1 Log into myUVM, navigate to the Advising page, and then click on the name of the student whose CATS Report you would like to see.

2 Scroll down to the Curriculum Information section and click on the link Run a Degree Audit (CATS).
3 Select Latest (all) (this is currently the only option available) and List All Requirements* and click Run Audit.

*Please note: You may select Incomplete Requirements Only or Complete Requirements Only if you wish but the List All Requirements option is recommended because it provides the most information.

4 On the following screen click on view submitted audits.

5 If the audit is not yet available click on the Refresh the List link until it is. Once available click on the report link under View Link.
To return to a list of audits use your browser's back button or click on Return to Audit List.

To see an example of a CATS Report please click on the appropriate link for your college or school.
