor of Chemistry

WALTER RAY GIBBONS
Ph.D. (Washington)  Professor of Physiology and Biophysics

ALPHONSE HENRY GILBERT
M.S. (Michigan), Ph.D. (Colorado)  Associate Professor of Resource Economics

BRADY BLACKFORD GILLELAND
M.A. (Oklahoma), Ph.D. (North Carolina)  Professor of Classical Languages

RICHARD WILLIAM GLADE
M.S., Ph.D. (Illinois)  Professor of Zoology

ROBERT JOHN GOBIN
M.Ed. (Bowling Green), Ph.D. (Ohio State)  Professor of Physical Education

DALE ERIC GOLDBHABER
M.A., Ph.D. (Syracuse)  Assistant Professor of Human Development

LAWRENCE RUSSELL GORDON
M.A., Ph.D. (North Carolina)  Associate Professor of Psychology

ALAN A. GOTLIEB
M.S., Ph.D. (Wisconsin)  Extension Associate Professor of Botany

ARMIN E. GRAMS
M.A. (DePaul), Ph.D. (Northwestern)  Professor of Human Development

ROBERT S. GRIFFIN
Ph.D. (Minnesota)  Associate Professor of Professional Education and Curriculum Development
D. JACQUE GRINNELL
M.B.A. (Cornell), D.B.A. (Indiana)
Professor of Business Administration

BARRY E. GUITAR
M.A. (Western Michigan), Ph.D. (Wisconsin)
Associate Professor of Communication Science and Disorders

DIETER W. GUMP
M.D. (John Hopkins)
Associate Professor of Medicine

STANLEY T. GUTMAN
M.A., Ph.D. (Duke)
Associate Professor of English

ROBERT WILLIAM HALL
M.A., Ph.D. (Harvard)
Professor of Philosophy and Religion

WILLIAM HALPERN
M.S. (Stanford), Ph.D. (Vermont)
Associate Professor of Physiology and Biophysics

SAMUEL B. HAND
Ph.D. (Syracuse)
Professor of History

MORRIS HANDELSMAN
M.E.E. (Ohio), Ph.D. (Syracuse)
Professor of Electrical Engineering

EDWARD MICHAEL HANLEY
M.A. (Arizona), Ph.D. (Kansas)
Professor of Special Education, Social Work, and Social Services

PETER ROBERT HANNAH
M.F. (Yale), Ph.D. (Michigan)
Associate Professor of Philosophy

CHAD D. HANSEN
Ph.D. (Michigan)
Professor of Zoology

GEORGE M. HAPP
Ph.D. (Cornell)
Associate Professor of Biochemistry

BETH A. HART
M.S., Ph.D. (Cornell)
Associate Professor of Psychology

JOSEPH E. HASAZI
M.S., Ph.D. (Miami)
Associate Professor of Forestry

SUSAN E. HASAZI
M.Ed. (Vermont), Ed.D. (Boston)
Associate Professor of Special Education, Social Work, and Social Services

LARRY D. HAUGH
M.A., M.S., Ph.D. (Wisconsin)
Associate Professor of Mathematics

WILLIAM A. HAVILAND
M.A., Ph.D. (Pennsylvania)
Professor of Anthropology

BERND HEINRICH
M.S. (Maine); Ph.D. (California)
Associate Professor of Civil Engineering

DAVID R. HEMENWAY
M.S., Ph.D. (North Carolina)
Associate Professor of Physiology and Biophysics

EDITH D. HENDLEY
M.S. (Ohio State), Ph.D. (Illinois)
Assistant Professor of Zoology

JOAN MARIE HERBERS
M.S., Ph.D. (Northwestern)
Associate Professor of Wildlife and Fisheries Biology

DAVID HAMMOND HIRTH
M.S. (Massachusetts), Ph.D. (Michigan)
Assistant Professor of Professional Education and Curriculum Development

DAVID R. HOLMES
M.A. (Columbia), Ph.D. (Denver)
Professor of English

JAMES ROBINSON HOWE
M.A., Ph.D. (N.Y.U.)
Associate Professor of Psychology

DAVID CHARLES HOWELL
M.S., Ph.D. (Tulane)
MAHENDRA SINGH HUNDAL  
M.S., Ph.D. (Wisconsin)  
Professor of Mechanical Engineering

ALLEN STANDISH HUNT  
M.S. (Michigan), Ph.D. (Harvard)  
Professor of Geology

LYMAN CURTIS HUNT, JR.  
M.A., Ed.D. (Syracuse)  
Professor of Professional Education and Curriculum Development

PATRICK H. HUTTON  
M.A., Ph.D. (Wisconsin)  
Associate Professor of History

BEAL BAKER HYDE  
A.M., Ph.D. (Harvard)  
Professor of Botany

JOSEPH ANTHONY IZZO, JR.  
M.S. (Illinois), Ph.D. (Columbia)  
Professor of Mathematics

JULIAN JOSEPH JAFFE  
M.A., Ph.D. (Harvard)  
Professor of Pharmacology

JUSTIN MANFRED JOFFE  
M.A. (U. of Witwatersrand), Ph.D. (U. of London)  
Professor of Psychology

DONALD BOYES JOHNSTONE  
M.S., Ph.D. (Rutgers)  
Professor of Microbiology and Biochemistry and Medical Microbiology

LEONIDAS MONROE JONES  
A.M., Ph.D. (Harvard)  
Professor of English

BRUCE SHEPARD KAPP  
M.S., Ph.D. (New York U.)  
Associate Professor of Psychology

MARC Z. KESSLER  
Ph.D. (Nebraska)  
Associate Professor of Psychology

C. WILLIAM KILPATRICK  
M.S. (Midwestern U.), Ph.D. (North Texas State U.)  
Associate Professor of Zoology

PATRICIA WILLIAMS KITCHER  
Ph.D. (Princeton)  
Associate Professor of Philosophy

PHILIP KITCHER  
Ph.D. (Princeton)  
Associate Professor of Philosophy

RICHARD M. KLEIN  
M.S., Ph.D. (Chicago)  
Professor of Botany

MARTHA FITZGERALD KNIGHT  
M.Ed. (Vermont), Ed.D. (Boston)  
Associate Professor of Special Education, Social Work and Social Services

ANDREW PAUL KRAPCHO  
M.A., Ph.D. (Harvard)  
Associate Professor of Anatomy and Neurobiology

RICHARD M. KRIEBEL  
Ph.D. (Temple)  
Professor of Physics

JOHN ERNEST KRIZAN  
M.S., Ph.D. (Lehigh)  
Associate Professor of Anatomy and Neurobiology

PATRICIA P. KRUPP  
Ph.D. (Hahnemann)  
Professor of Chemistry

MARTIN ERIC KUEHNE  
M.A. (Harvard), Ph.D. (Columbia)  
Associate Professor of Wildlife and Fisheries Biology

GEORGE W. LaBAR  
M.S. (Idaho), Ph.D. (Montana)  
Professor of Business Administration

GENE EARL LABER  
Ph.D. (Maryland)  
Associate Professor of Medical Technology

RENE CHARLES LACHAPELLE  
M.D., Ph.D. (Syracuse)
DAVID CHIN LAI
D. Eng. (Johns Hopkins)  
Professor of Electrical Engineering

LLOYD MILTON LAMBERT, JR.
M.S.E.E., M.A., Ph.D. (California)  
Professor of Physics

MERTON PHILIP LAMDEN
Ph.D. (M.I.T.)  
Professor of Biochemistry

RICHARD H. LANDESMAN
M.S. (N.Y.U.), Ph.D. (British Columbia)  
Associate Professor of Zoology

HELENE WANDA LANG
M.Ed., Ed.D. (Boston U.)  
Associate Professor of Professional Education and Curriculum Development

ROBERT LOWELL LARSON
M.Ed. (Bridgewater), Ed.D. (Boston)  
Associate Professor of Organizational, Counseling, and Foundational Studies

ROBERT BERNARD LAWSON
M.A., Ph.D. (Delaware)  
Professor of Psychology

WILLEM R. LEENSTRA
Ph.D. (Washington)  
Associate Professor of Chemistry

HERBERT LEROY LEFF
Ph.D. (Harvard)  
Associate Professor of Psychology

HAROLD LEITENBERG
Ph.D. (Indiana)  
Professor of Psychology

ROBERT HOWARD LENOX
M.D. (Vermont)  
Associate Professor of Psychiatry

CHARLES A. LETTERI
M.S. (St. John's), Ed.D. (Syracuse)  
Associate Professor of Physical Education, Health, and Learning Studies

GORDON FIELDING LEWIS
M.A., Ph.D. (Kentucky)  
Professor of Sociology

WILLIAM J. LEWIS
M.A. (Northwestern), Ph.D. (Florida)  
Professor of Communication

CHESTER H. LIEBS
M.S. (Columbia)  
Associate Professor of History

AULIS LIND
M.A. (S. Illinois), Ph.D. (Wisconsin)  
Associate Professor of Geography

JOHN J. LINDSAY
M.S. (Massachusetts), Ph.D. (Utah State)  
Associate Professor of Forestry

WILLIAM C. LIPKE
M.A. (Wayne State), Ph.D. (Wisconsin)  
Associate Professor of Art

BRIAN W. LITTLE
Ph.D., M.D. (Vermont)  
Professor of Pathology

LITTLETON LONG
M.A., Ph.D. (Yale)  
Professor of English

ROBERT B. LOW
Ph.D. (Chicago)  
Professor of Physiology and Biophysics

JOHN HAMILTON MABRY
M.A., Ph.D. (Iowa)  
Professor of Sociology

GEORGE B. MacCOLLON
Ph.D. (Cornell)  
Professor of Plant and Soil Science

FREDERICK R. MAGDOFF
M.S., Ph.D. (Cornell)  
Associate Professor of Plant and Soil Science

GREGORY S. MAHLER
A.M., Ph.D. (Duke)  
Assistant Professor in Political Science
FRANK MANCHEL  
M.A. (Hunter), Ed.D. (Columbia)  
Professor of Communication

WILLIAM MANN  
A.M. (Stanford), Ph.D. (Minnesota)  
Professor of Philosophy

ROBERT E. MANNING  
M.S., Ph.D. (Michigan State)  
Assistant Professor of Recreation Management

JOHN JOSEPH McCORMACK, JR.  
Ph.D. (Yale)  
Professor of Pharmacology

H. LAWRENCE McCROREY  
M.S. (Illinois), M.S. (Michigan), Ph.D. (Illinois)  
Professor of Physiology and Biophysics

HUGH STRATTON McKenzie  
Ph.D. (Arizona)  
Professor of Special Education, Social Work, and Social Services

RICHARD WARREN McLAY  
M.S., Ph.D. (Wisconsin)  
Professor of Mechanical Engineering

HAROLD AUSTIN MEEKS  
M.A., Ph.D. (Minnesota)  
Associate Professor of Geography

BRUCE ELWYN MESERVE  
M.A., Ph.D. (Duke)  
Professor of Mathematics

WILLIAM LAROS MEYER  
Ph.D. (U. of Washington)  
Professor of Biochemistry

HERMAN W. MEYERS, JR.  
M.A., Ph.D. (Connecticut)  
Associate Professor of Organizational, Counseling, and Foundational Studies

WOLFGANG MIEDER  
M.A. (Michigan), Ph.D. (Michigan State)  
Professor of German

EDWARD JERVIS MILES  
M.A., Ph.D. (Syracuse)  
Professor of Geography

CAROL T. MILLER  
M.S., Ph.D. (Purdue)  
Visiting Assistant Professor of Psychology

DOUGLAS L. MILLER  
M.S. (Ohio State); Ph.D. (Vermont)  
Research Assistant Professor of Physics

GAGAN MIRCHANDANI  
M.S. (Syracuse), Ph.D. (Cornell)  
Professor of Electrical Engineering

WILLIAM E. MITCHELL  
M.A., Ph.D. (Columbia)  
Professor of Anthropology

THOMAS JOHN MOEHRING  
M.S., Ph.D. (Rutgers)  
Professor of Medical Microbiology

MARIA FRANCA MORSHELLI  
Ph.D. (Milano)  
Research Associate Professor of Botany

BROOKE T. MOSSMAN  
M.S., Ph.D. (Vermont)  
Research Assistant Professor of Pathology

WILLIAM M. MURPHY  
M.S., Ph.D. (Wisconsin)  
Associate Professor of Plant and Soil Science

RICHARD E. MUSTY  
M.A., Ph.D. (McGill)  
Professor of Psychology

GARRISON NELSON  
M.A., Ph.D. (Iowa)  
Associate Professor of Political Science

ANN NEVIN  
M.Ed. (Vermont); Ph.D. (Minnesota)  
Associate Professor of Special Education, Social Work, and Social Services

ROBERT A. NEWMAN  
M.S., Ph.D. (Connecticut)  
Assistant Professor of Pharmacology
CARLTON M. NEWTON  
Ph.D. (SUNY at Syracuse)  
Associate Professor of Forestry

KAY MILLIGAN NILSON  
M.S. (Utah), Ph.D. (Nebraska)  
Professor of Animal Sciences

PIETRO S. NIVOLA  
Ph.D. (Harvard)  
Assistant Professor of Political Science

HOWARD L. NIXON II  
Ph.D. (Pittsburgh)  
Associate Professor in Sociology

CHARLES PRYOR NOVOTNY  
Ph.D. (Pittsburgh)  
Associate Professor of Medical Microbiology

WESLEY LEMARS NYBORG  
M.S., Ph.D. (Pennsylvania State)  
Professor of Physics

JANICE L. O'DONNELL  
M.A., Ph.D. (Colorado)  
Assistant Professor in Organizational, Counseling and Foundational Studies

JAMES PAUL OLSON  
M.S. (Tufts), Ph.D. (North Carolina)  
Associate Professor of Civil Engineering

JOSEPH CLARENCE OPPENLANDER  
M.S.C.E. (Purdue)  
Professor of Civil Engineering

Ralph Harry Orth  
Ph.D. (Rochester)  
Professor of English

James Harris Overfield  
M.A. (Chicago), Ph.D. (Princeton)  
Associate Professor of History

William Edward Paden  
M.A., Ph.D. (Claremont)  
Associate Professor of Religion

Susan D. Page  
M.S. (Ohio State)  
Assistant Professor of Medical Technology

Phyllis Paolucci-Whitcomb  
M.Ed. (Vermont), Ed.D. (Boston)  
Assistant Professor in Special Education, Social Work, and Social Services

E. Lauck Parke  
M.B.A. (Pennsylvania State), Ph.D. (Massachusetts)  
Assistant Professor of Business Administration

Bruce L. Parker  
M.S., Ph.D. (Cornell)  
Associate Professor of Plant and Soil Science

Rodney Lawrence Parsons  
Ph.D. (Stanford)  
Professor or Anatomy and Neurobiology

Norman Eugene Pellett  
M.S., Ph.D. (Minnesota)  
Associate Professor of Plant and Soil Science

Neil H. Pelsue, Jr.  
M.S. (Massachusetts), Ph.D. (Purdue)  
Associate Professor of Agricultural and Resource Economics

Dennis Dale Pence  
M.S., Ph.D. (Purdue)  
Assistant Professor of Mathematics

John P. Pennypacker  
Ph.D. (Connecticut)  
Assistant Professor of Zoology

Daniel Peter Perl  
M.D. (SUNY)  
Associate Professor of Pathology

James Allan Peterson  
M.Ed. (South Dakota State), Ed.D. (Boston U.)  
Professor of Organizational, Counseling, and Foundational Studies

Mary McNeil Pierce  
M.Ed. (Vermont), Ed.D. (Boston)  
Assistant Professor of Professional Education and Curriculum Development

Sidney Boris Pogor  
M.A., Ph.D. (Columbia)  
Professor of English

Zander Ponzo  
M.S. (Illinois), Ph.D. (Wisconsin)  
Assistant Professor of Organizational, Counseling, and Foundational Studies
MILTON POTASH
M.A. (Indiana), Ph.D. (Cornell)  Professor of Zoology

MARJORY W. POWER
Ph.D. (Indiana)  Associate Professor of Anthropology

DAVID WILLIAM RACUSEN
Ph.D. (Iowa State)  Professor of Microbiology and Biochemistry

JOANNA MARIE RANKIN
M.S. (Tulane), Ph.D. (Iowa)  Associate Professor of Physics

THOMAS LAWRENCE READ
M.M. (N.E. Conservatory), D.M.A. (Peabody Conservatory)  Professor of Music

GEORGEY P. REDMOND
M.A. (Virginia), M.D. (Columbia)  Assistant Professor of Pharmacology

JOHN PATRICK MARTINDALE REED
M.S. (Vermont)  Assistant Professor of Medical Technology

JOE ERNEST REICHEL
M.A. (Kansas State), Ph.D. (Wisconsin)  Visiting Assistant Professor of Special Education, Social Work, and Social Services

ERNEST REIT
D.V.M. (Cornell), Ph.D. (Yale)  Associate Professor of Pharmacology

S. ALEXANDER RIPPA
M.A. (Vanderbilt), Ed.D. (Harvard)  Professor of Organizational, Counseling, and Foundational Studies

ALTON O. ROBERTS
M.S. (Syracuse & Canisius), Ph.D. (Syracuse)  Assistant Professor of Professional Education and Curriculum Development

BARBARA SAYLOR RODGERS
M.A., Ph.D. (California)  Assistant Professor of Classics

JON ERIK ROLF
Ph.D. (Minnesota)  Associate Professor of Psychology

ALFRED F. ROSA
M.A., Ph.D. (Massachusetts)  Professor of English

JAMES CARL ROSEN
Ph.D. (California)  Assistant Professor of Psychology

JANE K. ROSS
M.S. (Purdue), Ph.D. (Oregon State)  Assistant Professor of Human Nutrition and Foods

WILFRED ROTH
Ph.D. (M.I.T.)  Professor of Electrical Engineering

KENNETH S. ROTHWELL
M.A., Ph.D. (Columbia)  Professor of English

STANLEY RUSH
M.S., Ph.D. (Syracuse)  Professor of Electrical Engineering

CHARLES CURTIS RYERSON
M.S. (Utah), Ph.D. (Southern Illinois)  Assistant Professor of Geography

SAMUEL F. SAMPSON
M.A. (Oklahoma); Ph.D. (Cornell)  Professor of Sociology

KAREN WILEY SANDLER
M.A. (Pennsylvania State), Ph.D. (Pennsylvania)  Assistant Professor of Romance Languages

FREDERIC OBERLIN SARGENT
Ph.D. (Wisconsin)  Professor of Resource Economics

EDWARD J. SBARDELLATI, JR.
M.Ed. (Vermont), Ph.D. (Pittsburgh)  Visiting Assistant Professor of Special Education, Social Work, and Social Services

LEONARD MICHAEL SCARFONE
M.A. (Williams), Ph.D. (R.P.I.)  Professor of Physics
WARREN IRA SCHAEFFER  
M.S., Ph.D. (Rutgers)  
Professor of Medical Microbiology

JOSEPH J. SCHALL  
M.S. (Rhode Island), Ph.D. (Texas)  
Assistant Professor of Zoology

ELEANOR D. SCHLENKER  
M.S. (Drexel); Ph.D. (Michigan State)  
Associate Professor of Human Nutrition

ROBIN RUDOLF SCHLUNK  
Ph.D. (Cincinnati)  
Professor of Classics

FREDERICK EEBEBHARD SCHMIDT  
M.S., Ph.D. (Cornell)  
Assistant Professor of Sociology

WOLFE WILHELM SCHMOKEL  
M.A., Ph.D. (Yale)  
Professor of History

HERBERT LEWIS SCHULTZ  
M.A., Ed.D. (Columbia)  
Associate Professor of Music

JAMES S. SCHWABER  
Ph.D. (Miami)  
Assistant Professor of Anatomy and Neurobiology

DAVID A. SCRASE  
Ph.D. (Indiana)  
Associate Professor of German

PETER JORDAN SEYBOLT  
Ph.D. (Harvard)  
Professor of History

LAWRENCE G. SHELTON  
M.A., Ph.D. (Minnesota)  
Associate Professor of Human Development

ALLEN GLASS SHEPHERD III  
M.A. (Brown), Ph.D. (Pennsylvania)  
Professor of English

GEORGE SHER  
Ph.D. (Columbia)  
Professor of Philosophy

DAVID A. SHIMAN  
M.A., Ph.D. (California)  
Professor of Organizational, Counseling, and Foundational Studies

LARRY E. SHIRLAND  
M.S., Ph.D. (Oregon State)  
Associate Professor of Business Administration

CHARLES M. SHUB  
M.S. (Maryland), Ph.D. (Kansas)  
Associate Professor of Computer Science

KENNETH ROGERS SIMMONS  
M.S., Ph.D. (Cornell)  
Assistant Professor of Animal Sciences

R. THOMAS SIMONE  
M.A., Ph.D. (Claremont)  
Assistant Professor of English

ROBERT ORVILLE SINCLAIR  
M.S. (Vermont), Ph.D. (Michigan State)  
Professor of Agricultural and Resource Economics

ROBERT ERIK SJOGREN  
M.S., Ph.D. (Cincinnati)  
Associate Professor of Microbiology and Biochemistry

ALBERT MATTHEW SMITH  
M.S., Ph.D. (Cornell)  
Professor of Animal Sciences

CAROL J. SMITH  
Ph.D. (Vermont)  
Research Assistant Professor of Medicine

LESTER R. SOYKA  
M.S., M.D. (Illinois)  
Professor of Pharmacology

KEVORK SPARTALIAN  
M.S., Ph.D. (Carnegie-Mellon)  
Assistant Professor of Physics

THOMAS JOHN SPINNER  
M.A. (Columbia), Ph.D. (Rochester)  
Professor of History
ROLFE SEATON STANLEY  
M.S., Ph.D. (Yale)  
Professor of Geology

MICHAEL N. STANTON  
Ph.D. (Rochester)  
Associate Professor of English

STANISLAW JAN STARON  
M.A., Ph.D. (U. St. Andrew’s, Scotland)  
Professor of Political Science

RONALD ALBERT STEFFENHAGEN  
M.S.A. (Wayne State), Ph.D. (SUNY Buffalo)  
Associate Professor of Sociology

HENRY JOHN STEFFENS  
M.A., Ph.D. (Cornell)  
Professor of History

WILLIAM A. STEPHANY  
M.A., Ph.D. (Delaware)  
Associate Professor of English

DEAN FINLEY STEVENS  
A.M. (Boston U.), Ph.D. (Clark)  
Associate Professor of Zoology

WARREN R. STINEBRING  
M.S., Ph.D. (Pennsylvania)  
Professor of Medical Microbiology

MARK A. STOLER  
M.A., Ph.D. (Wisconsin)  
Associate Professor of History

NEIL RALPH STOUT  
M.S., Ph.D. (Wisconsin)  
Professor of History

MICHAEL JOHN STRAUSS  
Ph.D. (California)  
Professor of Chemistry

ANNE M. SULLIVAN  
M.S. (Vermont)  
Associate Professor of Medical Technology

RICHARD SWETERLITSCH  
M.A. (Duquesne), Ph.D. (Indiana)  
Assistant Professor of English

DAVID LUTHER SYLWESTER  
A.M. (Indiana), Ph.D. (Stanford)  
Professor of Mathematics

LEONARD J. TASHMAN  
Ph.D. (Brown)  
Associate Professor of Business Administration

JOHN WALTER THANASSI  
Ph.D. (Yale)  
Professor of Biochemistry

LEE B. THOMPSON  
M.A. (Manitoba), Ph.D. (Queen’s)  
Associate Professor of English

HELENE W. TOOLAN  
Ph.D. (Cornell)  
Associate Professor of Pathology

RAYMOND HERMAN TREMBLAY  
M.S. (Vermont), Ph.D. (Cornell)  
Professor of Agricultural and Resource Economics

ROBERT S. TYZBIR  
Ph.D. (Rhode Island)  
Assistant Professor of Human Nutrition

ROBERT C. ULLRICH  
M.A., Ph.D. (Harvard)  
Associate Professor of Botany

CANUTE VANDERMEER  
M.A., Ph.D. (Michigan)  
Professor of Geography

JUDITH LEE VAN HOUTEN  
Ph.D. (California)  
Assistant Professor in Zoology

HUBERT WALTER VOGELMANN  
M.A., Ph.D. (Michigan)  
Professor of Botany

ROSS TIMM VOGELSBERG  
M.S. (Utah), Ph.D. (Illinois)  
Visiting Assistant Professor of Special Education, Social Work, and Social Services

THE GRADUATE FACULTY | 195
BRANIMIR F. VON TURKOVICH
M.S. (U. of Madrid), Ph.D. (Illinois)
Professor of Mechanical Engineering

GEORGE DAYTON WEBB
M.A.T. (Yale), Ph.D. (Colorado)
Associate Professor of Physiology and Biophysics

FRED CLARENCE WEBSTER
M.S. (Vermont), Ph.D. (Cornell)
Professor of Agricultural and Resource Economics

JOHN GEORGE WEIGER
M.A. (Colorado), Ph.D. (Indiana)
Professor of Romance Languages

JAMES GRAHAM WELCH
M.S., Ph.D. (Wisconsin)
Professor of Animal Sciences

DAVID LLOYD WELLER
Ph.D. (Iowa State)
Professor of Microbiology and Biochemistry

JOSEPH WELLS
Ph.D. (Duke)
Associate Professor of Anatomy and Neurobiology

EUGEN EMMANUEL WELTIN
Dipl.Sc.Nat., Dr.Sc.Nat. (E.T.H., Switzerland)
Associate Professor of Chemistry

ALAN PHILIP WERTHEIMER
Ph.D. (Case Western Reserve)
Professor of Political Science

JANET S. WHATLEY
Ph.D. (Vanderbilt)
Associate Professor of Romance Languages

WILLIAM NORTH WHITE
M.A., Ph.D. (Harvard)
Professor of Chemistry

DAVID WHITEHORN
Ph.D. (Washington)
Associate Professor of Physiology and Biophysics

SAMUEL CLAUDE WIGGANS
M.S., Ph.D. (Wisconsin)
Professor of Plant and Soil Science

RONALD W. WILLIAMS
Ph.D. (Iowa State)
Professor of Electrical Engineering

WAYNE WESTON WILLIAMS
M.A., Ph.D. (Wisconsin)
Assistant Professor of Special Education, Social Work, and Social Services

MARY SWEIG WILSON
M.A. (Emerson), Ph.D. (Northwestern)
Professor of Communication Science and Disorders

THOMAS GORDON WILSON
M.S. (North Carolina State), Ph.D. (Tennessee)
Research Assistant Professor in Zoology

GLEN M. WOOD
M.S., Ph.D. (Rutgers)
Professor of Biochemistry

ROBERT CUMMINGS WOODWORTH
Ph.D. (Penn State)
Associate Professor of Anthropology

ARNOLD PETER WOOLFSON
M.A. (Toronto), Ph.D. (SUNY at Buffalo)
Associate Professor of Communication

IAN A. WORLEY
M.S. (Canterbury), Ph.D. (British Columbia)
Associate Professor of Botany

ROBERT KINGMAN WRIGHT
M.A., Ph.D. (Columbia)
Professor of Mathematics

DHARAM PAUL YADAV
M.A. (Delhi), Ph.D. (Michigan State)
Associate Professor of Communication
